PROCEEDINGS AND DEBATES OF THE 91st CONGRESS, SECOND SESSION

## HOUSE OF REPRESENTATIVES—*Wednesday, September 23, 1970*

The House met at 12 o'clock noon.

Rev. Irvin C. Wise, Slocum United Methodist Church, Harveys Lake, Pa., offered the following prayer:

O God, our help in ages past, we come to Thee this day from a world in conflict. We believe we have no effective help in this critical hour but the guidance and wisdom which cometh from Thee. Touch our minds, we beseech Thee, with the influence of Thy holy spirit so that we may think clearly, stir our emotions that we may act wisely, and by Thy spirit guide the deliberations made here this day. May the legislation enacted be in keeping with Thy divine plan for the life of this Nation and our personal lives.

Be with the President of these United States, and every Member of this entire Congress. Bless them and keep them safe. We pray this in Thy name. Amen.

### THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

### MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Arrington, one of its clerks, announced that the Senate had passed, with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 14485. An act to amend sections 501 and 504 of title 18, United States Code, so as to strengthen the law relating to the counterfeiting of postage meter stamps or other improper uses of the metered mail system.

The message also announced that the Senate agrees to the amendment of the House to a bill of the Senate of the following title:

S. 2565. An act to amend the act fixing the boundary of Everglades National Park, Fla., and authorizing the acquisition of land therein, in order to increase the authorization for such acquisitions.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 1074. An act for the relief of Mr. and Mrs. Arvel Glinz;

S. 2835. An act for the relief of Albert G. Feller and Flora Feller;

S. 3942. An act to provide for thorough health and sanitation inspection of all livestock products imported into the United States, and for other purposes;

S. 4106. An act to amend the Public Health Service Act in order to provide for the establishment of a National Health Service Corps; and

S. 4269. An act to provide for employment within the Environmental Protection Agency of commissioned officers of the Public Health Service, and for other purposes.

### ELECTION TO COMMITTEES

Mr. GERALD R. FORD. Mr. Speaker, I offer a privileged resolution (H. Res. 1219) and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 1219

*Resolved*, That the following-named Members be, and they are hereby, elected members of the following standing committees of the House of Representatives:

Committee on Banking and Currency: JOHN H. ROUSSELOT, of California.

Committee on Interstate and Foreign Commerce: JOHN G. SCHMITZ, of California.

Committee on Merchant Marine and Fisheries: M. G. (GENE) SNYDER, of Kentucky.

The resolution was agreed to.

A motion to reconsider was laid on the table.

### PERMISSION FOR SUBCOMMITTEES ON INDIAN AFFAIRS AND ON NATIONAL PARKS AND RECREATION, COMMITTEE ON INTERIOR AND INSULAR AFFAIRS, TO SIT DURING GENERAL DEBATE TODAY

Mr. ASPINALL. Mr. Speaker, I ask unanimous consent that the Subcommittee on Indian Affairs and the Subcommittee on National Parks and Recreation be permitted to sit during general debate this afternoon.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

### PERMISSION FOR SUBCOMMITTEE ON ROADS, COMMITTEE ON PUBLIC WORKS, TO SIT DURING GENERAL DEBATE TODAY

Mr. HOWARD. Mr. Speaker, I ask unanimous consent that the Subcommittee on Roads of the Committee on Public Works be permitted to sit during general debate today.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

### FUEL SHORTAGE ON EASTERN SEABOARD

(Mr. BINGHAM asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BINGHAM. Mr. Speaker, I am deeply concerned that the eastern seaboard of our country is facing a major fuel shortage, and that the Nixon administration apparently has no clear policy to fend off this impending crisis.

Members of the New York City delegation were advised by Mayor Lindsay this morning that fuel oil and natural gas may well have to be rationed this winter unless remedial steps are quickly taken. The problem is not limited to New York City alone but affects the whole Northeast and, in fact, the entire eastern seaboard.

This situation has been aggravated by the action of the President in refusing to lift or modify oil import quotas, an action which he took in spite of the pleas of many Members of Congress that the import restrictions be lifted. These quotas mean not only higher prices to consumers but intensify the shortage, especially of low-sulfur-content fuels.

I hope that the Interstate and Foreign Commerce Committee will launch an immediate investigation to see who is to blame for allowing this situation to develop as it has, and to determine what steps must be taken to head off a calamity.

### THE REVEREND IRVIN C. WISE

(Mr. FLOOD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FLOOD. Mr. Speaker, we have had the high honor and great privilege of having the invocation asked this morning by the Reverend Irvin C. Wise from the great State of Pennsylvania. Reverend Wise recently retired from one of the oldest but best known Congregational charges in the United States, the Reverend Edwards Welsh Congregational Church of Edwardsville, Pa. He is now at one of the most beautiful and greatest lakes in Pennsylvania, serving as pastor for a church there.

I am grateful to the Chaplain and I am grateful to Reverend Wise for his asking the invocation for us today.

### FORMER ASTRONAUT FRANK BORMAN'S REPORT ON CURRENT PRISONER-OF-WAR SITUATION AND CON SON TIGER CAGES

(Mr. MONTGOMERY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MONTGOMERY. Mr. Speaker, Members of the House and Senate were certainly fortunate to have the President's special representative on prisoners of war, Mr. Frank Borman, give us a candid appraisal of our current POW situation. Mr. Borman did not paint a very rosy picture, but he did make one very telling point when he said that the so-called peace groups should work through the International Red Cross.

It was also reassuring to hear the former astronaut point out that the Con Son Island matter had been blown completely out of proportion. He stated in so many words that the so-called tiger cages were not pits as had been reported, but were actually in a two-story building. He also noted that those POW's on Con Son had been convicted of felonies or murders committed in ordinary prison camps.

Mr. Speaker, Mr. Borman's views on Con Son Island Prison coincide directly with those of the majority of the members of the House Select Committee on U.S. Involvement in Southeast Asia.

## AMERICAN SECURITY COUNCIL "OPERATION ALERT" NEEDS EXPLANATION

(Mr. EVANS of Colorado asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EVANS of Colorado. Mr. Speaker, the American Security Council has conducted its "Operation Alert" which they say is designed to alert the American voters to the voting records of the Members of Congress on votes the Council believes shows whether or not Members are for or against a stronger America.

All of us in the House are rated from 0 to 100 percent for a stronger America on the basis of 10 selected votes, and I know you are all interested in your rating.

After discovering with concern that I had been rated only 33 percent on their scale I began to look a little closer and discovered some interesting facts:

Fifty-three Members of the House did not vote at all on one of the key 10 votes, yet received a rating of 100 percent.

Twenty-two missed two votes, yet received a 100-percent rating.

Nine missed three votes and yet have the excellent rating of 100 percent.

Four did not vote on four issues and yet are 100-percenters.

And, believe it or not, two of you gentlemen failed to vote on half of the 10 issues, yet received 100-percent ratings.

I must confess I am at a loss as to any understanding of the system used by the American Security Council in rating us, and look forward with fascination to any explanation they may care to give us or the American public.

## PERSONAL EXPLANATION

(Mr. DEVINE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DEVINE. Mr. Speaker, last spring I attended a leadership meeting in the Speaker's Dining Room at which time the chairman and ranking minority member of the Appropriations Committee indicated all appropriations measures could be disposed of by the House prior to June 30, and it was informally suggested that the House might be in a position to adjourn sine die not later than Labor Day.

Recognizing the uncertainty of such a plan, yet knowing of the obligations of all Members during an election year, most of us deferred scheduling of many appearances back in our district until after that date.

Although it has become necessary to cancel many of the commitments made months ago for appearances following Labor Day, it is practically impossible in some instances where solid commitments have been made and recipient groups fully expect the Congressman to appear. I find myself in this position today, and will be required to catch a 4:40 p.m. flight this afternoon to address a large group of businesswomen at a dinner meeting in my district. I am further committed to make appearances at three events in my district tomorrow, all of which will probably deprive me of the opportunity to cast my vote on the pending drug abuse bill.

In order that there be no mistake about my position in this area, I am a cosponsor of a number of bills in the crime package urged by the President and feel it is high time Congress acted on these many measures that have been pending for months. I, of course, support the drug abuse bill, and I am confident it will pass. If my schedule had permitted me to be present to cast a vote on this measure, my vote would have been "aye."

## KLEPPE AGREES WITH O'BRIEN THAT NATION IS FALLING BEHIND

(Mr. KLEPPE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KLEPPE. Mr. Speaker, Democratic National Chairman Lawrence O'Brien has stated that the Nation is falling behind under the administration. I agree that we are falling behind in several fields. We are falling behind on the rate of crime increase—6 percent under the previous administration level.

We are falling behind on the rate of deficit spending, with balanced budgets being submitted by the President. We are falling behind on the levying of tax surcharges and have even gotten rid of one imposed by the previous administration.

We are falling behind on increasing interest rates—which went up 55 percent, from 4.5 percent in 1964 to 7 percent in 1968. In fact, the prime rate is being lowered from 8 percent to 7.5 percent by many large banks.

We are far behind in Vietnam war casualties and are bringing more troops home every week to further reduce the possibility of the 100-man-per-week death rate that was reached 2 years ago.

Yes, I am glad of it. And I am certain the American people are also pleased that we are not keeping up with the Democrats—and will express their sentiments at the polls in November.

## ADIOS, AMIGOS

(Mr. GROSS asked and was given permission to address the House for 1 minute.)

Mr. GROSS. Mr. Speaker, not all hijackers pine to visit Cuba, nor do they necessarily dwell among the golden sands of Araby, or have tastes that run exclusively to jumbo jets.

The military dictatorship which currently holds sway over our neighbors to the south, the Peruvians, found a way to legally hijack their own people. They simply promulgated a dictum to the effect that any Peruvians who had acquired U.S. dollar bills had to turn them in, pronto, for the local currency.

Their own brand of cash had obviously been judged suspect by the citizenry, who were found—by the time the last safe-deposit box had been pried open—to have accumulated $10 million in American greenbacks.

The hijackers promptly carted it off to their national bank, only to remember that they, themselves, would have to pay any interest the money earned if they left it there. Besides, they soon discovered to their alarm that the yanqui dollar displayed a tendency to deteriorate very rapidly—a condition that has been widely noted here at home for some years.

Pity the harassed hijackers. They were finally forced to round up some armed guards, rent a jet airliner, and fly the money to New York City where, sure enough, the good old friendly Federal Reserve bank was more than glad to get it.

So, here we are—with Uncle Sucker holding the bag of mouldy money for the hijackers who, like as not, stopped off in Washington on their way home to glom a bundle from the friendly folk at the foreign aid agency, the easiest mark in town.

Adios, amigos.

## PERSONAL ANNOUNCEMENT

Mr. CHAMBERLAIN. Mr. Speaker, because it was necessary for me to be in Michigan on official business this past Monday, September 21, I am unrecorded on four rollcall votes. I would like the record to show that had I been present, I would have voted "yea" on rollcall No. 307, "yea" on rollcall No. 308, "yea" on rollcall No. 309, and "yea" on rollcall No. 310.

## AUTHORITY FOR FBI TO INVESTIGATE BOMBINGS

(Mr. SMITH of Iowa asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of Iowa. Mr. Speaker, I notice that the administration has requested authority for the FBI to investigate bombings on campuses. This is

interesting in view of the fact that under title 18, section 837, they already have authority which is not limited to campus bombings but includes other buildings as well. On March 26, the administration bill was introduced that would abolish the existing authority not only to investigate bombings on campuses but of other noncommercial buildings as well.

In Iowa, bombings include police stations and a chamber of commerce building and other buildings. A lot has also been made of requests for heavier penalties but they could only be applied if the criminal is apprehended.

I would suggest the best thing for the administration to do is to withdraw their proposal to abolish the existing authority, to quit holding back on use of investigative authority, and start using unused authority they already have and not wait for some different authorization or for passage of legislation which in effect would reduce existing authority to help apprehend bombers.

## AGREEMENT OF MAJOR AIRLINES FILED WITH THE CAB

(Mr. ADAMS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ADAMS. Mr. Speaker, I am quite concerned that an agreement filed by American, TWA, and United Air Lines with the Civil Aeronautics Board may be in violation of the antitrust laws and the statutes governing the CAB. The agreement was entered into before approval by the Board and is now pending in docket Nos. 22525 and 21965. It would limit service by agreement in 15 major transcontinental markets by restricting the seats offered to the public, initially by approximately 15 percent. Each airline would be able under the agreement to reduce any market down to a level of one round trip per day.

I do not question the right of any airline to discontinue particular service so long as it maintains adequate service under its certificate, but I am concerned about the consequences of a pattern of agreement apparent in this case.

It is my feeling that this agreement must, at minimum, be made the subject of hearings by the CAB to determine the validity of claims which allegedly underlie the proposal. The effects of cost reduction of $50 million, as claimed by these carriers, must in addition be surveyed for their impact on the Nation's economy.

While I do not wish to prejudge this situation, I am deeply concerned that such an agreement may in fact be a cartel arrangement contrary to the antitrust laws of this Congress. The right of the CAB to approve such an arrangement by a regulation involves a difficult legal interpretation of the laws passed by this Congress.

A hearing has been requested to determine the conditions necessary should the CAB approve the agreement. This must lead to a full exploration of what terms, conditions or limitations would be required to protect the public and to insure fair competition with other carriers.

## ENERGY SHORTAGE

(Mr. BOGGS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOGGS. Mr. Speaker, I was interested in the remarks made by the gentleman from New York (Mr. BINGHAM), with reference to the energy shortage now facing much of the United States.

Mr. Speaker, unless there is a change, we will have an energy shortage all over the Nation in a relatively short period of time. Coal is in short supply, oil is in short supply, gas is in short supply, and atomic energy is still not developed. These are the main sources of energy in our country.

I might point out to the gentleman from New York that insofar as fuel oil is concerned, there is no limitation whatsoever on the importation of fuel oil into the United States. The problem is one of limitation of production here in the United States. The only known reserves for gas in the United States today are off the coasts of Louisiana and Texas. Yet, incomprehensibly, for the past 12 or 18 months the Department of the Interior has held up the leasing of these tracts. These are tracts that are owned by the Federal Government and from which the Government derives very substantial revenues. They are the only place that can provide substantial sources of gas which is needed all over the eastern seaboard of the United States.

Mr. Speaker, I hate to predict this, but we are suffering electrical brownouts today. Come next winter, unless there is some change and unless we act to implement the current low supply, there will be gas shortages in many places and there will be many a home that is cold this winter.

## VISIT OF GENERAL KY

(Mr. WOLFF asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WOLFF. Mr. Speaker, 2 years ago during an American presidential election the South Vietnamese Government indirectly but quite significantly interfered in our election by delaying the beginning of the expanded peace talks in Paris.

This year, with much audacity and little concern for the wishes of the American people, General Ky is directly interjecting himself into our congressional elections. His planned visit here next week could not be timed more inappropriately, for it will further divide this Nation at a time when the problems that face us make the goal of unity imperative.

His appearance at a rally for victory in Vietnam, ignoring the fact that American policy has never been to seek a military victory but rather a negotiated settlement, is not merely inconsiderate. It is a rude imposition and blatant interference in the American political process and should be canceled.

We need no General Ky to tell us how to conduct the affairs of our Nation. He had better put his own house in order and stop the corruption that permeates his government, then we can get on with ending this war but then again, maybe General Ky is not so anxious to see an end to the war.

## AUTHORIZING PRESIDENT TO PROCLAIM MONTH OF OCTOBER 1970 AS "PROJECT CONCERN MONTH"

Mr. JACOBS. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the joint resolution (H.J. Res. 1178) authorizing the President to proclaim the month of October 1970 as "Project Concern Month," with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the joint resolution.

The Clerk read the Senate amendments, as follows:

Page 1, line 4, strike out "May" and insert "October".

Amend the title so as to read: "Joint resolution authorizing the President to proclaim the month of October 1970 as 'Project Concern Month'."

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

Mr. GERALD R. FORD. Mr. Speaker, reserving the right to object, did I understand the gentleman correctly when he stated May 1970?

Mr. JACOBS. That is taken care of by the Senate amendment, I believe. The Senate has amended it to make it October 1970.

Mr. GERALD R. FORD. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

Mr. GROSS. Mr. Speaker, further reserving the right to object, are we going to limit "concern month" to the month of May only? Why not make it "concern year?"

Mr. JACOBS. Mr. Speaker, if the gentleman will yield, I believe that they are doing even better than that. We are limiting it only to 1 week, or, maybe, it is worse than that. It depends upon "concern for what," I suppose. Concern for good things I suppose should be for all year and concern for bad things, I do not think should be at all.

Mr. GROSS. This is the first time I have seen this joint resolution. I guess it is all right, but I think we ought to give consideration to a "concern year," which could include making payments on the public debt, reducing expenditures, and halting inflation, as well as a few other things which ought to be of concern.

Mr. JACOBS. Mr. Speaker, if the gentleman will yield further, I will tell the gentleman right now that if he will introduce such a resolution, I shall support it.

Mr. GROSS. It might even apply to concern for a generation.

Mr. JACOBS. Well, if the gentleman will yield further, I might even support that.

Mr. GROSS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The Senate amendments were concurred in.

A motion to reconsider was laid on the table.

---

## AUTHORIZING PRESIDENT TO DESIGNATE THE PERIOD OCTOBER 5 TO OCTOBER 9, 1970, AS "NATIONAL PTA WEEK"

Mr. JACOBS. Mr. Speaker, I ask unanimous consent for the immediate consideration of the Senate joint resolution (S.J. Res. 228) to authorize the President to designate the period beginning October 5, 1970, and ending October 9, 1970, as "National PTA Week."

The Clerk read the title of the Senate joint resolution.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The Clerk read the Senate joint resolution as follows:

S.J. RES. 228

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That as a tribute to the important contributions of the parent-teacher movement to the American way of life, and the continuing efforts of the National Congress of Parents and Teachers (National PTA) to provide quality living and quality learning for all Americans, the President is hereby authorized and requested to issue a proclamation designating "National PTA Week" from October 5, 1970, to October 9, 1970, and calling upon the people of the United States and interested groups and organizations to observe such period with appropriate ceremonies and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

---

## DESIGNATION OF A "DAY OF BREAD" AND "HARVEST FESTIVAL WEEK"

Mr. JACOBS. Mr. Speaker, I ask unanimous consent for the immediate consideration of the Senate Joint Resolution (S.J. Res. 218) providing for the designation of a "Day of Bread" and "Harvest Festival Week."

The Clerk read the title of the Senate Joint Resolution.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

Mr. SCHERLE. Mr. Speaker, reserving the right to object, I think after hearing the resolutions that it ought to be the concern of the House as to what the actions of the Senate are on these.

Mr. JACOBS. If the gentleman will yield, all of these have been approved by the Senate.

Mr. SCHERLE. I withdraw my reservation of objection, Mr. Speaker.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The Clerk read the Senate Joint Resolution, as follows:

S.J. RES. 218

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That as a token of man's gratitude for the bounty of nature and the annual harvest of farm and field, and in recognition of bread as a symbol of all foods, that Tuesday, the 6th day of October, 1970, be designated as a "Day of Bread" as a part of international observances, and that the week of October within which it falls be designated as a period of "Harvest Festival", and the President is requested to issue a proclamation calling on the people of the United States to join with those of other nations to observe this "Day of Bread" and "Harvest Festival Week" with appropriate ceremonies and activities.

Mrs. MAY. Mr. Speaker, I rise in support of this bill.

The resolution before us calls upon the President to designate Tuesday, October 6, as a "Day of Bread" and the week within which it falls as a "Harvest Festival Week." It also asks the President to issue a proclamation calling on the people of the United States to join with other nations of the world in international observance of this event.

A similar resolution was approved by Congress last year and such a proclamation was issued by the President along with designation of the appropriate day and week of the observances.

The Governors of more than 35 of our States, and the mayors of a number of cities followed the White House in their own proclamations of the "Day of Bread," recognizing that bread, which has served the family of man for more than 3,000 years, has come to stand for all food, and for the values expressed in the universal prayer, "Give us this day."

In observing a "Day of Bread" and a "Harvest Festival Week" we can do much to further international as well as domestic cooperation and understanding, for it provides us the opportunity to clasp hands with all peoples everywhere in an expression of gratitude for the bounty of nature and an ackowledgment that our existence depends on forces and circumstances beyond our control. It reminds us also that we must not relax our efforts to deal with the serious problems of hunger and malnutrition in the world—that we have accomplished much, but yet have far to go.

Mr. Speaker, let us approve this resolution and then join together on October 6 in gratitude for the bounty of nature and the annual harvest of farm and field.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

## AUTHORIZING THE PRESIDENT TO DECLARE 1 WEEK EACH SEPTEMBER AS "NATIONAL SS 'HOPE' WEEK"

Mr. JACOBS. Mr. Speaker, I ask unanimous consent for the immediate consideration of the Joint Resolution (H.J. Res. 1346) authorizing the President to declare 1 week each September as "National SS *Hope* Week."

The Clerk read the title of the joint resolution.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

Mr. CHAMBERLAIN. Mr. Speaker, reserving the right to object, and I shall not object, as the author of this resolution I would join the gentleman from Indiana in urging its adoption.

(Mr. CHAMBERLAIN asked and was given permission to revise and extend his remarks.)

Mr. CHAMBERLAIN. Mr. Speaker, the bill before us, House Joint Resolution 1346, would authorize the President to declare a "National SS *Hope* Week".

It was on September 22, 1960, that the voyage of the SS *Hope* began. Hopefully it will continue throughout our lifetimes.

Today, just 10 years later, the log of the SS *Hope,* now known as the most welcome ship in the world, brims with success. Former President Dwight D. Eisenhower called *Hope* "the single most effective step in presenting America as a warm and good friend."

During a decade that had more than its share of problems and trouble, Project HOPE has emerged as a great and inspiring example. In the words of its founder and President, Dr. William B. Walsh:

> The Sixties were welcomed with a special hopefulness by humanity everywhere. However, the decade which followed would often tax man's powers to make much sense of it. Still, during this uncertain time, hope continued to be kept alive by those of faith and vision.
>
> Some of this number donated time and talent to an idea as bright and promising as the name given it. Through Project HOPE, medical knowledge was to be carried to developing nations aboard a floating medical center. And millions would be assured healthier, happier, more productive lives when the world's first peacetime hospital ship first set sail.

This unique humanitarian endeavor has been just as stanchly supported by each administration and by Members of Congress from both sides of the aisle. Still, it is most important to note that HOPE is a private, nonprofit organization financed by the American people and has its international headquarters in Washington, D.C.

I would like to briefly review the log of this unique humanitarian ship:

In 1958, Project HOPE—Health Opportunity for People Everywhere—was organized with Dr. William B. Walsh as chairman. Over the next 2 years, the 15,000-ton Navy hospital ship, U.S.S. *Consolation,* was refitted and rechristened the SS *Hope,* world's first peacetime hospital ship.

The call was put out for American doctors, nurses, and technologists to share their skills and knowledge with the people of developing nations—teaching while healing. For every American on board there would be a counterpart to be trained.

From its beginning, the HOPE concept captured the imagination of a world much in need of its pragmatic ideal.

Voyage 1, Indonesia and South Vietnam, September 22, 1960, to September 16, 1961: On September 22, 1960, at 12 minutes past 4, the SS *Hope* pulled away from pier 50–A under clear San Francisco skies. Aboard were the finest medical professionals, selected from thousands of applicants.

The mission was unprecedented. Never before had a peacetime hospital ship sailed the ocean. In Indonesia the welcome was warm and the "Hopies" found their medical counterparts cooperative and eager to learn.

At the conclusion of the Indonesian mission, HOPE turned to Vietnam, where it would leave behind an orthopedic rehabilitation center, staffed and supplied.

Voyage 2, May 9, 1962, to March 11, 1963: Some 20 nations around the world had asked to be next in line for a HOPE visit. Peru was chosen because assistance was needed desperately and the staff felt it could be most effective there.

In May of 1962, the SS *Hope* sailed again from San Francisco, this time for the city of Trujillo, in northern Peru. The arrival was not gala. The welcoming committee was a gray mare and six bearded Peruvians shouting pro-Castro slogans and waving "Yankee, Go Home" signs. But the antagonism soon melted.

When HOPE departed 10 months later, 45,000 Peruvians came to give her staff a heartwarming farewell. After departure a HOPE team helped set up a new university teaching hospital and nursing school. HOPE continues in that country today.

Voyage 3, November, 1963, to September 16, 1964: After a repair and resupply period in the United States, the SS *Hope* sailed for Ecuador in November of 1963.

As in other host countries, HOPE left behind in Ecuador a legacy of learning.

Today, HOPE nurses and technologists are at work in Guayaquil and Quito, continuing programs started 6 years ago.

Voyage 4, September 30, 1964, to September 1, 1965: The mission to Guinea in 1964 marked the third continent touched by HOPE. The need was great: in a country of 3.5 million, there were 10 physicians, one dentist, and only a few nurses. At first, relations were tense, but doubts and fears faded after the first month. HOPE and Guinean professionals became partners, joined in a common goal of diminishing sickness and disease.

In 1965, while the SS *Hope* was still in Guinea, the foundation was asked by President Johnson to direct a pilot program to place volunteer American physicians in Vietnamese villages where they could provide much needed medical care for the civilian population. In the course of a year, some 119 American physicians—all volunteers—served in South Vietnam. Many were decorated by the Vietnamese Government and all received the personal gratitude of both the Vietnamese and United States Governments.

Having demonstrated that such a program was both possible and practical, the program was authorized for operation on a permanent basis, and assigned to the American Medical Association for administration.

Voyage 6, February 7, 1967, to December 15, 1967. The blizzard that marked the SS *Hope*'s farewell in Philadelphia in February 1967, contrasted sharply with the warm welcome that awaited the ship in Cartagena, Colombia. Here, along the coast of the Caribbean, in a setting which was once both colorful and compelling, HOPE was to conduct what many considered her most impressive mission to date.

Today, in one of the largest of HOPE's shore programs, teams work with medical and dental students at the University of Cartagena and are represented in virtually every department at Cartagena's Santa Clara Hospital.

Voyage 7, February 29, 1968, to March 22, 1969: The largest staff in the project's history worked with the people of the island nation of Ceylon in medical teaching/treatment programs for 10 months of 1968 and 1969.

HOPE's contributions included the introduction of heart valve surgery and training programs in the field of cancer scanning for women.

Not all the people in Ceylon were happy about HOPE's success From the first day the Ceylon Communists kept up their attacks on the mission of the SS *Hope*, calling it the second *Pueblo*. But the people of Ceylon who gained health and hope during the ship's visit knew differently; to them HOPE was doctor, teacher, and friend. A HOPE team still continues working in that country.

Voyage 8, August 29, 1969, to July 29, 1970: On August 29, 1969, the SS *Hope* sailed from Wilmington, Del., for Tunisia, her first country in the Mediterranean area. There the medical staff placed great emphasis on working with Tunisian medical students, interns, and residents.

Not long after HOPE had started its teaching mission, that country suffered a monstrous flood. HOPE's staff threw its medical resources into relief operations and earned high praise for those efforts.

The SS *Hope* departed Tunis in the project's 10th anniversary year.

DOMESTIC PROGRAMS

In addition to the eight voyages made to Indonesia and South Vietnam, Peru, Ecuador, Guinea, Columbia, Ceylon, and Tunisia, in the spring of 1969, Project HOPE organized a domestic medical education and health career training program to work with minority groups within the United States. HOPE's domestic program is an effort to give some of our own disadvantaged the hope and confidence they need to survive and progress in our society by stimulating their interest and training them for new careers in health and medicine. Today, programs based in Texas and another on the 16-million-acre Navajo Reservation in Arizona bring a new hope to Mexican Americans and American Indians.

On the 10th anniversary of Project HOPE, the board of directors of the People-to-People Health Foundation, Inc, announced that the SS *Hope* will conduct a 3-year hemispheric program to begin in January. Medical missions are scheduled to Jamaica in 1971, northeastern Brazil in 1972, and Venezuela in 1973.

A decade of HOPE has brought a legacy of health and people-to-people rapport to many of the world's disadvantaged. The people of HOPE have trained 5,257 physicians, surgeons, dentists, nurses, and technologists; treated over 130,000 persons; conducted some 13,286 major operations; benefited nearly 3 million people through immunization, examination, and other services; and distributed over 2,530,000 cartons of milk.

As HOPE makes its mark on a new decade, a wealth of knowledge in Asia, Africa, Latin America, and in our own United States will continue to be passed on from man to man, from skilled hand to skilled hand, and from mind to mind. Because HOPE was there.

This enduring knowledge is indeed the genuine legacy of HOPE.

I urge the adoption of this resolution.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There being no objection, the Clerk read the joint resolution, as follows:

H.J. RES. 1346

Whereas, on September 22, 1960, Project Hope sent its ship S.S. Hope, outfitted with medical staff and supplies, on its first voyage to bring medical assistance and hope to the inhabitants of Indonesia and South Vietnam, and

Whereas the S.S. Hope since that time has embarked on numerous voyages in an endeavor to bring better health and medical instruction to the needy throughout the world, and

Whereas Project Hope represents a joint undertaking in which thousands of doctors, nurses, and technologists share their skills and knowledge with the people of developing nations, and

Whereas the S.S. Hope spreads good will throughout the world and informally serves as one of this Nation's most effective ambassadors abroad, and

Whereas Project Hope is also involved with the organization of a domestic program to bring new hope to Mexican-Americans and American Indians by stimulating their interest in better health care and training them for new careers in medicine and related fields: Now, therefore, be it

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the President is hereby authorized and requested to issue each year a proclamation designating the week beginning on the third Sunday in September as "National S.S. Hope Week" and calling upon the people of the United States to observe such week with appropriate ceremonies and activities.

AMENDMENTS OFFERED BY MR. JACOBS

Mr. JACOBS. Mr. Speaker, I offer three amendments, and ask unanimous consent that they may be considered en bloc.

The SPEAKER. Is there objection to

the request of the gentleman from Indiana?

There was no objection.

The clerk read as follows:

1. On page 1 and 2 strike out all "whereas" clauses.

2. On page 2, line 4, strike out the words "each year".

3. On page 2, line 5, after the word "September" insert "1970".

The amendments were agreed to.

The joint resolution was ordered to be engrossed and read a third time, and was read the third time and passed.

The title was amended so as to read: "Authorizing the President to declare the week beginning the third Sunday in September 1970 as 'National SS *Hope* Week.' "

A motion to reconsider was laid on the table.

---

## GENERAL LEAVE

Mr. JACOBS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the series of resolutions just passed.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

---

## PROCEEDINGS AGAINST ARNOLD S. JOHNSON

Mr. ICHORD. Mr. Speaker, I rise to a question of the privilege of the House, and, by direction of the House Committee on Internal Security, I submit a privileged report (H. Rept. No. 91–146).

The Clerk read as follows:

PROCEEDINGS AGAINST ARNOLD S. JOHNSON

(Pursuant to title 2, United States Code, Sections 192 and 194)

Mr. Ichord, from the Committee on Internal Security, submitted the following report citing Arnold S. Johnson:

The Committee on Internal Security, as created and authorized by the Rules of the House of Representatives, particularly House Resolution 7, adopted January 3, 1969, as amended by House Resolution 89, adopted February 18, 1969, duly authorized and issued a subpena to Arnold S. Johnson. The subpena directed Arnold S. Johnson to be and appear before the said Committee on Internal Security, of which the Honorable Richard H. Ichord is chairman, or a duly appointed subcommittee thereof, on June 11, 1970, at 10 a.m., at their committee room, then and there to testify touching matters of inquiry committed to said committee, and not to depart without leave of said committee. The subpena served upon Arnold S. Johnson is set forth in words and figures as follows:

UNITED STATES OF AMERICA
CONGRESS OF THE UNITED STATES

To Arnold S. Johnson, *Greeting:*

Pursuant to lawful authority, You are Hereby Commanded to be and appear before the Committee on Internal Security of the House of Representatives of the United States, or a duly appointed subcommittee thereof, on June 11, 1970, at 10 o'clock, a.m., at their Committee Room, then and there to testify touching matters of inquiry committed to said committee, and not to depart without leave of said committee. A copy of the Committee Rules of Procedure and one copy of a Committee resolution adopted Dec. 10, 1969, authorizing this particular investigation and hearing are attached hereto.

Hereof Fail Not, as you will answer your default under the pains and penalties in such cases made and provided.

To U.S. Marshal/Herbert Romerstein, to serve and return.

Given under my hand this 3rd day of June, in the year of our Lord, 1970.

EDWIN W. EDWARDS,
*Chairman—Chairman of Subcommittee—Member Designate of the Committee on Internal Security of the House of Representatives.*

If you desire a conference with a representative of the Committee prior to the date of the hearing, please call or write to: Counsel, Committee on Internal Security, Washington, D.C. 20515, Telephone: 225–3051.

Attached to the said subpena and served therewith was a copy of the committee resolution adopted December 10, 1969, as follows:

"Whereas, on February 20, 1969, considering that a serious threat was posed to the internal security of this Nation and the free functioning of its Democratic institutions by the activities of certain organizations which would effect changes in our Government, or the administration of our Government, by other than constitutional processes, the Chairman accordingly proposed a preliminary study and inquiry into those organizations and their activities within the United States for the purpose of resolving a number of legislative problems, including an appraisal of the administration and enforcement of existing law, an examination of the respective roles of the Federal and State governments in the exercise of the police power, the need for remedial legislation, and to assist in the disposition of bills referred to the Committee, on subjects committed to it by the mandate of the House;

"Whereas, a resolution on that date was adopted by the Committee directing the Chairman to cause staff studies to be made with respect to such organizations and subjects, and to report on the same, from time to time, together with recommendations, with a view toward determining whether full-scale investigations and public hearings shall be authorized and conducted with respect to any such organization and subject;

"Whereas, a staff study concerning the New Mobilization Committee To End The War In Vietnam was prepared and reported to the Chairman (as published in the CONGRESSIONAL RECORD, vol. 115, pt. 24, pp. 32947–32949);

"Whereas, the Committee staff study of November 4, 1969, has raised serious questions concerning the true nature and objectives of the New Mobilization Committee To End The War In Vietnam in that the staff study disclosed that the leadership of the New Mobilization Committee To End The War In Vietnam is top-heavy with Communists and pro-Communists, including members and partisans of both the Communist Party, USA, and most particularly, the Trotskyist Socialist Workers Party and Young Socialist Alliance; that the conspicuous Communist presence at major planning sessions of NMCEWVN indicates blatant Communist manipulation, exploitation, and subversion of a protest movement concerning U.S. involvement in Vietnam, and that the staff study disclosed several national leaders of the New Mobilization Committee To End The War In Vietnam were among the delegates to the World Peace Assembly held in East Berlin during June, 1969, the Assembly being sponsored by the World Peace Council, an international Communist 'peace' front;

"Whereas, H. Res. 700 and H. Res. 701, introduced on November 13, 1969, by Mr. Landgrebe for himself and 42 other Congressmen, called for authorization of a full and complete investigation of the NMCEWVN, including its sources of income and leadership, by the Committee on Internal Security;

"Now Therefore be it resolved, that an in-depth investigation be conducted by the Committee on Internal Security, or by a subcommittee thereof appointed by the Chairman, concerning the following:

"The origin, history, organization, character, objectives, and activities of the New Mobilization Committee To End The War In Vietnam, with particular reference to (1) the extent to which it may be involved in acts of violence or other unlawful activities to accomplish any of its purposes or objectives; (2) the extent to which, and the manner in which, it may incite or employ acts of force, violence, terrorism, or any unlawful means to obstruct or oppose the Government of the United States in the execution of any law or policy affecting the internal security of the United States; (3) the extent to which, and the manner and means by which, it or any of its chapters or affiliated groups may be controlled, directed, or assisted by organizations or individuals who seek to overthrow or assist in the overthrow or alteration of the form of Government of the United States or any State thereof by unlawful means, or by any such means to obstruct or oppose the Government of the United States in the execution of any law or policy affecting the internal security of the United States; (4) the manner in which it is financed and supported; (5) the extent to which it may act in concert with, aid or assist, or be supported by, foreign Communist powers, their agents or nationals; and (6) all other facts in relation to the foregoing."

The foregoing subpena was duly served as appears by the return thereon made by Joseph Fitzgerald, deputy United States marshal for the Southern District of New York, who was duly authorized to serve it. At the time of service of said subpena, the said Arnold S. Johnson was likewise furnished with a printed copy of the committee Rules of Procedure and clause 27 of Rule XI of the House of Representatives. The return of service of said subpena is set forth in words and figures as follows:

"I made service of the within subpena by personal service to the within-named Arnold S. Johnson at 23 West 26th St., New York, N.Y., at 3:00 o'clock, p.m., on the 4th day of June, 1970.

"Dated June 4th, 1970.

"/s/ DUSM Joseph Fitzgerald SDNY."

The said Arnold S. Johnson, summoned as aforesaid, appeared on June 11, 1970, at a meeting of a duly authorized subcommittee of the Committee on Internal Security at the committee room in the city of Washington, D.C. He was accompanied by his counsel, John J. Abt, Esq. Called as a witness on that day to give testimony, as required by the said subpena, the said Arnold S. Johnson refused to be sworn or to take affirmation to testify. The record of the proceedings before the said committee, so far as it relates to the appearance of Arnold S. Johnson, is set forth in Appendix I, attached hereto and made a part hereof. Other pertinent committee proceedings are set forth in Appendix II and made a part hereof.

The refusal of Arnold S. Johnson to be sworn or to take affirmation to give testimony touching matters of inquiry committed to said committee, deprived the committee of pertinent testimony which the committee was instructed by House Resolution to investigate and places the said Arnold S. Johnson in contempt of the House of Representatives of the United States.

Pursuant to resolution of the Committee on Internal Security duly adopted at a meeting held August 13, 1970, the fact of the failure and refusal of Arnold S. Johnson to

be sworn or to take affirmation to testify is hereby reported to the House of Representatives, to the end that the said Arnold S. Johnson may be proceeded against in the manner and form provided by law.

---

APPENDIX I

THURSDAY, JUNE 11, 1970

U.S. HOUSE OF REPRESENTATIVES,
SUBCOMMITTEE OF THE
COMMITTEE ON INTERNAL SECURITY,
*Washington, D.C.*

PUBLIC HEARINGS

The subcommittee of the Committee on Internal Security met, pursuant to recess, at 10 a.m. in Room 311, Cannon House Office Building, Washington, D.C., Hon. Edwin W. Edwards, chairman of the subcommittee presiding.

(Subcommittee members: Representatives Edwin W. Edwards of Louisiana, chairman; Louis Stokes of Ohio; and William J. Scherle of Iowa.)

Subcommittee members present: Representatives Edwards and Scherle.

Staff members present: Donald G. Sanders, chief counsel; Richard L. Schultz, associate chief counsel; and Stephen H. Romines, assistant counsel.

Mr. EDWARDS. The committee will come to order.

Let the record show Mr. Scherle and the Chair are present, constituting a quorum.

Call your first witness, Counsel.

Mr. ROMINES. Mr. Arnold Johnson.

Mr. EDWARDS. Good morning, gentlemen.

Will you be sworn, Mr. Johnson.

Mr. ABT. Before the witness is sworn, I have preliminary motion I would like to make.

Shall I identify myself for the record, or is that not necessary?

Mr. EDWARDS. That might be a good idea.

Mr. ABT. My name is John J. Abt, A-b-t. I am here as the attorney for Mr. Johnson.

Mr. Chairman, I want to move to quash the subpena to Mr. Johnson, on two grounds, and I would like the liberty of stating them very briefly.

Mr. EDWARDS. Certainly.

Mr. ABT. My first ground is that at least at this stage of the investigation, the committee lacks authority to subpena any witness or to require any witness to testify concerning the matter under inquiry, which I understand from the resolution that was attached to the subpena served on Mr. Johnson is the New Mobilization Committee to End the War in Vietnam.

That is the matter under inquiry. Am I correct, Mr. Chairman, that this is the matter under inquiry at this time?

Mr. EDWARDS. As far as it goes; yes, sir.

Mr. ABT. My point is, as I say, that at this stage, the committee lacks authority to either subpena witnesses or to require testimony concerning that subject matter.

I first want to call the committee's attention to section 1 of its rules of procedure, which states:

"Committee investigations shall be limited to those legislative purposes committed to it by the mandate of the House. * * *"

The mandate of the House, as the committee knows, is contained in rule XI of the standing rules of the House, which appears in this little blue book that you are in the custom of thoughtfully serving on all persons who are subpenaed as witnesses.

Section 11 of rule XI authorizes the Internal Security Committee, this committee, to conduct investigations with respect to two categories of organizations, which it defines. Category I consists of organizations which seek to establish a totalitarian dictatorship in the United States, or to overthrow the Government of the United States by force and violence. Category 2, stated very briefly, consists of organizations which incite to violence, terrorism, or other unlawful acts.

Now, it is clear, I think, that before the committee has authority to subpena witnesses or to require their testimony, and section 11 of the standing rules says for the purpose of any such investigation the committee is authorized to subpena witnesses and require testimony, that it is not authorized to subpena or demand testimony of a witness unless and until it finds and determines on the basis of evidence that the organization under investigation is an organization of the character defined in the House rule which I have just read.

Any other construction of that rule would give this committee a roving commission to investigate any organization, charitable, religious, trade union, at its will, on the pretext that it was investigating unlawful activities and that, of course, is precisely what the House intended to prevent when it revoked the mandate of your predecessor committee, created this committee, and gave it the restricted and limited authority which I have just read.

Now, coming to the subject matter of this inquiry, the New Mobe, the committee has made no determination whatsoever that the New Mobe is an organization that is of the character which you are authorized to investigate, that is to say, an organization that advocates or seeks the violent overthrow of the Government or incites to violence, and there is not a shadow of evidence before this committee that would or could support such a determination.

The committee resolution under which you are proceeding bases its jurisdiction to make this investigation on a staff study concerning the New Mobilization Committee to End the War, a staff study which Mr. Ichord, the chairman of the committee, put into the *Congressional Record* some months ago. Now, there is nothing, not a word in that staff study, this preliminary investigation, which finds that the New Mobe has any of these characteristics to which your jurisdiction is limited.

Quite the contrary. The staff study starts in its second paragraph with a quotation, an excerpt from the *Daily World*, in which it quotes Sam Brown, Moratorium coordinator, as stating: On November 15 the New Mobilization Committee To End the War in Vietnam is sponsoring a peaceful and legal mass march and rally in Washington, D.C., and there is not a line in this preliminary investigation to indicate that the New Mobe planned anything else or organized anything else than a peaceful and legal mass march.

Moreover, when Mr. Ichord, the committee chairman, placed the staff study in the *Congressional Record*, he introduced it with the statement, and this is the worst thing he could find to say about the New Mobe, that it is a "blatant propaganda assault upon our Nation."

This committee has no jurisdiction to investigate organizations which engaged in nothing but "blatant propaganda assaults," or propaganda assaults, no matter how blatant. That was the jurisdiction that was conferred on your predecessor committee, to investigate propaganda, and it was precisely to prevent an investigation of propaganda that the authority of that committee was revoked and that your committee was created with a much more limited authority.

So that at this stage of the investigation and until such time, if ever, as the committee does and can, on the basis of some evidence voluntarily offered by it, make the finding that is essential to its conducting an investigation, it has no authority to issue a subpena or to compel a witness to testify.

My second point, and the second ground on which I move that the subpena to Mr. Johnson be quashed, is that it is apparent, and it is the avowed purpose of calling Mr. Johnson here to attempt to compel him to disclose the political affiliations of persons who this staff study alleges are members of the Communist Party of the United States.

Now, only a few months ago, as I think the members of the subcommittee are aware, the Court of Appeals of the District of Columbia, in the case of *Boorda* v. *The Subversive Activities Control Board*, held unanimously that it was a violation of the first amendment for Congress to pass a law authorizing the Subversive Activities Control Board to require and make such a disclosure of the membership of persons in the Communist Party. As I am sure you are also aware, only a few weeks ago the Supreme Court, and again unanimously, refused to review that decision.

Now, it is perfectly clear that if both Houses of Congress can't pass a law to require the disclosure of membership in the Communist Party, one House of Congress acting by resolution can't do that, and for that reason, also, I submit that the subpena served on Mr. Johnson is invalid.

On both of the grounds that I have stated, I move that the subpena be quashed.

That is the end of my statement, Mr. Chairman.

Mr. EDWARDS. Thank you, Counsel.

If the conclusions which you stated in the first part of your dissertation were established or correct, you would probably have a good legal argument, but the correctness of these conclusions is what we are trying to establish in these hearings.

The resolution which constitutes the source of authority for this subcommittee authorizes the committee, among other things, to investigate the extent to which, and the manner and means by which, the New Mobe or any of its chapters or affiliated groups may be controlled, directed, or assisted by organizations or individuals who seek to overthrow or assist in the overthrow or alteration of the form of the Government of the United States, or any State thereof, by unlawful means or by such means as to obstruct or oppose the Government of the United States in the execution of any law or policy affecting the internal security of the United States, also the manner in which it is financed, that is, the New Mobe, and also the extent to which it may act in concert or aid or assist or be supported by foreign communist powers, their agents, or nationals, and all other facts in relation to the foregoing.

May I say to you that what we are trying to establish in these hearings is set forth specifically in the resolution. Your client has been served with a copy of the resolution and of the rules, as you indicated. And, Mr. Abt, that is what we are trying to determine this morning.

If any questions are propounded to your client which infringe upon his constitutional rights, that would be an appropriate time for him to exercise his right to interpose his constitutional immunity, and the Chair will naturally proffer a ruling at such time as such specific objections are made.

For the time being, my ruling is on the basis of the entire testimony which has been elicited heretofore in these hearings——

Mr. ABT. May I ask what that testimony is or where it may be found? We are not aware of any such testimony——

Mr. EDWARDS. —and the resolution which was adopted by the whole committee on December 10, 1969, and the Chair will overrule your objections.

Now, the testimony to which I refer is the testimony which has been elicited in these proceedings by other witnesses who have testified as to some of the internal workings of the early meetings of the New Mobe, the composition of its officers and directors, the indication and the testimony that some of the leaders of the New Mobe indicated no real desire to seek peace in Vietnam, but rather to create turmoil and upheaval in our coun-

try, and the information which we have which indicates that the New Mobe or, at least, some of its principal organizers and leaders are members of the Communist Party and are intent upon overthrowing our Government.

Whether that is ultimately a fair conclusion to be drawn by the total hearings, whether or not it is proven after we have completed our investigation is, of course, something that we have to wait and see.

Fairminded people may disagree upon the conclusions; reasonable people may take different views as to what is involved and what is attempted by those who are involved in these New Mobe activities. I think Mr. Ichord's statement, to which you refer, properly refers to the vast majority of people who were involved in the Washington demonstrations, people who were generally interested in seeking a just peace in Vietnam, who generally have the humane attitude of wanting to stop war, a philosophy that I think most human beings agree with.

We are concerned not by folks who are well motivated. We are concerned about those who are using those people, and using a highly emotional issue in America to foment trouble and dissent and revolution in our Nation.

Will you be sworn, Mr. Johnson?

Mr. ABT. May I ask a question, Mr. Chairman?

I am not quite clear. Do I understand from the statements you have just made that the subcommittee and the full committee have not yet reached any conclusion as to the character of the Mobe in terms of the definitions of the two organizations, two types of organizations?

Mr. EDWARDS. We have reached conclusions which we feel justify proceeding with this investigation.

The reason we are investigating the New Mobe, and not the Baptist Church or some other church or some trade union, is because we feel that we have enough evidence before us to justify a belief that there were those named in these hearings who were motivated by a desire to overthrow our Government and to incite revolution. Whether or not the conclusion which we have reached will be borne out by the testimony is the whole purpose of this investigation.

Mr. Johnson.

Mr. ABT. Mr. Chairman, again, before the witness is sworn, have you ruled on my motion to quash?

Mr. EDWARDS. Yes, I have overruled it.

Mr. ABT. In view of that ruling, Mr. Chairman, and because I have advised Mr. Johnson that, in my opinion as a lawyer, the committee at this stage has no jurisdiction to subpena him or to require him to answer questions and since he, on his part, has informed me that he does not care to volunteer any testimony to this committee, I think we have no further business to transact.

Mr. SCHERLE. Mr. Chairman, may I interrupt at this point?

Mr. EDWARDS. Excuse me, Mr. Scherle.

Thank you for that statement. I am certain that you speak for your client, but for the record and for the purpose of further proceedings, the Chair at this time directs the witness, Arnold Johnson, to rise to take the oath or affirmation preparatory to being propounded questions by committee counsel.

Mr. JOHNSON. On the advice of counsel, I decline.

Mr. EDWARDS. Let the record show that the witness declines to take the oath or affirmation on the advice of counsel.

Give me one minute, would you, please, Mr. Johnson?

Mr. Johnson, committee chief counsel, Donald G. Sanders, suggests to the Chair, in an effort to bend over backward in fairness and to comply with every letter of the law, that the Chair advise you that part and parcel of the subpena which was served upon you is implicit the requirement that you appear today and that you take the oath or affirmation as required by the rules of the House and rules relating to this type of proceeding and that, following the taking of such oath or affirmation and as questions are propounded to you, you take it under the Constitution and the applicable decisions of the United States Supreme Court, and you will be free to urge such objections as you or your counsel think appropriate, and the Chair will consider each such objection at the time it is urged.

Failing to take the oath as directed by the Chair, as required by the committee, in the opinion of the Chair at this time, will constitute contempt of Congress. The Chair wishes to put you on notice that if you persist in your refusal to take the oath or affirmation that the Chair will suggest to the subcommittee and to the whole committee that appropriate proceedings be instituted against you, asking for a citation for contempt of Congress.

I read to you rule IX of the rules of this committee, which states:

"All witnesses at public or executive investigative hearings who testify as to matters of fact shall give all testimony under oath or affirmation which shall be administered by the Chairman or a member of the Committee or subcommittee.

"No witness shall be compelled to testify under oath or affirmation at any Committee or subcommittee hearing unless a quorum of the Committee or subcommittee is present to receive such testimony."

Mr. Johnson, I beseech you to take the oath. It is a step which will not violate any of your constitutional rights. It will not prejudice any of your objections to these proceedings and will, in my candid and humble opinion, save everyone concerned a great deal of controversy later on.

Will you reconsider, please, sir?

Mr. JOHNSON. No, I will not reconsider. I reaffirm my refusal, on the basis of the points made by counsel, and I think as those points are debated, when we proceed, my counsel will prove correct.

Mr. EDWARDS. In the presence of Mr. Johnson and counsel, and not indicating that either agrees with my summarization, for the record, the Chair will state that Mr. Johnson, accompanied by counsel who has identified himself, appeared this morning, sat at the witness table, at which time his counsel offered a two-pronged objection to the proceedings, which objections are already in the record and are self-declared.

Following the objection, for reasons stated by the Chair, the objection was overruled.

The Chair at this time directed the witness to stand to take the oath or affirmation, as required by the rules pursuant to the subpena served upon him, and, as the record has previously shown, Mr. Johnson twice refused to so affirm or take the oath.

Therefore, in view of the factual and legal circumstances which have arisen this morning, the Chair will at this time say that the matter will be considered further by the subcommittee and the full committee in further proceedings.

Mr. Johnson, I think Mr. Scherle wants the floor. You are not required to stay and listen to him. You may, if you wish.

Mr. ABT. Mr. Chairman, before we depart, just a question.

In your statement earlier, you referred to testimony or evidence that was before the subcommittee. I would like the record to show that testimony or evidence has never been available, made available to Mr. Johnson or myself. I would like to ask whether it has ever been published.

Mr. EDWARDS. All of the proceedings to which I refer were public sessions.

Mr. ABT. Has the testimony been published?

Mr. EDWARDS. All of it has not yet been published or typed up, because it is rather voluminous.

Mr. ABT. I am correct, am I not, Mr. Chairman——

Mr. EDWARDS. If counsel will advise the committee that upon receipt of a copy of this testimony he will change his opinion and voluntarily appear, we will postpone these hearings until such time as we can furnish you with a copy.

Mr. ABT. How can I give you that kind of assurance before I have seen the testimony?

Mr. EDWARDS. I didn't expect you would, but I wanted to afford you the opportunity.

Mr. ABT. But you will agree with my statement, will you not, that the testimony has never been submitted to Mr. Johnson or to myself?

Mr. EDWARDS. Yes; and I will also ask you to agree that there is no requirement that it be furnished to him. Nevertheless, that is a matter which some other tribunal will probably be ruling on at some later date.

Thank you, gentlemen, for coming.

Mr. Scherle, do you wish the floor?

Mr. SCHERLE. Mr. Chairman, I am sorry that the counsel is leaving, because I think if he were to read——

Mr. ABT. I will be glad to stay and hear you, Mr. Scherle. Maybe I will learn something.

Mr. SCHERLE. In the rules of procedure, Mr. Abt, I think rule XI states simply "Powers and Duties of Committees."

Now, your statement was only a part of the entire rule, and you took what you wanted out of context.

Mr. ABT. You are referring to rule XI of the standing rules, Mr. Scherle?

Mr. SCHERLE. Yes, page IV, the Committee on Internal Security: "The Committee on Internal Security, acting as a whole or by subcommittee, is authorized to make investigations from time to time of," and you took into consideration (1). Well, let's look at No. (2).

Mr. ABT. No, I referred to both (1) and (2).

Mr. SCHERLE [reads].

"(2) the extent, character, objectives, and activities within the United States of organizations or groups, their members, agents, and affiliates, which incite or employ acts of force, violence, terrorism, or any unlawful means, to obstruct or oppose the lawful authority of the Government of the United States in the execution of any law or policy affecting the internal security of the United States,"

And to continue:

"(3) all other questions, including the administration and execution of any law of the United States, or any portion of law, relating to the foregoing that would aid the Congress or any committee of the House in any necessary remedial legislation."

Now, how does that exclude your presence here this morning, as far as the resolution is concerned?

Mr. ABT. I think perhaps you didn't understand me, Mr. Scherle. You see, the committee, of course, is free to secure such voluntary testimony on the subject of the New Mobilization as it cares to.

My point is a very simple one, that the committee cannot compel testimony from an unwilling witness, unless and until it first makes a determination, based on evidence, preliminary determination based on evidence, that the organization that it is investigating does incite to violence or do some of the things that you say, that you read from the rule a moment ago.

Now, to my knowledge, there has been no such evidence. I have seen none. And certainly the committee has made no such determination and until it does—when, as, and if it does—and you resubpena Mr. Johnson, there will be a different ball game. We may have some other objections, but we won't have that one any more.

Mr. SCHERLE. You are not excluded, as far as the interpertation of this law pertains.

and I wanted you to know this before you left.

Mr. EDWARDS. Mr. Abt, I would like to add, for your benefit, as well as the news media, that this committee in conducting these hearings has heard from the other side, good guys in the white hats, as we might look at them from our side of the bench. They have definite impressions as to the intent and direction of the New Mobe and have testified before us to that effect.

We have definite conclusions as to what the intent of the leaders of the New Mobe was and is.

We have testimony and evidence sufficient to justify coming to the conclusion—that is correct as far as we are concerned—that this witness, Mr. Arnold Johnson, is a member of the steering committee of the New Mobe. We also have testimony that he has publicly stated, and certainly he is a self-proclaimed spokesman or representative or has some official capacity with the Communist Party, U.S.A.

The national Congress and the Supreme Court of the United States have long taken a view that Congress has wide power to legislate in the field of communist activity in this country, to conduct appropriate investigations in aid of that power.

In the well-based assumption that, in the final analysis, the right of self-preservation is indigenous to any legitimate society, Congress and the Court have long refused to regard this Communist Party as an ordinary political party, has recognized the close association between the Communist Party and violent overthrow of the Government, or at least some who advocate it. And we think that this witness, who is a self-proclaimed spokesman for or member of the Communist Party, U.S.A., and whom we have identified as a member of the steering committee, would have been an appropriate witness, if for no other purpose but to give us his side of the story.

Maybe what these other witnesses have said about their intent and directions is wrong. If he was guided by other motives, not violently dedicated or interested in doing damage to our country or inciting to revolution, I would think he would welcome the opportunity to proclaim it from the highest building in the country, and certainly from this forum which would give adequate publication to his sentiments. That he elects not to do so forces me to draw the conclusion that maybe he cannot truthfuly take such a position.

Mr. ABT. That conclusion is entirely unjustified, Mr. Chairman, as you well know.

Why didn't you give him an opportunity to come down and volunteer testimony, if he wanted to, instead of bringing him here under the compulsion of a subpena? There would be no doubt of your power to hear anybody who wants to volunteer testimony.

Mr. EDWARDS. Our investigators tried to contact Mr. Johnson and tried to offer him the opportunity, and he would not talk to them.

Mr. ABT. He was not invited down here as a voluntary witness. He was served with a subpena. I don't know that he would have volunteered.

Mr. EDWARDS. You can't invite a person to something if you can't talk to him. However, in the presence of his counsel and the staff, reserving for the committee and the national Congress all rights which it may have acquired to proceed by contempt proceedings, the Chair at this time, on its own motion, invites you, Mr. Johnson, to testify voluntarily before this committee at any reasonable time within the next 10 days.

Mr. ABT. You have an invitation.

Mr. JOHNSON. I shall refuse it.

Mr. EDWARDS. We have one additional witness and we will take a 5-minute recess.)

(Brief recess.)

* * * * *

Mr. EDWARDS. The committee is adjourned.

(Whereupon, at 11:05 a.m., Thursday, June 11, 1970, the subcommittee recessed, subject to the call of the Chair.)

---

## APPENDIX II

### PART 1

The following is an extract from the minutes of a meeting of the Committee on Internal Security held on February 20, 1969:

*Committee on Internal Security,*
*February 20, 1969*

The Committee on Internal Security met in executive session on February 20, 1969, at 10:00 a.m., in Room 311, Cannon House Office Building. The following members were present: Richard H. Ichord, Chairman; Claude Pepper, Edwin W. Edwards, Richardson Preyer, Louis Stokes, John M. Ashbrook, William J. Scherle.

The staff members present were: Donald G. Sanders, chief counsel; Alfred M. Nittle, counsel; Francis J. McNamara, director of research; Juliette P. Joray, recording clerk; and Mary M. Valente, administrative secretary.

The chairman called the meeting to order at 10:15 a.m.

* * * * *

The chairman submitted the following proposal to the members of the Committee for a study of revolutionary violence within the United States:

"I desire hereby to lay before the Committee a proposal for study and investigation in depth of revolutionary violence within this Nation.

"It is becoming increasingly evident that one of the gravest threats to our internal security and to the free functioning of our democratic institutions is posed by the activities of certain organizations which would effect changes in our government or its administration by other than constitutional processes. Recent investigations of this Committee, the statements of responsible officials, Federal and State, and daily press reports, appear to me to sustain this conclusion.

"In this respect, moreover, we are faced with evermounting demands from the Members of the House and the public for legislative action, both for additional legislation and with respect to the examination and appraisal of the administration and enforcement of existing law, including proposals for constitutional amendment as well.

"I need not state that the legislative problems we face on the subject of subversion are of the utmost complexity and difficulty not solely from the constitutional standpoint, but equally so from the standpoint of developing practical and effective legislation. We must find the answers to certain basic questions, among which are the following: Is additional Federal legislation necessary? What form should such legislation take? Should these statutes be essentially regulatory or penal? Can we profitably amend existing statutes in this area? What is the Federal role, as contrasted with the State role, in the exercise of the police power on this subject?

"In addition, a number of bills have already been referred to the Committee. Undoubtedly additional legislation will also be referred to it from time to time. Such legislation involves a number of subjects vital to the protection and maintenance of our internal security, including such subjects as the protection of defense facilities, the security of classified information released to industry, Federal employment security, vessel, ports, and harbor security, the protection of our armed forces during periods of undeclared war, passport security, proposals with respect to the Emergency Detention Act of 1950, etc.

"The answer to the foregoing questions, and the disposition of such legislation, will obviously require the most painstaking and thorough inquiry and understanding of the extent, character and objectives, the organizational forms, financing, and other facts, with respect to those organizations and individuals engaged in revolutionary violence, sedition, and breach of peace and law, as are proper subjects of investigation as mandated by the House. Obviously, we cannot legislate in a vacuum.

"I therefore submit for your approval my proposal that, under my direction, the staff be authorized to undertake preliminary studies and inquiries, the results of which I shall, from time to time, report to the full Committee with a view toward the subsequent authorization of such full scale investigations and public hearings as the Committee may seem desirable and necessary."

A discussion followed, and on motion of Mr. Pepper, and seconded, by Mr. Edwards, the following resolution was adopted:

"Resolved, That the Chairman be directed to cause staff studies and preliminary inquiries to be made with respect to the organizations and subjects herein proposed, and to report on same from time to time, with his recommendations, with a view toward determining whether full-scale investigations and public hearings shall be authorized and conducted by the Committee with respect to any such organization or subject."

The Chairman directed the staff to undertake preliminary studies of certain organizations and further directed that summaries of these studies be prepared for consideration by the Committee at its next meeting tentatively scheduled for March 5.

The meeting was adjourned at 11:25 a.m.

RICHARD H. ICHORD,
*Chairman.*

JULIETTE P. JORAY,
*Recording Clerk.*

### PART 2

The following is an extract from the minutes of a meeting of the Committee on Internal Security held on December 10, 1969:

*Committee on Internal Security,*
*December 10, 1969*

The Committee on Internal Security met in executive session on December 10, 1969, at 9:30 a.m., in Room 311, Cannon House Office Building. The following members were present: Richard H. Ichord, chairman; Edwin W. Edwards, John M. Ashbrook, Richard L. Roudebush, Albert W. Watson, and William J. Scherle.

Staff members present: Donald G. Sanders, chief counsel; Glenn E. Davis, editorial director; Alfred M. Nittle, counsel; Robert M. Horner, chief investigator; William G. Shaw, research director; John F. Lewis, coordinating editor; Stephen H. Romines, assistant counsel; William T. Poole, research analyst; Juliette P. Joray, recording clerk; and Mary M. Valente, administrative secretary.

The meeting was called to order at 10:04 a.m.

The Chairman offered a resolution for the consideration of the Committee which would authorize an investigation of the New Mobilization Committee to End the War in Vietnam. A motion was made by Mr. Edwards, seconded by Mr. Roudebush, that the following resolution be adopted:

"Whereas, on February 20, 1969, considering that a serious threat was posed to the internal security of this Nation and the free functioning of its Democratic institutions by the activities of certain organizations which would effect changes in our Government, or the administration of our Government, by other than constitutional processes, the Chairman accordingly proposed a preliminary study and inquiry into those organizations and their activities within the United States for the purpose of resolving a number of legislative problems, in-

cluding an appraisal of the administration and enforcement of existing law, an examination of the respective roles of the Federal and State governments in the exercise of the police power, the need for remedial legislation, and to assist in the disposition of bills referred to the Committee, on subjects committed to it by the mandate of the House;

"Whereas, a resolution on that date was adopted by the Committee directing the Chairman to cause staff studies to be made with respect to such organizations and subjects, and to report on the same, from time to time, together with recommendations, with a view toward determining whether full-scale investigations and public hearings shall be authorized and conducted with respect to any such organization and subject;

"Whereas, a staff study concerning the New Mobilization Committee To End The War In Vietnam was prepared and reported to the Chairman (as published in the CONGRESSIONAL RECORD, vol. 115, pt. 24, pp. 32947–32949);

"Whereas, the Committee staff study of November 4, 1969, has raised serious questions concerning the true nature and objectives of the New Mobilization Committee To End The War In Vietnam in that the staff study disclosed that the leadership of the New Mobilization Committee To End The War In Vietnam is top-heavy with Communists and pro-Communists, including members and partisans of both the Communist Party, USA, and, most particularly, the Trotskyist Socialist Workers Party and Young Socialist Alliance; that the conspicuous Communist presence at major planning sessions of NMCEWVN indicates blatant Communist manipulation, exploitation, and subversion of a protest movement concerning U.S. involvement in Vietnam, and that the staff study disclosed several national leaders of the New Mobilization Committee To End The War In Vietnam were among the delegates to the World Peace Assembly held in East Berlin during June, 1969, the Assembly being sponsored by the World Peace Council, an international Communist 'peace' front;

'Whereas, H. Res. 700 and H. Res. 701, introduced on November 13, 1969, by Mr. Landgrebe for himself and 42 other Congressmen, called for authorization of a full and complete investigation of the NMCEWVN, including its sources of income and leadership, by the Committee on Internal Security;

"Now therefore be it resolved, that an in-depth investigation be conducted by the Committee on Internal Security, or by a subcommittee thereof appointed by the Chairman, concerning the following:

"The origin, history, organization, character, objectives, and activities of the New Mobilization Committee To End The War in Vietnam, with particular reference to (1) the extent to which it may be involved in acts of violence or other unlawful activities to accomplish any of its purposes or objectives; (2) the extent to which, and the manner in which, it may incite or employ acts of force, violence, terrorism, or any unlawful means to obstruct or oppose the Government of the United States in the execution of any law or policy affecting the internal security of the United States; (3) the extent to which, and the manner and means by which, it or any of its chapters or affiliated groups may be controlled, directed, or assisted by organizations or individuals who seek to overthrow or assist in the overthrow or alteration of the form of Government of the United States or any State thereof by unlawful means, or by any such means to obstruct or oppose the Government of the United States in the execution of any law or policy affecting the internal security of the United States; (4) the manner in which it is financed and supported; (5) the extent to which it may act in concert with, aid or assist, or be supported by, foreign Communist powers, their agents or nationals; and (6) all other facts in relation to the foregoing."

The yeas and nays were requested. The Chairman directed the recording clerk to call the roll and each member responded as follows:

Mr. Ichord, aye.
Mr. Edwards, aye.
Mr. Ashbrook, aye.
Mr. Roudebush, aye.
Mr. Watson, aye.
Mr. Scherle, aye.

The motion carried and the resolution was adopted.

* * * * *

The meeting was adjourned at 10:12 a.m.

RICHARD H. ICHORD,
*Chairman.*

JULIETTE P. JORAY,
*Recording Clerk.*

PART 3

The following is an extract from the minutes of a meeting of the Committee on Internal Security held on March 25, 1970:

*Committee on Internal Security, March 25, 1970*

The Committee on Internal Security met in executive session on March 25, 1970, at 11:00 o'clock a.m., in Room 311, Cannon House Office Building. The following members were present: Richard H. Ichord, chairman; Edwin W. Edwards, John M. Ashbrook, Richard L. Roudebush, William J. Scherle.

The staff members present were: Donald G. Sanders, chief counsel; Richard L. Schultz, associate chief counsel; Alfred M. Nittle, counsel; Glenn Davis, editorial director; Robert M. Horner, chief investigator; Stephen H. Romines, Daniel Ferry, assistant counsel; Juliette P. Joray, recording clerk; and Mary M. Valente, administrative secretary.

The chairman called the meeting to order at 11:24 o'clock a.m.

The chairman submitted for consideration a resolution authorizing hearings on the New Mobilization Committee to End the War in Vietnam. On motion of Mr. Roudebush, seconded by Mr. Edwards, the following resolution was unanimously adopted:

"Whereas, on December 10, 1969, the Committee on Internal Security duly adopted a resolution authorizing an investigation, with regard to the origin, history, organization, character, objectives, and activities of the New Mobilization Committee to End the War in Vietnam, for the purposes and on the subjects of inquiry therein set forth;

"Now therefore be it resolved, That for the purposes of such investigation, hearings by the Committee on Internal Security, or by any subcommittee thereof appointed by the Chairman for that purpose, be held in Washington, D.C., or at such place or places, and on such date or dates, as the Chairman may designate."

* * * * *

The meeting was adjourned at 12:17 a.m.

RICHARD H. ICHORD,
*Chairman.*

JULIETTE P. JORAY,
*Recording Clerk.*

PART 4

The following is an extract of the minutes of a meeting of the subcommittee of the Committee on Internal Security to conduct hearings concerning the New Mobilization Committee to End the War in Vietnam, held on June 3, 1970:

*Committee on Internal Security, June 3, 1970*

The subcommittee designated to conduct hearings relating to the New Mobilization Committee To End the War in Vietnam met in executive session on June 3, 1970, at 3:00 o'clock p.m., in Room 311, Cannon House Office Building. The following members of the subcommittee were present:

Edwin W. Edwards, chairman William J. Scherle.

The members of the staff present were: Donald G. Sanders, chief counsel; Richard L. Schultz, associate chief counsel; Robert M. Horner, chief investigator; Stephen H. Romines and Daniel Ferry, assistant counsel; and Juliette P. Joray, recording clerk.

The meeting was called to order at 3:05 p.m.

Mr. Romines briefed the subcommittee on the hearings scheduled to commence on June 10 concerning the New Mobilization Committee to End the War in Vietnam. * * *

* * * * *

Mr. Romines further informed the subcommittee that in connection with the Committee's investigation of the New Mobilization Committee to End the War in Vietnam, it was recommended that Arnold Johnson, a top functionary of the Communist Party who is also on the Steering Committee of the New Mobilization Committee to End the War in Vietnam be summoned to testify on matters relating to this organization. Mr. Romines briefed the subcommittee on reasons for calling Johnson and on motion of Mr. Scherle, the subcommittee unanimously voted to authorize the issuance of a subpoena for Arnold Johnson to appear before the subcommittee on June 11, 1970.

* * * * *

The meeting was adjourned at 3:16 o'clock p.m.

ED W. EDWARDS,
*Subcommittee Chairman.*

JULIETTE P. JORAY,
*Recording Clerk.*

PART 5

The following are the minutes of a meeting of the aforesaid subcommittee of the Committee on Internal Security held on June 24, 1970:

*Committee on Internal Security, June 24, 1970*

A subcommittee of the Committee on Internal Security designated by the Chairman to conduct hearings regarding the origin, history, organization, character, objectives, and activities of the New Mobilization Committee to End the War in Vietnam, met in executive session on Wednesday, June 24, 1970, at 2:00 o'clock, p.m., in Room 311, Cannon House Office Building, Washington, D.C. The following members were present: Edwin W. Edwards, subcommittee chairman; Louis Stokes (entered at 2:09 p.m.), William J. Scherle.

The following staff members were also present: Donald G. Sanders, chief counsel; Richard L. Schultz, associate chief counsel; Robert M. Horner, chief investigator; Stephen H. Romines, assistant counsel; Daniel Ferry, assistant counsel; Mary M. Valente, administrative secretary.

The subcommittee chairman called the meeting to order at 2:07 p.m. He stated that the purpose of the meeting was to consider what action the subcommittee should take regarding the refusal of Arnold Johnson to be sworn, or to affirm (after being duly subpoenaed to testify before the subcommittee on June 11, 1970), preparatory to being propounded questions by Committee counsel at the direction of the subcommittee chairman, at the hearing conducted by said subcommittee on the 11th day of June, 1970, and what recommendation the subcommittee would make to the full Committee regarding a citation for contempt of the House of Representatives. It was noted that Mr. Edwards had sent each member of the subcommittee a memorandum report of the circumstances surrounding this matter.

After full discussion of the facts surrounding the refusal of Arnold Johnson to be sworn or to affirm, preparatory to being examined as a witness before the subcommittee on June 11, 1970, a motion was made by Mr.

Scherle, seconded by Mr. Stokes, that the subcommittee direct Committee counsel to prepare a memorandum to the full Committee reporting the events and circumstances surrounding the subpoenaing of Arnold Johnson, his appearance before this subcommittee, his counsel's objections, and his refusal to take an oath, the colloquy between the subcommittee chairman, Mr. Johnson and his counsel, and that the testimony and colloquy be made part of the memorandum together with applicable law, and on the basis of such facts that this subcommittee recommend to the full Committee that the full Committee report said facts and circumstances to the House of Representatives with recommendation that the said Arnold Johnson be cited for contempt of the House of Representatives.

The motion was put to a vote. The administrative secretary called the roll and each member responded as follows:

Mr. Edwards, aye.
Mr. Stokes, aye.
Mr. Scherle, aye.

The meeting adjourned at 3:35 p.m.

ED W. EDWARDS,
*Subcommittee Chairman.*
MARY M. VALENTE,
*Administrative Secretary.*

PART 6

The following is an extract from the minutes of a meeting of the Committee on Internal Security held on August 13, 1970:

*Committee on Internal Security,*
*August 13, 1970*

The Committee on Internal Security met in executive session pursuant to notice on Thursday, August 13, 1970, at 10:00 o'clock a.m., in Room 311, Cannon House Office Building. The following members were present: Richard H. Ichord, chairman; Claude Pepper, Richardson Preyer, John M. Ashbrook, William J. Scherle.

The following staff members were also present: Donald G. Sanders, chief counsel; Richard L. Schultz, associate chief counsel; Alfred M. Nittle, legislative counsel; Daniel Ferry, assistant counsel; and Juliette P. Joray, recording clerk.

The meeting was called to order at 10:35 a.m., by the chairman who stated that it was a purpose of this meeting to consider the report of the subcommittee designated to conduct hearings on the New Mobilization Committee to End the War in Vietnam with regard to the failure and refusal of Arnold S. Johnson to be sworn or to take affirmation to testify at the meeting of June 11, 1970, in connection with the investigation of the New Mobilization Committee to End the War in Vietnam.

The Chairman stated that written notice had been given to all members of the Committee of the purpose of this meeting, and he directed that a copy of the notice be attached to the minutes and made a part thereof. He further stated that a memorandum report had been made and circulated to the full Committee by Mr. Edwards, chairman of the subcommittee, together with a copy of the transcript of the hearing relating to the appearance of Arnold S. Johnson before the subcommittee on June 11, 1970, advising the Committee of the circumstances surrounding the refusal of Arnold S. Johnson, and of the fact that the subcommittee at a meeting of June 24, 1970, had directed a report be made to the full Committee of the facts and circumstances relating to the refusal of Arnold S. Johnson with the recommendation that the said Arnold S. Johnson be cited for contempt of the House of Representatives.

The Chairman then reviewed the circumstances in relation to the subpoenaing of Johnson to testify, observed that his subpoena had been duly issued and that in his opinion the proceedings were in due order. He said he hoped that he could avoid the unpleasant duty of citing a witness for contempt, but that there was no alternative under the circumstances of this case and that the Committee had a duty to protect the dignity and prerogatives of the House. A discussion ensued, following which a motion was made by Mr. Ashbrook, seconded by Mr. Ichord, that the following resolution be adopted:

"Resolved, That the Committee on Internal Security report to the House the fact of the failure and refusal of Arnold S. Johnson to be sworn or to take affirmation to testify at a meeting of the subcommittee on June 11, 1970, together with all the facts in connection therewith, to the end that the said Arnold S. Johnson may be proceeded against in the manner and form provided by law."

The chairman directed the Recording Clerk to call the roll and each member present responded as follows:

Mr. Ichord, aye.
Mr. Pepper, aye.
Mr. Preyer, aye.
Mr. Ashbrook, aye.
Mr. Scherle, aye.

The motion carried and the resolution was adopted.

* * * * *

The meeting was adjourned at 11:00 o'clock a.m.

RICHARD H. ICHORD,
*Chairman,*
JULIETTE P. JORAY,
*Recording Clerk.*

---

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
COMMITTEE ON INTERNAL SECURITY,
*Washington, D.C., August 10, 1970.*

To: Honorable Claude Pepper.
Honorable Edwin W. Edwards.
Honorable Richardson Preyer.
Honorable Louis Stokes.
Honorable John M. Ashbrook.
Honorable Richard L. Roudebush.
Honorable Albert W. Watson.
Honorable William J. Scherle.

From: Richard H. Ichord, Chairman.

Re: Notice of meeting regarding Arnold S. Johnson—contempt.

You are given notice that a meeting of the Committee on Internal Security will be held at the Committee hearing room (311 Cannon House Office Building) on August 13, 1970, at 10 A.M. to consider the report of the subcommittee with regard to the failure and refusal of Arnold S. Johnson to be sworn or to take affirmation to testify at the meeting of June 11, 1970, in connection with the investigation of the New Mobilization Committee to End the War in Vietnam. The Committee shall determine its action with respect to reporting such failure and refusal to the House with the recommendation that the said Arnold S. Johnson be proceeded against in accordance with the provisions of Title 2, U.S.C. § 192, 194.

Consideration will also be given to any other matters which may properly come before the Committee.

CERTIFICATE OF DELIVERY

*Congressman, staff member receiving notice, date, and time*

Hon. Richard H. Ichord.
Hon. Claude Pepper; Charlotte Dickson, 8/11/70, 11:45 a.m.
Hon. Edwin W. Edwards; Charlotte Wilmer, 8/11/70, 11:47 a.m.
Hon. Richardson Preyer; Bernice Pruitt, 8/11/70; 11:35 a.m.
Hon. Louis Stokes; Mike Davis, 8/11/70, 11:36 a.m.
Hon. John M. Ashbrook; Cindy Wayman, 8/11/70, 11:40 a.m.
Hon. Richard L. Roudebush; Eunice Rowl, 8/11/70, 11:30 a.m.
Hon. Albert W. Watson; Lillian Wright, 8/11/70, 11:44 a.m.
Hon. William J. Scherle; Gay Washburn, 8/11/70, 11:46 a.m.

Delivery of above notice made personally to members' offices as specified above.

LEO WILLIAM IVORY,
*Committee on Internal Security.*

Mr. ICHORD (during the reading). Mr. Speaker, in view of the fact that the report has been circulated to the Members for well over a week, I ask unanimous consent that the further reading of the report be dispensed with and that it be printed in full in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. ICHORD. Mr. Speaker, by direction of the House Committee on Internal Security, I offer a privileged resolution (H. Res. 1220) and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 1220

*Resolved,* That the Speaker of the House of Representatives certify the report of the Committee on Internal Security of the House of Representatives as to the refusal of Arnold S. Johnson to be sworn or to make affirmation to testify before a duly authorized subcommittee of the said Committee on Internal Security, together with all the facts in connection therewith, under the seal of the House of Representatives, to the United States Attorney for the District of Columbia, to the end that the said Arnold S. Johnson may be proceeded against in the manner and form provided by law.

The SPEAKER. The gentleman from Missouri (Mr. ICHORD) is recognized for 1 hour.

GENERAL LEAVE

Mr. ICHORD. Mr. Speaker, I ask unanimous consent that all Members who wish to do so may have 5 legislative days in which to revise and extend their remarks.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. ICHORD. Mr. Speaker, I yield myself 10 minutes.

Mr. Speaker, what is involved in this resolution citing Arnold S. Johnson is solely a question whether the authority of the process of this House is to be maintained. Having been duly summoned by authority of the House to appear before the Committee on Internal Security to give testimony on June 11, 1970, touching matters of inquiry committed to the committee, Arnold S. Johnson appeared, accompanied by counsel. On being required to be sworn or to take affirmation to testify, he refused to do so and persisted in that refusal. By such refusal Johnson made willful default in violation of the act of June 22, 1938. The question then on the resolution is whether this House shall require the Speaker to certify the statement of facts in connection with Johnson's default to the U.S. Attorney for the District of Columbia to the end that the said Arnold S. Johnson may be proceeded against in the manner and form provided by law.

The applicable provisions of law by which we proceed on this citation appear

in sections 192 and 194 of title 2, United States Code. They provide that when a person summoned as a witness by authority of the House to give testimony or to produce papers upon any matter of inquiry before the House willfully makes default, or who having appeared, refuses to answer any question pertinent to the question under inquiry, he shall be deemed guilty of a misdemeanor, punishable by a fine or not more than $1,000 or less than $100 and imprisonment in a common jail for not less than 1 month or more than 12 months. When a report of such failure of a witness is reported to the House, and the House is in session, it has always been the practice to call up the report for action by the House. Upon adoption of the resolution by the House requiring the Speaker to certify the facts of any such failure by the witness to the appropriate U.S. Attorney, it then becomes his duty to bring the matter before the grand jury for its action. The defaulting witness is required to stand trial only following indictment by the grand jury.

That a witness duly subpoenaed to testify before a committee of the House who refuses to be sworn or to take affirmation to testify is indictable under the provisions of section 192 of title 2, United States Code, is not open to question. This precise question was first raised and resolved several years ago in the case of *Eisler* v. *United States,* 170 Fed. F. 2d 273 (1948), cert. denied, 338 U.S. 883. In that case, a witness duly subpoenaed to testify before a committee of the House refused to be sworn or affirmed unless the committee permitted him to make a statement. He was informed that committee procedure required him to be sworn first and thereafter make his statement. He refused to be sworn, was cited for contempt, and convicted. In sustaining the conviction, the court held that Eisler's refusal to be sworn as a witness effectively constituted a refusal to give testimony, and that the indictment, which alleged that by reason of such refusal he had willfully made default, sufficiently stated an offense under section 192.

In the case of Arnold S. Johnson now before us, both the subcommittee before whom Arnold S. Johnson appeared but defaulted, and the full committee which now makes this report, have carefully reviewed the proceedings and circumstances of the refusal of Johnson to be sworn and testify. We are in agreement as to the propriety of his citation. It would be a grave delinquency on our part, I believe, to fail to report a matter of this kind which so seriously affects a basic function of the legislative process; namely, the investigative authority of the House.

It was pointed out in an early, leading case on the subject—*McGrain* v. *Daugherty,* 273 U.S. 135, at 161 (1927)—that the power of Congress to make investigations and to exact testimony "has long been treated as an attribute of the power to legislate. It was so regarded in the British Parliament and in the Colonial legislatures before the American revolution." More recently in *Watkins* v. *United States,* 354 U.S. 178, 187 (1956), the Chief Justice reiterated:

> The power of the Congress to conduct investigations is inherent in the legislative process. That power is broad.

This power would be ill-protected and would soon degenerate into a past power were we to permit witnesses duly summoned pursuant to this power to ignore it with impunity.

I do not believe that in reviewing the background of this controversy any fair-minded person would reasonably contend that the committee was without probable cause in conducting its investigation of New Mobe or in subpoenaing Arnold S. Johnson as a witness in aid thereof.

It has become increasingly evident that one of the gravest threats to the peace and security and to the free functioning of our democratic institutions is posed by the activities of certain revolutionary organizations, their members, agents, and affiliates, which would effect changes in our Government or its administration by other than constitutional processes. Indeed, this Congress in its wisdom has established this committee to undertake investigations of organizations and persons of this type, to assist the Congress, or any committee of the House, in any necessary remedial legislation.

Such investigations are essential to inform the mind of Congress. The legislative problems we face on the subject of subversion are of the utmost complexity and difficulty. We are seeking to find the answers to certain ultimate questions, including whether Federal legislation is necessary, what form such legislation should take, whether these statutes should be essentially regulatory or penal, and what are the respective legislative or enforcement roles of the Federal and State governments on this subject. In addition, there are bills either pending before the committee or referred to it from time-to-time which would require disposition. The answer to these questions, and the disposition of these bills, it is clear, require the most painstaking and thorough inquiry into the activities of such organizations, their members, agents, and affiliates.

On February 20, 1969, I recommended that the committee engage in preliminary studies and inquiries with respect to such revolutionary organizations, with a view toward determining what full-scale investigations and public hearings should be authorized wtih respect to particular organizations. A resolution was accordingly adopted by the committee on that date authorizing preliminary studies and inquiries.

Pursuant to the resolution of February 20, I directed the staff to undertake preliminary studies of certain organizations, and that summaries of these studies be prepared for consideration by the committee. These studies were made from time-to-time and made available to members of the committee. Among the studies undertaken pursuant to the resolution was that directed to New Mobe. The study of New Mobe revealed considerable information from which it would appear, or from which one might prima facie conclude, that various Communist organizations, and persons identified as members thereof, were playing an active part in the organization or direction of New Mobe.

These organizations included, among others, the Communist Party USA, and its youth front, the W. E. DuBois Clubs of America; the Communist-Trotskyite Socialist Workers Party, and its youth group, the Young Socialist Alliance, together with its affiliated organization, the Student Mobilization Committee. Information was also possessed that a large number of identified, and some self-proclaimed, Marxists were on the New Mobe Steering Committee, including but not limited to such well-known activists as Arnold Johnson, the National Legislative Director for the Communist Party USA, the subject of this citation; Irving Sarnoff, leader of the Southern California Peace Action Council; Otto Nathan, David Dellinger, Fred Halstead, and others. Indeed, a preliminary statement of the subversive involvement in the origin, leadership, and activities of the New Mobe was introduced by me in the CONGRESSIONAL RECORD of November 4, 1969.

Possessed of such information, the committee on December 10, 1969, adopted a resolution authorizing a full-scale investigation of New Mobe. By the terms of this resolution, the Committee sought to obtain that specific and detailed information which was essential to its purposes, including information as to the origin, history, organization, character, objectives and activities of New Mobe, the extent to which and the manner in which it or any of its chapters or affiliated groups may be controlled or assisted by organizations or individuals who seek to overthrow or assist in the overthrow or alteration of our form of government by unlawful means, and the extent to which foreign Communist powers or their agents were involved in support thereof. It was clear that the committee in adopting this resolution did so in accordance with the authorization and mandate of House rule XI.

House rule XI explicitly gives jurisdiction to the committee with respect to "Communist and other subversive activities," and the committee has been explicitly authorized to make investigations from time-to-time of organizations, their members, agents, and affiliates which seek to establish or assist in the establishment of a totalitarian dictatorship within the United States. As was said by Mr. Justice Harlan, speaking for the Supreme Court in *Barenblatt* v. *United States,* 360 U.S. 109 (1959), at p. 217:

> That Congress has wide power to legislate in the field of Communist activities in this Country, and to conduct appropriate investigations in aid thereof, is hardly debatable. The existence of such power has never been questioned by this Court. . . . In the last analysis this power rests on the right of self-preservation, "the ultimate value of any society," *Dennis* v. *United States,* 341 U.S. 494, 509. Justification for its exercise in turn rests on the long and widely accepted view that the tenets of the Communist Party include the ultimate overthrow of the Government of the United States by force and violence, a view which has been given formal expression by the Congress.

Nevertheless, the committee did not move hastily into public hearings or to exercise its subpena power on this subject. Pursuant to the December 10 resolution, the staff continued its investiga-

tion, a summary of which was later introduced in the hearing record. I include it with my remarks today. It was not until March 25, 1970, that the committee authorized public hearings on the subjects of inquiry set forth in its December 10 resolution, and no subpena had been issued prior to that date.

Following the adoption of the March 25 authorization, I appointed a subcommittee consisting of Mr. EDWARDS of Louisiana as chairman, together with Mr. STOKES and Mr. SCHERLE, to conduct public hearings on New Mobe. The subcommittee conducted hearings on April 7, 8, 9, and 15, in the course of which it received evidence and testimony from a number of witnesses on the subjects of inquiry. These hearings were continued into June following. It was not until June 3, 1970, that the subcommittee agreed to issue a subpena to Arnold S. Johnson, and did so on the obvious basis that as a member of the Steering Committee of New Mobe and a top functionary of the Communist Party he possessed information relevant and material to the subjects under inquiry. He was summoned to appear before the subcommittee on June 11, 1970. He appeared with counsel on the day for which he was summoned, was called as a witness and asked to be sworn or take affirmation to testify. He refused to do so.

As a basis for his refusal, he alleged two principal grounds. The first was that the committee was not authorized to subpena witnesses and compel testimony unless and until the committee made a determination that New Mobe was an organization which fell within the purview of House rule XI. He alleged that the committee had no evidence before it to support a determination that New Mobe was an organization that advocates or seeks the violent overthrow of the Government, or incites to violence. The second ground for his refusal was that the committee could not compel Johnson to disclose, as he said, "the political affiliations of persons" that the staff studies alleged are members of the Communist Party USA. This, he said, was precluded by a recent decision of the U.S. Court of Appeals for the District of Columbia Circuit in the case of *Boorda* v. *Subversive Activities Control Board*, 421 F. 2d 1142 (1970), with respect to which certiorari was denied by the Supreme Court on April 20, 1970.

These objections were correctly overruled by the subcommittee. Moreover, a reference to the record of the proceedings will reveal that the subcommittee was very patient with the witness, treated him fairly, and endeavored to explain to him the basis for the subcommittee's action in overruling his objections. He was further apprised that his failure to be sworn would be contemptuous and that appropriate proceedings might be recommended and instituted against him to seek a citation for contempt of Congress. He was repeatedly urged to be sworn, and was advised that if he did so it would not prejudice any objections he may make to the proceedings or preclude him from making objections to specific questions or areas of inquiry at that time. Nevertheless, Johnson persisted in his refusal and subsequently at a meeting of the subcommittee, held June 24, 1970, attended by all members thereof, the subcommittee unanimously resolved to report his refusal to the full committee with the recommendation that he be proceeded against as provided by law.

We believe beyond any reasonable doubt that the rulings of Chairman Edwards and the subcommittee upon the objections interposed by counsel on behalf of Mr. Johnson were correct. Indeed, from our examination of the record and of established precedents, it appears to us that Johnson was grasping at straws to avoid his duties as a witness, and was clearly in willful contempt of the House.

With respect to Johnson's first argument that the committee could not subpena him or others and compel testimony unless and until the committee had made a determination that New Mobe was an organization that advocates or seeks the violent overthrow of the Government or incited to violence, I would point out that no such positive or conclusive determination was required to be made to support the investigatory process and the subpena which was issued to Johnson. As was said in *Barenblatt* v. *United States*, 360 U.S. 109, 130 (1959):

> This position rests on a too constricted view of the nature of the investigatory process, and is not supported by a fair assessment of the record before us. An investigation of advocacy of our preparation for overthrow certainly embraces the right to identify a witness as a member of the Communist Party . . . and to inquire into the various manifestations of the Party's tenets. The strict requirements of a prosecution under the Smith Act . . . are not the measure of the permissible scope of a congressional investigation into "overthrow," for of necessity the investigatory process must proceed step-by-step.

The fact that a legislative investigation, or any investigation, must proceed "step by step" was again reiterated in *Gibson* v. *Florida Legislative Committee*, 372 U.S. 539, 543 (1963).

Certainly if one were to accept Johnson's argument, neither this committee nor any other investigative agency, including an investigatory grand jury or even the courts of law, could function. If a prior positive or conclusive determination must be made with respect to the very facts under inquiry, then, of course, no investigation could get off the ground. Can these facts be obtained without investigation and compulsion of testimony or production of documents? If complete and adequate information could be obtained by other means, that would be very nice, but experience has shown that this is not practicable. Many individuals, frequently those most knowledgeable of the facts, will not testify except under compulsion. Hence the Supreme Court has repeatedly rejected the principle for which Johnson contends.

In *Uphaus* v. *Wyman*, 360 U.S. 72 (1959), a case directly in point, the attorney general of New Hampshire was constituted as a one-man legislative investigating committee by joint resolution of the legislature. The resolution directed him to investigate violations of the State subversive activities act, and to determine whether subversive persons were then in the State. In language similar to our House rule XI, a subversive person was defined in the acts as one who commits or aids in the commission, or advocates by any means the commission, of any act intended to overthrow, destroy, or alter or assist in the overthrow, destruction, or alteration of the constitutional government of the State of New Hampshire by force or violence. On this authority, the attorney general conducted an investigation of an organization named World Fellowship, Inc., which maintained a summer camp in the State of New Hampshire. Possessed of information that several of the speakers and guests at World Fellowship either had been members of the Communist Party or had connections or affiliations with it or with one or more organizations cited as subversive or Communist controlled by the Attorney General of the United States, he issued a subpena to one Uphaus requiring him to produce the names of all persons who attended the camp during 1954 and 1955. Uphaus refused to do so on the claim that the attorney general was precluded from compelling the production of documents under the due process clause of the 14th amendment. In upholding his conviction for contempt, the Court did so on the basis that, possessed of such information as aforesaid, the attorney general "had valid reason to believe" that speakers and guests at World Fellowship "might be" subversive persons within the meaning of the New Hampshire act; that although the "nexus" between World Fellowship and subversive activities might not be conclusive, it was sufficiently "relevant" to support the attorney general's action. The Court said:

> Certainly, the investigatory power of the State need not be constricted until sufficient evidence of subversion is gathered to justify the institution of criminal proceedings.

See also Gibson against Florida Legislative Committee, supra.

That the requisite nexus existed between New Mobe and subversive or Communist activities, has been adequately established on the record. Moreover, on the basis of relevant information in its possession, there is no doubt that the committee was fully justified and had probable cause in issuing the subpena to Arnold Johnson. As a top functionary in the Communist Party and a member of the Steering Committee of New Mobe, he would most certainly be in a position to provide material and relevant information with respect to subjects under inquiry set forth in the committee resolution of December 10.

Johnson's second and remaining objection that the decision of the court of appeals in Boorda against SACB precluded any interrogation which, as he says, would disclose the political affiliations of persons, that is, his membership and that of others in the Communist Party, is likewise without substance. The first amendment objection thus raised has, in the context of congressional investigation, been repeatedly overruled by the Supreme Court. It was said by Mr. Justice Harlan in Barenblatt, supra, at page 128:

> This Court in its constitutional adjudications has consistently refused to view the

Communist Party as an ordinary political party. . . . Similarly in other areas, this Court has recognized the close nexus between the Communist Party and violent overthrow of the Government.

Thus in Barenblatt, and subsequent cases where first amendment objections were raised in the context of congressional investigations into Communist Party membership or activities, contempt convictions were upheld and the first amendment claim was expressly rejected. *Wilkinson* v. *United States*, 365 U.S. 399 (1961); *Braden* v. *United States*, 365 U.S. 431 (1961). See also *Communist Party* v. *SACB*, 367 U.S. 1 (1961).

Nor is the case of Boorda which he cites in point. In that case the court was not dealing with a question of compulsion of testimony for legislative purposes. Involved was an extraneous question of the constitutionality of those provisions of the Subversive Activities Control Act which authorized determinations with respect to membership of individuals in Communist-action organizations. It is true that in Boorda the court held that the disclosure of Communist Party membership for the purposes of that act was constitutionally protected by the first amendment, "except for those who join with the 'specific intent' to further illegal action." However, in citing that case, Mr. Abt, counsel for Mr. Johnson, failed to disclose that the court expressly stated that principles applied in that case were not to be taken as applicable to legislative investigations. Chief Judge Bazelon, writing for the court in Boorda, said, and I quote:

> We are not dealing here with a legislative investigation the primary purpose of which is to inform Congress with respect to matters properly within its concern. In such cases, some disclosure to the public may be justified as a necessary incident of disclosure to Congress. (Footnote 23.)

Finally, in any event, it should be observed that Johnson's objection to any disclosure of Communist Party membership, either his own or that of others, provided no basis for his refusal to be sworn as a witness or to quash the subpena. His objection at this point was speculative at best and raised no controversy. No such questions had been asked of him. Moreover, his refusal to be sworn precluded not only such interrogation, but interrogation on other relevant subjects as well, to which this objection was not applicable. Clearly, as a member of the Steering Committee of New Mobe, he was in a position to give relevant information on other subjects under inquiry independently of testimony as to his membership or that of others in the Communist Party. Hence, as the chairman of the subcommittee properly advised him, the appropriate time for Johnson to raise any constitutional claim for refusal to answer particular questions, was when and if they were propounded. The subcommittee would then be in a position to consider and rule upon his objections to specific questions in the context of his general interrogation.

This, Mr. Speaker, is a clear case of contempt. I therefore urge the House to act favorably on the resolution.

A synopsis of information follows:

SYNOPSIS OF INFORMATION IN COMMITTEE RESEARCH STUDY OF SUBVERSIVE INVOLVEMENT IN THE ORIGIN, LEADERSHIP, AND ACTIVITIES OF THE NEW MOBILIZATION COMMITTEE TO END THE WAR IN VIETNAM AND ITS PREDECESSOR ORGANIZATIONS

The New Mobilization Committee To End the War in Vietnam is, in its own words, "a broad coalition of organizations and individuals whose purpose is to gain an immediate end to the war in Vietnam through immediate and total withdrawal of American men and materiel." The Mobe regards all United States proposals for peace in Vietnam as fraudulent, thinly veiled demands for the absolute surrender of Hanoi and the Provisional Revolutionary Government to the "fascist" forces supported by the United States in South Vietnam.

Study of official Mobe pronouncements discloses that the official stance of the coalition's leadership is militantly pro-Hanoi and anti-United States. The Mobilization's program calls for a "unilateral decision for withdrawal" by the United States, to be followed by "reparations to the Vietnamese people for the damage the United States has done to their country."

Professor Sidney M. Peck, a national co-chairman of New Mobe and a former member of the Wisconsin State Committee of the Communist Party, U.S.A., has stated:

"We want an end to the war—a war that is a war of intervention and aggression—and we want the complete and total withdrawal of American forces from Vietnam. If that results in a victory of the National Liberation Front, we are pleased with that result because that would in effect be the wishes of the Vietnamese people."

Another New Mobe co-chairman, Professor Douglas Dowd, has said:

"One of the tensions that we've had to work out within the New Mobilization Committee is that the people who do the organizing for this kind of thing, almost all of them, really feel that not only the war should end but that if there had to be a side in that war I think most of us feel we would be on the other side."

The New Mobilization Committee functions today as the lineal descendant of the November 8 Mobilization Committee, formed in Cleveland, Ohio, on September 10–11, 1966. At a subsequent conference in Cleveland on November 26–27, 1966, the group reconstituted itself as the Spring Mobilization Committee To End the War in Vietnam. This group, which organized mass anti-Vietnam war protests in New York and San Francisco on April 15, 1967, was cited as communist-dominated by the House Committee on Un-American Activities in its March 31, 1967, report on the *Communist Origin and Manipulation of Vietnam Week.*

After a May 20–21, 1967, National Anti-War Conference in Washington, D.C., the Spring Mobilization Committee to End the War in Vietnam became known officially as the National Mobilization Committee To End the War in Vietnam. The primary projects organized by the National Mobe were the October 21, 1967, march on the Pentagon in Washington, D.C.; the August 1968 violent demonstrations in Chicago during the Democratic National Convention; and the January 1969 Counter-Inaugural demonstrations in Washington, also marked by violence.

The New Mobe was formally established at a national conference of antiwar groups and individuals in Cleveland, Ohio, during the weekend of July 4, 1969. This conference, hosted by the Cleveland Area Peace Action Council, a key Mobe affiliate formerly led by Peck, was attended by several hundred delegates from around the United States. A large percentage of the delegates were members of the Communist Party, U.S.A.; the Trotskyist communist Socialist Workers Party; the Young Socialist Alliance, youth and training section of the SWP; and the Student Mobilization Committee to End the War in Vietnam, an organization controlled by the YSA.

The conference formulated a program known as the Fall Offensive, designed to serve as a focal point for groups around the nation in organizing a series of anti-Vietnam war activities culminating in mass rallies and marches in Washington and San Francisco on November 15, 1969. The Student Mobilization Committee, Youth Socialist Alliance, and Socialist Workers Party played crucial roles both in setting up the New Mobe and in staging the Fall Offensive.

In addition, as shown by original documents disseminated by such international communist "peace" organizations as the Stockholm Conference on Vietnam and the World Peace Assembly, both projects of the Soviet-controlled World Peace Council, as well as by official statements made by communist officials and organizations in Vietnam, the New Mobilization Committee has operated from its inception with significant international communist support.

In recent months, activities of the New Mobilization Committee have taken on a broader complexion. Instead of the mass marches favored by the Trotskyists, led by the SWP and YSA, the Mobe has shifted its emphasis to more localized activities such as demonstrations at Selective Service offices during March and at Internal Revenue Service offices across the country on April 15, 1970. The Trotskyists see this change in emphasis as a diminution of the Mobe's effectiveness, which, they feel, can be maintained only by consistently calling for and organizing mass national mobilizations against the war and for the withdrawal of American troops.

Despite this, however, SWP and YSA leaders have remained among the active participants in Mobe's activities; and, as in the past, the YSA-controlled Student Mobilization Committee is rendering full support and providing crucial organizing abilities for the Mobe's program.

Two of the chief participants in the New Mobe coalition are the Student Mobe and the Vietnam Moratorium Committee. The latter group is an organization which, while continuing to support Mobe activities nationwide, has also branched out into more specifically political activity. The Mobe sees the different emphases of these organizations as complementary rather than competitive. An information sheet circulated prior to the November 15 demonstrations stated:

The leadership of the three groups sees the activities of the others as complementary [sic] to its own. In other words, the activities of one organization is [sic] in no way seen as contradicatory to the others, neither are the activities 'competitve.' Clearly, there is a need for viable anti-war activity moving forward on various levels and under various operating procedures. Thus, the Vietnam Moratorium Committee organizes on the local level for strictly local activity; the New Mobilization Committee organizes to bring people to Washington on specific days; and the Student Mobilization Committee organizes students on campuses for activities there and for the Washington March.

Though some of the emphases have changed, as noted above, this description of the interrelationship among the three primary organizations remains generally accurate.

Some of the New Mobe's primary affiliates, which in turn function as major regional coalitions of local anti-war groups, are:

(1) the Fifth Avenue Vietnam Peace Parade Committee, New York Mobe office led by David Dellinger, a national co-chairman of Mobe and self-identified non-Soviet communist;

(2) the Chicago Peace Council, headed by Sylvia Kushner, a member of the Communist Party, U.S.A.;

(3) the Peace Action Council of Southern

California, a Los Angeles-based group led by former Southern California District CPUSA official Irving Sarnoff;

(4) the New Mobilization Committee (West), headquartered in San Francisco and led by Terence Hallinan, a leader in the CPUSA-controlled W.E.B. DuBois Clubs of America and brother of CPUSA official Matthew Hallinan; Professor Donald Kalish, who is self-admittedly far to the left of the Communist Party; and Dr. Carleton Goodlett, a member of the Presidium of the Soviet-controlled World Peace Council;

(5) the Bay Area Peace Action Council, formerly GI-Civilian Alliance for Peace, also headquartered in San Francisco, and led by people close to the SWP and YSA;

(6) the Cleveland Area Peace Action Council; and

(7) the Detroit Coalition to End the War Now, an organization under SWP influence, led primarily by members and consistent supporters of the SWP and its front organizations.

One of the chief organizational tenets to which the Mobe's leadership has adhered is that of nonexclusion. This principle, which has remained fundamental to Mobe thinking since the founding of Mobe's first predecessor in September 1966, means simply that communists and non-communists must be welcomed into the coalition on an equal footing, the goal of the policy being the creation of the broadest possible united front of the left against the war in Vietnam. Thus, although a number of pacifist and other groups have been involved in Mobe activities, so also have the following:

(1) the Communist Party, U.S.A.;

(2) the W.E.B. DuBois Clubs of America, official CPUSA youth front until the founding of the Young Workers Liberation League in Chicago during February 1970;

(3) the Socialist Workers Party, largest and oldest Trotskyist communist group in the United States;

(4) the Young Socialist Alliance, youth and training section of the SWP;

(5) the Student Mobilization Committee, controlled by members of the YSA;

(6) the Workers World Party, a dissident Trotskyist group formed in 1959 by former members of the SWP;

(7) Youth Against War and Fascism, youth arm of the WWP;

(8) the American Servicemen's Union, founded and led by Andrew Stapp, a member of Youth Against War and Fascism;

(9) the GI-Civilian Alliance for Peace, an organization led principally by members of the SWP, YSA, and SMC;

(10) the Committee of Returned Volunteers, an organization of former Peace Corps workers who support an American defeat and communist victory in Vietnam;

(11) the International Longshoremen's and Warehousemen's Union, which has long been under the control of identified members of the CPUSA and which has participated actively in West Coast Mobe affairs;

(12) Women Strike for Peace, a pro-Hanoi organization characterized by the House Committee on Un-American Activities in 1967 as one "which, since it was first formed in the fall of 1961, has enjoyed the complete support of the Communist Party";

(13) the Black Panther Party, a militant, violence-oriented revolutionary group;

(14) Students for a Democratic Society, particularly the Worker-Student Alliance and Revolutionary Youth Movement II factions; and

(15) Veterans for Peace in Vietnam, founded during 1966 in Chicago by veteran Communist Party member Leroy Wolins.

The national leadership of the New Mobilization Committee includes several key activists who have been shown either by public source data or by committee investigation to be or to have been members of such diverse communist groups as the Communist Party, U.S.A.; W.E.B. DuBois Clubs of America; Labor Youth League; Revolutionary Workers League; Socialist Workers Party; Young Socialist Alliance; and Student Mobilization Committee. (See first attached chart.)

The first chart also includes David Dellinger, one of the most important and influential Mobe leaders and a man who has proclaimed himself to be a non-Soviet type communist, and Otto Nathan, New Mobe steering committee member who has been identified as having been a member of the Communist Party of Germany and who refused to tell the House Committee on Un-American Activities in 1956 whether he was then or had ever been a member of the Communist Party.

Not included on the chart are Mobe co-chairman and steering committee member Donald Kalish, who has described himself as being far to the left of the Communist Party, and Irving Benin, Mobe steering committee member and staff employee of the self-described "independent radical newsweekly" *Guardian*.

The second chart shows the major recent contacts of Mobe leaders with international communist front organizations and conferences, as well as participation in meetings with representatives of the communist North Vietnamese and National Liberation Front.

The third chart shows some of the New Mobilization Committee's major affiliated groups, especially those organizations which serve as regional and local co-ordinating agencies in the same manner in which the Mobe functions on a national level.

[8] Quebec—Meeting with representatives of North Vietnam, the NLF, and various peace groups, Quebec, Canada, Jan. 31, 1970.
[9] WPC BC—World Peace Council meeting, Vancouver, British Columbia, Canada, Feb. 7–8 1970.

Mr. KOCH. Mr. Speaker, will the gentleman yield?

Mr. ICHORD. I yield to the gentleman from New York (Mr. KOCH).

Mr. KOCH. I thank the gentleman for yielding.

What distresses me about proceedings of contempt in this case is this: I am someone who has criticized the New Mobilization leadership, or some of the members of that leadership and some of their announced objectives, but I must say to the gentleman even though I have criticized the New Mobe I have marched in peace parades that the New Mobilization has conducted up Fifth Avenue in New York City and in Washington, D.C. when that was the only group that was conducting demonstrations in opposition to our involvement in the Vietnam war.

Mr. ICHORD. Let me say to the gentleman from New York, I am quite sure many sincerely motivated people have participated in the so-called peace demonstrations of the New Mobilization committee, but let me make it clear that this gentleman is publicity director of the Communist Party U.S.A., and he is also a member of the steering committee of the New Mobilization committee.

Considering the responsibilities of the House Committee on Internal Security, I believe it is quite clear that the gentleman had the duty, being a member of the steering committee, to give the committee of the House the benefit of his testimony as to the extent of his involvement as an officer of the Communist Party U.S.A. in New Mobilization activities as well as the involvement of the Communist Party U.S.A.

The SPEAKER pro tempore. The time of the gentleman from Missouri has again expired.

Mr. ICHORD. Mr. Speaker, I yield myself 1 additional minute.

Mr. KOCH. What distresses me is that what in effect is happening as a result of this kind of contempt citation is that there is an attempt to dissuade people just by what you are doing from participating in antiwar activities. That may not be the intention of the gentleman but it has that consequence and it is a form of intimidation and has the effect of chilling dissent.

Mr. ICHORD. Let me answer the gentleman by saying that I do not question the sincerity or the integrity of the gentleman from New York. I do disagree very strongly, however, with the underlying philosophy he expresses. There is no intention on our part to deter any person by this proceeding. We seek only to uphold the dignity and integrity of the processes of the House.

We do have subversive organizations and subversives within the United States. We have many, many laws on the books dealing with subversion. Granted, many of them are ineffective.

Contrary to some of the opponents of investigating committees, as I mentioned a while ago, we are not actually penalizing Johnson by this proceeding here.

The SPEAKER pro tempore. The time of the gentleman from Missouri has again expired.

Mr. ICHORD. Mr. Speaker, I yield myself 1 additional minute.

We use the courts to enforce the contempt powers of the House of Representatives.

I will say this: This is the first contempt citation the House Committee on Internal Security has brought before this body. I believe that we should be very careful in bringing these citations before the body. I believe we should make certain that a clear case of contempt does lie.

In viewing the facts of this case, I would say that if the courts find as a matter of law that no contempt lies in this case, I would be in favor of recommending to this body that we use the inherent power of the House of Representatives to enforce our processes.

Mr. KOCH. Mr. Speaker, if the gentleman will yield, if there are people in the New Mobe—and there may very well be—who have committeed crimes, then indict them. Get the U.S. attorneys to use their offices.

Instead what you are doing, I suggest, sir, is intimidating and chilling dissent by saying that the Congress is going to investigate peace groups opposing our continued involvement in Indochina. This is probably the first of many such investigations and that is what I fear.

The SPEAKER pro tempore. The time of the gentleman has again expired.

Mr. ICHORD. Mr. Speaker, I yield myself 1 additional minute.

Mr. Speaker, nothing could be further from the truth. I disagree completely with the philosophy expressed by the gentleman from New York. I think this is a part of the permissive philosophy which has brought about a lot of the trouble we are experiencing today. We can ill afford to be led to refrain from taking any steps to deter subversive manipulation of organizations because of the fear that some people might be dissuaded from exercising their rights of free association.

Mr. Speaker, I now yield to the gentleman from Ohio, the ranking member of the House Committee on Internal Security (Mr. ASHBROOK), 5 minutes.

Mr. ASHBROOK. Mr. Speaker, as a member of the House Committee on Internal Security which has assigned a subcommittee to investigate the extent of possible Communist involvement in the New Mobilization Committee to End the War in Vietnam, I rise to strongly urge that Arnold Johnson be cited for contempt of Congress.

Before the subcommittee decided to call Mr. Johnson as a witness, it had received a thoroughly documented report on his connections with the so-called peace movement in the United States. I submit for the record, a summary of the information respecting Mr. Johnson's relationship to the New Mobe and its predecessors during the period of 1965 to 1970. Any notion that he, as a leader of the CPUSA, was only peripherally interested in New Mobe is convincingly dispelled by this chronicle of his active participation in those "peace" action groups that culminated in the formation of New Mobe.

A summary follows:

SUMMARY REGARDING ARNOLD JOHNSON

(1) Johnson served as a member of the steering committee of an organization known as the National Coordinating Committee to End the War in Vietnam, according to FBI Director Hoover testifying before the House Committee on Appropriations in February 1967. Hoover stated that the steering committee of the NCCEWV included representatives of a number of subversive organizations. The NCCEWV was pro-North Vietnam and pro-Vietcong, according to its own pronouncement. It was a group which attempted to serve as a unifying factor in the faction-ridden anti-Vietnam war movement. NCCEWV was led by Frank Emspak, son of a deceased member of the Communist Party, U.S.A., and participant in meetings of the CPUSA's official youth front, the W.E.B. DuBois Clubs of America. The NCCEWV was a predecessor, though not a direct one, of the New Mobe.

(2) The first direct predecessor of the New Mobe was the November 8 Mobilization Committee, another Hanoi-line group led by the late Rev. A. J. Muste, a prominent pacifist and communist sympathizer. The November 8 Mobe was formed in Cleveland, Ohio, in September 1966 at a conference initiated by Cleveland professor Sidney M. Peck, a former member of the Wisconsin State Committee of the CPUSA. At various times, Peck was active with such party-controlled groups as the American Youth for Democracy (AYD), Wisconsin Progressive Party, and National Committee to Abolish the House Un-American Activities (NCAHUAC). In 1965, Peck collaborated with members of the Socialist Workers Party (SWP) in founding the Cleveland Committee to End the War in Vietnam (CCEWV). Evidence in HCIS files indicates an extraordinarily high degree of communist participation in the November 8 Mobe. When, on November 26–27, 1966, the November 8 Mobilization Committee met in Cleveland to decide the group's future course, Arnold Johnson attended as a representative of the CPUSA.

(3) As a result of the November 26–27, 1966, Cleveland meeting, the November 8 Mobilization Committee became the Spring Mobilization Committee to End the War in Vietnam, the group which organized the massive protests against the Vietnam War in New York and San Francisco on April 15, 1967. Spring Mobe was cited as communist-dominated by the Committee on Un-American Activities on March 31, 1967, in the report on the *Communist Origin and Manipulation of Vietnam Week*. The conference resolution reconstituting the group as the Spring Mobe was signed by some 40 people, many of them members of the Communist Party and Socialist Workers Party. Among the signers of this document was Arnold Johnson.

(4) On November 27, 1966, the temporary steering committee for the Spring Mobilization met in Cleveland to lay plans for the group. At this session were numerous members of the CPUSA and SWP. Among the CPUSA members present was Arnold Johnson.

(5) The April 15, 1967, demonstrations in New York and San Francisco were ardently supported by virtually every major communist group in the United States. Both the CPUSA and SWP played major roles in organizing support for this action. Among the numerous members of the CPUSA who lent their stated support was Arnold Johnson.

(6) On May 20–21, 1967, the Spring Mobe conducted a National Anti-War Conference in Washington, D.C. This conference, attended by some 700 delegates, 300 of them members of the CPUSA, DCA, SWP, YSA, or Youth Against War and Fascism (YAWF, official youth arm of the Trotskyist communist Workers World Party), decided to organize a mass march on Washington on October 21, 1967, to protest the war in Vietnam. Subsequent to this meeting, the Spring Mobe came to be known as the National Mobilization Committee To End the War in Vietnam. The CPUSA participated actively in organizing this demonstration. It also had its official contingent which marched under its own banner, led by several top party officials, among them Arnold Johnson.

(7) During 1968, the National Mobe's major project was the disruption of the August 1968 Democratic National Convention in Chicago. The CPUSA and several of its major front groups played an important part in helping to organize the demonstrations. At a September 14, 1968, administrative committee meeting held by the Mobe in Washington, D.C., Arnold Johnson was present as a representative of the Communist Party.

(8) In July 1969, the National Anti-War Conference was held in Cleveland, Ohio. This conference, again initiated by Sidney Peck, formed the New Mobilization Committee To End the War in Vietnam to carry on the work of the National Mobe. It was at this meeting, called formally by a coalition of movement leaders, most of them connected with National Mobe, that the so-called "Fall Offensive" was formulated. According to official conference delegate lists and steering committee rosters, Arnold Johnson participated actively in this conference both as a delegate from the CPUSA and as a member of the important conference steering committee.

(9) According to official lists circulated in late July 1969, September 17, 1969, and November 1969, Arnold Johnson served as a member of the New Mobe steering committee.

(10) An official New Mobe document lists Arnold Johnson as one of the participants in a New Mobe steering committee meeting held August 17–18, 1969, in Philadelphia, Pennsylvania. The purpose of this meeting was planning for the Fall Offensive.

(11) Official printed minutes of the session reflect that Arnold Johnson participated in a steering committee meeting in Washington, D.C., on September 14, 1969. Johnson was named to (1) the committee to plan the program for the November rally, (2) a committee on so-called "International Aspects," and (3) a committee on "Labor Participation."

(12) According to an official list dated September 26, 1969, Arnold Johnson of the CPUSA served as a member of the New Mobe Washington Action Committee, identified by HCIS witness Irwin Bock and by the Committee's staff study as the official body within the New Mobe that was charged with organizing the November 1969 Washington demonstrations.

(13) According to the staff study, page 45, Arnold Johnson was a participant in a New Mobe steering committee meeting in Cleveland, Ohio, on December 13–14, 1969. The program adopted at this meeting, as reiterated in the staff study, suggests an increase in the CPUSA's importance within the Mobe coalition, together with a corresponding decline in influence for the SWP and its allies. The HCIS staff study, page 45, also identifies Arnold Johnson as a member of the New Mobe executive committee.

(14) The staff study, page 47, reflects that Arnold Johnson was in attendance at a meeting held in Quebec, Canada, on January 30–31, 1970. At this meeting, which was attended by several representatives of United States "peace" groups, as well as by representatives of the World Peace Council and North Vietnam, there were several items discussed, most of them part of the New Mobe's Spring Offensive program as formulated at the December steering committee meeting in Cleveland. This meeting is significant because it demonstrates clearly the international communist ties of several movement activists, and it shows the attempt at coordination of programs with international communist elements.

(15) According to a New Mobe press release dated February 7, 1970, Arnold Johnson participated in a steering committee meeting held on that date in Washington, D.C.

(16) A New Mobe letterhead dated February 13, 1970, included Arnold Johnson's name in a list of members of the New Mobe national committee. The national committee is exactly the same in composition as the steering committee, with the exception of one additional name.

(17) According to *The Militant* (official publication of the Socialist Workers Party) for June 12, 1970, page 4, Arnold Johnson was present at a steering committee meeting held in Atlanta, Georgia, on May 23–24, 1970. At this meeting, it was decided to call a conference for the weekend of June 26–28, 1970, in Milwaukee, Wisconsin, to counterbalance another, rival conference called by the SWP and its allies for June 19–21, 1970, in Cleveland, Ohio. The *Militant* article states that Johnson generally supported the calling of the Milwaukee conference, but that he expressed reservations about total reliance on civil disobedience tactics and total abandonment of mass mobilization tactics.

(18) In a statement handed to the press after his refusal to testify before the HCIS on June 11, 1970, Johnson identified himself as "a member of the Steering Committee of New Mobilization as a representative of the Communist Party, U.S.A."

(19) Arnold Johnson was observed at the Strategy Action Conference in Milwaukee on Saturday, June 27, 1970, according to a confidential source. The CPUSA gave major support to this conference, pointedly downgrading the SWP's Cleveland meeting in favor of the multi-issue Milwaukee meeting.

Now, Mr. Speaker, Mr. Johnson would have us believe that he is a dedicated pacifist and that his own personal love of peace is the motivation behind his work with New Mobe's highest counsels.

Anyone who has studied the history of the CPUSA and Arnold Johnson's long history of association with the party in an official capacity knows full well that when he speaks of peace he thinks of a condition that contributes to America's humiliation or defeat—nothing more, nothing less.

Mr. Johnson wants peace for the people of the United States in the same sense that the Kremlin wanted peace for Czechoslovakia at the time of the invasion and occupation of that hapless country in 1968.

Some measure of the sincerity of Mr. Johnson's self-proclaimed dedication to peace in Vietnam may be better understood if we consider the manner in which the Soviet Union is furthering the interests of peace in the Middle East. Mr. Johnson's CPUSA is one of Moscow's handmaidens in advancing world communism's vision of peace—namely, a vision of victory for Red tyranny and the ultimate defeat and surrender of all who oppose Communist world conquest.

Mr. Johnson is not for peace in Vietnam any more than the late Ho Chi Minh was. Mr. Johnson is for a Communist victory in Vietnam and an American defeat there.

Neither Moscow nor the CPUSA are in favor of peace in the Middle East today. They seek only a Communist victory scored as the Arabs become subverted

through dependence on Moscow's support and Israel is worn down by a protracted war of fighting and terrorism, an arms race and meaningless negotiations.

With utter cynicism, Arnold Johnson—the elder statesman of American Communists who conveniently looks like anyone's grandfather—has addressed himself to all of his "dear" friends "in the peace movement" to help him fight this very request for a contempt citation.

On August 24, 1970, he used CPUSA stationery to write all of those who attended a then recent Milwaukee peace conference. His open letter states—and I now quote from it:

On August 13, five of the nine members of the House Internal Security Committee, voted to recommend that the U.S. Congress cite me for contempt because on June 11, when under subpoena to appear before the committee, I refused to be sworn and to testify before that present version of the Un-American Committee (HUAC) and challenged its right to subpoena me or anyone else in the New Mobilization Committee. My reasons for refusing to testify and for challenging the committee's authority are expressed in the enclosed statement which I issued at that time. Thus far I am the first and only member of the New Mobe to be subpoenaed. I believe my stand is valid and can halt the committee in its campaign against the peace movement. Therefore this is not a personal issue.

The House Committee plans to ask Congress to cite for contempt, when Congress returns on September 9. Any serious debate by a member of Congress can convince the Congress to reject the H.I.S.C. recommendation. I want to urge that these days be used to visit your Congressman when he or she is at home, and to send letters to her or him at House Office Building, Washington, D.C.—urging "Vote No" on the request to cite. This is a time when the H.I.S.C. should be abolished. That will be a blow to repression and will give more strength to the peace movement.

When Arnold Johnson says his appeal does not involve a personal issue he is correct. His fight is a Communist Party issue—a clearcut effort by CPUSA to challenge the Congress of the United States. Let me make one point clear. This vote today is not for or against the peace movement in America. By using the propaganda machinery and personnel of the entire peace movement in this Nation Arnold Johnson hopes for a Communist victory in his coldly calculated refusal to be sworn by a responsible committee which seeks information Mr. Johnson is best equipped to provide.

How bold is Mr. Johnson in this day and age to so blatantly ask all of his peace movement acquaintances to support the Communist Party in its campaign to thwart this Congress and the work of one of its committees.

I hope this House will give overwhelming support to the House Committee on Internal Security in meeting this flagrant challenge to the right of Congress to obtain information from a witness whose testimony would be so obviously germane to a subject under investigation.

I thank you, Mr. Speaker.

Mr. ICHORD. Mr. Speaker, I yield 5 minutes to the gentleman from Iowa (Mr. SCHERLE).

Mr. SCHERLE. Mr. Speaker, Arnold Johnson is a Communist. He is proud of it. He has also been in the forefront of those persons of various ideologies who have brought about a new creation called New Mobilization Committee To End the War in Vietnam or New Mobe.

Despite the fact that the Communist Party of the United States is avowedly determined to overthrow our constitutional form of government by any means at its disposal, the Supreme Court seems determined, in all its wisdom, to hold to a position that mere membership in the Communist Party is perfectly legal.

However, it has not ruled that Johnson, the Communist Party, or any other person or group has the right to defy Congress with immunity from prosecution.

Last June 11, Arnold Johnson, the public relations director of the Communist Party, U.S.A., chose to defy Congress by refusing to testify or even to be sworn in before the House Committee on Internal Security of which I am a member.

Mr. Speaker, this was a prime example of the contempt with which they regard our Congress, our form of government, our flag, and our heroic traditions as a nation. They would, quite simply, destroy our Republic. We must not allow this conquest.

As has been noted, Chairman ICHORD and a majority of committee members, after extensive study and deliberation, approved a committee probe into the so-called New Mobe.

Now we do not say that New Mobe was without any right to oppose the war in Vietnam. They have no corner on this market. Any citizen or group of citizens has that right. We all want that war brought to a speedy and honorable conclusion.

However, it was the intention of our committee to determine whether New Mobe was a legitimate group or whether it was a "front" and mouthpiece for the Communist Party in this country.

There was sufficient evidence that Arnold Johnson had been active in New Mobe from the time of its inception. The committee therefore sought to question him about this association.

If Johnson is proud of being a Communist, he should have welcomed the opportunity to testify before our committee. It would have furnished him with a platform from which to boast of his Communist Party membership and activity in New Mobe.

But Johnson, with barely concealed scorn, uttered defiance of Congress. I was present when he made his intentions known. I attempted, unsuccessfully, to explore his motivation. Johnson's defiance was an affront not only to the committee, but to the House of Representatives. It must not go unpunished. Outside the committee hearing room he lost no time in handing out to members of the news media a press release and subsequently holding an interview.

There was Johnson, arrogantly telling the press that he indeed is public relations director of the Communist Party and that, yes, he has long been active in New Mobe.

And he glowingly pronounced how this membership in the Communist Party serves to achieve peace and freedom and democracy. Yes, peace and freedom and democracy. The kind advocated by Joseph Stalin, Mao Tse Tung, and Kim Il Sung. There are millions of hapless people all over the world groaning under the yoke of that kind of "freedom."

Johnson's position against the war is not new. He was opposed to the Korean war because that war was also a determined effort to stop the spread of communism in Southeast Asia.

And he was against fighting the legions of Adolf Hitler, too, so long as Hitler and Stalin had their cozy nonaggression pact. But he danced to a different fiddler when Hitler invaded Johnson's beloved Russia. War was justified then, according to Johnson.

This body hardly needs to be reminded that the Communist Party, USA, operates under the direction and control of the Soviet Union, that the world communist movement, of which it is a vital part, has as its purpose the establishment of a Communist totalitarian dictatorship in the United States, and that the establishment of such a dictatorship has uniformly resulted in the supression of all individual rights and liberties. Furthermore, in carrying on their activities, such Communist organizations have operated through groups commonly known as "fronts."

Arnold Johnson and his associates in both the New and the Old Left are more severely dangerous than our foreign enemies. We have adequate military weapons to protect ourselves from foreign powers who would destroy us through direct aggression.

Contending with those who would topple us from within is another matter. Our very Constitution protects those who would destroy it.

Mr. Speaker, we must protect our Constitution from the Arnold Johnsons of this world. We must safeguard the authority, prerogatives, and dignity of this House.

So far as the present case is concerned, we do have a weapon of self-protection: the power to find Arnold Johnson in contempt of Congress and bring about his trial on that charge.

I strongly urge this great body to exercise that power. If we do not, it will only encourage additional attacks advocating the overthrow of this country by individuals hiding behind the cloak of our Constitution, to bolder and more aggressive efforts to bring this Nation to her knees.

Mr. SCOTT. Mr. Speaker, will the gentleman yield?

Mr. SCHERLE. I will be happy to yield to my colleague, the gentleman from Virginia.

Mr. SCOTT. I appreciate the gentleman yielding. Mr. Speaker, I rise only to commend the gentleman and the other members of the committee for bringing this matter to the attention of the House. There is no doubt that we have a permissiveness and lack of regard for orderly process in our society that needs to be corrected. Certainly it should not be permitted to come into the Halls of Congress or should a person with impunity be permitted to defy a committee of this House.

Mr. SCHERLE. I thank the gentleman.

Mr. EDWARDS of Louisiana. Mr. Speaker, committee Chairman RICHARD H. ICHORD has outlined in detail the background of the question concerning the contempt of Arnold S. Johnson. With the indulgence of my colleagues I want to examine briefly what is at issue.

Arnold Johnson, an acknowledged leader of the Communist Party in the United States, by refusing to testify—or even be sworn in—before a subcommittee of the House Committee on Internal Security is not merely challenging the authority of that committee. He is defying this House itself.

In February of 1969, Chairman ICHORD proposed that the committee staff make a careful and detailed study of certain groups that had by their activities indicated they were of a revolutionary nature, seeking the forceful overthrow of our constitutional government. Such organizations, of course, come within the committee's mandate.

The purpose of this was not to impugn any individual; it was simply to determine if certain organizations were, in fact, dedicated to overthrow of this Government by forceful means and if so, to ascertain the extent and seriousness of the threat so that legislation could be devised, if necessary.

Subsequently included in the committee study was the New Mobilization Committee To End the War in Vietnam. The committee staff was assigned the task of determining whether there was sufficient evidence of subversive influence in New Mobe to warrant a full-scale investigation and subsequent public hearings.

This preliminary study was not undertaken lightly or accomplished in haste. It was not until after exhaustive research, that the committee determined to hold public hearings and, if necessary, exercise its powers of subpena.

The staff compiled extensive data concerning New Mobe predecessors. The first was the November 8 Mobilization Committee, creation of the late Rev. A. J. Muste, prominent pacifist and longtime Communist sympathizer. The committee developed evidence that the November 8 Mobe had an extraordinarily high degree of Communist membership at the leadership level. Among them was Arnold Johnson, who attended an organizational meeting of this group in Cleveland on November 26–27, 1966.

The November 8 Mobe evolved into the Spring Mobilization Committee To End the War in Vietnam or Spring Mobe, which was cited as Communist-dominated by the Committee on Un-American Activities in 1967 in the report on Communist Origin and Manipulation of Vietnam Week. The conference resolution reconstituting the group November 8 Mobe as Spring Mobe was signed by some 40 persons, many of them members of the Communist Party and Socialist Workers Party—including Arnold Johnson.

Spring Mobe next became the National Mobilization Committee To End the War in Vietnam or National Mobe. A major project of National Mobe was the disruption of the August 1968 Democratic National Convention in Chicago. In September 1968 an administrative meeting of National Mobe was held in Washington, D.C., and Arnold Johnson was identified as being present.

Finally, in July of 1969, the leaders of National Mobe met in Cleveland in a coalition conference of movement leaders and formed the New Mobilization Committee To End the War in Vietnam, or New Mobe. According to official conference delegate lists and steering committee rosters, Arnold Johnson participated actively, both as a delegate representing the Communist Party and as a member of the conference steering committee.

A New Mobe document lists Arnold Johnson as one of the participants in a New Mobe steering committee meeting held in Philadelphia in August 1969, the purpose of which was to plan the fall offensive. According to official printed minutes of the steering committee meeting in Washington, D.C., in September 1969, Johnson was named to a committee to decide upon the program for the November rally, a committee on so-called international aspects, and a committee on labor participation. According to an official list dated September 26, 1969, Arnold Johnson served as a member of the New Mobe Washington Action Committee, identified by Irwin Bock, a committee witness, as the official body within New Mobe that was charged with organizing the November 1969 Washington demonstrations.

On April 6 of this year, Chairman ICHORD appointed me as chairman of a subcommittee to hold a series of hearings on New Mobe.

The first witnesses were Irwin A. Bock and Thomas West, Chicago police officers who as undercover agents infiltrated New Mobe. Bock eventually obtained a position as a member of the New Mobe Steering Committee.

Another witness was Louis Salzberg, a freelance photographer who had attended many New Mobe-connected rallies and demonstrations.

Information developed during the preliminary inquiry indicated that Arnold Johnson of New York City, who identifies himself as public relations director of the Communist Party, USA, was a member of the New Mobe's steering committee and had been active in formulating policy and strategy of New Mobe and its antecedents.

There was ample evidence to indicate that Arnold Johnson, an acknowledged leader of the Communist Party, was also a key figure in New Mobe. There was similar indication that many other New Mobe leaders either belonged to Communist-oriented groups or actively supported them. There was ample evidence to indicate that Arnold Johnson was most knowledgeable concerning policies and programs of New Mobe, and of Communist Party involvement, which would be particularly within his competence to furnish to the committee. Such information would have been most helpful in gaining a better understanding of the New Mobe.

So after an unproductive invitation to Johnson to give voluntary testimony before the committee, the subcommittee voted to authorize issuance of a subpena, directing his presence at a hearing.

Because Johnson had been quite open and public about his Communist Party and New Mobe affiliations, it was anticipated that he would decline to testify, It was expected that he would appear and forthrightly furnish relevant data to the subcommittee.

However, Arnold Johnson chose last June 11 to defy the committee and this Congress by not only refusing to testify before a congressional committee but by refusing to take the oath.

I feel fairminded men would have to conclude that the subcommittee was most reasonable and patient with Johnson, and the attorney who accompanied him, John Abt of New York City. I carefully explained my reasons for overruling his objections to giving testimony or taking the oath and informed him that failure to do so could be construed as an act of contempt for which I would recommend to the subcommittee and the full committee that he be cited for contempt of Congress.

Upon leaving committee chambers, Johnson lost his reticence and spoke freely to a large audience of news media representatives. He said that he is indeed—and I quote—"a member of the steering committee of New Mobilization as a representative of the Communist Party, U.S.A." He further stated in a prepared document that, "I have been active in the peace movement in this country for some 44 years and hold that my membership in the Communist Party since 1936 has only served to strengthen my devotion and dedication to the struggle for peace and democracy, freedom and social progress."

Mr. Speaker, Arnold Johnson's "struggle for peace and democracy, freedom and social progress" is carried out in behalf of the hammer and sickle of communism. That is the form of government that he and his Communist Party associates seek to impose on this country. I do not think we want or need Johnson's version of "social progress" in the United States.

Some of us have had the opportunity to witness at first hand this Communist social progress in Eastern Europe.

Many Americans have shed their blood to prevent the spread of such social progress in Korea and South Vietnam.

The citadel of traditional world communism is in the Soviet Union which bears responsibility for such noteworthy struggles for peace and freedom as we have witnessed in the cruel repressions in Hungary and Czechoslovakia.

Mr. Speaker, a foreign invader burned this Capitol, including this House in 1814. Now, in 1970, this House is threatened by foes inside the country who would like to, figuratively, if not literally, burn it to the ground and establish something quite different upon its ashes.

Those who seek the blessings of our Nation and the guarantees of our Constitution should defend and support the system which affords these blessings and guarantees. With equal logic, all who raise the umbrella of constitutional guarantees as citizens of this country are

required to support our Government. The proceedings of this Congress and those of its duly authorized commissions are governmental functions of the highest order. Therefore, Arnold Johnson was under obligation to testify and to impart pertinent knowledge and information so that this information and knowledge could be used by this Congress to determine course and action and the consideration of appropriate legislation to deal with the violence, revolution, and subversion in our country. Mr. Speaker, all throughout America loyal citizens, at personal sacrifice, are inconvenienced serving as members of juries, testifying before courts, commissions, and tribunals and have generally contributed to the legislative and judiciary process in government at all levels. If this service is required of and rendered by other citizens, certainly no less would be required of the Arnold Johnsons who apparently do not share our desire to see our Nation achieve the greatness our Founding Fathers destined for America.

The Congress owes it to loyal Americans everywhere to investigate fully the serious causes of revolution and violence in this country. The Committee on Internal Security has reason to believe that Arnold Johnson is privy to conversations and possesses information which would assist the Congress in that noble endeavor. We cannot allow him to flaunt the will of the Congress; we cannot tolerate a double standard. If there is to be liberty and justice for all, as indeed there must be, then each must assume the responsibility and discharge his obligation of rendering whatever service his individual talents, experiences, and circumstances make possible.

In the name of all loyal Americans, I urge this House to vote unanimously for passage of this resolution citing Arnold Johnson for contempt of Congress.

Mr. ICHORD. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore (Mr. SMITH of Iowa). The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. ASHBROOK. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Doorkeeper will close the doors, the Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 337, nays 14, not voting 78, as follows:

[Roll No. 312]

## EXPRESSING SUPPORT FOR THE INTERNATIONAL BIOLOGICAL PROGRAM

Mr. MILLER of California. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the joint resolution (H.J. Res. 589) expressing the support of the Congress, and urging the support of Federal departments and agencies as well as other persons and organizations, both public and private, for the international biological program, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the joint resolution.

The Clerk read the Senate amendment, as follows:

Strike out all after the resolving clause and insert:

"That (a) the Congress hereby finds and declares that the international biological program, which was established under the auspices of the International Council of Scientific Unions and the International Union of Biological Sciences and is sponsored in the United States by the National Academy of Sciences and the National Academy of Engineering, deal with one of the most crucial situations to face this or any other civilization—the immediate or near potential of mankind to damage, possibly beyond repair, the earth's ecological system on which all life depends. The Congress further finds and declares that the international biological program provides an immediate and effective means available of meeting this situation, through its stated objectives of increased study and research related to biological productivity and human welfare in a changing world environment.

"(b) The Congress therefore commends and endorses the international biological program and expresses its support of the United States National Committee and the Interagency Coordinating Committee, which together have the responsibility for planning, coordinating, and carrying out the program in the United States.

"(c) In view of the urgency of the problem, the Congress finds and declares that the provision by the United States of adequate financial and other support for the international biological program is a matter of first priority.

"SEC. 2. (a) The Congress calls upon all Federal departments and agencies and other persons and organizations, both public and private, to support and cooperate fully with the international biological program and the activities and goals of the United States National Committee and the Interagency Coordinating Committee.

"(b) For this purpose, the Congress authorizes and requests all Federal departments and agencies having functions or objectives which coincide with or are related to those of the international biological program to obligate or make appropriate transfers of funds to the program from moneys available for such functions or objectives and provide such other support as may be appropriate."

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. FULTON of Pennsylvania. Mr. Speaker, reserving the right to object, could I ask the gentleman from California, first, are there any authorized or appropriated funds conditional upon the passage of this legislation and, second, does the amendment that has been passed by the other body taking out the June 30, 1970, date have any particular effect, or does that action just bring the resolution up to date because the other body had not acted on it before June 30, 1970.

Mr. MILLER of California. The matter is now moot. It really strikes that out. There are no appropriated funds in this bill. It calls upon the Federal departments and agencies having functions or objectives which coincide with those relating to the international biological program to obligate and make appropriate transfers of funds from moneys available for such functions or objectives.

So, there is no money directly for this in the joint resolution.

Mr. FULTON of Pennsylvania. Therefore, any action taken by any governmental agency under this particular legislation will be from funds that are already authorized and appropriated to that agency?

Mr. MILLER of California. That is correct.

Mr. FULTON of Pennsylvania. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

The Senate amendment was concurred in.

A motion to reconsider was laid on the table.

## CONFERENCE REPORT ON S. 2264, COMMUNICABLE DISEASE CONTROL AMENDMENTS OF 1970

Mr. ROGERS of Florida filed the following conference report and statement on the bill (S. 2264) to amend the Public Health Service Act to provide authorization for grants for communicable disease control and vaccination assistance.

CONFERENCE REPORT (H. REPT. NO. 91-1462)

[To accompany S. 2264]

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 2264) to amend the Public Health Service Act to provide authorization for grants for communicable disease control and vaccination assistance, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows: That the Senate recede from its disagreement to the amendment of the House and agree to the same.

HARLEY O. STAGGERS,
JOHN JARMAN,
PAUL G. ROGERS,
WILLIAM L. SPRINGER,
ANCHER NELSEN,
*Managers on the Part of the House.*

RALPH W. YARBOROUGH,
HARRISON A. WILLIAMS, Jr.,

WM. B. SAXBE,
*Managers on the Part of the Senate.*

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 2264) to amend the Public Health Service Act to provide authorization for grants for communicable disease control and vaccination assistance, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

The Senate agreed to the amendment of the House.

HARLEY O. STAGGERS,
JOHN JARMAN,
PAUL G. ROGERS,
WILLIAM L. SPRINGER,
ANCHER NELSEN,
*Managers on the Part of the House.*

## INVESTMENT COMPANY AMENDMENTS ACT OF 1970

Mr. DELANEY. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1193 and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 1193

*Resolved*, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 17333) to amend the Investment Company Act of 1940 and the Investment Advisers Act of 1940 to define the equitable standards governing relationships between investment companies and their investment advisers and principal underwriters, and for other purposes. After general debate, which shall be confined to the bill and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interstate and Foreign Commerce, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Interstate and Foreign Commerce now printed in the bill as an original bill for the purpose of amendment under the five-minute rule. At the conclusion of such consideration, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions. After the passage of H.R. 17333, the Committee on Interstate and Foreign Commerce shall be discharged from the further consideration of the bill S. 2224, and it shall then be in order in the House to move to strike out all after the enacting clause of the said Senate bill and insert in lieu thereof the provisions contained in H.R. 17333 as passed by the House.

The SPEAKER pro tempore (Mr. PRICE of Illinois). The gentleman from New York (Mr. DELANEY) is recognized for 1 hour.

Mr. DELANEY. Mr. Speaker, I yield 30 minutes to the gentleman from Tennessee (Mr. QUILLEN) pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 1193 provides an open rule with 2 hours of general debate for consideration of H.R. 17333 to amend the Investment Company Act of 1940 and the Investment Advisers Act of 1940. The resolution also provides that it shall be in order to consider the committee substitute as an original bill for the purpose of amendment and that, after passage of H.R. 17333, the Committee on Interstate and Foreign Commerce shall be discharged from further consideration of S. 2224 and it shall be in order to move to strike all after the enacting clause of the Senate bill and amend it with the House-passed language.

The purpose of H.R. 17333 is to make comprehensive amendments to the Investment Company Act of 1940 for the first time in three decades. Amendments would also be made to the Investment Advisers Act and to other related securities statutes where necessary. In addition to updating the Investment Company Act in many respects and making numerous technical improvements in it, the bill would add a number of new provisions to provide additional safeguards and protections to public investors. Notable among these are the new standards provided in the bill for the measuring of sales charges and investment advisory fees. The bill also codifies a number of administrative positions which have been developed by the Securities and Exchange Commission in its administration of this regulatory statute.

The legislation would amend the Investment Company Act in the areas of sales charges, management fees, banking and insurance, fund holding companies, oil and gas funds, as well as fingerprinting due to the dramatic increase in recent years of thefts of securities.

The Investment Advisers Act would be amended to remove provisions of the act which now afford investment advisers to investment companies special exemptions from regulation. In this connection the Commission would be given broad

exemptive authority to administer the act in a flexible manner. Also, existing disciplinary controls over registered investment advisers would be strengthened by making them more comparable to the provisions of the Securities Exchange Act relating to broker dealers in securities and to the proposed amendments to the Investment Company Act.

Mr. Speaker, I move the adoption of House Resolution 1193 in order that H.R. 17333 may be considered.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 1193 makes in order for consideration of H.R. 17333 under an open rule with 2 hours of general debate.

The purpose of the bill is to amend the Investment Company Act of 1940 to add safeguards in order to protect the investing public. The bill also codifies many administrative positions developed by the Securities and Exchange Commission over the years.

The bill amends the act with respect to the sales commission charged to investors when purchasing shares of mutual funds. Many small investors purchase such funds by agreeing to invest a specific sum each month for a period of years. Present practice is to calculate the sales commission payable over the term of the contract and to apply 50 percent of the first year's payment toward the total sales commission. The remaining 50 percent is taken out in subsequent years. This results in one-half of the investor's payment the first year going solely to pay commissions; should he, for any reason, not complete his contract plan, he has paid sales commissions for fund shares which he, in fact, never purchased.

To resolve this situation the bill would permit the sales commissions to be taken out at a rate not to exceed 20 percent of any 1 year's payments for the first 4 years, and the average rate for the first 4 years of the sales contract could not exceed 16 percent.

As an alternative to this method, the current payment system could be retained but a refund provision would be required so that if at any time during the first year of an investment plan the investor redeems his interest, he would receive in cash the sum of the value of his account and an amount equal to that part of the excess paid for sales commissions over 20 percent of his gross payments.

The bill also deals with the question of management fees within the mutual funds industry. Almost all funds now operating do not manage their own investments. They contract with an investment adviser for fund management services. The fee is usually based upon a percentage of the fund's net assets and fluctuates with the value of the portfolio. Currently the only way a shareholder of the fund may challenge the fee paid to the management firm is by a suit alleging gross misconduct or abuse of trust. This procedure has been cumbersome and less than effective.

The bill will continue to permit performance fee agreements with respect to investment advisory contracts with: First, an investment company, second, a trust fund, or separate account if its assets exceed $5,000,000, and third, any person entering into a contract for investment advice relating to assets in excess of $1,000,000. The bill does however limit performance fees to those payment agreements based on the value of the assets under management averaged over a specific period of time and measured against an appropriate index.

The bill amends the act by providing that the investment-management adviser stands in a confidential relationship to the mutual fund. Any bona fide shareholder could bring suit charging breach of such relationship by "clear and convincing evidence."

Further, the bill sets forth procedures to be followed by banks if they operate what have been called a bank mutual fund. At the moment it appears that existing banking laws do permit this. Therefore, the reported bill sets forth the requirement that such operations shall be subject to the regulatory pattern of the Investment Company Act, and the administrative requirements set out by the Security and Exchange Commission in March 1966. These regulations cover both banks and savings and loan institutions.

The Security and Exchange Commission would like to see amendments to the bill to bring it into line with the Senate reported bill which it believes more surely protects investors.

Mr. Speaker, I have no further requests for time, but I reserve the balance of my time.

Mr. DELANEY. Mr. Speaker, I have no further requests for time.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. MOSS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 17333) to amend the Investment Company Act of 1940 and the Investment Advisers Act of 1940 to define the equitable standards governing relationships between investment companies and their investment advisers and principal underwriters, and for other purposes.

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 17333, with Mr. CHARLES H. WILSON in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from California (Mr. Moss) will be recognized for 1 hour and the gentleman from Illinois (Mr. SPRINGER) will be recognized for 1 hour.

The Chair recognizes the gentleman from California (Mr. Moss).

Mr. MOSS. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman and members of the committee, H.R. 17333 would amend the Investment Company Act of 1940 and the Investment Advisers Act of 1940 to define the equitable standards governing relationships between investment companies and their investment advisers and principal underwriters. This bill would make comprehensive amendments to these important Federal regulatory statutes for the first time since their passage 30 years ago. It is understandable that after three decades, technical improvements and updating are necessary and desirable. The bill would not only update the Investment Company Act and make numerous technical improvements in its provisions, but it would also codify many administrative positions which the Securities and Exchange Commission has developed in the course of its administration of this statute. These purposes alone would justify enactment of H.R. 17333. However, perhaps of greatest significance is the additional safeguards and protections to public investors which this legislation will provide.

Investment company securities have been and continue to be an important vehicle of investment for millions of Americans. These securities have provided and should continue to provide an avenue of investment for investors interested in putting their savings in a broadly diversified and professionally managed investment portfolio. Investments in this medium have increased from $450 million at the end of 1940 to $53 billion in 1969. It is important that this investment vehicle continue to be available to investors. The bill before us is designed to accomplish that purpose with the safeguards and protections deemed necessary under our Federal regulatory structure.

Mr. Chairman, the legislation which we consider here today has been thoroughly and carefully considered and is based on studies which date back as much as 10 years. In 1958 the Commission engaged the Wharton School of Finance of the University of Pennsylvania to make a study of mutual funds. That study examined the rapid growth of mutual funds and pointed to the resulting emergence of problems not significant when the act was considered and passed in 1940. Subsequent to the Wharton School study, the Commission directed attention to certain aspects of mutual funds, particularly selling practices, in its special study of securities markets issued by the SEC in 1963 pursuant to a congressional directive.

The report which bears most directly upon the legislation before us today, however, is the Securities and Exchange Commission's report on the public policy implications of investment company growth issued by the Commission on December 2, 1966. That report, with its accompanying legislative recommendations, became the basis for bills introduced in the 90th Congress. Since no legislation was enacted in that Congress, bills were again introduced in the present Congress to deal with this important subject matter. In May 1969, the other body reported and passed a bill to amend

the Investment Company Act. Our Subcommittee on Commerce and Finance held extensive hearings on this subject in November and December 1969. All interested parties were given an opportunity to be heard, and the subcommittee followed the hearings with extensive deliberations. The full committee considered the matter further and ordered reported the bill which is before us today.

Almost 4 years ago I assumed the chairmanship of the Subcommittee on Commerce and Finance. One of the major pieces of legislation pending before the subcommittee at that time was the mutual fund bill and I am delighted that we are finally able to bring it to the floor today.

The 4 years we have spent deliberating this bill and the years of study that preceded our deliberations make the mutual fund bill, in my opinion, one of the most thoroughly thought-out pieces of legislation to come before the House in the 18 years I have served here.

The bill is a product of the legislative process at its best. It represents a reasonable compromise between the legitimate concerns of the Congress, the Securities and Exchange Commission, and the mutual fund industry.

I am not, personally, 100 percent in accord with everything contained in this bill and I believe that the same thing could be said of most of the subcommittee members. Nevertheless I believe that we are in substantial agreement that the bill as a whole is a good one and I urge my colleagues to approve it today.

In this connection, I would like to take the opportunity to thank my colleagues on the Commerce and Finance Subcommittee for the statesmanlike job they have done over the years on this bill. The bill before us today testifies to the diligence of their efforts and the wisdom of their views. The SEC as well as the principal industry groups, are in general support of this legislation.

Some of the more significant provisions of the bill deal with the subjects of sales charges and management fees with respect to mutual fund shares. The new sales charge provisions in the bill would simply provide that sales charges on mutual funds should not be excessive. The bill, using the existing self-regulatory structure in the securities industry, provides, in effect, that the National Association of Securities Dealers would have initial responsibility for promulgating rules and regulations on this subject of sales loads with SEC oversight.

On the subject of the front-end loads on periodic payment plans, the bill sets forth alternate provisions for protection of investors. One acceptable method under the bill would permit a continuation of the existing practice of applying 50 percent of the first year's payments toward the total sales load applicable to the entire plan, but would require that, if the investor terminates his plan at any time during the first year, he would receive back the sum of the value of his account plus an amount equal to that part of the excess paid for sales loading over 20 percent of the gross payments made.

An alternative method would provide that the front-end loading would have to be spread over the first 4 years of the periodic payment plan with no more than 20 percent of any 1 year's payments being applied to sales load and the average sales load paid during each of the first 4 years could not exceed 16 percent.

On the important subject of the management fee paid by the mutual fund to its investment adviser for the professional management of the fund's assets, the bill provides that the investment adviser shall be deemed to have a fiduciary duty to the fund shareholders with respect to the receipt of compensation for services paid by the investment company.

On the question of banks entering the mutual fund business, the bill simply provides that, if other provisions of law permit a bank to engage in this type of activity, then they shall do so subject to the regulatory pattern of the Investment Company Act, with certain exceptions.

The mutual fund bill approved last year by the other body would include many oil and gas funds under the coverage of the Investment Company Act of 1940. These funds are specifically exempt under the law as it stands today. The committee has determined not to make any change in the existing exemption. We have done so because we have been assured by the Securities and Exchange Commission and industry representatives that they will work toward providing a separate scheme of investor protection in this area during the next 18 months.

The committee has also included a provision requiring personnel in the securities industry to be fingerprinted as a condition of employment. The dramatic increase in securities thefts in recent years and the possibility of the involvement of organized crime in this area make this an important and desirable step.

Finally, the committee has dealt with the important question of fund-holding companies in a manner that we believe to be acceptable to all interested parties. Fund-holding companies are, of course, mutual funds that purchase the shares of other mutual funds. These so-called funds of funds present difficult regulatory problems and the committee has provided important restrictions upon the manner in which they may operate without, at the same time, legislating those fund-holding companies that are already in business out of existence.

Mr. Chairman, the bill before us today has been carefully studied and thoroughly deliberated. It is the product of the best thinking which could be brought together on this complex subject. The SEC, as well as the principal industry groups, are in general support of this legislation. It is clearly time that we amend and update this important Federal regulatory statute, and I urge favorable action on H.R. 1733.

However, in doing so, we must remember that it was first proposed over 4 years ago. I am certain that my colleagues are all aware of the fast-moving developments that have shaken the securities markets and changed the face of the investment industry since that time. Such events make the bill, in a sense, almost obsolete before its passage.

I would caution my colleagues, therefore, not to assume that the passage of this bill will solve for another 30 years all of the problems of the securities and mutual fund industries. At the end of this year the Securities and Exchange Commission is scheduled to present to the Congress the results of its institutional investor study that was authorized by Congress almost 2 years ago. We cannot, at this time, foresee all of the findings of this important study but there is every indication that major changes in the securities laws may become necessary as a result.

Mr. HALL. Mr. Chairman, will the gentleman yield?

Mr. MOSS. I yield to the gentleman from Missouri.

Mr. HALL. Mr. Chairman, the gentleman in his statement referred to the fiduciary duty of the investment adviser. I wonder if he could and would for the purposes of the Committee of the Whole House on the State of the Union define that said fiduciary duty.

Mr. MOSS. Well, it is a matter of a legal obligation to so administer and to so charge the fund that he does not commit an excess against the fund. There is a judgmental factor in it. It is for all practical purposes of a work of art in law.

At the present time the fund manager can only be acted against if he charges what are in effect excessively excessive charges for services. This, by imposition of the fiduciary duty, would in effect require a standard of reasonableness in the charges.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. MOSS. Mr. Chairman, I yield myself 2 additional minutes.

Mr. HALL. Does the gentleman mean to imply that these fiduciary duties of investment advisers are indeed one and the same as those of the fund managers and owners?

Mr. MOSS. To all intents and purposes I would say I think they are.

Mr. HALL. Mr. Chairman, I am not skilled in the law, of course, but inasmuch as the gentleman's committee report says, under that section pertaining to management fees, that there is a fiduciary duty to the investment adviser, and later sets forth two different areas where the shareholder may seek relief against an investment adviser, I believe it would be important to define the fiduciary duties of the investment adviser vis-a-vis those of the fund managers, owners, or those who control it under the SEC regulations. Otherwise it would appear from reading the report that we might seriously preclude sale and advice pertaining to investments of mutual funds.

Perhaps that is what the distinguished gentleman's committee wants to do, but I would discern a difference between the investment adviser who sells to "lovely little ladies who have a widow's fund to invest" and those who manage the fund and determine whether it is "front end load" or "no load," or some other arrangement.

Mr. MOSS. The gentleman is confusing this. It is an investment adviser to the fund. We are not talking about the adviser who advises one for a fee. We are talking about the adviser who advises the fund.

Mr. HALL. In other words, in the sense of this report, it is the corporation or the business firm that specializes in investment techniques and management which is retained by the fund officers or board to consult with as to how to properly use the funds? If so, this is important legislative record.

Mr. MOSS. That is correct. It is not intended in any manner to reach the original investment adviser who might undertake to advise one as a client.

Mr. SPRINGER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the mutual fund bill, known more formally as the Investment Company Amendments Act of 1970, has had a long and tortured history which reaches back to a study by the Wharton School of Finance prior to 1962. This led to a study by the Securities and Exchange Commission at the direction of the Committee on Interstate and Foreign Commerce. This latter study came to the front in 1966 and since that time some form of this legislation has been under active consideration in both of the Houses of Congress.

Since the passage of the original act of 1940 the money which has been invested in investment company securities, or mutual funds, has increased dramatically. Between that time and December 1969, the net assets of the mutual fund shares had increased from $450 million to over $53 billion. This is no small segment of our economy, no matter from what point of view you may consider it. Certainly during this period of 30 years there had been many major changes in securities markets and in the whole framework of American economy. It would seem almost self-evident that some changes and improvements in the act would be in order.

The original recommendation by the Securities and Exchange Commission for legislation met with a reasonable response from many segments of the industry. There were many meetings over many months and years trying to work out what would be compromises acceptable to all concerned and fair to the investing public. On this front, there were many false starts and what seemed like back-tracking after agreement seemed to be reached. The bill we bring before you today is not an object of universal agreement in all of its aspects but we believe it to be fair. Most of the interested parties would say that they can abide with this bill. It may be marginal to some but if barely acceptable, nonetheless acceptable. This would seem to indicate that some of the provisions are delicately balanced. If we understand it correctly there are some elements of the industry which would be damaged severely if much change were to be made in the bill's provisions. For example, in the case of contract plans the 1-year provision which I will mention later seems critical.

Most people understand the basic principles of a mutual fund. Many have purchased at least small holdings in one fund or another. Some are aware of the different objectives of the various funds such as investment or rapid growth. Most small holders have been sold on the idea by a salesman who offers a plan for monthly payments into the fund and a gradual increase in the equity. Many do not know just how the sales charge is extracted. In such case the permitted total sales load is spread over a period of time but about half of the first year's payments are allotted to sales fee rather than equity. This is considered to be necessary if sales people are to bother with the business. This bill would limit this practice. A company could still take out one-half of the first year's payments but if the buyer decided to get out during that year he would be returned all but 20 percent. This means that a company using this plan must set up reserves to pay such claims. A fund may use a different system called a spread load whereby only 20 percent is taken the first year and somewhat larger percentages than otherwise taken in the next few years. The largest direct seller of mutual fund shares in the country has adopted this latter plan. For many smaller companies the limitation of 1 year for the refund seems to be very important. Keeping reserves and the uncertainty of the fee for a longer period of time would apparently create a great strain on them.

Many investors in mutual funds, particularly the more sophisticated ones, buy fund shares very much as they buy conventional stock issues, through a broker. The legal sales fee is presently a maximum of 9 percent and most sales commissions run only about one-half of a percent less than this, or 8½ percent. The law now says that the load must not be unconscionable or grossly excessive. This bill would change this to merely "excessive." The larger change, however, is a provision that allows the National Association of Securities Dealers, a self-regulating industry group, to set the final figures for sales fees with the approval of the Securities and Exchange Commission. The bill does, however, state that whatever figure is set must still present a reasonable opportunity for profit. Conditions change and such considerations must be taken into account.

There has been criticism of the money which can be made by managing a mutual fund. Many, if not most, funds do not handle their own investments. They hire firms dedicated exclusively to this task. For this service, the managing firm gets a percentage of the value of the fund. This has hovered in the area of one-half of 1 percent. To add more responsibility in these matters, the bill now defines fund managers as fiduciaries and this imposes a high degree of legal commitment to treat the fund with utmost fairness. Suits can still be brought against fund managers in regard to management fees but they must be brought by bona fide shareholders and the evidence must be clear and convincing. This arrangement, it seems to us, protects everyone adequately, as does the SEC.

The points I have discussed thus far are the most important and controversial but not the only ones, so I will mention briefly some others which are of great interest to specialized segments of the industry.

Mutual funds whose assets consist only of shares in other mutual funds, sometimes called fund of funds, may not acquire more than 3 percent of any one fund for its portfolio. We have already mentioned that these will be set the ceiling on sales commissions. Such funds have ordinarily been taking only an additional 1½ percent. But to make a uniform rule, the bill provides that such second fee, when taken together with the first fee, may not exceed whatever percentage NASD has set for a total fee in an ordinary mutual fund transaction.

Some funds make agreements with their shareholders which allow them to take larger fees if they outperform the market. If this is acceptable to all concerned there is nothing wrong with it. The committee did feel that such escalations should be accompanied by similar scaledowns when the fund underperforms and it is so provided.

Much discussion has taken place all during the discussion on mutual funds about the proper role of the bank in this picture. They now have some investment responsibilities with certain kinds of pensions and some trusts. This is somewhat different from selling shares in its own enterprises. Besides this, a statute which came about as a result of the scandals of the twenties, the Glass-Steagall Act, denies to banks the right to deal in securities. The courts have been mulling this over for some time now and a final decision by the Highest Court has not yet come forth. This bill takes a sensible stand on it. If the Court finally says banks may form mutual funds under the laws as they read; so be it. If they can and do, they must abide by the rules which govern all other mutual funds. And this seems fair also.

One last problem. Shares in oil and gas leases have been sold very much like mutual funds. The arrangement and the idea is the same. Originally these were for the rich sophisticated investor who was willing to take a flier along with a few other people in the same situation and bet on some oil leases. The question arose about lifting the exemption on such funds and bringing them in like all other mutual funds under the bill. Careful examination of the problem indicated that this would be a hasty and ill advised move. The problem is really not so great and it is being carefully watched now. The SEC and the industry agreed that solutions should be looked over which could more precisely fit the situation and be proposed separately at a later time. That is where it has been left by the bill. The SEC has promised to keep a careful watch on this matter.

And there we have it. At long last a mutual fund bill comes to the floor which the large majority of the Commerce Committee can recommend as meeting the many problems in a fair manner and with an even hand. The changes it makes in the Investment Company Act should improve its operation by protecting the investor without unnecessarily burdening an industry.

Mr. MOSS. Mr. Chairman, I yield 10

minutes to the gentleman from Georgia (Mr. STUCKEY).

Mr. STUCKEY. Mr. Chairman, I rise to support H.R. 17333, the mutual fund bill reported by our committee, and ask my colleagues to support the bill without any amendments. All possible aspects of the matter, all conceivable amendments, all suggested changes were discussed at great length in the subcommittee and full committee and are explained in detail in the committee report. H.R. 17333 represents the legislative process at its best—a compromise and accommodation of conflicting points of view to arrive at the broadest possible consensus.

Indeed, I want to compliment SEC Chairman Hamer Budge, Commissioners Richard Smith, Hugh Owens, James Needham and our former colleague Sid Herlong, SEC General Counsel Philip Loomis and the staff for their cooperation in helping us write this bill.

H.R. 17333 updates the Investment Company Act of 1940, makes many technical amendments, and generally strengthens both investor protection and the position of advisers and salesmen in meeting their responsibilities. I compliment the various mutual fund companies for the effort their officers, lawyers, and accountants made in helping us find ways to increase investor protection without overregulation. I believe strongly in the first amendment right to petition Congress, and would recommend that more interested persons make their views known to us on legislation.

H.R. 17333 differs in some important respect from S. 2224, the mutual fund bill passed by the Senate in May 1969. Since then, radical changes in the economy have altered many of the assumptions on which that bill was based. For example, many mutual fund management companies are operating at a loss, many small brokers and dealers who specialized in mutual funds have gone out of business, many of the 180,000 securities salesmen have gone into other fields because of inadequate income. The go-go fund cult has come to an end, trading volume on our national securities exchanges is down 50 percent and many large firms have merged to reduce expense. Also, the SEC has granted commission rate increases to help keep firms solvent. Thus, it is pretty hard to argue that mutual fund sales charges or management fees are too high—the evidence now is that they may be too low. Our bill indicates that the NASD and SEC should allow "reasonable opportunity for profit for brokers, dealers, and underwriters." I believe this is an important difference with the Senate bill and should be sustained in conference. This will help our small businessmen in keeping with a long established policy of Congress to encourage small enterprises in all fields. We have retained section 22(d) of the present 1940 act despite the Justice Department's suggestion to the contrary. We must not return to the cutthroat retail price competition in sales charges that existed prior to the 1940 act. There is adequate competition at the wholesale level, which gives investors a choice from no load to 9 percent, depending on the fund involved.

We have provided in H.R. 17333 that funds of funds, or multi-funds, can have the same sales loads as other funds, under NASD and SEC oversight to prevent excessive sales loads. I think this must remain in the bill.

We have provided a 1-year refund period on contractual plans to protect investors who have a change of circumstances which interferes with their capacity to make periodic payments or change their minds for any reason. We thought that the 3-year period in the Senate bill was unfairly long, would impose unreasonable economic burdens on plan sponsors, would upset their net capital requirements, and would place the salesman's commissions under a cloud of contingency for too long a period. One year seems long enough to allow a reasonable opportunity for the investor to change his mind.

On management compensation we have introduced a new concept in corporate law by providing that investment advisers have a fiduciary duty to a fund and its shareholders with respect to the receipt of compensation for services. We do not want this provision to encourage a flood of frivolous litigation or strike suits by unscrupulous lawyers more interested in fees than the shareholders. Our bill differs from the Senate bill in that we limit the right to sue for breach of fiduciary duty to bona fide shareholders—not someone who buys a few shares in order to bring suit. Second, we require that such lawsuits can only be brought by a plaintiff "acting in good faith and with justifiable cause." This is a standard the courts have applied for many years in libel and defamation suits, or litigation which can damage a person's reputation unjustly. Certainly to allege that an investment adviser is guilty of a breach of fiduciary duty cast a shadow of dishonesty or overreaching on his good name. We have further required that a plaintiff bear the burden of proving a breach of fiduciary duty as to management compensation by "clear and convincing evidence."

A number of Supreme Court decisions have made it clear that a mere preponderance of evidence is enough in a negligence case, that proof beyond a reasonable doubt applies in criminal cases, and that in civil cases involving vested rights the evidence must be "clear, unequivocal and convincing." Congress has used a standard of clear proof in certain labor laws, the courts have applied it in workmen compensation cases, deportation cases, citizenship cases, and in disbarment proceedings against lawyers. Since being found guilty of breach of fiduciary duty can bar a man for life from the securities business, can ruin his reputation, can destroy his business, I think we must retain the "clear and convincing" evidence requirement in the bill. It will discourage unjustified allegations yet permit bona fide cases to proceed.

Bank operated mutual funds, if permissible under existing law, will be regulated under the 1940 act. Savings and loan association mutual funds must meet the same regulatory pattern.

Performance fees will be permitted for assets in excess of $5 million and for any person with assets in excess of $1 million. On smaller accounts the base point from which a proportionate increase or decrease in advisory fees must be equal to the index chosen. We will continue the exemption for certain offshore funds.

Oil and gas drilling funds continue to be exempt from the mutual fund law, since they are basically different. They invest in and actively operate real property leases, while mutual funds invest passively in the securities of other corporations.

We have required that persons in the securities industry be fingerprinted. I hope we are not becoming a police state, where every employee of every bank, savings and loan, insurance company, or other corporation is fingerprinted. However, law and order is important and we are told fingerprinting will help.

Our long hearings have shown us that mutual funds are a great institution. They provide small and middle income investors a chance to pool their investment assets and acquire professional management of their portfolio at reasonable costs impossible on an individual basis. Moreover, mutual funds provide a means of diversifying risk. There are 31½ million shareholders in 26,000 publicly owned companies. While full financial information is available, it is utterly impractical for the small or even the large, busy investor to make value judgments as to comparative income, growth, risk and other characteristics of these companies—to say nothing of cost. Just as a bank pools the investors' money and selects sound loans in which to invest, so a mutual fund pools the investors' money and seeks good investments. In both cases, the management is professional. I think H.R. 17333 is a good bill and will strengthen the securities industry. I urge its enactment.

Mr. SPRINGER. Mr. Chairman, I yield 5 minutes to the gentleman from Massachusetts (Mr. KEITH) the ranking Republican member of the Subcommittee on Commerce and Finance.

Mr. KEITH. I thank the gentleman for yielding to me at this time.

Mr. Chairman, years ago I was in the life insurance business, and, on many occasions, I would advise my clients, when they had bought adequate protection against the hazards of death and disability and living too long, to buy mutual funds. Ownership of mutual funds provided one of the best ways that I knew for the small investor, particularly the investor who had a good insurance program—including life and accident and health—to invest his surplus dollars.

Generally speaking, I advised these clients, most of them middle income Americans, to strike a balance between mutual funds and savings accounts.

Balanced savings programs, combinations of mutual funds and savings accounts, have, since the passage of the 1940 Investment Company Act, afforded the American public the best way to accumulate nest eggs for education and for supplemental savings objectives.

The basic soundness of the 1940 Act made possible the development of a sound mutual fund industry, an industry that has served our society well. It provided

strong incentives for the creation of investment companies, it adequately compensated the sales forces who sold and serviced their customers, and it enabled the American public to share more fully in the ownership of American industry. And, in the final analysis, it provided capital for corporate enterprise to produce the goods and services for the people of America and for people everywhere.

For years the SEC and special study groups have watched this industry grow and they have been concerned about the public policy implications of that growth. But they have been more concerned with the parts of the picture rather than with the whole. They have been concerned that a salesman or a management company might make too much or that a buyer of a fund might pay too much of a commission or service fee.

In tackling these two problem areas, that is, of commissions and of management fees, your committee has, in my view, struck a balance that is truly in the best interest of the industry, of the buyer of mutual funds, of corporate enterprise in this country and of the American public.

The American public may have been in recent years oversold on mutual funds. The performance cult dominated some segments of the mutual fund industry and of the investing public; and this phenomenon contributed at least to a degree to the overpricing of stocks both on and off the exchange.

Mr. Chairman, this bill, in a reasonable and responsible way, attacks the problems of excessive compensation for both sales forces and management companies. The end result is very much in the public interest. It offers additional protection to the investors in this important investment vehicle. It will continue to make available one of the best ways for the American public to share in the rewards of our free enterprise system.

Accordingly, I strongly urge the passage of this legislation.

Mr. SPRINGER. Mr. Chairman, I yield 5 minutes to the gentleman from Georgia (Mr. THOMPSON) a member of the subcommittee.

Mr. THOMPSON of Georgia. Mr. Chairman, I thank the gentleman from Illinois for yielding me this time.

Mr. Chairman, as a member of the House Interstate and Foreign Commerce Committee and of the Subcommittee on Commerce and Finance which reported H.R. 17333, I wish to express my views on this bill as a part of the legislative history. As outlined in the committee report, this bill has had a long and checkered history extending from the Wharton School's study of mutual funds filed with Congress in 1962, through the SEC's special study of securities markets issued in 1963, culminating in the SEC's Public Policy Implications of Investment Company Growth issued in December of 1966, which was the basis for the present bill. I think it is bad government and bad politics to pass laws unless there has been a substantial showing of need. I have yet to be shown a true need for this legislation.

In proposing this legislation, the SEC has requested Congress to make extensive revisions in the Investment Company Act of 1940 on the basis of their conclusion that they do not now have sufficient authority to protect investors against excessive management compensation or sales charges on mutual funds. However, the SEC has never used its existing legislative authority to promulgate rules or bring any lawsuits against mutual funds to correct any such abuses. Yet, since 1940 the SEC has had authority under section 22 of the 1940 act to regulate excessive sales loads, authority under section 27 of the 1940 act to regulate front end loads on all contractual plans, and authority under section 36 of the 1940 act to regulate management compensation. The material presented to our committee shows that while more than 50 shareholder suits have been filed against mutual fund management companies alleging these things, the courts have found that the allegations are simply not true. Therefore, I do not think this legislation is necessary. Moreover, it introduces into the free enterprise system serious new departures from basic concepts of corporate democracy.

Under existing law, the SEC requires every person to have received an up-to-date prospectus before he invests in a mutual fund. That prospectus contains certified financial statements, a clear showing on its front page of the sales load and management compensation, and detailed information respecting the investment policies of the company. In addition, these companies are required to file quarterly, semiannual, and annual reports which are a matter of public record and which are sent to shareholders. The fact that assets rose to $53 billion and mutual funds have over 8½ million shareholders is evidence of the broad public support and confidence these companies enjoy as a result of their good management and sound policies. A mutual fund is one of the most valuable conceptions ever created in the financial world. It permits small investors to participate in a pool of securities along with thousands of other persons so that the cost to them individually per share for highly skilled management is reduced to the lowest possible levels consistent with high professional performance. More importantly, these small investors are able to diversify the risk of loss through the concept of pooling their investments in a mutual fund. I say these companies strengthen America by making it possible for more persons to own a share of American business, participate in the free enterprise system, and to learn first hand through company reports of how corporate democracy works and how the capitalistic system operates. These millions of small investors learn first hand that risk taking is the great motive force that fuels the engine that makes America run. Through the creation of capital markets on a broad base, the United States is the economic wonder of the world. We have a higher standard of living, a greater rate of economic growth, a more established economy and provide our citizens with a happier life and more opportunity in the framework of freedom than has ever before existed on the face of the globe. The great danger to this system is overregulation by Government. Capital markets in other developed countries of the world are not even in the same league with the United States, largely due to overregulation and other types of governmental tinkering which discourages investment and inhibits freedom of choice in investments.

The Federal securities laws, including the Securities Act of 1933, the Securities Exchange Act of 1934, the Investment Advisers Act of 1940, and the Investment Company Act of 1940, are basically truth-in-securities laws. That is, they provide for the registration with the Securities and Exchange Commission of shares of mutual funds and other companies offered to the public. Severe civil and criminal penalties assure that there is full disclosure of all material facts necessary to an investment judgment. These facts are contained in a prospectus, and any investor who voluntarily purchases shares of a mutual fund must necessarily have had in his hands facts on management compensation, sales loads, contractual plans, front end loads, redemption rights, portfolio brokerage commissions, reciprocity business, give-ups, the relationship between a mutual fund and its investment adviser and distributor and full financial information. No one is required to buy a share in a mutual fund and anyone who has purchased a share has a right to redeem his purchase at net asset value on demand.

Yet, we find in H.R. 17333, particularly in section 36, a broad invitation for more litigation by shareholders against mutual funds. I do not believe in regulation by litigation. It is the responsibility of the SEC to regulate the securities industry. New section 36(b) of the act provides that "the investment adviser of a registered investment company shall be deemed to have a fiduciary duty with respect to the receipt of compensation for services, or of payments of a material nature, paid by such registered investment company, or by the security holders thereof, to such investment adviser or any affiliated person of such investment adviser."

Time may well prove this to be a dangerous innovation. It has always been a basic implication of corporate democracy that given full disclosure under Federal regulation, an investor can either buy or not buy a security. Certainly an investment is not a necessity of life like food, clothing, and shelter. Having purchased securities, the shareholder is entitled each year to have a full and complete proxy statement, to vote on matters of a material nature and to elect directors to manage the company on a day to day basis. When a majority of the shareholders on the basis of full disclosure have elected directors, they should not be interrupted in their day to day activities by frivolous shareholder litigation instigated by dissident or minority shareholders. The above language is an open invitation to this kind of harassment which not only is expensive for mutual funds, but discourages good

men from becoming directors and seriously hampers the officers and directors from doing the business they are paid to do.

Indeed, when I was in law school we were taught that the investigation or stirring up of litigation was not only against public policy, but was also a crime. This unlawful activity is known as "barratry" and interested persons may learn more about it in *Sampler* v. *Motion Picture Patents Co.* 255 Fed. 242.

In addition, the agreements whereby a person without a personal interest undertakes to carry on litigation at his own expense or to meddle in litigation involving the rights of others is known as "champetry and maintenance" which is described in volume 14, Corpus Juris at page 357. This is also against public policy and such agreements are void. And yet today we are considering in H.R. 17333 an invitation to unjustified lawsuits in violation of the principles which have made barratry and champetry and maintenance contrary to public policy.

Recently Chief Justice Burger pointed out to a meeting of the American Bar Association in St. Louis that pending consumer class action litigation may well so clog the Federal courts that it will be necessary to triple or quadruple the number of judges. I understand there are over 100 lawsuits now pending against mutual funds without this new law. I sincerely believe that should H.R. 17333 become law in its present form, 31 million shareholders in American industry generally who hold securities in more than 26,000 publicly owned companies, will have to some extent lost the right to manage their own affairs. Instead, either the SEC or minority shareholders will be able to exert unfair leverage on the decisions of the majority respecting day to day operations, management compensation, sales compensation, employees salaries, and even such details as expenses for office furniture, rent, and other facilities.

To paraphrase some recent court decisions, the only redeeming social value I see in new section 36(b) of the Investment Company Act of 1940 is the provision that—

> An action may be brought under this subsection by the Commission, or by a bona fide security holder of such registered investment company on behalf of such company acting in good faith and with justifiable cause against such investment adviser, or any affiliated person of such investment adviser . . . and the plaintiff shall have the burden of proving a breach of fiduciary duty by clear and convincing evidence.

I consider the requirements that a shareholder bringing a lawsuit for a breach of fiduciary duty by a "bona fide shareholder" who is "acting in good faith and with justifiable cause" to be absolutely vital. Further, I think our committee intended that the burden of proving a breach of fiduciary duty by "clear and convincing evidence" is fundamental to the bill. I make special mention of this because some of my colleagues on the committee have indicated that they intend to try and amend this bill on the floor of the House to eliminate this provision. They somehow arrived at the conclusion that by requiring this high level of proof to protect mutual funds from the harassment of litigation, we make it more difficult for the justified litigant to proceed. I believe their argument to be wholly wrong and I particularly disagree with their conclusion that this standard is, to use their words, "entirely inappropriate in a civil action." The Supreme Court has made it perfectly clear in a number of cases that there is an established legal principle that vested rights can be canceled only upon clear, unequivocal and convincing evidence. The case of *Woodby* v. *Immigration and Naturalization Service*, 385 U.S. 277, restates this principle of law.

Every man has a vested right in his reputation, in his good name, and in his freedom to make business judgments. To charge a corporate director with breach of fiduciary duty is to cast a shadow on his good name, to impugn his integrity, to indict his motives and to challenge his honesty. It upsets his credit by casting the cloud of contingent liability on his assets. It besmirches his character. It is now and has always been a basic principle of common law that all officers and directors, whether of a mutual fund company or any other corporation, have a duty of fiduciary responsibility to shareholders. A breach of fiduciary duty connotes mismanagement so gross as to imply bad faith or wrongdoing. The courts over the years have imposed high standards of fiduciary duty, but have protected directors and officers from unjustified litigation by requiring a showing by a plaintiff of either dishonesty or corporate waste, that is, management so reckless as to be the equivalent of dishonesty.

As long as a director is honest and prudent, he cannot be charged with a breach of fiduciary duty for mistakes of judgment or errors in business decisions. This is the way it should be and the way experience has shown it must be if capitalism is to flourish in an expanding society. Now for the first time we propose to enact into Federal law a provision that management compensation is a fiduciary duty, and open all directors to the risk of lawsuits, and challenge honest business judgments as to the value of management. Who is to say whether Robert McNamara was worth $700,000 a year as president of Ford Motor Co.? If the directors who voted him that salary and the majority shareholders who elected the directors agree, why should the SEC substitute its judgment in the matter? What expertise do they have to qualify them to determine the value of the unique services of an executive?

We all know that the Internal Revenue Service has for years challenged excessive compensation as being nondeductible, which has served as a limitation on management compensation. We know that from the days when George Washington Hill was sued as president of the American Tobacco Co. for excessive compensation that the courts have executed jurisdiction in proper cases. This is the law today. There is no need for new section 36(b) and it can only result in the serious mischief of a flood of litigation which in the end will do investors far more harm than good. Therefore, I urge my colleagues to vote against any amendment to remove from the bill the protections I have referred to. I intend to vote against the entire bill. If the SEC at some time decides to use its existing authority under sections 22, 27, and 36 and to make greater use of its regulatory authority under the Securities Act of 1933 and comes to us with a clear showing that existing law is inadequate to protect investors, I will support more legislation. Until that time, I refuse to participate in generating unnecessary Federal regulation of mutual funds. All of the assumptions on which the SEC legislative proposals were based have changed—mutual funds have been on the brink of net redemptions, sales of shares have been sharply reduced, many brokerage firms are closing because of reduced volume, sales loads are proving to be inadequate to provide overhead and a living for salesmen.

Many management companies and investment advisers are in loss operations. Assets have shrunk from $50 million to slightly more than $40 billion. It is absolutely imperative that we encourage more investment in mutual funds so that new money comes in more rapidly than old money goes not in the form of redemptions. This is vital so that mutual fund managements are not forced to sell securities to meet redemptions rather than buying and selling securities on the basis of investment decisions.

It is for these reasons that I have opposed the bill and will vote against it today.

Additionally I should like to point out certain other facts.

On page 3 of the report it is erroneously stated that S. 2224 embodies understandings between SEC and the "investment company industry."

Again at page 7 of the report it is erroneously stated, in the next to last paragraph, that discussions were held by SEC with "representatives of the industry." It should be noted that the governors of the investment company institute conceded they were not speaking for "the industry" or for the members of the Institute, but were speaking only for themselves, and that they had not polled their members in any way to ascertain their wishes.

Another error in the RECORD which should be corrected appears in the second paragraph at page 7, which states:

> The forces of arm's length bargaining do not work in the mutual fund industry in the same manner as they do in other sectors of the American economy.

This statement is misleading. Although it may be true in some cases that there is no hard arm's length bargaining between the management company and the fund, the true bargaining occurs when each investor decides to invest in a particular fund. Every prospectus clearly discloses the rate of management fee paid. The prospectus also discloses the total amount paid to the management company for the prior 3 years. Annually thereafter he receives financial reports and proxy statements before deciding whether to vote for or

against the renewals of the management contracts. Even if the contracts are renewed, he is not bound in any way, and is at liberty to withdraw his money from the fund at any time without any penalty for doing so, at its then net asset value.

Mr. MOSS. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from Tennessee (Mr. BLANTON).

Mr. BLANTON. Mr. Chairman, I want to thank the distinguished gentleman for yielding to me.

Mr. Chairman, although I voted for H.R. 17333 in the subcommittee and in the full committee, it was only on the basis of my understanding that our committee and its senior members on both sides of the aisle would strongly support the bill on the floor and in conference with S. 2224, a substantially different bill, which was approved by the Senate May 26, 1969. In the committee report covering the background on this legislation, the history of the Investment Company Act of 1940 is outlined. It could be called the truth-in-mutual-fund law and has worked remarkably well since its enactment. That is because it was based on the Securities and Exchange Commission's report on investment companies in 1938 and 1939. The mutual fund industry was surveyed again in 1958 by the University of Pennsylvania's Wharton School of Finance under an arrangement with the Commission and again by the Commission itself in its special study of securities markets in 1962. These studies led to the Commission's report to Congress entitled "Public Policy Implications of Investment Company Growth" issued on September 2, 1966.

Our committee bill, H.R. 17333, may be said to be the ultimate and most up-to-date effort to adapt some of the recommendations made by the Commission while at the same time retaining the basic principles of corporate democracy. Our free enterprise system depends upon freedom of choice in our capital markets. No one is required either to save his money or to invest it in securities. In order to make sure that investors have full and adequate information on which to base investment judgment, Congress has enacted the Securities Act of 1933, requiring the registration of any issuer of securities to be offered to the public including mutual funds. In addition, Congress has enacted the Investment Company Act of 1940 which provides a pervasive scheme of registration based upon full disclosure and fair dealing in the mutual fund industry. Such questions as management compensation, sales charges, and similar matters affecting the day-to-day operations of a mutual fund have been left to the decision of the officers and directors elected annually by the shareholders. These officers and directors under basic principles of corporate democracy have a fiduciary duty to the shareholders to conduct the affairs of a mutual fund with the same prudence and integrity as the courts impose on other fiduciaries. In addition, Congress has given the SEC extensive authorization under existing Federal securities laws to require that each potential investor be given a prospectus containing in clear and bold type and in clear and simple language all material facts necessary to an investment judgment. This includes management compensation, sales loads, details of contractual plans, investment policies, portfolio turnover, and any interlocking or overlapping relationships between officers, directors, and other interested persons.

In short, Congress has required for investor protection, that any issuer, including a mutual fund, make a full disclosure under serious civil and criminal penalties. Since under SEC rules, every investor is required to have received a prospectus before he makes an investment, it must be assumed that he has read the prospectus and is aware of the sales load he is paying, the advisory fees a fund pays, the investment policies of a fund, its rate of portfolio turnover, brokerage commissions paid, and similar matters. Each prospectus is required to contain the substance of both any advisory and any distribution agreement.

Thus, it has seemed to me that shareholders having made a voluntary choice with full disclosure to purchase shares of a mutual fund should be estopped from later suing the officers and directors of the fund or the investment adviser on grounds that the sales load is too high, that management compensation is excessive, or that portfolio brokerage commissions were paid to an affiliated broker, or similar matters. It is for this reason that I have had serious reservations about either the need for or the justification for this legislation.

However, since our committee reported the bill which includes significant safeguards from "strike" lawsuits or other unjustified shareholder litigation by investors who may later become dissatisfied, or who may be encouraged to sue by unscrupulous lawyers, I have supported the bill. One of the most important of these safeguards is contained in new section 36(b) of the act added by H.R. 17333. It would require that lawsuits against mutual funds for breach of fiduciary duty may be brought only by a "bona fide shareholder" who is "acting in good faith and with justifiable cause." In addition, any plaintiff must prove his allegation of breach of fiduciary duty by "clear and convincing evidence." These are extremely important provisions, without which I could not support the bill.

In recent years, mutual funds have been harassed with nearly 200 lawsuits alleging breach of fiduciary duty, excessive advisory fees, excessive portfolio brokerage, and similar breaches of fiduciary duty. This litigation has not only disrupted officers and employees in their day-to-day work, but in some cases has unfairly impugned the integrity of honorable outside directors. In short, some of this litigation has been just plain unjustified and has resulted in settlements involving large fees for lawyers, but no sufficient benefits for shareholders.

In separate views of our committee report, some of my colleagues refer to the requirement that an allegation of a breach of fiduciary duty by the investment advisor with respect to the receipt of compensation for services paid by an investment company must be shown by "clear and convincing evidence" as a "flaw" in the bill. They point to section 6 of the Norris-LaGuardia Act and cases such as *United Brotherhood of Carpenters* v. *United States*, 330 U.S. 395 and *United Mine Workers* v. *Gibbs*, 383 U.S. 715, as indications that the "clear" and convincing evidence" level of proof is, as they put it, "entirely inappropriate in a civil action." I agree.

In recent years Congress has legislated a number of proposals to try and give more protection to consumers, minority groups, and other special interests. This has led to a flood of litigation which is clogging the court system. We are now faced with so-called public service law firms that generate litigation, and we have pending in Congress various types of consumer class action bills. Where once the instigation of lawsuits by lawyers was discredited as against public policy and punished as the crime of champetry and maintenance, we now find neighborhood legal service organizations federally funded to instigate litigation. Thus, in my judgment, it becomes extremely important for Congress to enact safeguards which permit legitimate litigation to reach the courts, but help screen out unjustified lawsuits. Placing on a plaintiff who has voluntarily invested in a mutual fund with full knowledge of management compensation and similar information given to him in an SEC-approved prospectus, the burden of providing his case by "clear and convincing evidence" seems to me to be reasonable. Had my colleagues probed a little further, they would have found a decision of the Supreme Court, *Woodby* v. *Immigration and Naturalization Service*, 385 U.S. 277 and *Schneiderman* v. *U.S.*, 320 U.S. 118, which hold that the standard of "clear, unequivocal and convincing evidence" is based upon "the principle that vested rights can be cancelled only upon clear, unequivocal and convincing proof."

In the Woodby case, the petitioners argued that the appropriate burden of proof in deportation proceedings should be that which the law imposes in criminal cases—the duty of proving the essential facts beyond a reasonable doubt. The Government, on the other hand, pointed out that a deportation proceeding is not a criminal case and that the appropriate burden of proof should consequently be the one generally imposed in civil cases and administrative proceedings—the duty of prevailing by a mere preponderance of the evidence. The Supreme Court in weighing this argument said:

> To be sure, a deportation proceeding is not a criminal prosecution but it does not syllogistically follow that a person may be banished from this country upon no higher degree of proof than applies in a negligence case.

While a shareholder's derivative suit against an investment adviser or the officers and directors of a mutual fund alleging breach of fiduciary duty is a civil action, it can result in the defendant being banished from the securities industry. It can destroy his reputation and

his credit. It can deprive him of the opportunity to engage in the business of his choice. In short, to be judged guilty of a breach of fiduciary duty carries with it a flavor of moral turpitude, of a lack of integrity, of self-dealing and overreaching, and should certainly not be based on anything less than "clear and convincing evidence" adduced by a plaintiff who has met the test of being a "bona fide shareholder" who is "acting in good faith and with justifiable cause" as required in the new section 36(b) of the Investment Company Act of 1940 to be added by H.R. 17333.

I urge Members to oppose any effort to delete these provisions from the bill.

Mr. MOSS. Mr. Chairman, I have no further requests for time, and I reserve the balance of my time.

Mr. SPRINGER. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, I would like to ask the distinguished chairman of the subcommittee two questions:

Mr. Chairman, section 5 of the bill provides that a registered investment company which is a collective or other pooled fund maintained by a bank may have a board of directors all of the members of which, except one, are interested persons of the bank, if a number of provisos are met. One of these provisos is that the investment adviser shall be registered under the Investment Advisers Act, or shall be a bank.

Do I understand correctly that this section of the bill recognizes that banks are exempt from the Investment Advisers Act so that a bank investment adviser, even under these circumstances does not have to be registered?

Mr. MOSS. Mr. Chairman, if the gentleman will yield, that is the case. The gentleman's understanding is absolutely correct. That is the result reached in this legislation.

Mr. SPRINGER. And section 5 of the bill specifically reaches the result which the gentleman has mentioned?

Mr. MOSS. It does, indeed.

Mr. SPRINGER. The second question: Section 27(b) of the bill provides an exemption from registration under the Securities Act of 1933 for interests or participations in trust funds maintained by banks for funding certain stock bonus, pension or profit-sharing plans which meet the requirements for qualification under section 401 of the Internal Revenue Code. I understand that this bill differs slightly from the bill passed by the Senate in that it would make it clear that interests in a single trust maintained by a bank where the trust assets were not commingled with those of other qualified trusts would also be exempted from the registration requirements of the Securities Act. I understand that the SEC has required registration of interests and participations in such trust funds where employee money is used to buy securities of the employer or companies affiliated with the employer. I understand that this bill would not prevent the SEC from requiring registration of interests or participations in such trusts if that also were the case. Am I correct?

Mr. MOSS. The gentleman is correct. It is my understanding that that is what was intended.

Mr. SPRINGER. I thank the distinguished gentleman for his explanation.

Mr. Chairman, I have no further requests for time.

Mr. MURPHY of New York. Mr. Chairman, the House today begins consideration of the first in-depth amendments to the Investment Company Act since its enactment in 1940.

H.R. 17333 is the product of months of painstaking work by the House Committee on Interstate and Foreign Commerce, and Chairman STAGGERS and Subcommittee Chairman Moss can be justly proud of this eminently balanced and responsible legislative package. The bill defines equitable standards to govern relationships between investment companies and their investment advisers, and is responsive to a wide range of questions relating to the operation and management of our vital mutual fund industry.

As the debate develops on this legislation, we shall receive thoughtful discussions on many key aspects of the bill. I would like to invite your attention to a section of the bill which relates to a very critical problem involved in the actual handling of securities—stocks and bonds and other such documents—within the exchanges and financial houses which deal in securities.

Organized crime has two substantial weapons for infiltrating the securities business—contacts and cash—and has used these weapons to advantage. During 1969, the mysterious disappearance of securities at brokerage houses and banks was estimated at nearly $45 million, amid strong indications that the figure might run even higher if reporting were more complete. This conservative figure represented a 30-percent increase over 1968.

A new kind of bank robber, the youthful back-office brokerage and bank employee, often blackmailed by organized crime, is the key figure in this modern day Bonnie and Clyde saga of robbery. The theft of securities represents a modern alternative to armed bank robbery and is more deadly in its sophistication and difficulty of detection.

The dimensions of these thefts and the foothold of organized crime in the backrooms of high finance are extremely dangerous to the health of the securities business.

H.R. 17333 contains a section that will provide the securities industry with the weapons needed to fight back the insidious advance of organized crime on Wall Street.

The legislation provides a mechanism for the collection and exchange of fingerprint information to ferret out past and would-be criminals.

Personal fingerprints voluntarily submitted from registered national security exchanges, their members, affiliated stock clearing corporations, and brokers and dealers registered with the SEC shall be collected, classified, preserved, and identified in the same manner and subject to the same terms and conditions as personal fingerprints voluntarily submitted from insurance companies and national banks.

I initially introduced legislation providing for the fingerprinting of securities employees in March 1969. This legislation, which is now embodied in H.R. 17333, authorizes the Securities and Exchange Commission to exchange fingerprint data with national security exchanges and related agencies. The measure, in effect, establishes a national fingerprint record clearinghouse under the control and direction of the SEC.

As you may know, New York State, in response to the Wall Street crime crisis, enacted a similar statute. Federal Judge Edward Weinfeld ruled that there is nothing unconstitutional about a law requiring fingerprinting of employees in the New York Stock Exchange and other securities markets. The law was enacted for the express purpose of combating the upsurge of thefts, and it is a commonsense statute that can be further reinforced, and made national in scope, by the provisions now contained in the Mutual Fund Amendments of 1970.

Frank G. Zarb, chairman of an industrywide committee to fight securities thefts, and Robert M. Morgenthau, former U.S. attorney in New York, have cited the ability of organized crime to infiltrate the securities business, when they endorsed my measure to combat this insidious wave of crime.

Mr. Chairman, as the House considers H.R. 17333 I urge my colleagues to carefully consider this important section. I am sure they will agree that it will provide the necessary weapons to combat organized crime's infiltration of the financial heart of America.

Mr. MOSS. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. There being no further requests for time, pursuant to the rule, the Clerk will now read the substitute committee amendment printed in the reported bill as an original bill for the purpose of amendment.

The Clerk read as follows:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Investment Company Amendments Act of 1970".

SEC. 2. (a) Section 2(a) of the Investment Company Act of 1940 (15 U.S.C. 80a–2(a)) is amended as follows:

(1) Paragraph (5) is amended by striking out "under section 11(k) of the Federal Reserve Act, as amended" and inserting in lieu thereof "under the authority of the Comptroller of the Currency".

(2) Paragraphs (19) through (35) are redesignated as paragraphs (20) through (36), respectively, and paragraphs (36) through (42) are redesignated as paragraphs (38) through (44), respectively.

(3) A new paragraph is inserted immediately after paragraph (18) to read as follows:

"(19) 'Interested person' of another person means—

"(A) when used with respect to an investment company—

"(i) any affiliated person of such company,

"(ii) any member of the immediate family of any natural person who is an affiliated person of such company,

"(iii) any interested person of any investment adviser of or principal underwriter for such company,

"(iv) any person or partner or employee of any person who at any time since the beginning of the last two fiscal years of such company has acted as legal counsel for such company,

"(v) any broker or dealer registered under the Securities Exchange Act of 1934 or any

affiliated person of such a broker or dealer, and

"(vi) any natural person whom the Commission by order shall have determined to be an interested person by reason of having had, at any time since the beginning of the last two fiscal years of such company, a material business or professional relationship with such company or with the principal executive officer of such company or with any other investment company having the same investment adviser or principal underwriter or with the principal executive officer of such other investment company:

*Provided,* That no person shall be deemed to be an interested person of an investment company solely by reason of (aa) his being a member of its board of directors or advisory board or an owner of its securities, or (bb) his membership in the immediate family of any person specified in clause (aa) of this proviso; and

"(B) when used with respect to an investment adviser of or principal underwriter for any investment company—

"(i) any affiliated person of such investment adviser or principal underwriter,

"(ii) any member of the immediate family of any natural person who is an affiliated person of such investment adviser or principal underwriter,

"(iii) any person who knowingly has any direct or indirect beneficial interest in, or who is designated as trustee, executor, or guardian of any legal interest in, any security issued either by such investment adviser or principal underwriter or by a controlling person of such investment adviser or principal underwriter,

"(iv) any person or partner or employee of any person who at any time since the beginning of the last two fiscal years of such investment company has acted as legal counsel for such investment adviser or principal underwriter,

"(v) any broker or dealer registered under the Securities Exchange Act of 1934 or any affiliated person of such a broker or dealer, and

"(vi) any natural person whom the Commission by order shall have determined to be an interested person by reason of having had at any time since the beginning of the last two fiscal years of such investment company a material business or professional relationship with such investment adviser or principal underwriter or with the principal executive officer or any controlling person of such investment adviser or principal underwriter.

For the purposes of this paragraph (19), 'member of the immediate family' means any parent, spouse of a parent, child, spouse of a child, spouse, brother, or sister, and includes step and adoptive relationships. The Commission may modify or revoke any order issued under clause (vi) of subparagraph (A) or (B) of this paragraph whenever it finds that such order is no longer consistent with the facts. No order issued pursuant to clause (vi) of subparagraph (A) or (B) of this paragraph shall become effective until at least sixty days after the entry thereof, and no such order shall affect the status of any person for the purposes of this title or for any other purpose for any period prior to the effective date of such order."

(4) A new paragraph is inserted immediately after redesignated paragraph (36) (formerly paragraph (35)) as follows:

"(37) 'Separate account' means an account established and maintained by an insurance company pursuant to the laws of any State or territory of the United States, or of Canada or any province thereof, under which income, gains and losses, whether or not realized, from assets allocated to such account, are, in accordance with the applicable contract, credited to or charged against such account without regard to other income, gains, or losses of the insurance company."

(5) A new paragraph is inserted immediately after redesignated paragraph (44) (formerly paragraph (42)) as follows:

"(45) 'Savings and loan association' means a savings and loan association, building and loan association, cooperative bank, homestead association, or similar institution, which is supervised and examined by State or Federal authority having supervision over any such institution, and a receiver, conservator, or other liquidating agent of any such institution."

(b) Section 13(b) of such Act (15 U.S.C. 80a–13(b)) is amended by striking out "paragraph (40)" and inserting in lieu thereof "paragraph (42)".

SEC. 3. (a) The second sentence of paragraph (2) of section 3(b) of the Investment Company Act of 1940 (15 U.S.C. 80a–3(b)(2)) is amended by inserting "in good faith" and "paragraph".

(b) Section 3(c) of such Act (15 U.S.C. 80a–3(c)) is amended as follows:

(1) The material preceding paragraph (1) is amended to read as follows:

"(c) Notwithstanding subsection (a), none of the following persons is an investment company within the meaning of this title:".

(2) Strike paragraph (8); redesignate paragraphs (5) through (15) as paragraphs (4) through (13), respectively; and strike "paragraphs (3), (5), and (6)" in redesignated paragraph (6) (formerly paragraph (7)) and insert in lieu thereof "paragraphs (3), (4), and (5)".

(3) Redesignated paragraph (5) formerly paragraph (6)) is amended by inserting "redeemable securities," before "face-amount certificates".

(4) Redesignated paragraph (8) (formerly paragraph (10)) is amended to read as follows:

"(8) Any company subject to regulation under the Public Utility Holding Company Act of 1935."

(5) Redesignated paragraph (11) (formerly paragraph (13)) is amended to read as follows:

"(11) Any employees' stock bonus, pension, or profit-sharing trust which meets the requirements for qualification under section 401 of the Internal Revenue Code of 1954; or any collective trust fund maintained by a bank consisting solely of assets of such trusts; or any separate account the assets of which are derived solely from (A) contributions under pension or profit-sharing plans which meet the requirements of such section or the requirements for deduction of the employer's contribution under section 404(a)(2) of such Code, and (B) advances made by an insurance company in connection with the operation of such separate account."

(c)(1) Section 8(b)(2) of such Act (15 U.S.C. 80a-8(b)(2)) is amended to read as follows:

"(2) a recital of all investment policies of the registrant, not enumerated in paragraph (1), which are changeable only if authorized by shareholder vote;".

(2) Paragraphs (3) and (4) are redesignated as paragraphs (4) and (5), respectively.

(3) A new paragraph is inserted immediately after paragraph (2) to read as follows:

"(3) a recital of all policies of the registrant, not enumerated in paragraphs (1) and (2), in respect of matters which the registrant deems matters of fundamental policy;".

(d) Section 13(a)(3) of such Act (15 U.S.C. 80a-13(a)(3)) is amended to read as follows:

"(3) deviate from its policy in respect of concentration of investments in any particular industry or group of industries as recited in its registration statement, deviate from any investment policy which is changeable only if authorized by shareholder vote, or deviate from any policy recited in its registration statement pursuant to section 8(b)(3);".

SEC. 4 (a) That part of section 9(a) of the Investment Company Act of 1940 (15 U.S.C. 80a-9(a)) which precedes paragraph (1) is amended by inserting "employee," before "officer".

(b) Section 9 of such Act (15 U.S.C. 80a-9) is further amended by redesignating subsection (b) as subsection (c) and inserting immediately after subsection (a) a new subsection to read as follows:

"(b) The Commission may, after notice and opportunity for hearing, by order prohibit, conditionally or unconditionally, either permanently or for such period of time as it in its discretion shall deem appropriate in the public interest, any person from serving or acting as an employee, officer, director, member of an advisory board, investment adviser or depositor of, or principal underwriter for, a registered investment company or affiliated person of such investment adviser, depositor, or principal underwriter, if such person—

"(1) has willfully made or caused to be made in any registration statement, application or report filed with the Commission under this title any statement which was at the time and in the light of the circumstances under which it was made false or misleading with respect to any material fact, or has omitted to state in any such registration statement, application, or report any material fact which was required to be stated therein; or

"(2) has willfully violated any provision of the Securities Act of 1933, or of the Securities Exchange Act of 1934, or of title II of this Act, or of this title, or of any rule or regulation under any of such statutes; or

"(3) has willfully aided, abetted, counseled, commanded, induced, or procured the violation by any other person of the Securities Act of 1933, or of the Securities Exchange Act of 1934, or of title II of this Act, or of this title, or of any rule or regulation under any of such statutes."

SEC. 5. (a) Section 10(a) of the Investment Company Act of 1940 (15 U.S.C. 80a–10(a)) is amended to read as follows:

"(a) No registered investment company shall have a board of directors more than 60 per centum of the members of which are persons who are interested persons of such registered company."

(b) Section 10(b) of such Act (15 U.S.C. 80a–10(b)) is amended—

(1) by striking out "After one year from the effective date of this title, no" and inserting in lieu thereof "No"; and

(2) by striking out "affiliated", each place it appears in paragraph (2) and inserting in lieu thereof "interested".

(c) Section 10(c) of such Act (15 U.S.C. 80a–10(c)) is amended to read as follows:

"(c) No registered investment company shall have a majority of its board of directors consisting of persons who are officers, directors, or employees of any one bank, except that, if on March 15, 1940, any registered investment company had a majority of its directors consisting of persons who are directors, officers, or employees of any one bank, such company may continue to have the same percentage of its board of directors consisting of persons who are directors, officers, or employees of such bank."

(d) Section 10(d) of such Act (15 U.S.C. 80a–10(d)) is amended to read as follows:

"(d) Notwithstanding subsections (a) and (b)(2) of this section, and, in the case of a registered investment company which is a collective or other pooled fund maintained by a bank for the collective investment and reinvestment of assets contributed thereto by such bank in its capacity as managing agent, if such a collective or other pooled

fund is otherwise permitted by law, notwithstanding subsections (b)(3) and (c) of this section, a registered investment company may have a board of directors all the members of which, except one, are interested persons of the investment adviser of such company, or are officers or employees of such company, if—

"(1) such investment company is an open-end company;

"(2) such investment adviser (A) is registered under title II of this Act and is engaged principally in the business of rendering investment supervisory services as defined in title II, or (B) is a bank;

"(3) no sales load is charged on securities issued by such investment company;

"(4) any premium over net asset value charged by such company upon the issuance of any such security, plus any discount from net asset value charged on redemption thereof, shall not in the aggregate exceed 2 per centum;

"(5) no sales or promotion expenses are incurred by such registered company; but expenses incurred in complying with laws regulating the issue or sale of securities shall not be deemed sales or promotion expenses;

"(6) such investment adviser is the only investment adviser to such investment company, and such investment adviser does not receive a management fee exceeding 1 per centum per annum of the value of such company's net assets averaged over the year or taken as of a definite date or dates within the year;

"(7) all executive salaries and executive expenses and office rent of such investment company are paid by such investment adviser; and

"(8) such investment company has only one class of securities outstanding, each unit of which has equal voting rights with every other unit."

SEC. 6. Section 11(b) of the Investment Company Act of 1940 (15 U.S.C. 80a–11(b)) is amended to read as follows:

"(b) The provisions of this section shall not apply to any offer made pursuant to any plan of reorganization, which is submitted to and requires the approval of the holders of at least a majority of the outstanding shares of the class or series to which the security owned by the offeree belongs."

SEC. 7. Section 12(d) of the Investment Company Act of 1940 (15 U.S.C. 80a–12(d)) is amended to read as follows:

"(d)(1)(A) It shall be unlawful for any registered investment company (the 'acquiring company') and any company or companies controlled by such acquiring company to purchase or otherwise acquire any security issued by any other investment company (the 'acquired company'), and for any investment company (the 'acquiring company') and any company or companies controlled by such acquiring company to purchase or otherwise acquire any security issued by any registered investment company (the 'acquiring company'), if the acquiring company and any company or companies controlled by it immediately after such purchase or acquisition own in the aggregate—

"(i) more than 3 per centum of the total outstanding voting stock of the acquired company;

"(ii) securities issued by the acquired company having an aggregate value in excess of 5 per centum of the value of the total assets of the acquiring company; or

"(iii) securities issued by the acquired company and all other investment companies (other than Treasury stock of the acquiring company) having an aggregate value in excess of 10 per centum of the value of the total assets of the acquiring company.

"(B) It shall be unlawful for any registered open-end investment company (the 'acquired company'), any principal underwriter therefor, or any broker or dealer registered under the Securities Exchange Act of 1934, knowingly to sell or otherwise dispose of any security issued by the acquired company to any other investment company (the 'acquiring company') or any company or companies controlled by the acquiring company, if immediately after such sale or disposition—

"(i) more than 3 per centum of the total outstanding voting stock of the acquired company is owned by the acquiring company and any company or companies controlled by it; or

"(ii) more than 10 per centum of the total outstanding voting stock of the acquired company is owned by the acquiring company and other investment companies and companies controlled by them.

"(C) It shall be unlawful for any investment company (the 'acquiring company') and any company or companies controlled by the acquiring company to purchase or otherwise acquire any security issued by a registered closed-end investment company, if immediately after such purchase or acquisition the acquiring company, other investment companies having the same investment adviser, and companies controlled by such investment companies, own more than 10 per centum of the total outstanding voting stock of such closed-end company.

"(D) The provisions of this paragraph (1) shall not apply to a security received as a dividend or as a result of an offer of exchange approved pursuant to section 11 or of a plan of reorganization of any company (other than a plan devised for the purpose of evading the foregoing provisions).

"(E) The provisions of this paragraph (1) shall not apply to a security (or securities) purchased or acquired by an investment company if—

"(i) the depositor of, or principal underwriter for, such investment company is a broker or dealer registered under the Securities Exchange Act of 1934, or a person controlled by such a broker or dealer;

"(ii) such security is the only investment security held by such investment company (or such securities are the only investment securities held by such investment company, if such investment company is a registered unit investment trust that issues two or more classes or series of securities, each of which provides for the accumulation of shares of a different investment company); and

"(iii) in the event such investment company is not a registered investment company, the purchase or acquisition is made pursuant to an arrangement with the issuer of, or principal underwriter for the issuer of, the security whereby such investment company is obligated—

"(aa) either to seek instructions from its security holders with regard to the voting of all proxies with respect to such security and to vote such proxies only in accordance with such instructions, or to vote the shares held by it in the same proportion as the vote of all other holders of such security, and

"(bb) to refrain from substituting such security unless the Commission shall have approved such substitution in the manner provided in section 26 of this Act.

"(F) The provisions of this paragraph (1) shall not apply to securities purchased or otherwise acquired by a registered investment company if—

"(i) immediately after such purchase or acquisition not more than 3 per centum of the total outstanding stock of such issuer is owned by such registered investment company and all affiliated persons of such registered investment company; and

"(ii) such registered investment company has not offered or sold after January 1, 1971, and is not proposing to offer or sell any security issued by it through a principal underwriter to otherwise at a public offering price which includes a sales load which, when added to the maximum sales load applicable to the acquisition of its portfolio securities, is excessive within the meaning of section 22(b) of this Act.

No issuer of any security purchased or acquired by a registered investment company pursuant to this subparagraph shall be obligated to redeem such security in an amount exceeding 1 per centum of such issuer's total outstanding securities during any period of less than thirty days. Such investment company shall exercise voting rights by proxy or otherwise with respect to any security purchased or acquired pursuant to this subparagraph in the manner prescribed by subparagraph (E) of this subsection.

"(G) For the purposes of this paragraph (1), the value of an investment company's total assets shall be computed as of the time of a purchase or acquisition or as closely thereto as is reasonably possible.

"(H) In any action brought to enforce the provisions of this paragraph (1), the Commission may join as a party the issuer of any security purchased or otherwise acquired in violation of this paragraph (1), and the court may issue any order with respect to such issuer as may be necessary or appropriate for the enforcement of the provisions of this paragraph (1).

"(2) It shall be unlawful for any registered investment company and any company or companies controlled by such registered investment company to purchase or otherwise acquire any security (except a security received as a dividend or as a result of a plan of reorganization of any company, other than a plan devised for the purpose of evading the provisions of this paragraph) issued by any insurance company of which such registered investment company and any company or companies controlled by such registered company do not, at the time of such purchase or acquisition, own in the aggregate at least 25 per centum of the total outstanding voting stock, if such registered company and any company or companies controlled by it, own in the aggregate, or as a result of such purchase or acquisition will own in the aggregate, more than 10 per centum of the total outstanding voting stock of such insurance company.

"(3) It shall be unlawful for any registered investment company and any company or companies controlled by such registered investment company to purchase or otherwise acquire any security issued by or any other interest in the business of any person who is a broker, a dealer, is engaged in the business of underwriting, or is either an investment adviser of an investment company or an investment adviser registered under title II of this Act, unless (A) such person is a corporation all the outstanding securities of which (other than short-term paper, securities representing bank loans, and directors' qualifying shares) are, or after such acquisition will be, owned by one or more registered investment companies; and (B) such person is primarily engaged in the business of underwriting and distributing securities issued by other persons, selling securities to customers, or any one or more of such or related activities, and the gross income of such person normally is derived principally from such business or related activities."

SEC. 8. (a) Section 15(a) of the Investment Company Act of 1940 (15 U.S.C. 80a–15(a)) is amended to read as follows:

"(a) It shall be unlawful for any person to serve or act as investment adviser of a registered investment company, except pursuant to a written contract, which contract, whether with such registered company or with an investment adviser of such registered company, has been approved by the vote of a majority of the outstanding voting securities of such registered company, and—

"(1) precisely describes all compensation to be paid thereunder;

"(2) shall continue in effect for a period more than two years from the date of its execution, only so long as such continuance is specifically approved at least annually by the board of directors or by vote of a majority of the outstanding voting securities of such company;

"(3) provides, in substance, that it may be terminated at any time, without the payment of any penalty, by the board of directors of such registered company or by vote of a majority of the outstanding voting securities of such company on not more than sixty days' written notice to the investment adviser; and

"(4) provides, in substance, for its automatic termination in the event of its assignment."

(b) Section 15(b) of such Act (15 U.S.C. 80a–15(b)) is amended to read as follows:

"(b) It shall be unlawful for any principal underwriter for a registered open-end company to offer for sale, sell, or deliver after sale any security of which such company is the issuer, except pursuant to a written contract with such company, which contract—

"(1) shall continue in effect for a period, more than two years from the date of its execution, only so long as such continuance is specifically approved at least annually by the board of directors or by vote of a majority of the outstanding voting securities of such company; and

"(2) provides, in substance, for its automatic termination in the event of its assignment."

(c) Section 15(c) of such Act (15 U.S.C. 80a–15 (c)) is amended to read as follows:

"(c) In addition to the requirements of subsection (a) and (b) of this section, it shall be unlawful for any registered investment company having a board of directors to enter into, renew, or perform any contract or agreement, written or oral, whereby a person undertakes regularly to serve or act as investment adviser of or principal underwriter for such company, unless the terms of such contract or agreement and any renewal thereof have been approved by the vote of a majority of directors, who are not parties to such contract or agreement or interested persons of any such party, cast in person at a meeting called for the purpose of voting on such approval. It shall be the duty of the directors of a registered investment company to request and evaluate, and the duty of an investment adviser to such company to furnish, such information as may reasonably be necessary to evaluate the terms of any contract whereby a person undertakes regularly to serve or act as investment adviser of such company."

(d) Section 15 of such Act (15 U.S.C. 80a–15) is amended by striking out subsection (d) and redesignating subsections (e) and (f) as subsections (d) and (e), respectively.

SEC. 9. (a) Section 17(f) of the Investment Company Act of 1940 (15 U.S.C. 80a–17(j)) is amended to read as follows:

"(f) Every registered management company shall place and maintain its securities and similar investments in the custody of (1) a bank (including in the case of a registered investment company which is a collective fund maintained by a bank (if such a collective fund is otherwise permitted by law), the bank maintaining such fund) or banks having the qualifications prescribed in paragraph (1) of section 26(a) of this title for the trustees of unit investment trusts; or (2) a company which is a member of a national securities exchange as defined in the Securities Exchange Act of 1934, subject to such rules and regulations as the Commission may from time to time prescribe for the protection of investors; or (3) such registered company, but only in accordance with such rules and regulations or orders as the Commission may from time to time prescribe for the protection of investors. Subject to such rules, regulations, and orders as the Commission may adopt as necessary or appropriate for the protection of investors, a registered management company or any such custodian, with the consent of the registered management company for which it acts as custodian, may deposit all or any part of the securities owned by such registered management company in a system for the central handling of securities established by a national securities exchange or national securities association registered with the Commission under the Securities Exchange Act of 1934, or such other person as may be permitted by the Commission, pursuant to which system all securities of any particular class or series of any issuer deposited within the system are treated as fungible and may be transferred or pledged by bookkeeping entry without physical delivery of such securities. Rules, regulations, and orders of the Commission under this subsection, among other things, may make appropriate provision with respect to such matters as the earmarking, segregation, and hypothecation of such securities and investments, and may provide for or require periodic or other inspections by any or all of the following: Independent public accountants, employees and agents of the Commission, and such other persons as the Commission may designate. No such member which trades in securities for its own account may act as custodian except in accordance with rules and regulations prescribed by the Commission for the protection of investors. If a registered company maintains its securities and similar investments in the custody of a qualified bank or banks, the cash proceeds from the sale of such securities and similar investments and other cash assets of the company shall likewise be kept in the custody of such a bank or banks, or in accordance with such rules and regulations or orders as the Commission may from time to time prescribe for the protection of investors, except that such a registered company may maintain a checking account in a bank or banks having the qualifications prescribed in paragraph (1) of section 26(a) of this title for the trustees of unit investment trusts with the balance of such account or the aggregate balances of such accounts at no time in excess of the amount of the fidelity bond, maintained pursuant to section 17(g) of this title, covering the officers or employees authorized to draw on such account or accounts."

(b) Section 17(g) of such Act (15 U.S.C. 80a–17(g) is amended to read as follows:

"(g) The Commission is authorized to require by rules and regulations or orders for the protection of investors that any officer or employee of a registered management investment company who may singly, or jointly with others, have access to securities or funds of any registered company, either directly or through authority to draw upon such funds or to direct generally the disposition of such securities (unless the officer or employee has such access solely through his position as an officer or employee of a bank) be bonded by a reputable fidelity insurance company against larceny and embezzlement in such reasonable minimum amounts as the Commission may prescribe."

(c) Section 17 of such Act (15 U.S.C. 80a–17) is further amended by adding at the end thereof a new subsection as follows:

"(j) It shall be unlawful for any affiliated person of or principal underwriter for a registered investment company or any affiliated person of an investment adviser of or principal underwriter for a registered investment company, to engage in any act, practice, or course of business in connection with the purchase or sale, directly or indirectly, by such person of any security held or to be acquired by such registered investment company in contravention of such rules and regulations as the Commission may adopt to define, and prescribe means reasonably necessary to prevent, such acts, practices, or courses of business as are fraudulent, deceptive or manipulative. Such rules and regulations may include requirements for the adoption of codes of ethics by registered investment companies and investment advisers of, and principal underwriters for, such investment companies establishing such standards as are reasonably necessary to prevent such acts, practices, or courses of business."

SEC. 10. Section 18(f)(2) of the Investment Company Act of 1940 (15 U.S.C. 80a–18(f)(2) is amended to read as follows:

"(2) 'Senior security' shall not, in the case of a registered open-end company, include a class or classes or a number of series of preferred or special stock each of which is preferred over all other classes or series in respect of assets specifically allocated to that class or series: *Provided*, That (A) such company has outstanding no class or series of stock which is not so preferred over all other classes or series, or (B) the only other outstanding class of the issuer's stock consists of a common stock upon which no dividend (other than a liquidating dividend) is permitted to be paid and which in the aggregate represents not more than one-half of 1 per centum of the issuer's outstanding voting securities. For the purpose of insuring fair and equitable treatment of the holders of the outstanding voting securities of each class or series of stock of such company, the Commission may by rule, regulation, or order direct that any matter required to be submitted to the holders of the outstanding voting securities of such company shall not be deemed to have been effectively acted upon unless approved by the holders of such percentage (not exceeding a majority) of the outstanding voting securities of each class or series of stock affected by such matter as shall be prescribed in such rule, regulation, or order."

SEC. 11. Section 19 of the Investment Company Act of 1940 (15 U.S.C. 80a–19) is amended by inserting "(a)" after "SEC. 19.", and by adding at the end thereof a new subsection as follows:

"(b) It shall be unlawful in contravention of such rules, regulations, or orders as the Commission may prescribe as necessary or appropriate in the public interest or for the protection of investors for any registered investment company to distribute long-term capital gains, as defined in the Internal Revenue Code of 1954, more often than once every twelve months."

SEC. 12. (a) Section 22(b) of the Investment Company Act of 1940 (15 U.S.C. 80a–22(b)) is amended to read as follows:

"(b)(1) Such a securities association may also, by rules adopted and in effect in accordance with said section 15A, and notwithstanding the provisions of subsection (b)(8) thereof but subject to all other provisions of said section applicable to the rules of such an association, prohibit its members from purchasing, in connection with a primary distribution of redeemable securities of which any registered investment company is the issuer, any such security from the issuer or from any principal underwriter except at a price equal to the price at which such security is then offered to the public less a commission, discount, or spread which is computed in conformity with a method or methods, and within such limitations as to the relation thereof to said public offering price, as such rules may prescribe in order that the price at which such security is offered or sold to the public shall not include an excessive sales load but shall allow for reasonable compensation for sales personnel, for reasonable opportunity for profit for brokers and dealers and underwriters, and for reasonable sales loads to investors. The Commission shall on application or otherwise, if it appears that smaller companies are subjected to relatively higher operating costs,

make due allowance therefor by granting any such company or class of companies appropriate qualified exemptions from the provisions of this section.

"(2) At any time after the expiration of eighteen months from the date of enactment of the Investment Company Amendments Act of 1970, or after a securities association has adopted rules as contemplated by this subsection, the Commission may make such rules and regulations pursuant to section 15(b)(10) of the Securities Exchange Act of 1934 as are appropriate to effectuate the purpose of this subsection with respect to sales of shares of a registered investment company by broker-dealers subject to regulation under section 15(b)(8) of that Act: *Provided,* That the underwriter of such shares may file with the Commission at any time a notice of election to comply with the rules prescribed pursuant to this subsection by a national securities association specified in such notice, and thereafter the sales load shall not exceed that prescribed by such rules of such association, and the rules of the Commission as hereinabove authorized shall thereafter be inapplicable to such sales.

"(3) At any time after the expiration of eighteen months from the date of enactment of the Investment Company Amendments Act of 1970, the Commission may alter or supplement the rules of any securities association as may be necessary to effectuate the purposes of this subsection in the manner provided by section 15A(k)(2) of the Securities Exchange Act of 1934.

"(4) If any provision of this subsection is in conflict with any provision of any law of the United States in effect on the date this subsection takes effect, the provisions of this subsection shall prevail."

(b) Section 22(c) of such Act (15 U.S.C. 80a–22(c)) is amended to read as follows:

"(c) The Commission may make rules and regulations applicable to registered investment companies and to principal underwriters of, and dealers in, the redeemable securities of any registered investment company, whether or not members of any securities association, to the same extent, covering the same subject matter, and for the accomplishment of the same ends as are prescribed in subsection (a) of this section in respect of the rules which may be made by a registered securities association governing its members. Any rules and regulations so made by the Commission, to the extent that they may be inconsistent with the rules of any such association, shall so long as they remain in force supersede the rules of the association and be binding upon its members as well as all other underwriters and dealers to whom they may be applicable."

(c) Section 22(d) of such Act (15 U.S.C. 80a–22(d) is amended to read as follows:

"(d) No registered investment company shall sell any redeemable security issued by it to any person except either to or through a principal underwriter for distribution or at a current public offering price described in the prospectus, and, if such class of security is being currently offered to the public by or through an underwriter, no principal underwriter of such security and no dealer shall sell any such security to any person except a dealer, a principal underwriter, or the issuer, except at a current public offering price described in the prospectus. Nothing in this subsection shall prevent a sale made (i) pursuant to an offer of exchange permitted by section 11 including any offer made pursuant to section 11(b); (ii) pursuant to an offer made solely to all registered holders of the securities, or of a particular class or series of securities issued by the company proportionate to their holdings or proportionate to any cash distribution made to them by the company (subject to appropriate qualifications designed solely to avoid issuance of fractional securities); or (iii) in accordance with rules and regulations of the Commission made pursuant to subsection (b) of section 12."

(d) Section 22 of such Act (15 U.S.C. 80a–22) is further amended by adding a new subsection at the end thereof as follows:

"(h) Subject to any provision of any law of any State or of the United States prohibiting the creation or operation of an investment company by a bank or banks or by a savings and loan association or savings and loan associations and also subject to any restrictions or requirements imposed by any law of any State or of the United States—

"(1) the creation or operation of a registered investment company by a bank or banks shall be unlawful unless such creation or operation is in compliance with any applicable regulations of the Comptroller of the Currency, and

"(2) the creation or operation of a registered investment company by a savings and loan association or savings and loan associations shall be unlawful unless such creation or operation is in compliance with any applicable regulations of the Federal Home Loan Bank Board, and

"(3) the underwriting, distribution, or sale by a bank, or by a savings and loan association, of securities issued by a registered investment company shall be unlawful unless the registered investment company issues such securities only for distribution and sale by banks or by savings and loan associations,

and further provided that such securities issued by such investment company are sold at a public offering price which does not include a sales load and are sold only by officers and employees of banks and savings and loan associations who meet such standards with respect to training and experience as the Comptroller of the Currency and the Federal Home Loan Bank Board shall prescribe by regulations which are consistent with the rules and regulations promulgated by the Securities and Exchange Commission under the Securities Exchange Act of 1934."

SEC. 13. (a) Section 24(d) of the Investment Company Act of 1940 (15 U.S.C. 80a–24(d)) is amended to read as follows:

"(d) The exemption provided by paragraph (8) of section 3(a) of the Securities Act of 1933 shall not apply to any security of which an investment company is the issuer. The exemption provided by paragraph (11) of said section 3(a) shall not apply to any security of which a registered investment company is the issuer, except a security sold or disposed of by the issuer or bona fide offered to the public prior to the effective date of this title, and with respect to a security so sold, disposed of, or offered, shall not apply to any new offering thereof on or after the effective date of this title. The exemption provided by section 4(3) of the Securities Act of 1933 shall not apply to any transaction in a security issued by a face-amount certificate company or in a redeemable security issued by an open-end management company or unit investment trust if any other security of the same class is currently being offered or sold by the issuer or by or through an underwriter in a distribution which is not exempted from section 5 of said Act, except to such extent and subject to such terms and conditions as the Commission, having due regard for the public interest and the protection of investors, may prescribe by rules or regulations with respect to any class of persons, securities, or transactions."

(b) Section 24 of such Act (15 U.S.C. 80a–24) is further amended by adding at the end thereof a new subsection to read as follows:

"(f) In the case of securities issued by a face-amount certificate company or redeemable securities issued by an open-end management company or unit investment trust, which are sold in an amount in excess of the number of securities included in an effective registration statement of any such company, such company may, in accordance with such rules and regulations as the Commission shall adopt as it deems necessary or appropriate in the public interest or for the protection of investors, elect to have the registration of such securities deemed effective as of the time of their sale, upon payment to the Commission, within six months after any such sale, of a registration fee of three times the amount of the fee which would have otherwise been applicable to such securities. Upon any such election and payment, the registration statement of such company shall be considered to have been in effect with respect to such shares. The Commission may also adopt rules and regulations as it deems necessary or appropriate in the public interest or for the protection of investors to permit the registration of an indefinite number of the securities issued by a face-amount certificate company or redeemable securities issued by an open-end management company or unit investment trust."

SEC. 14. Section 25(c) of the Investment Company Act of 1940 (15 U.S.C. 80a–25(c)) is amended to read as follows:

"(c) Any district court of the United States in the State of incorporation of a registered investment company, or any such court for the district in which such company maintains its principal place of business, is authorized to enjoin the consummation of any plan of reorganization of such registered investment company upon proceedings instituted by the Commission (which is authorized so to proceed upon behalf of security holders of such registered company, or any class thereof), if such court shall determine that any such plan is not fair and equitable to all security holders."

SEC. 15. (a) Section 26 of the Investment Company Act of 1940 (15 U.S.C. 80a–26) is amended by redesignating subsections (b) and (c) thereof as subsections (c) and (d), respectively, and by inserting immediately after subsection (a) a new subsection as follows:

"(b) It shall be unlawful for any depositor or trustee of a registered unit investment trust holding the security of a single issuer to substitute another security for such security unless the Commission shall have approved such substitution. The Commission shall issue an order approving such substitution if the evidence establishes that it is consistent with the protection of investors and the purposes fairly intended by the policy and provisions of this title."

(b) Redesignated subsection (c) (formerly subsection (b)) of section 26 of such Act is amended to read as follows:

"(c) In the event that a trust indenture, agreement of custodianship, or other instrument pursuant to which securities of a registered unit investment trust are issued does not comply with the requirements of subsection (a) of this section, such instrument will be deemed to meet such requirements if a written contract or agreement binding on the parties and embodying such requirements has been executed by the depositor on the one part and the trustee or custodian on the other part, and three copies of such contract or agreement have been filed with the Commission."

SEC. 16. Section 27 of the Investment Company Act of 1940 (15 U.S.C. 80a–27) is amended by adding at the end thereof the following new subsections:

"(d) Notwithstanding subsection (a) of this section, it shall be unlawful for any registered investment company issuing periodic payment plan certificates, or for any depositor of or underwriter for such company, to sell any such certificate unless the certificate provides that the holder thereof may surrender the certificate at any time within the first year after the issuance of the certificate and receive in payment there-

of, in cash, the sum of (1) the value of his account, and (2) an amount, from such underwriter or depositor, equal to that part of the excess paid for sales loading which is over 20 per centum of the gross payments made by the certificate holder. The Commission may make rules and regulations applicable to such underwriters and depositors specifying such reserve requirements as it deems necessary or appropriate in order for such underwriters and depositors to carry out the obligations to refund sales charges required by this subsection.

"(e) With respect to any periodic payment plan certificate sold subject to the provisions of subsection (d) of this section, the registered investment company issuing such periodic payment plan certificate, or any depositor of or underwriter for such company, shall in writing (1) inform each certificate holder who has missed three payments or more, within thirty days following the expiration of ten months after the issuance of the certificate, or, if any such holder has missed one payment or more after such period but prior to the expiration of one year after the issuance of the certificate, at any time prior to the expiration of such one year period (or, if later, at any time prior to the expiration of ten days after such payment was missed), of his right to surrender his certificate as specified in subsection (d) of this section, and (2) inform the certificate holder of (A) the value of the holder's account as of the time the written notice was given to such holder, and (B) the amount to which he is entitled as specified in subsection (d) of this section. The Commission may make rules specifying the method, form, and contents of the notice required by this subsection.

"(f) With respect to any periodic payment plan, the custodian bank for such plan shall mail to each certificate holder, within sixty days after the issuance of the certificate, a statement of charges to be deducted from the projected payments on the certificate and a notice of his right of withdrawal as specified in this section. The Commission may make rules specifying the method, form, and contents of the notice required by this subsection. The certificate holder may within thirty days of the mailing of the notice specified in this subsection surrender his certificate and receive in payment thereof, in cash, the sum of (1) the value of his account, and (2) an amount, from the underwriter or depositor, equal to the difference between the gross payments made and the net amount invested. The Commission may make rules and regulations applicable to underwriters and depositors of companies issuing and such certificates specifying such reserve requirements as may be reasonably necessary in order for such underwriters and depositors to carry out the obligations to refund sales charges required by this subsection.

"(g) Notwithstanding the provisions of subsections (a) and (d), a registered investment company issuing periodic payment plan certificates may elect, by written notice to the Commission, to be governed by the provisions of subsection (h) rather than the provisions of subsection (a) and (d) of this section.

"(h) Upon making the election specified in subsection (g), it shall be unlawful for any such electing registered investment company issuing periodic payment plan certificates, or for any depositor of or underwriter for such company, to sell any such certificate, if—

"(1) the sales load on such certificate exceeds 9 per centum of the total payments to be made thereon;

"(2) more than 20 per centum of any payment thereon is deducted for sales load, or an average of more than 16 per centum is deducted for sales load from the first forty-eight monthly payments thereon, or their equivalent;

"(3) the amount of sales load deducted from any one of the first twelve monthly payments, the thirteenth through twenty-fourth monthly payments, the twenty-fifth through thirty-sixth monthly payments, or the thirty-seventh through forty-eighth monthly payments, or their equivalents, respectively, exceeds proportionately the amount deducted from any other such payment, or the amount deducted from any subsequent payments exceeds proportionately the amount deducted from any other subsequent payment;

"(4) the deduction for sales load on the excess of the payment or payments in any month over the minimum monthly payment, or its equivalent, to be made on the certificate exceeds the sales load applicable to payments subsequent to the first forty-eight monthly payments or their equivalent;

"(5) the first payment on such certificate is less than $20, or any subsequent payment is less than $10;

"(6) if such registered company is a management company, the proceeds of such certificate or the securities in which such proceeds are invested are subject to management fees (other than fees for administrative services of the character described in clause (C) of paragraph (2) of section 26(a)) exceeding such reasonable amount as the Commission may prescribe, whether such fees are payable to such company or to investment advisers thereof; or

"(7) if such registered company is a unit investment trust the assets of which are securities issued by a management company, the depositor of or principal underwriter for such trust, or any affiliated person of such depositor or underwriter, is to receive from such management company or any affiliated person thereof any fee or payment or account of payments on such certificate exceeding such reasonable amount as the Commission may prescribe."

SEC. 17. Section 28 of the Investment Company Act 1940 (15 U.S.C. 80a–28) is amended by adding at the end thereof a new subsection as follows:

"(i) The foregoing provisions of this section shall apply to all face-amount certificates issued prior to the effective date of this subsection; to the collection or acceptance of any payment on such certificates; to the issuance of face-amount certificates to the holders of such certificates pursuant to an obligation expressed or implied in such certificates; to the provisions of such certificates; to the minimum certificate reserves and deposits maintained with respect thereto; and to the assets that the issuer of such certificate was and is required to have with respect to such certificates. With respect to all face-amount certificates issued after the effective date of this subsection, the provisions of this section shall apply except as hereinafter provided.

"(1) Notwithstanding subparagraph (A) of paragraph (2) of subsection (a), the reserves for each certificate of the installment type shall be based on assumed annual, semi-annual, quarterly, or monthly reserve payments according to the manner in which gross payments for any certificate year are made by the holder, which reserve payments shall be sufficient in amount, as and when accumulated at a rate not to exceed 3½ per centum per annum compounded annually, to provide the minimum maturity or face amount of the certificate when due. Such reserve payments may be graduated according to certificate years so that the reserve payment or payments for the first three certificate years shall amount to at least 80 per centum of the required gross annual payment for such years; the reserve payment or payments for the fourth certificate year shall amount to at least 90 per centum of such year's required gross annual payment; the reserve payment or payments for the fifth certificate year shall amount to at least 93 per centum of such year's gross annual payment; and for the sixth and each subsequent certificate year the reserve payment or payments shall amount to at least 96 per centum of each such year's required gross annual payment: *Provided*, That such aggregate reserve payments shall amount to at least 93 per centum of the aggregate gross annual payments required to be made by the holder to obtain the maturity of the certificate. The company may at its option take as loading from the gross payment or payments for a certificate year, as and when made by the certificate holder, an amount or amounts equal in the aggregate for such year to not more than the excess, if any, of the gross payment or payments required to be made by the holder for such year, over and above the percentage of the gross annual payment required herein for such year for reserve purposes. Such loading may be taken by the company prior to or after the setting up of the reserve payment or payments for such year and the reserve payment or payments for such year may be graduated and adjusted to correspond with the amount of the gross payment or payments made by the certificate holder for such year less the loading so taken.

"(2) Notwithstanding paragraphs (1) and (2) of subsection (d), (A) in respect of any certificate of the installment type, during the first certificate year, the holder of the certificate, upon surrender thereof, shall be entitled to a value payable in cash not less than 80 per centum of the amount of the gross payments made on the certificate; and (B) in respect of any certificate of the installment type, at any time after the expiration of the first certificate year and prior to maturity, the holder of the certificate, upon surrender thereof, shall be entitled to a value payable in cash not less than the then amount of the reserve for such certificate required by clauses (1) and (2) of subparagraph (D) of paragraph (2) of subsection (a), less a surrender charge that shall not exceed 2 per centum of the face or maturity amount of the certificate, or 15 per centum of the amount of such reserve, whichever is the lesser, but in no event shall such value be less than 80 per centum of the gross payments made on the certificate. The amount of the surrender value for the end of each certificate year shall be set out in the certificate."

SEC. 18. Section 32(a) of the Investment Company Act of 1940 (15 U.S.C. 80a–31(a)) is amended to read as follows:

"(a) It shall be unlawful for any registered management company or registered face-amount certificate company to file with the Commission any financial statement signed or certified by an independent public accountant, unless—

"(1) such accountant shall have been selected at a meeting held within thirty days before or after the beginning of the fiscal year or before the annual meeting of stockholders in that year by the vote, cast in person, of a majority of those members of the board of directors who are not interested persons of such registered company;

"(2) such selection shall have been submitted for ratification or rejection at the next succeeding annual meeting of stockholders if such meeting be held, except that any vacancy occurring between annual meetings, due to the death or resignation of the accountant, may be filled by the vote of a majority of those members of the board of directors who are not interested persons of such registered company, cast in person at a meeting called for the purpose of voting on such action;

"(3) the employment of such accountant shall have been conditioned upon the right of the company by vote of a majority of the outstanding voting securities at any meeting called for the purpose to terminate such employment forthwith without any penalty; and

"(4) such certificate or report of such accountant shall be addressed both to the board of directors of such registered company and to the security holders thereof.

If the selection of an accountant has been rejected pursuant to paragraph (2) or his employment terminated pursuant to paragraph (3), the vacancy so occurring may be filled by a vote of a majority of the outstanding voting securities, either at the meeting at which the rejection or termination occurred or, if not so filled, at a subsequent meeting which shall be called for the purpose. In the case of a common-law trust of the character described in section 16(b), no ratification of the employment of such accountant shall be required but such employment may be terminated and such accountant removed by action of the holders of record of a majority of the outstanding shares of beneficial interest in such trust in the same manner as is provided in section 16(b) in respect of the removal of a trustee, and all the provisions therein contained as to the calling of a meeting shall be applicable. In the event of such termination and removal, the vacancy so occurring may be filled by action of the holders of record of a majority of the shares of beneficial interest either at the meeting, if any, at which such termination and removal occurs, or by instruments in writing filed with the custodian, or if not so filed within a reasonable time then at a subsequent meeting which shall be called by the trustees for the purpose. The provisions of paragraph (42) of section 2(a) as to a majority shall be applicable to the vote cast at any meeting of the shareholders of such a trust held pursuant to this subsection."

SEC. 19. Section 33 of the Investment Company Act of 1940 (15 U.S.C. 80a–32) is amended to read as follows:

"FILING OF DOCUMENTS WITH COMMISSION IN CIVIL ACTIONS

"SEC. 33. Every registered investment company which is a party and every affiliated person of such company who is a party defendant to any action or claim by a registered investment company or a security holder thereof in a derivative or representative capacity against an officer, director, investment adviser, trustee, or depositor of such company, shall file with the Commission, unless already so filed, (1) a copy of all pleadings, verdicts, or judgments filed with the court or served in connection with such action or claim, (2) a copy of any proposed settlement, compromise, or discontinuance of such action, and (3) a copy of such motions, transcripts, or other documents filed in or issued by the court or served in connection with such action or claim as may be requested in writing by the Commission. If any document referred to in clause (1) or (2)—

"(A) is delivered to such company or party defendant, such document shall be filed with the Commission not later than ten days after the receipt thereof; or

"(B) is filed in such court or delivered by such company or party defendant, such document shall be filed with the Commission not later than five days after such filing or delivery."

SEC. 20. Section 36 of the Investment Company Act of 1940 (15 U.S.C. 80a—35) is amended to read as follows:

"BREACH OF FIDUCIARY DUTY

"SEC. 36. (a) The Commission is authorized to bring an action in the proper district court of the United States, or in the United States court of any territory or other place subject to the jurisdiction of the United States, alleging that a person serving or acting in one or more of the following capacities has engaged within five years of the commencement of the action or is about to engage in any act or practice constituting a breach of fiduciary duty involving personal misconduct in respect of any registered investment company for which such person so serves or acts—

"(1) as officer, member of any advisory board, investment adviser, or depositor; or

"(2) as principal underwriter, if such registered company is an open-end company, unit investment trust, or face-amount certificate company.

If such allegations are established, the court may enjoin such person from acting in any or all such capacities, either permanently or temporarily and award such injunctive or other relief against such person as may be reasonable and appropriate in the circumstances, having due regard to the protection of investors and to the effectuation of the policies declared in section 1(b) of this title.

"(b) For the purposes of this subsection, the investment adviser of a registered investment company shall be deemed to have a fiduciary duty with respect to the receipt of compensation for services, or of payments of a material nature, paid by such registered investment company, or by the security holders thereof, to such investment adviser or any affiliated person of such investment adviser. An action may be brought under this subsection by the Commission, or by a bona fide security holder of such registered investment company on behalf of such company acting in good faith and with justifiable cause, against such investment adviser, or any affiliated person of such investment adviser, or any other person enumerated in subsection (a) of this section who has a fiduciary duty concerning such compensation or payments, for breach of fiduciary duty in respect of such compensation or payments paid by such registered investment company or by the security holders thereof to such investment adviser or person. With respect to any such action the following provisions shall apply:

"(1) It shall not be necessary to allege or prove that any defendant engaged in personal misconduct, and the plaintiff shall have the burden of proving a breach of fiduciary duty by clear and convincing evidence.

"(2) In any such action approved by the board of directors of such investment company of such compensation or payments, or of contracts or other arrangements providing for such compensation or payments, and ratification or approval of such compensation or payments, or of contracts or other arrangements providing for such compensation or payments, by the shareholders of such investment company, shall be given such consideration by the court as is deemed appropriate under all the circumstances.

"(3) No such action shall be brought or maintained against any person other than the recipient of such compensation or payments, and no damages or other relief shall be granted against any person other than the recipient of such compensation or payments. No award of damages shall be recoverable for any period prior to one year before the action was instituted. Any award of damages against such recipient shall be limited to the actual damages resulting from the breach of fiduciary duty and shall in no event exceed the amount of compensation or payments received from such investment company, or the security holders thereof, by such recipient.

"(4) This subsection shall not apply to compensation or payments made in connection with transactions subject to section 17 of this title, or rules, regulations, or orders thereunder, or to sales loads for the acquisition of any security issued by a registered investment company.

"(5) Any action pursuant to this subsection may be brought only in an appropriate district court of the United States.

"(6) No finding by a court with respect to a breach of fiduciary duty under this subsection shall be made a basis (A) for a finding of a violation of this title for the purposes of sections 9 and 49 of this title, section 15 of the Securities Exchange Act of 1934, or section 203 of title II of this Act, or (B) for an injunction to prohibit any person from serving in any of the capacities enumerated in subsection (a) of this section."

SEC. 21. The last sentence of section 43(a) of the Investment Company Act of 1940 (15 U.S.C. 80a–42(a)) is amended by striking out "sections 239 and 240 of the Judicial Code, as amended" and inserting in lieu thereof "section 1254 of title 28, United States Code".

SEC. 22. Section 44 of the Investment Company Act of 1940 (15 U.S.C. 80a–43) is amended—

(1) by striking out the next to the last sentence and inserting in lieu thereof "Judgments and decrees so rendered shall be subject to review as provided in sections 1254, 1291, 1292, and 1294 of title 28, United States Code."; and

(2) by adding at the end thereof a new sentence as follows: "The Commission may intervene as a party in any action or suit to enforce any liability or duty created by, or to enjoin any noncompliance with, section 36(b) of this title at any stage of such action or suit prior to final judgment therein."

SEC. 23. Section 202(a) of the Investment Advisers Act of 1940 (15 U.S.C. 80b–2(a)) is amended as follows:

(1) Paragraph (2) is amended by striking out "under section 11(k) of the Federal Reserve Act, as amended" and inserting in lieu thereof "under the authority of the Comptroller of the Currency".

(2) Paragraphs (17) through (20) are redesignated as paragraphs (18) through (21), respectively, and a new paragraph is inserted immediately after paragraph (16) to read as follows:

"(17) The term 'person associated with an investment adviser' means any partner, officer, or director of such investment adviser (or any person performing similar functions), or any person directly or indirectly controlling or controlled by such investment adviser, including any employee of such investment adviser, except that for the purposes of section 203 of this title (other than subsection (f) thereof), persons associated with an investment adviser whose functions are clerical or ministerial shall not be included in the meaning of such term. The Commission may by rules and regulations classify, for the purposes of any portion or portions of this title, persons, including employees controlled by an investment adviser."

SEC. 24. (a) Section 203(b) of the Investment Advisers Act of 1940 (15 U.S.C. 80b–3(b)) is amended to read as follows:

"(b) The provisions of subsection (a) shall not apply to—

"(1) any investment adviser all of whose clients are residents of the State within which such investment adviser maintains his or its principal office and place of business, and who does not furnish advice or issue analyses or reports with respect to securities listed or admitted to unlisted trading privileges on any national securities exchange;

"(2) any investment adviser whose only clients are insurance companies; or

"(3) any investment adviser who during the course of the preceding twelve months has had fewer than fifteen clients and who neither holds himself out generally to the public as an investment adviser nor acts as an investment adviser to any investment company registered under title I of this Act."

(b) Section 203(c) of such Act (15 U.S.C. 80b–3(c)) is amended by striking out subparagraph (F) and inserting in lieu thereof the following:

"(F) whether such investment adviser, or any person associated with such investment adviser, is subject to any disqualification which would be a basis for denial, suspension, or revocation of registration of such

investment adviser under the provisions of subsection (e), and".

(c) Section 203 of such Act (15 U.S.C. 80b–3) is further amended by redesignating subsection (d) as subsection (e), redesignating subsection (e) as subsection (g), and inserting after subsection (c) a new subsection as follows:

"(d) Any provision of this title (other than subsection (a) of this section) which prohibits any act, practice, or course of business if the mails or any means or instrumentality of interstate commerce are used in connection therewith shall also prohibit any such act, practice, or course of business by any investment adviser registered pursuant to this section or any person acting on behalf of such an investment adviser, irrespective of any use of the mails or any means or instrumentality of interstate commerce in connection therewith."

(d) Redesignated subsection (e) (formerly subsection (d) of section 203 of such Act) (15 U.S.C. 80b–3(d)) is amended to read as follows:

"(e) The Commission shall, after appropriate notice and opportunity for hearing, by order censure, deny registration to, or suspend for a period not exceeding twelve months, or revoke the registration of, an investment adviser, if it find that such censure, denial, suspension, or revocation is in the public interest and that such investment adviser or any person associated with such investment adviser, whether prior to or subsequent to becoming such—

"(1) has willfully made or caused to be made in any application for registration or report filed with the Commission under this title, or in any proceeding before the Commission with respect to registration, any statement which was at the time and in the light of the circumstances under which it was made false or misleading with respect to any material fact, or who has omitted to state in any such application or report any material fact which is required to be stated therein; or

"(2) has been convicted within ten years preceding the filing of the application or at any time thereafter of any felony or misdemeanor which the Commission finds (A) involves the purchase or sale of any security, (B) arises out of the conduct of the business of a broker, dealer, or investment adviser, (C) involves embezzlement, fraudulent conversion, or misappropriation of funds or securities, or (D) involves the violation of section 1341, 1342, or 1343 of title 18, United States Code; or

"(3) is permanently or temporarily enjoined by order, judgment, or decree of any court of competent jurisdiction from acting as an investment adviser, underwriter, broker, or dealer, or an affiliated person or employee of any investment company, bank, or insurance company, or from engaging in or continuing any conduct or practice in connection with any such activity, or in connection with the purchase or sale of any security; or

"(4) has willfully violated any provision of the Securities Act of 1933, or of the Securities Exchange Act of 1934, or of title I of this Act, or of this title, or of any rule or regulation under any of such statutes; or

"(5) has aided, abetted, counseled, commanded, induced, or procured the violation by any other person of the Securities Act of 1933, or the Securities Exchange Act of 1934, or of title I of this Act, or of this title, or of any rule or regulation under any of such statutes or has failed reasonably to supervise, with a view to preventing violations of such statutes, rules, and regulations, another person who commits such a violation, if such other person is subject to his supervision: Provided, That, for the purposes of this paragraph (5), no person shall be deemed to have failed reasonably to supervise any person, if—

"(A) there have been established procedures, and a system for applying such procedures, which would reasonably be expected to prevent and detect, insofar as practicable, any such violation by such other person; and

"(B) such person has reasonably discharged the duties and obligations incumbent upon him by reason of such procedures and system without reasonable cause to believe that such procedures and system were not being complied with; or

"(6) is subject to an order of the Commission entered pursuant to subsection (f) of this section barring or suspending the right of such person to be associated with an investment adviser, which order is in effect with respect to such person."

(e) Section 203 of such Act (15 U.S.C. 80 b–3) is further amended by redesignating subsections (f) and (g) as subsections (h) and (i), respectively, and inserting after redesignated subsection (c) a new subsection as follows:

"(f) The Commission may, after appropriate notice and opportunity for hearing, by order censure any person or bar or suspend for a period not exceeding twelve months any person from being associated with an investment adviser, if the Commission finds that such censure, barring, or suspension is in the public interest and that such person has committed or omitted any act or omission enumerated in paragraph (1), (4), or (5) of subsection (e) of this section, or has been convicted of any offense specified in paragraph (2) of subsection (e) within ten years of the commencement of the proceedings under this subsection, or is enjoined from any action, conduct, or practice specified in paragraph (3) of subsection (e). It shall be unlawful for any person as to whom such an order barring or suspending him from being associated with an investment adviser is in effect, willfully to become, or to be, associated with an investment adviser, without the consent of the Commission, and it shall be unlawful for any investment adviser to permit such a person to become, or remain, a person associated with such investment adviser without the consent of the Commission, if such investment adviser knew, or in the exercise of reasonable care should have known of such order."

SEC. 25. Section 205 of the Investment Advisers Act of 1940 (15 U.S.C. 80b–5) is amended to read as follows:

"INVESTMENT ADVISORY CONTRACTS

"SEC. 205. (a) No investment adviser, unless exempt from registration pursuant to section 203(b), shall make use of the mails or any means or instrumentality of interstate commerce, directly or indirectly, to enter into, extend, or renew any investment advisory contract, or in any way to perform any investment advisory contract entered into, extended, or renewed on or after the effective date of this title, if such contract—

"(1) provides for compensation to the investment adviser on the basis of a share of capital gains upon or capital appreciation of the funds or any portion of the funds of the client;

"(2) fails to provide, in substance, that no assignment of such contract shall be made by the investment adviser without the consent of the other party to the contract; or

"(3) fails to provide, in substance, that the investment adviser, if a partnership, will notify the other party to the contract of any change in the membership of such partnership within a reasonable time after such change.

"Paragraph (1) of this section shall not (A) be construed to prohibit an investment advisory contract which provides for compensation based upon the total value of a fund averaged over a definite period, or as of definite dates, or taken as of a definite date, or (B) apply to an investment advisory contract with—

"(i) an investment company registered under title I of this Act, or

"(ii) any trust, collective trust fund or separate account referred to in section 3(c)(11) of title I of this Act, provided that the contract relates to the investment of assets in excess of $5 million, or

"(iii) any other person, provided that the contract relates to the investment of assets in excess of $1 million,

which contract provides for compensation based on the asset value of the company or the fund under management averaged over a specified period and increasing and decreasing proportionately with the investment performance of the company or fund over a specified period in relation to the investment record of an appropriate index of securities prices or such other measure of investment performance as the Commission by rule, regulation, or order may specify. For purposes of clause (B) of preceding sentence, the point from which increases and decreases in compensation are measured shall be the fee which is paid or earned when the investment performance of such company or fund is equivalent to that of the index or other measure of performance, and an index of securities prices shall be deemed appropriate unless the Commission by order shall determine otherwise. As used in paragraphs (2) and (3) of this section, 'investment advisory contract' means any contract or agreement whereby a person agrees to act as investment adviser or to manage any investment or trading account of another person other than an investment company registered under title I of this Act.

"(b) Subsection (a) shall not apply to any investment advisory contract with an investment company which (1) is not registered nor required to be registered under title I of this Act, (2) is not organized or otherwise created under the laws of the United States or of a State, and (3) does not make use of the mails or any means or instrumentality of interstate commerce, directly or indirectly, to offer for sale, sell, or deliver after sale, in connection with a public offering, any security of which such company is the issuer."

SEC. 26. The Investment Advisers Act of 1940 (15 U.S.C. 80b–1–21) is further amended by inserting immediately after section 206 a new section as follows:

"EXEMPTIONS

"SEC. 206A. The Commission, by rules and regulations, upon its own motion, or by order upon application, may conditionally or unconditionally exempt any person or transaction, or any class or classes of persons, or transactions, from any provision or provisions of this title or of any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of this title."

SEC. 27. (a) Section 2 of the Securities Act of 1933 (15 U.S.C. 77b) is amended by adding at the end thereof two new paragraphs as follows:

"(13) The term 'insurance company' means a company which is organized as an insurance company, whose primary and predominant business activity is the writing of insurance or the reinsuring of risks underwritten by insurance companies, and which is subject to supervision by the insurance commissioner, or a similar official or agency, of a State or territory or the District of Columbia; or any receiver or similar official or any liquidating agent for such company, in his capacity as such.

"(14) The term 'separate account' means an account established and maintained by an insurance company pursuant to the laws

of any State or territory of the United States, the District of Columbia, or of Canada or any province thereof, under which income, gains and losses, whether or not realized, from assets allocated to such account, are, in accordance with the applicable contract, credited to or charged against such account without regard to other income, gains, or losses of the insurance company."

(b) Section 3(a)(2) of such Act (15 U.S.C. 77c (a)(2)) is amended to read as follows:

"(2) Any security issued or guaranteed by the United States or any territory thereof, or by the District of Columbia, or by any State of the United States, or by any political subdivision of a State or territory, or by any public instrumentality of one or more States or territories, or by any person controlled or supervised by and acting as an instrumentality of the Government of the United States pursuant to authority granted by the Congress of the United States; or any certificate of deposit for any of the foregoing; or any security issued or guaranteed by any bank; or any security issued by or representing an interest in or a direct obligation of a Federal Reserve bank; or any interest or participation in any common trust fund or similar fund maintained by a bank exclusively for the collective investment and reinvestment of assets contributed thereto by such bank in its capacity as trustee, executor, administrator, or guardian; or any interest or participation in a single or collective trust fund maintained by a bank or in a separate account maintained by an insurance company which interest or participation is issued in connection with (A) a stock bonus, pension, or profit-sharing plan which meets the requirements for qualification under section 401 of the Internal Revenue Code of 1954, or (B) an annuity plan which meets the requirements for the deduction of the employer's contribution under section 404 (a)(2) of such Code, other than any plan described in clause (A) or (B) of this paragraph which covers employees some or all of whom are employees within the meaning of section 401(c)(1) of such Code. The Commission, by rules and regulations or order, shall exempt from the provisions of section 5 of this title any interest or participation issued in connection with a stock bonus, pension, profit-sharing, or annuity plan which covers employees some or all of whom are employees within the meaning of section 401(c)(1) of the Internal Revenue Code of 1954, if and to the extent that the Commission determines this to be necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of this title. For the purposes of this paragraph, a security issued or guaranteed by a bank shall not include any interest or participation in any collective trust fund maintained by a bank; and the term 'bank' means any national bank, or any banking institution organized under the laws of any State, territory, or the District of Columbia, the business of which is substantially confined to banking and is supervised by the State or territorial banking commission or similar official; except that in the case of a common trust fund or similar fund, or a collective trust fund, the term 'bank' has the same meaning as in the Investment Company Act of 1940."

(c) Section 3(a)(5) of such Act (15 U.S.C. 77c(a)(5)) is amended to read as follows:

"(5) Any security issued (A) by a savings and loan association, building and loan association, cooperative bank, homestead association, or similiar institution, which is supervised and examined by State or Federal authority having supervision over any such institution, except that the foregoing exemption shall not apply with respect to any such security where the issuer takes from the total amount paid or deposited by the purchaser, by way of any fee, cash value or other device whatsoever, either upon termination of the investment at maturity or before maturity, an aggregate amount in excess of 3 per centum of the face value of such security; or (B) by (i) a farmer's cooperative organization exempt from tax under section 521 of the Internal Revenue Code of 1954 (ii) a corporation described in section 501(c)(16) of such Code and exempt from tax under section 501(a) of such Code, or (iii) a corporation described in section 501(c)(2) of such Code which is exempt from tax under section 501(a) of such Code and is organized for the exclusive purpose of holding title to property, collecting income therefrom, and turning over the entire amount thereof, less expenses, to an organization or corporation described in clause (i) or (ii));".

SEC. 28 (a) Section 3(a)(12) of the Securities Exchange Act of 1934 (15 U.S.C. 78c (a)(12) is amended to read as follows:

"(12) The term 'exempted security' or 'exempted securities' includes securities which are direct obligations of or obligations guaranteed as to principal or interest by the United States; such securities issued or guaranteed by corporations in which the United States has a direct or indirect interest as shall be designated for exemption by the Secretary of the Treasury as necessary or appropriate in the public interest or for the protection of investors; securities which are direct obligations of or obligations guaranteed as to principal or interest by a State or any political subdivision thereof, or by any agency or instrumentality of a State or any political subdivision thereof, or by any municipal corporate instrumentality of one or more States; any interest or participation in any common trust fund or similar fund maintained by a bank exclusively for the collective investment and reinvestment of assets contributed thereto by such bank in its capacity as trustee, executor, administrator, or guardian; any interest or participation in a collective trust fund maintained by a bank or in a separate account maintained by an insurance company which interest or participation is issued in connection with (A) a stock-bonus, pension, or profit-sharing plan which meets the requirements for qualification under section 401 of the Internal Revenue Code of 1954, or (B) an annuity plan which meets the requirements for the deduction of the employer's contribution under section 404(a)(2) of such code, other than any plan described in clause (A) or (B) of this paragraph which covers employees some or all of whom are employees within the meaning of section 401(c)(1) of such code; and such other securities (which may include, among others, unregistered securities the market in which is predominantly intrastate) as the Commission may, by such rules and regulations as it deems necessary or appropriate in the public interest or for the protection of investors, either unconditionally or upon specified terms and conditions or for stated periods, exempt from the operation of any one or more provisions of this title which by their terms do not apply to an 'exempted security' or to 'exempted securities'."

(b) Section 3(a)(19) of the Securities Exchange Act of 1934 (15 U.S.C. 78c(a)(19)) is amended to read as follows:

"(19) the terms 'investment company', 'affiliated person', 'insurance company', and 'separate account' have the same meanings as in the Investment Company Act of 1940."

(c) Section 12(g)(2) of such Act (15 U.S.C. 781(g)(2)) is amended by adding at the end thereof a new subparagraph as follows:

"(H) any interest or participation in any collective trust funds maintained by a bank or in a separate account maintained by an insurance company which interest or participation is issued in connection with (i) a stock-bonus, pension, or profit-sharing plan which meets the requirements for qualification under section 401 of the Internal Revenue Code of 1954, or (ii) an annuity plan which meets the requirements for deduction of the employer's contribution under section 404 (a)(2) of such Code."

SEC. 29. (a) Section 6 of the Securities Exchange Act of 1934 (15 U.S.C. 78f) is amended by adding at the end thereof the following new subsection:

"(g) all persons including officers, directors, and employees employed by a national securities exchange registered pursuant to the provisions of this Act and any officer, director, or employee of a clearing corporation affiliated with such registered national securities exchange employed on or after September 1, 1970, shall, as a condition of employment, be fingerprinted. Every set of fingerprints taken pursuant to this subsection shall be promptly submitted to the Commission. The Commission shall make rules and regulations to provide for the appropriate processing and use of these fingerprints."

(b) Section 15(b)(1) of the Securities Exchange Act of 1934 (15 U.S.C. 78o(b)(1)) is amended by adding at the end thereof the following: "All persons including partners, officers, directors, and employees employed by a broker-dealer registered under this section employed on or after September 1, 1970, shall, as a condition of employment, be fingerprinted. Every set of fingerprints taken pursuant to this section shall be promptly submitted to the Commission. The Commission shall make rules and regulations to provide for the appropriate processing and use of these fingerprints."

SEC. 30. The provisions of the Securities Act of 1933 and the Investment Company Act of 1940 shall not apply, except for purposes of definition of terms used in this section, to any interest or participation (including any separate account or other fund providing for the sharing of income or gains and losses, and any interest or participation in such account or fund) in any contract, certificate, or policy providing for life insurance benefits which was issued prior to March 23, 1959, by an insurance company, if (1) the form of such contract, certificate, or policy was approved by the insurance commissioner, or similar official or agency, of a State, territory, or the District of Columbia, and (2) under such contract, certificate, or policy not to exceed 49 per centum of the gross premiums or other consideration paid was to be allocated to a separate account or other fund providing for the sharing of income or gains and losses.

SEC. 31. This Act shall take effect on the date of its enactment, except that—

(1) sections 5 (a), (b), and (c); 9(a); 11; 18; 24(a); and 25; (amending sections 10 (a), (b), and (c); 17(f); 19; and 32(a) of the Investment Company Act of 1940; and sections 203(b) and 205 of the Investment Advisers Act of 1940, respectively) shall take effect upon the expiration of one year after the date of enactment of this Act;

(2) that part of section 5(d) which substitutes "interested persons" for "affiliated persons" in section 10(d) of the Investment Company Act of 1940 shall take effect upon the expiration of one year after the date of enactment of this Act;

(3) sections 16 and 17 (amending sections 27 and 28 of the Investment Company Act of 1940) shall take effect upon the expiration of six months after the date of enactment of this Act; and

(4) that part of section 20 which adds a subsection (b) to section 36 of the Investment Company Act of 1940 shall take effect upon the expiration of eighteen months after the date of enactment of this Act.

Mr. MOSS (during the reading). Mr. Chairman, I ask unanimous consent that the substitute committee amendment be

considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

AMENDMENT OFFERED BY MR. MOSS

Mr. MOSS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Moss: Page 98, line 5, insert after the comma the following: "(or, if earlier, after a securities association has adopted for purposes of paragraph (1) any rule respecting excessive sales loads)."

Mr. MOSS. Mr. Chairman, this amendment is a very simple clarifying amendment to which I understand there is no objection.

Through inadvertence we provided that after rules were adopted or promulgated by a national association engaging in regulations that they would not be reviewed for a period of 18 months. This amendment merely makes it clear that upon the adoption of those rules, they would then be subject to review by the SEC rather than having an intervening 18-month period.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. Moss).

The amendment was agreed to.

The CHAIRMAN. Are there further amendments? If not, the question is on the committee amendment, as amended.

The committee amendment, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the Chair, Mr. Charles H. WILSON, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (H.R. 17333) to amend the Investment Company Act of 1940 and the Investment Advisers Act of 1940 to define the equitable standards governing relationships between investment companies and their investment advisers and principal underwriters, and for other purposes, pursuant to House Resolution 1193, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The bill was passed.

A motion to reconsider was laid on the table.

The SPEAKER. Pursuant to the provisions of House Resolution 1193, the Committee on Interstate and Foreign Commerce is discharged from the further consideration of the bill, S. 2224.

The Clerk read the title of the Senate bill.

MOTION OFFERED BY MR. MOSS

Mr. MOSS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. Moss moves to strike out all after the enacting clause of S. 2224 and insert in lieu thereof the provisions of H.R. 17333, as passed.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 17333) was laid on the table.

APPOINTMENT OF CONFEREES

Mr. MOSS. Mr. Speaker, I ask unanimous consent that the House insist on its amendment to the bill S. 2224 and request a conference with the Senate on the disagreeing votes of the two Houses thereon.

The SPEAKER. Is there objection to the request of the gentleman from California? The Chair hears none, and appoints the following conferees: Messrs. STAGGERS, Moss, MURPHY of New York, SPRINGER, and KEITH.

## GENERAL LEAVE TO EXTEND

Mr. MOSS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks in the RECORD on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

## COMPREHENSIVE DRUG ABUSE PREVENTION AND CONTROL ACT OF 1970

Mr. MADDEN. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1216 and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 1216

*Resolved*, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 18583) to amend the Public Health Service Act and other laws to provide increased research into, and prevention of, drug abuse and drug dependence; to provide for treatment and rehabilitation of drug abusers and drug dependent persons; and to strengthen existing law enforcement authority in the field of drug abuse. After general debate, which shall be confined to the bill and shall continue not to exceed four hours, three hours to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interstate and Foreign Commerce, and one hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider without the intervention of any point of order the amendment in the nature of a substitute recommended by the Committee on Interstate and Foreign Commerce now printed in the bill as an original bill for the purpose of amendment under the five-minute rule. At the conclusion of the consideration of title II of the amendment in the nature of a substitute for amendment, title III of said substitute shall be considered as having been read for amendment. No amendments shall be in order to title III of said substitute except amendments offered by direction of the Committee on Ways and Means, and said amendments shall be in order, any rule of the House to the contrary notwithstanding, but shall not be subject to amendment. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

Mr. MADDEN. Mr. Speaker, I yield 30 minutes to the gentleman from California (Mr. SMITH), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 1216 provides a rule with 4 hours of general debate for consideration of H.R. 18583, the Drug Abuse Prevention and Control Act. Titles I and II of the bill shall be open for amendment and 3 hours of debate will be controlled by the Committee on Interstate and Foreign Commerce on those titles. No amendments may be offered to title III of the bill except amendments offered by the Committee on Ways and Means, which committee will control 1 hour of debate on that title. Further, it shall be in order to consider, without the intervention of a point of order, the committee substitute as an original bill for the purpose of amendment. The committee substitute is much broader in its scope, than the original bill, and without the waiver of points of order there might be some question as to germaneness. In addition, section 516 (b) and (c) of the substitute—page 204 of the bill—can be construed as an appropriation in an authorization bill.

The purpose of H.R. 18583 is to deal comprehensively with the menace of drug abuse in the United States through providing authority for increased efforts in drug abuse prevention and rehabilitation of users, through providing more effective means for law enforcement aspects of drug abuse prevention and control, and by providing for an overall balanced scheme of criminal penalties for offenses involving drugs.

Title I of the bill provides authority for HEW to increase its efforts in the rehabilitation, treatment, and prevention of drug abuse, through community mental health centers and through public health service hospitals and facilities. Over a 3-year period $75 million in increased authorizations are provided for community mental health center facilities to deal with narcotic addicts and drug-dependent persons. Twenty-nine million dollars is authorized for drug abuse education activities, and $60

million is authorized for special facilities in areas having percentages of narcotic addicts and drug-dependent persons.

Increased research and training activities are authorized through the National Institute of Mental Health out of appropriations otherwise authorized for that institute. The bill would encourage treatment of narcotic addicts by individual physicians.

Title II of the bill provides for control by the Justice Department of problems related to drug abuse through registration of manufacturers, wholesalers, retailers, and all others in the legitimate distribution chain, and makes transactions outside the legitimate distribution chain illegal.

The drugs with respect to which the controls are enforced are those which by law or regulation have been placed under control under existing law, which include all hard narcotics and opiates, marihuana, all hallucinogens, amphetamines, barbiturates, and tranquilizers subject to abuse.

Procedure is established for classification of future drugs which create abuse problems, whereby the Attorney General will gather data and request an evaluation by the Secretary of Health, Education, and Welfare determines that the drug should not be controlled. If the Secretary of Health, Education, and Welfare determines that the drug should not be controlled, the Attorney General may not control the drug; otherwise, the Attorney General may proceed in accordance with rulemaking procedures, which provide notice and opportunity for a hearing, to list the drug for control. However, if a drug is required to be controlled pursuant to an international treaty, convention, or protocol in effect on the enactment of the bill, the drug will be controlled by conformity with the treaty or other international agreement obligations.

Transfers of drugs providing serious addiction or abuse problems may be made only through the use of officially prescribed order forms, with a copy furnished the Attorney General. All persons in the distribution chain are required to be registered, and, with certain exceptions, must keep records with respect to all transfers of controlled drugs. Practicing physicians are required to keep records of drugs which they dispense to patients—as distinguished from prescribing or administering. Researchers are not required to keep records with respect to controlled substances used by them at registered establishments that keep records.

The entire structure of criminal penalties involving controlled drugs is revised and the bill specifies a number of administrative authorities for the Attorney General.

Over a 3-year period the Department of Justice is authorized an appropriation of $220 million, plus $6 million a year for increased enforcement personnel.

Title III of the bill provides for control of imports and exports of drugs subject to abuse through a system of registration of importers and exporters, and permits for or notification to the Attorney General of transactions, with criminal penalties for transactions outside the legitimate chain.

The bill establishes a Presidential Commission on Marihuana and Drug Abuse which will study and report to the Congress within 1 year and an appropriation of $1 million is authorized for the Commission.

Mr. Speaker, I urge the adoption of House Resolution 1216 in order that this all important bill may be considered.

Mr. GROSS. Mr. Speaker, will the gentleman yield to me for a question?

Mr. MADDEN. I yield to the gentleman from Iowa.

Mr. GROSS. I thank the gentleman for yielding.

I would like to ask why the House is precluded from offering amendments to title III?

Mr. MADDEN. In connection with that, I will yield to the gentleman from Florida.

Mr. PEPPER. If the gentleman will allow me to say so, due to the fact that title III was handled by the Committee on Ways and Means and the Committee on Ways and Means, because it does have to do with the imposition of taxes upon imports, according to their usual custom, have requested that there be a closed rule on this part of the bill, title III, which only deals with the tax section of the bill, because they say that if you open this title up to amendment, you will open up practically the whole tax code of the country. However, titles I and II are here under an open rule, as recommended by the Committee on Rules.

Mr. GROSS. Will the gentleman yield further, very briefly?

Mr. MADDEN. Yes.

Mr. GROSS. I was afraid that would be the answer. I thank the gentleman from Florida for his explanation, but I was afraid it would be the answer that no amendments may be offered under this rule to title III because it has become fashionable to give the Committee on Ways and Means closed rules with regard to the offering of amendments to bills coming from the Committee on Ways and Means. It seems to me that a rule could have been brought out providing for amendments which were germane to the subject matter of title III of this bill. That would not have opened all the tax laws of the country to amendment.

I am opposed to this rule for the reason that it does prohibit amendments to title III. I can think of no good reason why this rule should have been brought out, precluding as it does the opportunity to amend an important part of the bill. Again I thank the gentleman for yielding.

Mr. SMITH of California. Mr. Speaker, I yield myself such time as I may use.

Mr. Speaker, the gentleman from Indiana (Mr. MADDEN) very thoroughly explained the rule, and in the interest of saving time I will just add some things that he did not say, because I agree with what the gentleman has said.

On title III, which was handled by the Committee on Ways and Means, a statement was made before the Committee on Rules that this could open up the whole internal revenue code. It only applies to a small portion of it. Pursuant to that request they asked for a closed rule and waiver of points of order on the entire bill. I do not think points of order are involved in this. The Ramseyer rule, I believe, was fully complied with, but the committee decided to go along with the request.

This is an example, Mr. Speaker, of how two committees can cooperate. The Committee on Interstate and Foreign Commerce handled the first two titles. They will have 3 hours of debate under their control. The Committee on Ways and Means cooperated very completely with the Committee on Interstate and Foreign Commerce on the tax provisions, and they will have 1 hour to handle title III of the bill.

As far as the bill itself is concerned, the major purposes are the following:

To provide rehabilitation programs for drug users;

To change existing criminal penalties with respect to illegal drugs and their uses;

To authorize for the Department of Justice additional control over the manufacturing and distribution of drugs for legitimate uses through a system of registration and reporting; and

To provide better control of imports and exports of drugs through a system of registration and permits for legitimate businesses.

Mr. Speaker, it is clear enough that the United States faces a serious drug problem, particularly with respect to our young people. In 1968 over 162,000 persons were arrested for drug use violations. Of this total 43,200 were under 18 years of age. Now, a leading cause of death among teenagers is drug overdose. It is estimated that almost 50 percent of the 9 million amphetamines and barbituates legally produced in 1969 were illegally diverted into illicit channels. The problems of drug use, with its accompanying dependency—physical and/or psychological—are well known. The present statutory authority is not adequate to stem the existing problems. This bill seeks to fill this particular gap.

Now, Mr. Speaker, there are some controversial parts of the bill, two at least. One has to do with the no-knock provision and the other has to do with continuing criminal enterprise. I understand that the gentleman from Virginia (Mr. POFF) may offer an amendment in connection with the continuing criminal enterprise.

Mr. Speaker, it is my opinion that everyone is in agreement with the general purposes of the bill. On the no-knock provision there seems to be a little bit of difference of opinion in that section. However, it was explained to us that the no-knock provision as contained in this bill is not as strong as the no-knock provision contained in the District of Columbia bill. That District of Columbia bill says "will be served" in connection with no-knock, while this one uses the words "may be served."

Mr. Speaker, the overall cost of the bill for a 3-year period as I understand it will be $407 million. There may be some discussion over the reduction of

the marijuana penalty on the first offense from a mandatory 5-year sentence, a felony, which can be reduced at the discretion of the court to a misdemeanor.

However. the majority of the testimony indicated that it is extremely difficult to convict a young individual who is using marijuana, or who has it in his possession for the first time and has never previously been involved with the law, with the result that many of them are not convicted. Therefore, this suggestion was made.

Mr. Speaker, I imagine some will criticize some of us for reducing the marijuana penalty, but insofar as I am concerned, the one we presently have does not seem to work and, perhaps, we should try this.

Mr. Speaker, I know of no objection to the rule and I urge its adoption.

Mr. MADDEN. Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from Florida (Mr. PEPPER).

Mr. PEPPER. Mr. Speaker, I thank my able friend and distinguished colleague from Indiana for yielding this time to me. I am particularly grateful to the gentleman for handling the rule as I was a little tardy in arriving here from a meeting of the House Internal Security Committee and he was good enough to go ahead with a presentation of this rule which had been assigned to me by the able chairman of the Committee on Rules. The gentleman from Indiana has done his usual excellent job in the presentation of the rule on this legislation.

Mr. Speaker, I wish especially to commend the chairman of the subcommittee and the chairman of the full Committee on Interstate and Foreign Commerce, as well as the Committee on Ways and Means, for the fine job they have done in bringing this legislation to the floor of the House.

This matter of drug abuse today has become one of the most grievous concerns of our country. We have been told through our hearings held by the Crime Committee that one-half of all the violent street crimes committed in this country are committed by people under 25 years of age, and that roughly one-half of all of that violent street crime is attributable to the use of drugs by those young people who commit those crimes, or through the commission of those crimes in order to get money to sustain their narcotic or dangerous drug addiction.

We held a hearing recently in New York on the matter of heroin, and we were told by the prosecuting authority that in New York, and in Bronx Counties, that 40 percent of all the cases tried in those counties were attributable to traffic in or the possession of heroin, and another 25 percent of their cases, making it a total of near 75 percent, were attributable to crimes committed by addicts of heroin who needed money to sustain their addiction. And there is no longer a confinement of those terrible narcotic and dangerous drug addictions and crimes to the ghettos of the country. They reach into all aspects and segments of our society.

I think it is only fair to say that in one respect members of the House Select Committee on Crime do propose to offer an amendment on the floor later on when this measure comes under consideration, and that is to remove from schedule 3 to schedule 2 the amphetamines, which we consider a dangerous drug, which should be under a quota system under the Attorney General. Eight billion of these products are being manufactured and distributed throughout the country today, about half of them into the black market.

But I just rise, Mr. Speaker, to commend my able colleague, the gentleman from Florida (Mr. ROGERS), and all the members of the committee, for bringing this very meritorious measure to the floor of the House.

Mr. MADDEN. Mr. Speaker, I want to join in commending the committee for bringing this much-needed legislation to the floor of the House. I also want to commend the gentleman from Florida (Mr. PEPPER), who is the chairman of the Select Crime Committee, and the members of that committee, for the outstanding work they have been doing all over the country in holding hearings. I have read accounts in the newspapers from coast to coast concerning the hearings held by the House Select Crime Committee, and the testimony that they have taken, and the meetings they have held with the press, the results of which have probably gone into probably millions of the homes of our Nation alerting the people as to the dangers of drugs and the crimes that are committed through their use. The House was indeed well advised when it created this Select Crime Committee, and for the great work that the gentleman from Florida (Mr. PEPPER) and his committee have done.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. JARMAN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 18583) to amend the Public Health Service Act and other laws to provide increased research into, and prevention of, drug abuse and drug dependence; to provide for treatment and rehabilitation of drug abusers and drug dependent persons; and to strengthen existing law enforcement authority in the field of drug abuse.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Oklahoma.

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 18583, with Mr. MOORHEAD in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Pursuant to the rule, general debate shall continue not to exceed 4 hours—3 hours to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interstate and Foreign Commerce, and 1 hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means.

Under the rule, the gentleman from Oklahoma (Mr. JARMAN), will be recognized for 1½ hours and the gentleman from Illinois (Mr. SPRINGER) will be recognized for 1½ hours.

The Chair recognizes the gentleman from Oklahoma (Mr. JARMAN).

Mr. JARMAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this bill deals with one of the most important health problems existing in the United States today, the problem of drug abuse. I know that many persons consider that this problem is primarily one involving law enforcement, but in my opinion it is a health problem—a mental health problem.

The abuse of drugs is a criminal offense, but it is a criminal offense only because we have made it one. In recent years we have learned to our dismay that merely making this type of activity a crime does not deter many of our citizens, particularly the young, from engaging in this form of behavior.

Something more fundamental is involved here, and I think we should recognize drug abuse for what it really is. In my opinion, drug abuse is a symptom of an underlying disorder. A person takes drugs in order to change his perception of the world around him, and whether the drug is alcohol, marihuana, LSD, or heroin, the drug abuser takes the drug because he wants to change the way the world around him looks and feels to him. He wants to change the way the world looks or feels because he is not satisfied with it the way it is. His problem may be that he lives in an environment of poverty, misery, and degradation. His problem may arise from conditions other than, or in addition to, his environment.

In the case of many, the escape provided by drug is primarily an escape by the individual from himself. We all project onto the outer world the personality problems we ourselves have, and to the extent that our psychological makeup is disorderly, we tend to see a disorderly world about us.

The psychologists call this phenomenon projection, and it is a frequent occurrence that a person is most distressed by manifestations in others of the facets of his own personality which he finds distressing. We see this clearly in the behavior patterns of those of underlying authoritarian makeup who, in the name of freedom, would deny its exercise by others.

When a person does not like himself very much, or for other reasons does not like the world around him, he can either try to change the world or his view of it, endure it, or run away from it. Drugs provide a convenient method of running away by changing the way one sees the world.

After a person begins to use drugs for this purpose, he may tend to use them more and more frequently as he becomes

psychologically dependent upon them. This psychological dependence frequently is the result of the underlying reasons that led to the use of drugs in the first place—the individual wants to escape from himself or from the rest of the world, and during the periods when he is free from drugs, he is more distressed than he otherwise would be, since his drug-induced state is, at least temporarily so much more pleasant for him than is his normal state.

This psychological dependence can lead to increasing rates of use of drugs. In addition, in the case of many drugs, the individual comes to be physically dependent upon them, and their absence in his bloodstream can cause him physical discomfort—sometimes acute discomfort, even convulsions and death in severe cases.

This physical or psychological dependence or both, leads the individual into a state where frequently his life begins to center around drugs to such an extent that he lives for nothing else.

At this point the interests of our society conflict sharply with the individual drug abuser. He frequently turns to crime to support his habit; he is dangerous on the highways and on the streets; he ceases to act responsibly toward his family and the society in which he lives; his contribution to our society diminishes or disappears, and he becomes counterproductive.

We therefore have to protect ourselves against him, and also prevent him from doing more harm to himself, his family, and the society of which he is a part.

The bill we are considering today is designed to attack this social and health problem in a number of ways. It is designed to make it difficult to obtain drugs subject to abuse; to deter individuals who exploit the weaknesses of others for personal profit through selling drugs illicitly, and to punish those who engage in this traffic; to provide means of deterring individuals from engaging in the abuse of drugs, and to rehabilitate those who have fallen into this trap; and to educate those who might otherwise be tempted to abuse drugs concerning the consequences of such abuse.

The bill deals with prevention, rehabilitation, and law enforcement. It provides in title I for the increased use of community mental health centers for rehabilitation of drug abusers, and in those communities having a serious narcotic addiction problem, provides special assistance for facilities for persons who have become addicted to narcotics. The bill also spells out authority for research and treatment by the Department of Health, Education, and Welfare in the area of drug abuse.

As it relates to law enforcement aspects of drug abuse, the bill provides increased authority for the Attorney General to control the manufacture and distribution of drugs subject to abuse. The bill lists a number of drugs as subject to the bill's controls upon enactment. These drugs are those which are already subject to controls under existing law. Where the Attorney General proposes to control additional drugs in the future, the bill provides that he will obtain the scientific advice of the Secretary of Health, Education, and Welfare, and then go through rulemaking proceedings under the Administrative Procedures Act which provides persons adversely affected an opportunity to present their views at a hearing. If a drug is then listed for control, persons adversely affected can obtain judicial review of this decision.

The bill provides that all persons engaged in the distribution of drugs, from the manufacturer down to the final dispenser, shall be registered. The registration requirements for manufacturers and wholesale distributors are of such a nature that in substance the bill provides licensing authority to the Attorney General. Retail druggists, physicians, and researchers are required to be registered, but registration of these persons by the Attorney General is as a matter of right where the registrant is engaged in activities authorized or permitted under State law.

All persons in the distribution chain are required to keep records subject to inspection; however, individual physicians will not be required to keep separate records except to the extent they are required to do so under existing law. Researchers are required to keep the same records as are required by regulations of the Food and Drug Administration today governing investigation of new drug applications under the Food and Drug Act.

The bill also covers a number of administrative authorities for the Department of Justice related to the control of the illicit drug traffic, and provides authority for education and research activities by the Department, acting through the Bureau of Narcotics and Dangerous Drugs. With regard to the role of the BNDD in the area of education and research and the gathering of data prior to the submission to the Secretary of Health, Education, and Welfare on issues of control, I should point out that the committee is aware of the memorandum of understanding reached between the Department of Justice and the Department of Health, Education, and Welfare, defining the research role between the NIMH and BNDD. This memorandum, effective August 11, 1970, is the very kind of agreement that this committee intended to be reached between the two agencies involved. It is the kind of dichotomy of research effort that we feel is necessary in the Federal Government.

On one hand it permits the BNDD to identify and characterize for regulatory purposes substances having a potential for abuse and to develop adequate screening capabilities to assure that these drugs are drugs that should be identified at an early stage before control. This leaves to the NIMH the basic research into narcotics and dangerous drugs which we feel is their proper function. We support this memorandum of understanding and hope that it will prove fruitful and effective in protecting the American public while at the same time allow the NIMH wide latitude in its research endeavors.

The criminal penalties set forth in the bill are in general much more flexible than the present penalty structure, and allow judges discretion in sentencing offenders.

The bill has been carefully considered in numerous executive sessions by the Subcommittee on Public Health and Welfare and by the full Interstate and Foreign Commerce Committee. With the exception of provisions relating to no-knock search warrants and continuing criminal enterprises, all members of the committee support the provisions of the bill before us today, and we recommend its passage.

Mr. SPRINGER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, today the House of Representatives is going to consider one of the most important and urgent pieces of legislation to come before it during this Congress. This is the Comprehensive Drug Abuse Prevention and Control Act of 1970. There will be but little disagreement upon its objectives and, as might be expected, many points of view upon the details of reaching them.

It would be unrealistic for the committee to come before you today and expect immediate and universal agreement on every provision of this bill. The committee itself has struggled for many months to produce the legislation. It has struggled with broad philosophical differences on the proper approach to the drug problem. It has weighed and sifted many ideas on the proper placement of responsibility and administrative detail. What we now bring to you is a good bill—one which can stand the test.

It is not as though there has been no drug law up to this point. The biggest problem may be caused by the fact that there have been many drug laws which have come about under different circumstances and with entirely separate and diverse histories. In past years, hard drugs—heroin, cocaine, and the like—were controlled from a tax standpoint, and for many years enforcement lay in the Treasury Department. Marihuana appeared on the scene, and although it was a quite different kind of substance it was pushed in with the others then being controlled. And there it stayed. This accounts for the sentencing structure in marihuana cases in the past.

When a pattern of abuse began to develop in the use of pep pills and tranquilizers, it was natural that legislation to curb them would come from the Commerce Committee as an amendment to the food and drug law. These substances were also widely used in the treatment of certain conditions by physicians. Prescriptions for these pills were very common. Drug firms were competing to develop and market new effective drugs with these characteristics. Because of this H.R. 2, the Drug Abuse Act, was worked out and reported to the House by the Commerce Committee. It was designed to fit into the pattern of food and drug control with enforcement by the Department of Health, Education, and Welfare. At that time LSD was no great problem but hallucinogenic drugs were recognized as a possible source of trouble and so they were included. An entirely independent penalty structure was pro-

vided aimed at what seemed like a separate and distinct problem.

It was not too long before the anomaly of having two approaches to drug abuse enforcement became apparent. It did not make sense. The so-called drug culture which emerged did not differentiate. Consequently LSD, marihuana, and things like heroin got all mixed in together. But sorting out the offenders in the same group for purposes of prosecution and particularly for sentencing pointed up the need for a comprehensive approach. This was begun by transferring enforcement responsibility for all drugs into the Justice Department 2 years ago. That was a start but the law was still as mixed up as ever. This bill tries to fix that, too.

So far all this sounds as though this bill is primarily concerned with enforcement but that is not so. Before the bill goes into the subject of enforcement it sets forth an accelerated program for rehabilitation. Rescuing potential drug users and short-stopping drug abuse are actually more important in the long haul than trying to salvage the wrecks. Many programs today, both in and out of Government, are concentrating upon the drug problem. Taking these into consideration the bill places even further emphasis in this direction. It amends the program which creates community mental health centers to make them available to drug dependent patients so that they will have the proper treatment available. In addition, extra funds and extra authority are included to have special facilities in the places where the drug problem hits the hardest.

In the ultimate, the success of the war on drugs rests in extent and quality on the education effort which is shared by all Government and private sources combined. The bill recognizes this challenge. The extent of its realization of this fact cannot be appreciated unless some detail of the program is inspected.

The new section 253 of the Community Mental Health Centers Act proposed by the bill authorizes grants and contracts by the Secretary of Health, Education, and Welfare, first, for the collection, preparation, and dissemination of educational materials on drug use and abuse and the prevention of such abuse; and, second, for the development and evaluation of programs of drug abuse education directed at the general public, school-age children, and special high-risk groups. This section further directs the Secretary, acting through the National Institute of Mental Health, to, first, serve as a focal point for collection and dissemination of information related to drug abuse; second, collect, prepare, and disseminate materials—including films and other educational devices—dealing with drug abuse and its prevention; third, provide for preparation, production, and conduct of programs of public education—including those using films and other educational devices—in this field; fourth, train persons to organize and participate in programs of public drug abuse education; fifth, coordinate activities with respect to health education aspects of drug abuse carried on by Federal departments and agencies designated by the Secretary; sixth, provide technical assistance to State and local health and educational agencies with respect to the establishment and implementation of programs and procedures for public education on drug abuse; and, seventh, undertake other activities essential to a national program for drug abuse education. Finally, this section authorizes the Secretary, acting through the National Institute of Mental Health, to develop and conduct workshops, institutes, and other activities for the training of professional and other personnel to work in the area of drug abuse education.

Now as to control and enforcement. It should be clearly noted at the outset that the purpose of this act is to bring together the various laws affecting drugs in order to codify and consolidate them. It is intended to make enforcement more uniform and the handling of offenders more flexible and thereby more effective.

The bill sets up machinery which can handle changing conditions. Except for setting forth by name the drugs already controlled, it does not try to guess just what may be best for a new drug or even a new problem with an old one. Control can be changed when the facts warrant. Let us also make a definite point of the fact that purely enforcement responsibilities are placed with the Department of Justice while medical and scientific judgments necessary to drug control are left where they properly should lie and that is with the Department of Health, Education, and Welfare.

So the Attorney General is given authority to classify substances for purposes of control. He first asks HEW for a scientific opinion. If that opinion is negative, that ends it. If scientific information indicates that a substance can be abused, the Attorney General then looks around to see if there is evidence that it is. He must consider all possible facets of the problem to make sure that control is necessary. The bill gives him many pointers on the kinds of things to look for. If ultimately a drug is tagged for control, it must be placed in one of the five categories created. The criteria for placement of a drug in a given category are as follows:

The citeria for those substances listed in schedule I are a high potential for abuse, no currently accepted medical use in treatment in the United States, and a lack of accepted safety for use under medical supervision.

The criteria for substances listed in schedule II are a high potential for abuse, a currently accepted medical use in treatment in the United States, or a currently accepted medical use with severe restrictions, and that abuse may lead to severe psychological or physical dependence.

The criteria for substances listed in schedule III are a potential for abuse less than that for substances in schedules I and II, a currently accepted medical use in treatment in the United States, and that abuse of the substance may lead to moderate or low physical dependence or high psychological dependence.

The criteria for substances listed in schedule IV are a low potential for abuse relative to the substances listed in schedule III, a currently accepted medical use in treatment in the United States, and that abuse of the substance may lead to limited physical or psychological dependence relative to the substances in schedule III.

The criteria for the substances listed in schedule V are a low potential for abuse relative to the substances in schedule IV, a currently accepted medical use in treatment in the United States, and that abuse may lead to limited physical or psychological dependence relative to the substances listed in schedule IV.

Drugs already controlled are listed and placed in the appropriate category. This also gives some additional guidance for future references. Hard narcotics such as heroin fall into categories I and II. Marihuana falls into category II but it has to be treated differently in some respects because it is not truly a narcotic as are the others. Most of the substances which originally fell within the Drug Abuse Act fall into categories III and IV.

There is considerable discussion about raising the classification of amphetamines because they seem to be so prevalent and so available. In the case of certain particularly vicious ones this may very likely be wise and will be done. The machinery is set out to accomplish this if it is needed. Not all amphetamines would be of this nature, however, and a blanket change would be unnecessary and work hardship.

In order to manufacture, distribute or dispense controlled substances, one registers with the Attorney General. Registration is not automatic. Several factors concerning the ability of the applicant to handle the substances must be looked into. One most important factor is the provisions made to prevent diversion of the drugs into illegal channels. Registrations can also be lifted for serious offenses such as falsification.

Substances listed in schedules I and II are subject to production quotas and persons wishing to acquire quantities of them must do so using a prescribed order blank. Records of stocks must be kept as well as records of transfers and sales. These must be available for 2 years.

Everyone is interested in the revised penalties included in the bill. Upon inspection some say enforcement has been weakened. Others say just the opposite. The idea of the changes was to create more flexibility in the handling of the first offenders and those who might actually be salvaged, while bearing down with great intensity upon the pusher and the peddler. It is the opinion of most law-enforcement people that the harsh mandatory sentences in the narcotics law have been a hindrance rather than an aid to enforcement. This bill avoids the mandatory minimum, particularly in first offence cases.

Penalties go like this:

For selling or dispensing schedule I and II narcotic drugs first offence brings up to 15 years or $25,000.

The same offence for schedule II non-narcotic—this would include mari-

huana—or schedule III brings up to 5 years and $15,000.

Schedule IV brings up to 3 years and $10,000.

Schedule V brings up to 1 year and $5,000.

All of these penalties are doubled for second offence, and in the case of sale to a minor they are double even for a first offence.

Simple possession will carry only 1 year or $5,000, and the court has the right to grant probation. If everything works right and the offender is completely rehabilitated, the proceedings may be dismissed, and in the case of a minor a record may be expunged.

The bill includes a provision on search warrants which has come to be referred to as no-knock and which has caused considerable debate in other bills. The District crime bill included such a provision in a form which was stronger than the language used here.

No-knock is not a sinister plot to allow gestapo tactics. Many people have been led to believe that their house would be subject to being invaded any time at the whim of a police officer if no-knock were to be enacted. Actually, a search warrant has always required a showing and a decision by a court that such extraordinary authority is required to enforce the law. The only difference with a warrant under no-knock is that the applicant may show—if he can—that the alleged offender will destroy vital evidence if polite exchanges must precede entry. Or he may be able to show that lives will be endangered without it. In either event police officers must promptly identify themselves and their mission upon entry.

I have great difficulty viewing this authority as a threat to the safety of the law-abiding citizen or a threat to the security of his home. It has become a sort of emotional issue, and a great deal of the emotion has been worked up by drug users, drug pushers, and their sympathizers. Events of the last year should make a decision by Congress between their wishes and the good of society easy to reach.

All of the programs outlined here will cost us $403 million over the next 3 years. This includes the education and rehabilitation expansion as well as the stepped up enforcement by the Department of Justice. Drug abuse is already costing us far more in actual dollars than the amount provided here. There is no price which can be set upon the misery which comes to families and to individuals caught in this horrible net of drug addiction and its inevitable consequences. I am sure most of us can recite at least one example of degradation, crime, death and bitter memories attributable to drugs.

This bill alone and no bill can guarantee to lick the drug problem in this country. It is a job which calls for every kind of recruit. Every echelon of government, every public and private organization must commit its resources and its energy to the task. I think we can do it and this bill will help. I ask my colleagues to accept our efforts and pass H.R. 18583.

Mr. BOW. Mr. Chairman, will the gentleman yield?

Mr. SPRINGER. I yield to the gentleman from Ohio.

Mr. BOW. Mr. Chairman, the gentleman has just said that the entire enforcement provisions go into the Attorney General's office, in the Bureau of Narcotics, and I am sure in the Justice Department. Is there anything in this bill that would affect the right of the customs group to enforce the narcotic laws at our ports of entry or abroad?

Mr. SPRINGER. That part has been handled, as the gentleman knows, by the Committee on Ways and Means. They have gone along with us on this, so that now we do have the enforcement in one spot, and that is with the Attorney General.

Mr. BOW. I understand that, but I wonder if there is anything that will prevent Customs from handling the importation or their work abroad, because there has been some gray area here in the enforcement at the present time.

Mr. SPRINGER. That is right.

Mr. BOW. I am a member of the subcommittee that appropriates for the Justice Department, and I believe they should have it, but I think we must do something to make sure that Customs are not stopped from handling that which has been their responsibility on importation.

Mr. SPRINGER. May I say that Customs and the Attorney General's Office have worked out an arrangement in which they dovetail their two powers together.

Mr. BOW. I assume the gentleman has knowledge of that, and I will ask the gentleman whether he feels this agreement now is one which will be workable, so that—as I am sure the gentleman and I both have in mind—we will stop the importation of drugs from abroad, and I should hope there would be nothing in this bill that might hamper the opportunity for Customs to continue their work.

Mr. JARMAN. Mr. Chairman, will the gentleman yield?

Mr. SPRINGER. I yield to the gentleman from Oklahoma.

Mr. JARMAN. Mr. Chairman, I might say to the gentleman from Ohio that on page 233 of the bill, in the section under jurisdiction of the Ways and Means Committee, section 1016 reads:

> Nothing in this Act shall derogate from the authority of the Secretary of the Treasury under the customs and related laws.

Mr. BOW. Mr. Chairman, if the gentleman will yield further, I thank the gentleman from Illinois and the gentleman from Kentucky for bringing this to my attention. I think this does handle it in good shape. I hope it can be worked out, because we are all interested in stopping importation.

Mr. SPRINGER. The Attorney General's Office is working in very close association with Customs on this problem. We know where the hard narcotics are originating—in Turkey, with a second stop in France, and the third stop in the United States. All this is being dovetailed, and they are working together.

Mr. BOW. Mr. Chairman, I thank the gentleman. I believe his committee is to be complimented for bringing this bill to the floor today.

Mr. ECKHARDT. Mr. Chairman, will the gentleman yield?

Mr. SPRINGER. I yield to the gentleman.

Mr. ECKHARDT. What I am concerned about, if the gentleman will enlighten me on it, is exactly what the no-knock provision means in this bill. It says:

> (b) Any officer authorized to execute a search warrant relating to offenses involving controlled substances the penalty for which is imprisonment for more than one year may, without notice of his authority and purpose, break open an outer or inner door or window of a building, or any part of the building, or anything therein, if the judge or United States magistrate issuing the warrant (1) is satisfied that there is probable cause to believe that (A) the property sought may and, if such notice is given, will be easily and quickly destroyed or disposed of, or (B) the giving of such notice will immediately endanger the life or safety of the executing officer or another person, . . .

Now, in the discussion of the matter before the committee, as I recall, and in some of the testimony presented before the committee by the Department of Justice, there was the argument that this would actually afford an additional security against no-knock searches and that, after all, since the case of Kerr against California provides that where three circumstances exist an officer may now enter without knocking and notifying the person of his authority, these three purposes being where the persons within already know the officers' authority, and where the officers are justified in the belief that the persons within are in imminent peril of bodily harm, or where those within, made aware of the presence of someone outside are then engaged in activity which justifies the officers in the belief that an escape or the destruction of evidence is being attempted.

That is present constitutional law. Thus, there is present authority to break into premises without notice.

As I understand some of the argument before the committee, the no-knock provision of this bill would not replace the constitutional requirements of those facts existing at the time, but would impose in addition the requirement of a warrant being issued in advance of the entry which satisfied the judge on the grounds stated in the language quoted.

Would the gentleman so construe the provision in that manner?

Mr. SPRINGER. I construe what already has happened from the interpretations of the decisions which the gentleman has cited as being more liberal in allowing a peace warrant than we have provided for in this bill. Now, if it had been my choice, I would have taken those decisions and codified them. If you had codified them I think it would be very nearly and very closely akin to the no-knock provision which we put in the District of Columbia crime bill.

So I think, if you are talking about safeguarding the rights of the property and the person whose property it is sought to get a search warrant for, that

we have more safeguard of his rights contained in this bill than we did in the District of Columbia crime bill or as provided for in those decisions which the gentleman from Texas cited.

Mr. ECKHARDT. Mr. Chairman, if the gentleman will yield further, would the gentleman then say that the Kerr decision which seems to me to say that the widest range of constitutionality under the fourth amendment and I would assume also the fifth amendment, because that is the due process amendment, that the widest range of permissibility provided in Kerr would still be the outside area in which the officer could operate, but in addition the officer would have to get a warrant from the judge in advance, making the narrow case that you describe in order to justify the warrant?

Mr. SPRINGER. If the gentleman is talking about this bill—is that what the gentleman is talking about?

Mr. ECKHARDT. That is right.

Mr. SPRINGER. I think we have carefully restricted the ability of the officer to get a search warrant in this bill perhaps beyond what the gentleman from Texas has already cited as being the law of the land under those decisions.

Mr. ECKHARDT. Thus this bill would add the narrow requirement to the constitutional limitation provided in Kerr; is that correct?

Mr. SPRINGER. That would be my impression; yes.

Mr. ECKHARDT. I thank the gentleman.

Mr. Chairman, will the gentleman yield further?

Mr. SPRINGER. I yield further to the gentleman from Texas.

Mr. ECKHARDT. Mr. Chairman, I understand the Poff amendment, as it is intended to be introduced, would be an addition to the provisions of the Dingell amendment.

As the gentleman recalls, the committee decided that the Dingell amendment should be chosen over the original language. I think the argument went something like this: that the Dingell amendment created a new offense which would have to be triable in all its parts by admissible evidence brought before the court, whereas the postconviction presentence of the original bill similar to the Poff provisions provided that some report upon which sentence would be based would be available to the judge, cross examination would be available of those who presented the report, but not of those who may have contributed to it. And somewhat on that basis, as I recall, the Dingell amendment was preferred to the Poff amendment, or rather to the language which involves a provision similar to the Poff amendment.

Would the gentleman prefer the addition of the Poff amendment to the Dingell language, or as a substitute?

Mr. SPRINGER. May I say I want to reserve my opinion on that until I see the Poff amendment, which I have not seen at this time. It is my understanding only from talking with the gentleman from Virginia (Mr. POFF) that this provides another alternative.

Mr. ECKHARDT. An added alternative to the Dingell amendment?

Mr. SPRINGER. That is correct. But it does not impair the Dingell amendment.

Mr. ECKHARDT. I merely urge that if there is to be a choice that it be a choice between the two approaches rather than the inclusion of both. Because, if the gentleman is correct that the Dingell amendment is unconstitutional perhaps on the grounds of uncertainty, then we should certainly not burden the bill with both approaches, both of which have some elements of possible unconstitutionality.

Mr. SPRINGER. It is my opinion—my advice—that the Poff amendment is constitutional. The gentleman might disagree.

Personally, I believe we would do better, as this bill is now written, to take the Poff amendment and add it to the bill and leave the Dingell amendment as it is, and let it be tried out by the courts. I think in this way we would not disappoint either party and I think it would give us an alternative to the Dingell amendment.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. SPRINGER. I yield to the gentleman.

Mr. GROSS. Mr. Chairman, I would like to have the attention, if I may, of the gentleman from Oklahoma.

Is there any authority in this bill, to the gentleman's knowledge, that would permit, directly or indirectly, the use of any funds herein authorized to be used for the subsidization of foreign farmers, for instance, the farmers of Turkey, not to produce opium?

Mr. SPRINGER. To be honest with the gentleman, I will have to admit that I do not know of any money that is being offered to any country not to produce any product.

Mr. GROSS. Then it would not be within the discretion of anyone administering this bill to use funds for that purpose?

Mr. SPRINGER. I think, if you did, I think our problem in Turkey is working more nearly with the Government of Turkey to keep out, or to keep it down—and I am talking about the production of and this raises some problems with the State Department, as I understand. But I will be willing to yield to the distinguished chairman of the subcommittee, the gentleman from Oklahoma (Mr. JARMAN), for further comment.

Mr. GROSS. I wish the gentleman would do that.

Mr. JARMAN. I can say unequivocally to the gentleman from Iowa that there is nothing in this bill that so provides.

Mr. MILLS. Mr. Chairman, will the gentleman yield?

Mr. SPRINGER. I yield to the gentleman from Arkansas, chairman of the Committee on Ways and Means.

Mr. MILLS. Mr. Chairman, I can also say that there is nothing in that part of the bill which is title III, which was handled by the Committee on Ways and Means, that has anything to do with this subject matter. There is no authorization for an appropriation for any such purpose in our title.

Will the gentleman yield further?

Mr. SPRINGER. Yes; I yield to the gentleman.

Mr. MILLS. We did, at the suggestion of the gentleman from Ohio, a member of the Ways and Means Committee, write in a provision in the trade bill that is pending before the Rules Committee an authorization for the President to take certain action with respect to countries that do not cooperate with us in eliminating the illicit traffic in drugs. It is a very strong provision if the President wants to use it.

Mr. GROSS. If the gentleman will yield further, but you did not take action in relation to that bill to provide in any way for a subsidy?

Mr. MILLS. No; not in that bill either.

Mr. GROSS. I have asked the question because I have noted articles in one or more newspapers in which it was proposed, and seemed to be quite seriously considered, that we subsidize Turkish farmers with an initial outlay of $20 million not to grow opium, whether imported to this country or not. It was stated that we would simply subsidize them not to produce opium. I would be very much opposed to any provision in this or any other bill to offer such a subsidy.

Mr. MILLS. Mr. Chairman, will the gentleman yield further?

Mr. SPRINGER. I yield to the gentleman from Arkansas.

Mr. MILLS. It is my understanding of the rules of the House that if any such bill were introduced in the House authorizing an appropriation for that purpose, it would have to go to the gentleman's committee, and I know if that is the case, he will keep it from coming out in that form.

Mr. GROSS. I will say, if the gentleman from Illinois will permit me, that if the gentleman from Arkansas will cast his eyes over some of the legislation that has been enacted and the discretionary power given to the Chief Executive, no matter who that Chief Executive may be, to expend moneys appropriated or withhold them, but generally to expend money for various purposes, especially foreign aid—if he will look at some of those discretionary powers, he will understand what I am talking out.

Mr. SPRINGER. May I say I do know that the State Department has been pressing all it could with the Government of Turkey on the question of the growing of the opium poppy—to reduce it in every way that they possibly can. This is a cause of a great deal, of consternation in Turkey because, this has been a profitable enterprise, and our Government has been doing everything it could to get Turkey to suppress the opium poppy.

It is my understanding that they have been trying to cooperate, even over the protests of the farmers of Turkey, in reference to this matter.

Mr. GROSS. I am glad that they are seeking all the cooperation that they can get to shut off the flow of narcotics into this country. But we should very seriously consider the matter before we expend an additional $20 million to subsidize

Turkish farmers, because opium can be grown in other areas of this world, and before we got through, we could go bankrupt subsidizing foreign farmers not to produce opium.

I thank my friend from Illinois for yielding.

Mr. CARTER. Mr. Chairman, will the gentleman yield?

Mr. SPRINGER. I yield to the gentleman from Kentucky, a member of the committee.

Mr. CARTER. Mr. Chairman, with other members of the subcommittee, we worked long and hard on this bill. I believe there were 51 sessions or thereabouts. There is no $20 million authorized for any subsidy to Turkisk farmers or any other group in this field. I think we can dispel any fear on the part of the distinguished gentleman from Iowa about any such money being included in this bill.

Mr. KYL. Mr. Chairman, will the gentleman yield?

Mr. SPRINGER. I yield to the gentleman from Iowa.

Mr. KYL. There are some serious ramifications involved in the question I am about to pose. The Federal agency which has been primarily involved in controlling narcotics, dangerous drugs, and so on——

Mr. SPRINGER. The gentleman is talking about classifications 1 and 2?

Mr. KYL. Well, I am talking about the Federal agencies that have been most concerned with narcotics, dangerous drugs, and the control of abuses in both cases.

This is not the significant part of the question. The significant thing is that these agencies for years have said unhesitatingly and without qualification that the most costly and dangerous drug we have used in the United States is alcohol. I say the answer to this question is a serious one in terms of enforcement application of the laws we intend to pass here, and so on. To what extent does the committee intend that this bill we debate now will deal with alcohol as a dangerous drug?

Mr. SPRINGER. This bill does not deal with the question of alcohol.

Mr. KYL. In any way?

Mr. SPRINGER. In any way.

May I say I understand the gentleman perfectly. I will send over to the gentleman a speech I made on the floor of the House 3 weeks ago, called "Behind the Wheel of Every 50th Car."

There were 48,000 deaths in this country last year caused by accidents on highways. Of those 48,000, 28,000 were caused by drunk drivers. In the last 9 years in Vietnam, 44,000 boys have lost their lives, and in that same 9-year period 243,000 people have been killed by drunk drivers on the highways of this country.

The gentleman has a point. I admit he has a point. If the gentleman wants to read the series of 10 articles which were put in the CONGRESSIONAL RECORD by the distinguished gentleman from New Hampshire (Mr. CLEVELAND), which were in the Christian Science Monitor last month, it will give the gentleman the exact picture of where we are going on the problem of alcohol. But at the present time alcohol is a legal product in this country, whether the gentleman agrees with that or not.

The question is what are we going to do about the people who use this drug in situations which involve danger not just to themselves, but danger also to other people who are walking or driving around the streets, some of them being held up by people under the influence of getting killed or run over by people driving while under the influence of alcohol.

Mr. KYL. The reason for my asking the question is to try to establish some legislative history. We appropriate funds for rehabilitation in this bill and we have laws relative to enforcement, and I do want to have it definitely established that this bill does not concern any kind of alcohol enforcement as such, so that we do not run into that.

Mr. SPRINGER. Let me develop it further for the gentleman. In my committee I happened to be one of the builders, along with others, of the national highway traffic safety bill in which about 4 years ago we tried to get at part of this. That is not the solution. We have tried to provide cross records between the 50 States, so we can keep track of the people in one State who run over others and then go to another State and get a license. We provide for transfer of records to a central place, where other States can get information. We have not been asleep, but we do not have, so far, any solution.

Mr. JARMAN. Mr. Chairman, will the gentleman yield?

Mr. SPRINGER. I yield to the gentleman from Oklahoma, the chairman of the subcommittee.

Mr. JARMAN. Mr. Chairman, I thank the gentleman from Illinois for yielding.

In further explanation to the gentleman from Iowa on this subject, I would like to emphasize what the gentleman from Illinois has said, and that is the consciousness of the Public Health and Welfare Subcommittee and the full Interstate and Foreign Commerce Committee of the magnitude of this problem. We have been working on it.

I might report to the gentleman that as recently as last week we held 3 days of hearings on a bill as passed in the other body that mounts a major program in the field of alcoholism. Those hearings are now complete, and we are ready for executive session on the bill.

Mr. JARMAN. Mr. Chairman, I yield such time as he may require to the gentleman from Florida (Mr. ROGERS) who has contributed in such a major manner to the development of this legislation and its presentation to the House.

Mr. ROGERS of Florida. Mr. Chairman, I thank the gentleman for yielding, and I am grateful to him for his remarks

Mr. Chairman, I do want to concur with what has been said before I firmly believe that this legislation, which represents extensive work on the part of the Subcommittee on Public Health and Welfare of the Interstate and Foreign Commerce Committee, the full Interstate and Foreign Commerce Committee, and the Committee on Ways and Means, is the most progressive, the most far-reaching Federal effort to deal with the problem of drug abuse yet undertaken.

The Subcommittee on Public Health and Welfare, cognizant of the scope and seriousness of the drug abuse problem, held 11 days of hearings on this legislation, and considered various legislative proposals during 37 executive sessions, after which a clean bill, H.R. 18583, was introduced, cosponsored by all subcommittee members.

This legislation has three principal objectives: First, to deter drug abuse more effectively through a revision of the present Federal law-enforcement aspects of drug-abuse prevention and control and through better educational programs; second, to provide improved treatment and rehabilitation of drug abusers and an active program of education; and, third, to encourage research into the causes of drug abuse and provide a better understanding of the psychological and physiological effects certain drugs have on human beings.

I might recall very briefly for Members the fact that the legislation which originally came out of the Senate narrowed it to a law-enforcement approach.

The subcommittee felt this was too narrow an approach to deal with the drug-abuse problem of this Nation which actually has, in many instances, reached epidemic proportions.

We have added to the intent of the original Senate bill of beefing up the law enforcement, particularly on pushers, and have expanded this whole approach into one we believe will begin to effectively deal with the drug abuse problem of this Nation.

In title I we provide for an expansive program of prevention of treatment and rehabilitation, of research and of education, and we go into law enforcement and penalties in title II.

Of course, the Ways the Means Committee will come forth and present its contribution, which has been most significant, in title III.

I might add here and I know I speak for all the committee when I express our appreciation for the splendid cooperation from the distinguished chairman and the members and staff of the Ways and Means Committee. From that contribution of cooperation between the two committees we have gotten to this point where we can present a unified bill in which I believe the American people can take great pride when it is passed in order to meet this problem.

This is an ambitious bill, let there be no mistake, but we must have an ambitious effort if we are to effectively deal with the crisis of drug abuse which is sweeping our Nation and threatens to injure or destroy thousands of young lives. We cannot afford to be complacent about drug abuse—it hits too close to home, too often, for too many Americans.

Teenagers and young adults speak too easily of the accessibility of "grass," of their many friends who take "uppers" and "downers," of their acquaintances

who are "speed freaks," and in some cases of their deceased friends who became hooked on heroine.

At the present time, the Federal enforcement effort with respect to the illegal manufacture, wholesale, retail, distribution, or possession of drugs is somewhat fragmented. In 1968, the Congress passed Reorganization Plan No. 1 which transferred drug abuse enforcement authority from the Food and Drug Administration and from the Treasury Department to the Department of Justice in which was established the Bureau of Narcotics and Dangerous Drugs. From that Bureau emanates the principal Federal enforcement effort for the control of drugs, yet the drug regulatory laws are centered principally in the Food, Drug, and Cosmetic Act, the Internal Revenue Code of 1954, and in other acts.

This legislation would not remove the principal enforcement authority vested in the Bureau of Narcotics and Dangerous Drugs, but it would consolidate all of the Federal drug laws into one act and would restructure the penalties associated with the commission of certain acts to enable more efficient administration of the laws and a more realistic association between the criminal act and the penalty.

The thrust of this restructuring is to place the emphasis on the drug pusher, the peddler of pain and suffering under the guise of euphoria. The committees which have considered this legislation do not seek, I believe, to make felons of our young men and women who come into contact with drugs on a first occasion, but nor should we condone such action, and surely we must not encourage its repetition. The penalty structure and approach of this legislation carries out that intent. A first offense of possession of controlled drugs is made a misdemeanor, except where the possession is for the purpose of distribution to others. In the case of a first offense of simple possession, the court may place the offender on probation for not more than 1 year. If at the end of the period of probation the offender has not violated the conditions of probation, the proceedings against him may be dismissed without a court adjudication of guilt. If the offender is below the age of 21 when the offense occurs, he may obtain a court order expunging from all official records all recordation relating to his arrest, indictment, trial, and finding of guilt. This procedure for the person under 21 may only be used once, and a second offense of possession thereafter will be treated as a first offense.

Appropriately, the toughest provisions of the bill apply to the illegal manufacture or distribution of illicit drugs, with penalties up to life imprisonment where a continuing criminal enterprise is involved.

This legislation is geared to deterring drug abuse and to treating and rehabilitating drug abusers. But, there is another aspect of the problem which must be resolved if we are to fully cope with drug abuse. I am speaking of the causes of drug abuse and the psychological and physiological properties of the substances which are and may be subject to this legislation.

Research into drug abuse is very important and this legislation recognizes that importance.

This bill would establish a Presidential Commission on Marihuana and Drug Abuse which will study and report to the Congress within 1 year on problems involved in marihuana use, and within 2 years on the causes of drug abuse and their relative significance.

As Members may recall, the scientific community and medical community of this Nation were greatly upset over the fact that scientific and medical decisions in the Senate bill were centered in the Department of Justice, with the Attorney General having the responsibility to make scientific and medical determinations which were not in the competency of that Department, and admittedly so.

We have changed that so that the Department of Health, Education, and Welfare will determine scientific and medical decisions. This is a most important change in the whole approach as it came from the Senate.

Through this legislation, the Attorney General has retained the mechanism of control and scheduling, but the Secretary of Health, Education, and Welfare has significant input concerning the health and scientific questions involved in the scheduling and importantly, has a veto power over the classification of a substance or the moving of a substance to a higher schedule, if he thinks that it should not be done for scientific or medical reasons. I am hopeful that the Secretary of Health, Education, and Welfare will utilize the resources of independent scientific bodies, including the National Academy of Science, as he seeks knowledge on the properties of substances under consideration through this act.

For example, there are many types of amphetamines. If the Secretary of Health, Education, and Welfare and the Attorney General find that an amphetamine, or the whole body of amphetamines, needs to be under a quota system, it can be shifted into category II very quickly.

The Department of Justice believes it is not in the best interest of the Nation to do it at this time, because it would be too all encompassing to do it by legislation. Rather, it should be approached as the problem develops and as the administrative remedies allow, so as to move them into categories as basically as it might be necessary.

Let me speak for a moment about the determined effort in this legislation to improve our treatment and rehabilitation programs for drug abusers.

In making a strong commitment to this aspect of the drug-abuse problem, the bill before us proposes to utilize the most practical resources: our community mental health centers and our public health service hospitals and facilities.

Under the Community Mental Health Centers Act, there is authority to narcotic addiction and alcoholism. This legislation would expand the scope of these facilities, of which there are some 350 across the Nation, to include drug abusers.

The impetus of this approach is to fight the problem of drug abuse in the local community by utilizing existing programs and facilities with increased Federal support.

So I think the committee has tried to approach this bill in all of the ramifications of the problem of drug abuse, and I am confident that if we will see to it the intent of the legislation is carried out vigorously—and I believe it will be—we will begin to get on top of the problem. This I think is the most encouraging legislation that the Congress will have yet enacted to meet the problem of drug abuse, but it is really only the beginning of an improved Federal effort to meet one of America's greatest problems.

Mr. KYL. Mr. Chairman, will the gentleman yield?

Mr. ROGERS of Florida. I am happy to yield to the gentleman.

Mr. KYL. I want to compliment the committee for the job that they have done. The gentleman from Florida just explained the difference between the House bill and the Senate bill. I talked to hundreds of experimenters, those with psychological dependence and those with physical dependence on drugs. It is so obvious that you need more than law enforcement because collectively drug abuse is a problem. Individually it is a symptom of a problem which will not be cured by law enforcement. In fact, it can be complicated by simple punishment without treatment. I have long said that the simple criterion for a good drug-abuse program would be this: a good drug-abuse program would make it harder to start and easier to quit. And I think this bill meets that criterion.

Mr. ROGERS of Florida. I thank the gentleman for his comments. I agree with him. It is really the intent of our bill to get on top of the whole problem with research, treatment, rehabilitation, and education. We want to know enough through research about the drug-abuse problem and how it affects human beings, and to tell the people involved about it. Young people will make logical decisions if they know the facts about how the drugs will affect them. That is what we want to do, and we want to do it in the proper way.

There has been so much misinformation that people do not know what to tell young people. As you say, in trying to put everybody in jail for a first offense of possession, this is not a realistic thing, because the courts are not doing it and they have not done it. The laws have been severe, and this has not answered the problem. When we have reports that as many as 50 to 75 percent of college and even the high school population are now experimenting with drugs, you can see what would happen to our jails in this country very rapidly. Obviously that is not the solution. We have to do other things through research and get an effective education program going. This is something that this bill will do.

I thank the gentleman for his comments.

Mr. SPRINGER. Mr. Chairman, I yield 8 minutes to the ranking Republican on the subcommittee, the gentleman from Minnesota (Mr. NELSEN).

Mr. NELSEN. Mr. Chairman, I believe this is one of the most important pieces of legislation that this Congress will consider in this session of Congress.

First I must pay my respects to members of the committee that I think have demonstrated that in this great body of the Congress of the United States the atmosphere and the attitude of bipartisan consideration of a major problem is possible. In my judgment, we have had an exemplary performance here.

I also wish to compliment the staff, Jim Menger, to name one, for providing us with some of the most excellent staff work and information that I have ever seen in all of the years I have been in the Congress.

Dealing with this problem, I think many of our Members attended a White House conference earlier in the year in which there was called to our attention the real problem of drug abuse in the United States.

The Chief of Police Mr. Wilson, was there calling attention to what was going on here in the District of Columbia, a devastating thing.

Mr. Ingersoll was there from the Bureau of Narcotics and Dangerous Drugs calling attention to his problems. It was obvious that tools for enforcement were necessary. It was obvious also that you do not do the job alone with policemen.

So, we needed many approaches to the problem.

Now, I might point out that early in the first consideration of this bill there was some concern about jurisdiction and who was going to do what. Of course we are all proud of what little muscle we have in our various committees, but soon that was ironed out between the Committee on Ways and Means and the Committee on Interstate and Foreign Commerce.

There was some feeling as to who would do the research, the Department of Justice or Health, Education, and Welfare. However, soon we ironed that out also. We also established communication between the Department of Health, Education, and Welfare, the Department of Justice and our committee and, finally, we were sitting around the table, Republicans and Democrats, HEW people and representatives of the Department of Justice, all people trying to figure out how to do the best job that needed to be done.

Finally, we came to the conclusion that we needed rehabilitation and education and all of these things are included in the bill, along with things that have already been explained whereby we set up the various categories.

We have given to the Department of Health, Education, and Welfare the right to make changes where there is obvious need for change.

So, I want to say that in all the time I have been in Government one way or the other, in the State legislature and at this level, I do not know that I have ever seen a time where a committee has so carefully worked out the details to do a job as was done in our committee.

I want to also point out that the penalties that are included in this bill dealing with the use of marihuana where a youngster might be fooling around, he has a misdemeanor or a felony charge against his record and this goes with him for life. All of us have been kids at one time and many have seen where youngsters sort of fooled around with one thing or another and it became quite obvious that if you placed a felony charge against that youngster we would have our jails filled all over the country, because it does not mean that they would become an addict; it might mean that they were just having a ball and fooling around we will say with marihuana in this case. So, the charge was reduced to a misdemeanor. But in this bill the pusher—the pusher—that is trying to make slaves out of our young people, I am sure none of us would be at all hesitant about leveling a tremendous penalty against the pusher.

Mr. ZWACH. Mr. Chairman, will the gentleman yield?

Mr. NELSEN. I yield to my colleague from Minnesota.

Mr. ZWACH. Mr. Chairman, I thank my distinguished colleague for yielding. I wish to associate myself with the remarks of my distinguished colleague from Minnesota, whom I feel has performed a distinguished service in this area, a crime area of concern to the people of the United States.

I further wish to compliment the committee for this broad-based approach at the Federal level in our effort to deal with this most serious problem.

Mr. NELSEN. I thank the gentleman.

So, Mr. Chairman, by and large, when we finished this bill and when we brought it to the floor of the House for consideration, I again want to say that this has been a great experience to move on legislation that deals with a major problem in the country and that is drug abuse.

Mr. Chairman, when we find that crimes have been committed, in many cases we will find the drug addiction problem. We have seen it right here in Washington, D.C.

It is my opinion that if we get at this total problem we must move in the direction of not only correcting crime but making a contribution to the future of many, many young people who might become addicts.

Therefore, I wish to commend to the Congress the enactment of this legislation. In my opinion if we did nothing else but pass this bill, we would have done something which would represent a great service to the people of the United States.

Mr. ROGERS of Florida. Mr. Chairman, will the gentleman yield?

Mr. NELSEN. I will be glad to yield to the gentleman from Florida.

Mr. ROGERS of Florida. Mr. Chairman, I just want to commend the gentleman from Minnesota for the very significant part the gentleman has played, and one that I think ought to be made part of the RECORD, in trying to help work out the differences between the two departments, the Department of Health, Education, and Welfare and the Department of Justice. I think it was due greatly to the efforts of the gentleman from Minnesota that we were able to get the Attorney General to see the point that we were trying to establish in putting scientific and medical decisions in the Department of Health, Education, and Welfare.

Again I commend the gentleman from Minnesota for the great contribution the gentleman made in writing this bill.

Mr. NELSEN. Mr. Chairman, I thank the gentleman for his comments.

Mr. Chairman, a unanimity of viewpoint is rarely reached in this body on issues of major significance. I believe that virtually every Member of the House, however, would agree that existing drug control laws are in need of revision. Where differences arise, quite naturally, is with regard to the manner in which revision should take place.

The Comprehensive Drug Abuse Prevention and Control Act of 1970, H.R. 18583, is a product of bipartisan cooperation and is worthy of the bipartisan support of the entire House. This bill certainly does not resolve every disagreement on how the national threat of drug abuse should be handled, nor does it pretend to be the means by which this problem will be solved. Drug abuse is a complex phenomenon which requires greater time and understanding before it can truly be eliminated from the American scene. A schoolboy in Minnesota may swallow speed for reasons completely different than those which cause a schoolboy in New York to shoot heroin.

Yet this body will take a major step forward by passing H.R. 18583, for this bill contains many significant legislative reforms designed to help both the boy in Minnesota and his counterpart in New York.

Through the use of a well-regulated registration system, and the employment of order forms and production quotas in certain cases, the availability of the dangerous substances being abused by our youngsters in ever increasing numbers should be drastically reduced. Amphetamines and barbiturates, for example, are too plentiful and obtainable in our schools throughout the country. Passage of H.R. 18583 will give our Federal officials the wherewithal to change this situation.

As for hard narcotics like heroin, which is not manufactured in this country, this measure will provide an array of offenses and penalties which may be utilized in a realistic way against the narcotic trafficker. For the first time, as an example, extraterritorial jurisdiction will exist to deal with persons trafficking beyond our borders in drugs destined for this country. If these peddlers enter America they may then be prosecuted for their overseas activities.

All drugs entering or leaving the United States will be subject to the controls in title III of H.R. 18583, which will only allow drugs to come in for specific limited use as prescribed by the Attorney General. Notification requirements will

create a greater awareness in the Federal Government with regard to shipments of drugs into, out of, and across this country.

Federal agents will have greater powers of arrest, search, and seizure. The professional criminal will find fewer havens in which to hide his illegal wares and, in appropriate cases, will not have the advance warning prior to a search which often enables him to dispose of the evidence against him.

I will not deny that there has been controversy over certain sections of this bill, and as a member of both the Interstate and Foreign Commerce Committee and the Subcommittee on Public Health and Welfare, I have heard all the arguments. I am convinced, however, that this version now before the House represents a maximum effort to take into account the needs of the various interests which will be effected by the bill. Most of all, however, the bill protects the interests of the American people. I consider myself fortunate to have had a part in putting this bill together, and I now urge its swift passage.

Mr. SPRINGER. Mr. Chairman, I yield such time as she may consume to the distinguished gentlewoman from New Jersey (Mrs. DWYER).

Mrs. DWYER. Mr. Chairman, I rise in support of this very important legislation, and I commend the committee for bringing it to the floor of this House.

Mr. Chairman, few situations today arouse such anger, anxiety, fear, and irrationality as the misuse of drugs by large segments of society, especially by young people. Thousands of Americans are addicted to hard narcotics, with the number of individuals increasing each year. The committee report on the Comprehensive Drug Abuse Prevention and Control Act of 1970 stated:

> For 1968, uniform crime reports indicate that 162,177 persons were arrested by State and local authorities for drug violations, constituting a 322-percent increase over the number of drug arrests made in 1960. Of the total number arrested in 1968, 43,200 were under the age of 18 and 6,243 were under the age of 15.

This is such a serious problem that the 1968 Republican platform pledged a "vigorous nationwide drive against trafficking in narcotics and dangerous drugs." Since taking office, President Nixon has launched a strong campaign against drug abuse. He has initiated a stepped-up program to educate our citizens, enforce existing laws, and cooperate with State and local communities to curb the widespread curse of drug addiction.

In addition, in July of last year, the President submitted to the Congress a legislative program to deal with skyrocketing drug abuse. These provisions are among those included in the bill we are considering today, H.R. 18583, the Comprehensive Drug Abuse Prevention and Control Act of 1970.

The time since President Nixon first announced the need for additional legislation to combat this crucial problem has served only to increase the urgency of the problem. As Mr. Nixon said in March of this year:

> Drug misuse is a growing national problem. Hundreds of thousands of Americans—young and old alike—endanger their health through the inappropriate use of drugs of all kinds. More than 100,000 of these Americans lead totally unproductive lives because of their addiction to narcotics.

I, too, have seen wasted lives resulting when individuals are strung out on hard drugs. We all want to do what we can to try to stop this growing cancer which has broadly attacked so much of our society. There is no longer an easy victim or an obvious seller to whom we can shake an accusing finger. On the contrary, the patterns of use and "pushing" are changing rapidly. In the past, most heroin was used by male, urban ghetto dwellers. Now many young, suburban men and women are using this drug.

In years past, marihuana was considered prevalent only among populations of disadvantaged individuals—such as the Mexican-American community—and among jazz musicians and the like. Now, marihuana smokers penetrate the middle and upper income families as well. Dr. Stanley F. Yolles, then Director of the National Institute of Mental Health, stated in June of this year that approximately 20 million adults and juveniles have experimented with marihuana at least once.

Today's Health reports typical comments of 3,600 individuals who responded to their recent questionnaire concerning the serious drug problem we face.

One young lady stated:

> Most of my friends take them, [drugs] and they aren't any more glamorous than they were before.

Young parents wrote statements such as:

> I worry about my two pre-schoolers who may grow up in a world of drugs.

And, perhaps one of the most touching letters came from a woman who shared her family's personal experience:

> I know what it is like to talk my son down from a bad LSD trip, to have him sleep for three days straight after a high on speed. I know what it is to watch him become completely paranoid, to hold a 17-year old "child" in my arms and let him cry . . . All this from a boy who was outgoing, lovable, funloving.

Most fortunately, this particular story had a happy ending, as the young man kicked his habit and eventually came to counsel other individuals with similar drug problems.

Many others are not so fortunate. The tragic death of Diane Linkletter shocked the entire country, and my heart went out then, as it does still, to her parents who bravely and nobly shared their sorrow to prevent others from becoming similarly trapped.

A responsible society must provide all its citizens with information about the dangers facing them, including the possible dangers of drugs. However, dissemination of information will not choke off the sources of drugs. It is obvious that we must also enact adequate laws and provide proper medical help to those in need.

What is clearly needed is a comprehensive approach such as that provided in H.R. 18583. This legislation consolidates all the miscellaneous laws now in existence. It tightens regulatory controls as a means of safeguarding legitimate drug channels. It provides for better record-keeping, makes money available for additional research into the little-understood subject of drug abuse, and equalizes the punishment and assures rehabilitation of drug abusers when necessary.

Title I of the bill provides for the establishment of rehabilitation programs to assist drug users. It extends authority to the Department of Health, Education, and Welfare to increase its efforts on behalf of addicts through community mental health centers and other health-connected facilities and hospitals. Within a 3-year period, $75 million will be provided for community mental health center facilities, $29 million for drug abuse education activities, and $60 million for various special facilities.

Title II provides additional authority to the Justice Department in order to halt drug abuse. It details a procedure by which future drugs may be classified, and specifies the administrative authorities the Attorney General may exercise regarding law enforcement aspects of drug abuse.

This section also explains the modernization of present criminal laws and penalties, and establishes a Presidential Commission on Marihuana and Drug Abuse. This Commission is to study and report back to the Congress within 1 year the problems of marihuana, and within 2 years about the causes of drug abuse and any significant conclusions derived.

Title III of the Comprehensive Drug Abuse Prevention and Control Act of 1970 provides for the control of exports and imports of drugs subject to possible abuse. I am particularly pleased by such emphasis, and have introduced related legislation to cut off diplomatic relations with any country exporting illegal narcotics to the United States.

It is my hope that H.R. 18583 will be passed by the House today.

First, it is a humane piece of legislation. I believe, as do many law-enforcement officers and others involved with the problem, that drug abuse is related to social, medical, and psychiatric problems. Emphasis must be placed on rehabilitation of those who want to live normal lives. By providing increased funds for various medical centers, such a goal can be accomplished.

Second, the bill is realistic. It recognizes that as of yet we do not have adequate information surrounding drug abuse. Before our laws are completely salutary and just, we must thoroughly understand the benefits and dangers of narcotics as viewed against both the individual and his society. Hopefully, the Commission on Marihuana and Drug Abuse will provide us with the needed facts.

Third, H.R. 18583 is appropriate. By arming the Justice Department with laws to concentrate on the vendors and purveyors of hard narcotics and at the same time providing the courts discretion in dealing with first offenders and

minors, it strikes hardest at those who threaten our society most.

Drug abuse is a subject in which I have long been interested and about which I have long been concerned. In 1962 I sponsored legislation to prevent the wholesale movement of dangerous drugs into the black market, and, in 1965, I was instrumental in passing the Drug Abuse Control Amendments, which helped to stop the distribution and use of such dangerous drugs as goof balls and pep pills. At the President's invitation, I attended the signing of this legislation, which was especially satisfying to me.

I have also supported legislation to place our narcotics programs in the appropriate Government agencies, and, as I mentioned earlier, I have recently introduced H.R. 18398, a bill to cut off diplomatic relations with countries sending illegal narcotics to our country.

It certainly seems the Comprehensive Drug Abuse Prevention and Control Act of 1970 is the next logical and necessary step in the battle we are waging against drug abuse. Let us wait no longer to get to work and pass this bill.

Mr. SPRINGER. Mr. Chairman, I yield such time as he may consume to the distinguished gentleman from New York (Mr. ROBISON).

Mr. ROBISON. Mr. Chairman, as those who peruse the extension section of the RECORD may have noted, during past months I have included numerous articles and statements dealing with the problem of drugs and drug use. Throughout both those articles and my prefatory remarks, the one theme which was consistently reiterated was that the Congress must take action—responsible action—to help stop the flow of these dangerous substances. I think that we have all felt a sense of helplessness as far as knowing exactly what form that action should take, and, therefore, it is with great enthusiasm that I greet H.R. 18583, the Comprehensive Drug Abuse Prevention and Control Act of 1970. I commend the Committee on Interstate and Foreign Commerce for having developed—as the title indicates—such a comprehensive and yet reasonable piece of legislation. There are a few provisions with which I disagree, and I will, therefore, join in efforts to amend certain sections of the bill, but the important point is that we have a piece of drug legislation before us that blends controls, sanctions, and reason, in my opinion, in a well-balanced fashion.

This bill, Mr. Chairman, recognizes that the manufacture, distribution, and sale of dangerous drugs—except by prescription or license—is a crime, and punishes the violators accordingly with stiff sentences which are increased for subsequent offenses. On the other hand, this legislation also recognizes that the mere use of dangerous drugs is more of a sickness than a crime and reduces penalties accordingly. The fact that any penalties are retained for use-or-possession violations is due, in large part, to the fact that we do not know how to dissuade people from using drugs without holding some sanction over their heads. Perhaps, in the future, our level of understanding of the drug problem will allow us to completely substitute treatment for punishment.

But, the bill that the committee has reported recognizes that those who do merely use or possess drugs for their own use, and who are caught, should not have their futures ruined by such fact—at least not until a pattern of behavior has been established. In that regard, section 404(b) (1) and (2) allows the court, in its discretion, to dismiss charges against one who is convicted or pleads guilty of drug possession if such is his first offense and, in the instance of those under 21, the record may be expunged.

My laudatory comments about this bill are not in any way diminished because I feel the bill has two serious shortcomings. Those are capable of being corrected, I believe, without in any way detracting from the overall effectiveness of this bill. The first weakness in this legislation is the provision which authorizes entry without prior announcement—commonly known as the "no-knock" provision. That provision, section 509, allows an officer to enter without knocking if the magistrate issuing the search warrant finds, as a fact, that either the property sought can be quickly disposed of or that the officer's life might be endangered by announcing his intentions of serving the warrant. I would submit, Mr. Chairman, that such circumstances would possibly apply any time a drug search warrant is issued, and, thus, every warrant would, in practice, allow for immediate entry. This issue was hotly debated while the District of Columbia crime bill was before this body and, therefore, I do not see that any purpose would be served by repeating those arguments here. However, I would observe that the erosion to one liberty invariably gives rise to the erosion of another, and I am unwilling to lend my support to the further eroding of the principle of the sanctity of one's home.

Additionally, it is interesting to note that the main thrust of this bill—the place where it really cracks down—is on the illegal manufacture, sale, and distribution of controlled drugs and the very bulk or quantity of the drugs anticipated means that quick or easy disposal of those quantities is unlikely. Therefore, it would seem to me that the no-knock provision would not appreciably assist in regulating the manufacturing and sale of these drugs. For us to here approve "no-knock," knowing that it would be of limited value to the enforcement of the provisions of this act would, in my opinion, be most unwise.

The second aspect of the pending legislation to which I would draw attention is the possible overlap between State and Federal criminal jurisdictions.

Section 101, entitled "Findings and Declarations," makes clear that the Federal Government has an interest in the intrastate manufacturing and uses of controlled drugs because of the likelihood that such drugs have been, or are likely to be, involved in interstate commerce and because of the difficulty of distinguishing between intrastate and interstate drugs. Thus, it would seem to me that the Federal Government is not only establishing the basis of its interest in controlled drugs, but may very well be preempting the entire area from the control of the States.

Although I am not familiar with all State laws dealing with penalties for the manufacture of drugs, I am familiar with the laws of a number of States that make the possession of drugs, and particularly marihuana, a felony. The pending legislation, in contrast, reduces penalties for possession to misdemeanors and, as I read through the bill, I do not find any clear provision indicating the intention of the Congress as to whether the State laws on possession will be preempted. If they are not preempted, the situation could arise where a young person could be apprehended by Federal officials and charged with possession.

Under the provisions of section 504, that individual could be placed on probation and, perhaps, have his record of conviction expunged. Enter the State—let us say on the next day, when this defendant still had one marihuana cigarette in his possession. Now, this young person could be subjected to the provisions of the State law making such possession a felony, with no provision for the expunging of the records. Not only would such subsequent—or prior—State prosecution defeat the purpose of the Federal law in expunging the records, but it would also be at variance with the new attitude of the Federal Government that we ought to lessen penalties for mere use of these controlled drugs.

Thus, Mr. Chairman, if we do not preempt this field of dangerous drugs in its entirety—civil and criminal—much of the praiseworthy intent of this legislation, as it relates to possession and use of drugs, will be but an empty gesture, with possible State prosecution lurking just around the corner from every Federal prosecution. The concept of what not only amounts to a possible double prosecution, but also the frustration of the new Federal purpose, warrants such preemption being applied in these instances.

Mr. Chairman, as I indicated earlier, I believe the deficits which I have pointed out are minor in nature and can be cured readily by this body so as to make the Comprehensive Drug Abuse Prevention and Control Act of 1970 a more complete and valuable piece of legislation. The statistics on drug use, particularly among the young, clearly mandate such legislation as we have before us today, but I would submit that in our haste to correct the problem we should not overlook matters which would allow that legislation to more fully achieve its most worthwhile purposes.

Mr. SPRINGER. Mr. Chairman, I yield 8 minutes to the gentleman from Kentucky (Mr. CARTER), a member of the subcommittee.

Mr. CARTER. Mr. Chairman, although as a Member of this body my interests are primarily legislative, I must admit that my thinking is often colored by the fact that I am a physician as well. My membership on the Subcommittee on Public Health and Welfare is certainly

attributable, at least in part, to my interests in matters relating to the fields of science and medicine.

When our subcommittee had the opportunity to examine the bill now before you in depth, I was particularly pleased with the chance this gave me to try and insure that the matters in this bill affecting the medical profession were cast in appropriate terms. While many of the relevant provisions aroused considerable controversy, I can, in candor, report that physicians, and indeed scientists, should suffer no adverse affects from the passage of H.R. 18583.

One area of considerable concern to the medical people which came through during our hearings involved research. Anxiety was expressed over the control this legislation appeared to give the Attorney General with regard to research into dangerous substances. I am pleased to report that language was worked out with regard to registration for research giving the Department of Health, Education, and Welfare full authority to pass on the medical and scientific aspects of research projects, reserving to the Attorney General control over those parts of the project relating to security. In addition, the bill contains provisions which authorize grants of anonymity to people who volunteer to be the subjects of research, so that disclosure of their names by the researcher could not be compelled by anyone. These are new provisions which should serve to insure the integrity of research projects and encourage additional research.

Representatives of the medical and scientific community also expressed doubts regarding the Attorney General's authority to make final decisions on which drugs should be controlled. Again, this concern was taken care of by language which requires the Attorney General to seek the advice of the Secretary of Health, Education, and Welfare on drug control questions, and which makes the Secretary's advice with respect to medical and scientific issues binding on the Attorney General. In this way, an appropriate balance was achieved between scientific interest and those of law enforcement.

There are other perhaps less dramatic but extremely significant provisions in the bill which have been worked out with due regard to the concerns of the medical profession. As a physician, I can therefore reassure all members of the medical profession, and of the scientific community, that this highly important piece of legislation will not prove damaging or burdensome to them in any way. As a legislator and a representative of the State of Kentucky, I can add my assurances that both Kentucky and the Nation as a whole will benefit immeasurably from the passage of H.R. 18583. As with all legislation there are areas which could be improved, but in general it is a good bill—one which is greatly needed.

Mr. BROTZMAN. Mr. Chairman, will the gentleman yield?

Mr. CARTER. I yield to the distinguished gentleman.

Mr. BROTZMAN. Mr. Chairman, as a member of the full Committee on Interstate and Foreign Commerce, I particularly would like to commend the very hardworking and able subcommittee on bringing this bill really out after arduous work and after many hours of dedicated study.

I think we on our committee are particularly fortunate to have in our group the gentleman who is now in the well. So often do we call on him not only for his good judgment on legislative matters, but we rely on his medical expertise to help us understand the complicated area of narcotics.

I know that there is a great deal of discussion as to how various narcotics, barbiturates, and so forth should be categorized, and I want to ask you, Doctor, what is librium?

Mr. CARTER. I thank the distinguished gentleman for his remarks.

Librium is a chlorodiazepoxide and consists of: 7 chloro, 2 methyl, 4 amino, 5 phenyl, 3H-1, 4 benzodiazepine, 4 oxide; slightly yellow crystalline material insoluble in water. Molecular weight is 299.75.

It is used to relieve anxiety, tension, and apprehension.

Mr. BROTZMAN. I think the gentleman has adequately disclosed his expert qualifications.

Mr. CARTER. I thank the gentleman.

Mr. NELSEN. Mr. Chairman, will the gentleman yield?

Mr. CARTER. I yield to the distinguished gentleman.

Mr. NELSEN. Mr. Chairman, I want to make the same observation relative to Dr. CARTER, who not only serves on the committee as a very outstanding citizen but also as a medical doctor so that we get professional information along with the good judgment of a good Kentuckian.

I just want to pay my respects to and express my thanks to Dr. CARTER for the fine job he has done on this particular subcommittee in dealing with this problem.

Mr. CARTER. I thank the distinguished gentleman from Minnesota for his kind remarks.

Mr. ROGERS of Florida. Mr. Chairman, will the gentleman yield?

Mr. CARTER. I yield to the distinguished gentleman from Florida.

Mr. ROGERS of Florida. Mr. Chairman, I would like to join in these expressions and commend our distinguished colleague for the fine contribution he has made in this legislation, not only that, but in all the legislation that this committee has dealt with. I do not know of anyone who has been more loyal in trying to be there and in trying to help write these bills and his contributions have been most significant.

Mr. CARTER. I thank the distinguished gentleman from Florida.

I wish to state that it has been a pleasure to work with the gentleman and our subcommittee chairmen and other members of the subcommittee. It has been wonderful working together and sometimes we have worked together at night on this bill. I thank them for their wonderful cooperation.

Mr. HUNGATE. Mr. Chairman, will the gentleman yield?

Mr. CARTER. I yield to the distinguished gentleman.

Mr. HUNGATE. Mr. Chairman, I would like to commend the gentleman for his work and particularly for his definition of librium—I could not have said it better myself.

Mr. CARTER. I thank the distinguished gentleman.

Mr. SPRINGER. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from New York (Mr. HASTINGS), a member of the subcommittee.

Mr. HASTINGS. Mr. Chairman, first I would like to express my pleasure to the other members of the subcommittee for our association throughout the many months we labored on this legislation. I would like to commend the gentleman from Florida (Mr. ROGERS) particularly for pointing out that this measure came from the Senate as strictly a law-enforcement measure and, when taken under consideration by the subcommittee, the important elements of education and rehabilitation were added to the bill.

We had our differences, and they were settled, I believe, in the best interests of both the bill and the problem of drug abuse.

I should also like to thank the members of the subcommittee for consideration of an amendment which would allow special projects to be included in education and rehabilitation. I might point out to the members of the committee that there was a lack of language that would allow States with on-going programs of drug education and rehabilitation to come under the terms of this legislation. The subcommittee was good enough to accept an amendment which would allow such States that were already expending their own resources in these areas to be included and to receive partial payment for some of the moneys expended.

On the no-knock provision, I understand that when we get to the amendment process, there will undoubtedly be some attempt made to remove the no-knock provision from this legislation. I stand firmly in support of the no-knock statute that is included in this legislation. I point out that in my State, the State of New York, we have had no-knock since 1964, a statute that is somewhat even less restricted than that contained in the proposed legislation. The New York law has been taken to the highest court of the State of New York, the court of appeals, and it has been upheld as to its constitutionality in relation to the fourth amendment. Petition for certiorari has been denied in the U.S. Supreme Court. That should answer the constitutional question. I hope that when such an amendment is offered tomorrow we can consider it fully, and retain this important law enforcement tool.

Once again, my complete respects to the chairman of the subcommittee and the entire membership of the subcommittee and the full committee for their work on this bill.

I would like to discuss for a few moments the drug classification scheme contained in the bill presently under consideration, since I feel it is one of the

bill's most innovative and significant features from the standpoint of providing necessary flexibility in the regulatory controls over the legitimate pharmaceutical industry. At the same time, I would like to clarify a few misconceptions relating to this classification scheme which have recently come to my attention.

As you know, all the substances which are to be controlled under this bill are categorized in the five schedules provided for in part B of title II. These substances include narcotic drugs, marihuana, stimulant and depressant drugs, hallucinogens, and precursor chemicals used in the manufacture of certain of these drugs.

Of key importance are the provisions authorizing the Attorney General to administratively add or remove substances from the schedules, or to transfer substances between the various schedules, provided that the characteristics of the substance satisfy the criteria established for the schedule in which the substance is to be placed. I might point out here that there are two exceptions to this requirement that a substance satisfy the criteria of the schedule in which it is to be placed. One is the situation where control of a drug is required by U.S. obligations under international treaties, protocols, or conventions. In this case, the Attorney General may control the substance and list it in the appropriate schedule, without regard to the findings required by the schedule. The second exception relates to the control of precursor chemicals. Both the language of the bill and the Interstate and Foreign Commerce Committee's report on the bill should make it clear that a precursor chemical, if controlled, may be placed in the same schedule in which the controlled substance of which it is an immediate precursor is placed or in any other schedule with a higher numerical designation, regardless of whether or not it satisfies the criteria required for placement in the particular schedule. For example, an immediate precursor of a substance listed in schedule III could be placed in schedule III, IV, or V, but could not be placed in schedule I or II.

By transferring substances between certain schedules, the Attorney General can effectively alter the degree of regulatory control imposed over the legitimate manufacture, distribution, dispensing, or other use of the substance. For example, production quotas are imposed on the manufacture of all substances listed in schedules I and II, and order forms are required for the distribution of schedules I and II substances. However, these restrictions are not imposed on the substances listed in the other three schedules. If a substance is moved out of schedule I or II, because it no longer meets the criteria of either schedule, and is placed in one of the other three schedules, the provisions requiring order forms and production quotas will no longer be applicable. Conversely, if a substance is transferred from schedule III, IV, or V into schedule I or II, the Attorney General will then be required to impose production quotas over its manufacture and order forms will then be required for its distribution. Movement of a substance into schedule I or II also triggers a number of other regulatory controls such as more stringent import and export restrictions, prescription limitations, and stricter packaging requirements.

By tying the regulatory scheme into the drug classification scheme, thereby making the degree of regulatory control dependent on the schedule in which a substance is classified, considerable flexibility is achieved. This flexibility will enable the Attorney General to meet the demands of changing conditions in that he can tailor the regulatory controls imposed over any particular drug to fit the degree of abuse potential posed by it.

Mr. Chairman, I would like to make one final point. As presently structured, many of the drug schedules contain only a single category of drug. For example, at the present time, schedule II contains only narcotic drugs and narcotic precursors. However, this is not intended to preclude the creation in the future of other categories within schedule II for the placement of other types of drugs.

Mr. ROGERS of Florida. Mr. Chairman, will the gentleman yield?

Mr. HASTINGS. I yield to the gentleman from Florida.

Mr. ROGERS of Florida. I believe it should be pointed out that the gentleman's amendment zeroed in on the hard-core areas of the use of illegal drugs, narcotics and drug abuse, and was a real contribution. Certainly I think the committee recognized his idea by incorporating it into the bill, which allows additional funds, some $20 million each year for the next 3 years, to be devoted to those areas of our country where the most severe problems exist. I think you are going to be very proud of that amendment. I am sure the committee and the Congress will, because I think it will begin now to allow us additional tools to get to problems in the hard-core areas.

Mr. HASTINGS. I thank the gentleman from Florida.

Mr. JARMAN. Mr. Chairman, I yield 10 minutes to the gentleman from Texas (Mr. ECKHARDT).

Mr. ECKHARDT. Mr. Chairman, as one of those who signed additional views, I want to join my colleagues in commending the committee on the general approach of the bill. I also want to recognize the bipartisan nature of the working-out of this bill, and also the multicommittee method of working it out. I join in recognizing each of the members of the subcommittee for their excellent work.

I would simply like to add one other expression of commendation, and that is to the able gentleman from New York (Mr. KOCH), who had introduced and who had got through the Judiciary Committee a provision for an Advisory Commission on Marihuana. We, I think, are deeply indebted to him on this committee for providing the background and basic work for that section of this bill. His work is incorporated almost verbatim in section 601. It largely comes from the bill which came from Judiciary, and which was passed out of that committee under his auspices. I think he deserves recognition for that section and high commendation.

I, for one—and I think I also speak for the others who wrote the additional views—recognize the bill in its medical aspects, its educational aspects and in its general control aspects as a tremendous step forward in this field. There is no one, I think, that would speak more strongly for these reforms than the Members who signed the additional views.

Therefore, the objections rest solely on two sections. Both of these sections are not typically drug-control sections, but are in criminal sanctions that arise from elsewhere than the drug field. I think the experimental use of these different and new techniques in a drug-control bill is a very dangerous procedure indeed.

I refer Members to the language of Justice Brandeis in United States ex. rel. *Democratic Publishing Co.* v. *Burleson* (255 U.S. 407):

> In every extension of governmental functions lurks a new danger to civil liberty.
>
> Experience should teach us to be most on our guard to protect liberty when the government's purposes are beneficent.

There could be no more beneficent purpose than doing something about drug abuse in the United States. There could be no more beneficent purpose than placing heavy penalties on drug pushers to stop their trade. I merely submit that this is not the place to experiment with new forms of criminal procedure which trench at least on the outskirts of constitutionality.

In this connection I want to say something about the no-knock provision, because I think there is no issue before this Congress that is less well understood. Certainly if we in Congress know what it is about, it has not been explained in sufficient precision to the people of the United States. There is nothing in law today that requires an officer to stand outside a door when persons inside the door know he is there, when they are about to destroy the evidence, when they are about to shoot him, and simply knock and announce his presence as an officer. This is not the law today.

The limitation on entry without notice is the limitation contained in the fourth amendment of the Constitution, buttressed by the fifth. The fourth amendment limits searches and seizures to reasonable searches and seizures. It does not say there may not be any search and seizure inside one's house. It says the search and seizure must be reasonable, and we have come to accept the proposition as one of the most deeply ingrained propositions of constitutional law, that this means that the police cannot enter a man's house without announcing their presence and the authority for it, unless it is absolutely necessary under evidence existing in the particular case to enter without knocking.

This does not mean that Congress can in advance make some policy determination that in case drugs are involved, or in case a situation may be deemed to exist after some type of administrative process or even quasi-judicial process,

that the dangers exist. The dangers must, in fact, exist at the point and at the time that the officers enter. Therefore, there is no constitutional way that this Congress can write a provision saying that all that must be done to enter a man's house unannounced is to find the most lenient judge—in the direction of law enforcement officers—and get an order from him permitting police to enter without being limited by these constitutional restrictions; and, armed with this predetermination in a warrant, one may go and break into a man's house regardless of what the circumstances are at the place and at the time.

One cannot do that constitutionally.

Kerr against California is the case that governs this point. What was the situation in Kerr against California? It was a situation in which officers, pursuing a suspected narcotics peddler, closed in upon him in his automobile in the street. He whipped his car around in the middle of the street, in a state of anguish that he was about to be arrested. He dashed back to his own premises. He went into his house and assumed the most innocent pose possible at the table. The officers, hot on his trail, broke into the house without announcing their presence, and seized marihuana which was then and there laying on a cabinet or bookcase.

Justice Clark, writing with three other judges in the case, said that this was proper. He said that the activity of the man in whirling his car around indicated he knew he was being pursued, and when he got back in the house he knew that officers were seeking entry and not someone else; and that the situation which existed resulted in the entry being reasonable under those circumstances.

But Justice Clark and the judges who joined him made it very clear that their determination was on the specific facts which existed at that immediate time, not on some policy determination made earlier.

Justice Brennan, in an opinion joined by three of the other Justices, dissented. The reason why he dissented in the case is that he said the fact that the man was sitting quietly in his home, and that the marihuana was not concealed, indicated that in fact the conditions required for entry without knocking and stating authority did not exist.

Mind you, there were four Justices on each side, an even split. The balance was thrown by Justice Harlan who joined Justice Clark. He went along with a Frankfurter decision in Rochin against California, and was obviously in the minority on most points. By throwing his weight with Justice Clark, the case went that way.

At any rate, all judges were in agreement that the facts existing at the time determined the question of reasonableness.

This is the only way one can determine whether or not a search and seizure is reasonable. One cannot write a constitutional law that says an administrative commission, a judge or anybody else acting in advance can determine that where marihuana is involved, or heroin, or narcotics, that such a situation usually results in the destruction of the drug, and that when these conditions exist one can break in as a matter of policy.

One cannot provide as a general proposition in advance that, because drugs are contained in small packages and capsules and can be easily flushed down the commode, therefore police can break in without making their presence known. One cannot make such a determination as a matter of policy.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. JARMAN. Mr. Chairman, I yield the gentleman 5 additional minutes.

Mr. ECKHARDT. One cannot determine in advance that because the drug threat is a great one today the police can break in without notice.

Whatever we decide here, there will be the added requirement of a reasonable search and seizure under the standards of the Kerr case.

Mr. MIKVA. Mr. Chairman, will the gentleman yield?

Mr. ECKHARDT. I yield to the gentleman from Illinois.

Mr. MIKVA. I am impressed by the point the gentleman from Texas is making, and I have been struck by what seems to me to be inconsistent answers I have gotten from some administration spokesmen on this point. On one hand we are told this is a very needed provision because of the serious problem, and on the other hand we are assured it is not going to change existing law because the Constitution would not let existing law be changed. Is the gentleman able to get more consistency out of those two seemingly inconsistent answers I have had than I?

Mr. ECKHARDT. No, I am not.

We are told that we need to add this requirement of a prior warrant that permits no-knock entries to give officers a wider latitude of authority and, on the other hand, we heard the argument both in the committee and from Justice Department witnesses that this restricted no-knock provision would require the special kind of warrant in addition to the ordinary warrant that would result in an arrest.

We also have another inconsistency: That is, that this provision has worked fine in New York. It has had to be used inly 18 times, but, nevertheless, it is said that it is extremely necessary to use it. It is an extremely pressing need in this country, but yet it has been used only 18 times in the State of New York.

Mr. MIKVA. Will the gentleman yield further?

Mr. ECKHARDT. I yield to the gentleman.

Mr. MIKVA. I thank the gentleman for yielding.

Those must be wondrous words indeed which can have so many different meanings to so many different people.

I thank the gentleman.

Mr. ECKHARDT. Let me just say this: The very distinguished ranking minority member of the committee, in the colloquy I had with him at the time we were discussing no-knock, stated to me, as I understood it—and I think this to be correct—that the constitutional limitations of the Kerr case, which require one of three things at the time of entry; namely, first, either the officer's identity be in fact known; or second, that there be danger to those inside unless there is an unannounced entry; or third, that there be danger of destroying the evidence inside—as I understood his statement, constitutional limitation limited to these three facts would continue, but in addition to that the bill requires that there be a special kind of warrant permitting a no-knock entry before entry could be accomplished, without first knocking and announcing the officers' authority.

If this had been law at the time of the Kerr case, the officers pursuing the man when he turned rapidly in the street would have had to go to a magistrate and get a special no-knock warrant and then come back and still prove, as I understand it, the standards that Justice Clark and his three colleagues and Justice Brennan and his three colleagues insisted upon.

It seems to me, if this be true, the no-knock provision is more of an encumbrance on the bill than it is an aid to it. If this not be true, then we are deeply trenching on constitutional rights that require before a man enters one's house that he announce that he is an officer and not break through the door except under those restricted circumstances that the Constitution, as construed in the Ker case, provides for.

Mr. SATTERFIELD. Mr. Chairman, will the gentleman yield?

Mr. ECKHARDT. Yes. I yield to the gentleman.

Mr. SATTERFIELD. I have been somewhat concerned by the suggestion that this bill does no more than codify common law. Do you conisder that by receiving in advance a warrant which permits an officer to enter without announcing his presence— that there has been an enlargement of his common law right to enter without knocking based on circumstances as they appear to him at the time of entry?

Mr. ECKHARDT. I do not, for this reason. The courts have frequently said that the fourth amendment is closely related to and in fact runs into the fifth amendment. As you know, of course—and the gentleman is an able lawyer and I understand a former prosecutor—the situation is this: The fourth amendment requires reasonable search and seizure. The fifth amendment with respect to Federal matters requires due process. It seems to me, to determine whether or not the search and seizure was reasonable, there must be afforded a due process to determine what facts existed at the time. It is not due process, in my opinion, to let somebody determine what might happen in the future. The right involved is the right of the person brought to trial. He is entitled to due process, and he is entitled to it with respect to the seizure that existed at the time.

The CHAIRMAN. The time of the gentleman has expired.

Mr. JARMAN. Mr. Chairman, I yield the gentleman 1 additional minute.

Mr. SATTERFIELD. Would the gentleman yield further?

Mr. ECKHARDT. Yes. I yield to the gentleman.

Mr. SATTERFIELD. Would the gentleman say that under the circumstances of the issuance of a no-knock warrant the right of the police officer has been converted to that of a license to enter without knocking?

Mr. ECKHARDT. No, I do not believe that that would be constitutionally permissible, and if such is intended in the bill, it would be unconstitutional. Frankly, I do not know what is intended in the bill. I would eliminate this provision because I think we give authority to police to enter without knocking at the present. If we eliminated the questionable provision police could act under existing constitutional grounds.

Mr. SATTERFIELD. I agree with the gentleman.

Mr. SPRINGER. Mr. Chairman, I yield such time as he may consume to the gentleman from Ohio (Mr. CLANCY).

Mr. CLANCY. Mr. Chairman, I rise today in support of H.R. 18583, the Comprehensive Drug Abuse Prevention and Control Act of 1970.

Drug abuse in this country has become a problem of frightening dimension. It is a disease which seems to be developing an ever-increasing grip on this Nation's youth. Not only are the colleges and universities plagued by this problem, but it is a clear indication of the increased proportions of the problem when even this Nation's grade school children are beginning to come under the shadow of the cloud of drug addiction.

Studies involving some colleges and graduate schools indicate that 50 percent or more of the students have abused drugs at one time or another. Statistics such as this together with the committee's finding that overdosages of heroin have become one of the leading causes of death among teenagers again demonstrate the need for effective legislation which will provide not only increased efforts in drug abuse prevention and rehabilitation of users but also increased efforts to provide more effective means of law enforcement procedures.

Drug abuse frequently results in the subsequent problem of drug dependency. This dependence, both physical and psychological, ties the drug user to a perpetual drug habit which he must constantly feed with ever-increasing amounts of drugs. The drug dependency may become so demanding that the user frequently must turn to additional criminal activity in order to support his most expensive habit. Therefore, action must be taken now to aid the drug-dependent individual not only in order to help him regain his health and self-respect but to also protect others from the results of the actions he may take to support his habit.

I support this legislation because it represents an effective dual approach to combating this problem of drug abuse. The size and scope of the problem make it clearly evident that the Federal Government must take an active and powerful approach to attack this menace to society and the Federal Government must take this action now without further delay. We must make every effort to make active participation in drug abuse too dangerous and undesirable to be attractive. While I believe it is necessary to have criminal penalties for persons involved in the illicit manufacture, sale, and use of drugs, I also feel that it is necessary for the Federal Government to develop a rehabilitative approach to this problem. The individual user must be rehabilitated so that he will not continue or return to the use of drugs.

Congress has previously taken action regarding the drug abuse problem but this action has resulted in confusion and duplication in the control and enforcement of drug abuse statutes. The legislation before us today realistically faces this problem of confusion and consolidates the diverse statutes into one piece of legislation. The bill not only classifies substances which will be subject to controls according to their abuse potential, as well as their psychological and physical effects, but the legislation also sets forth the penalties which correspond to the violations involving the classified drugs.

I believe that this legislation provides an effective means for improving the administration and regulation of the manufacture, distribution, and dispensing of these controlled substances. It is hoped that the closed system of drug distribution which is established by this legislation will significantly reduce the widespread diversion of drugs out of legitimate channels into illicit markets. I also feel that one of the most important provisions of this legislation is the revision of the entire structure of criminal penalties involving controlled drugs by the establishment of consistent methods of treatment of all persons accused of violations. The realinement of this structure represents a more realistic approach for combating the drug abuse problem.

I strongly urge that the Members of the House join me in support of this legislation in an effort to help in fighting this menace to society. The future of this Nation rests in its youth and future generations. Efforts must be made now to effectively control this serious disease which is currently sweeping this country.

Mr. SPRINGER. Mr. Chairman, I yield myself such time as I may consume.

Fortunately, Mr. Chairman, some weeks ago the chairman of the Committee on Interstate and Foreign Commerce determined—he and I together, to send out to my home county Mr. Rebin who is on the staff of the committee because of the marihuana that was grown to a great extent in the immediate area in which I live. He went out there and spent several days and did an excellent job of investigation, working with the Bureau of Narcotics out of the Chicago office, with the local sheriff's office and the local police in the cities of Champaign and Urbana. He uncovered a great deal of information that was very helpful to us with reference to this marihuana situation. In connection with that he had several conversations with Mr. Ellery L. Knake, extension agronomist of the Cooperative Extension Service of the University of Illinois. Mr. Chairman, this letter is most revealing as to what can and cannot be done in controlling marihuana generally.

I doubt, Mr. Chairman, if there is a person on the floor of this House who does not have some marihuana growing in the home county in which he lives. It is grown in almost every county that corn or cotton will grow. In our own area it grows to the height of about a man. It is on almost every farm. While Mr. Rebin was there he went with the sheriff one day along the Sangamon River which is that river that Abraham Lincoln floated down to New Orleans, looking for marihuana. They found where two University of Illinois students were getting it and putting it in sacks, getting ready to take it back and refine it in their apartments. This is how widespread marihuana is.

I do not know whether any of you have ever seen marihuana. I will have to admit that I had not seen it until these exhibits were mailed to me through the Cooperative Extension Service of the University of Illinois. Anyone who cares to look at it can see it. These are the ends that are cut off from the top. It is the top leaves which are refined or baked or cooked and made into the form like tobacco which you smoke. But, if any of you are interested in looking at it, you can see what marihuana looks like.

I will have to admit that this is my first experience with it.

Mr. Chairman, the letters I referred to earlier are as follows:

COOPERATIVE EXTENSION SERVICE,
UNIVERSITY OF ILLINOIS,
*Urbana, Ill., August 21, 1970.*

Hon. WILLIAM L. SPRINGER,
*House of Representatives,*
*Washington, D.C.*

DEAR MR. SPRINGER: We recently had a very nice visit with Mr. Robert Rebein when he visited Champaign County. I noted in your newsletter sometime ago that you introduced the drug abuse bill and Mr. Rebein's visit reinforced your sincere interest in combatting the drug problem. Our own interest has intensified in control of marihuana since this plant was added to the Illinois noxious weed law about a year ago. This was accomplished largely through the efforts of the Illinois Bureau of Investigation and the Division of Plant Industry of the Illinois Department of Agriculture. Our interest was further increased when the Federal Bureau of Narcotics and Dangerous Drugs sought the cooperation of the Extension Service and initiated a pilot program in 2 counties in each of 11 Northcentral states.

We have learned a great deal this year and I feel obligated to pass on to you some of our findings and thoughts.

We have prepared a circular on "Eradicating Marihuana" in cooperation with the Illinois Bureau of Investigation and the Division of Plant Industry of the Illinois Department of Agriculture, and assisted with preparation of the recent USDA and Department of Justice circular "Wild Hemp—How to control it". We are disseminating considerable information through mass media, including T.V., radio, news releases, and articles for Prairie Farmer and Successful Farming magazines.

Until about a year ago we had the policy of "the less said the better". Now we are very actively trying to help our clientele learn how to identify and control marihuana.

Having had little experience with control

of marihuana previously, we established 3 research plots in east, central, and western Illinois in cooperation with personnel of the Division of Plant Industry this year. This research was established in areas where there were natural infestations of marihuana. We tried to determine herbicides, rates, and time of spraying that would be most effective for control of marihuana. Based on this research we are confident that a rate of approximately one pound per acre of one of the phenoxy herbicides (2,4–D; 2,4,5–T; or silvex) applied in May or June when marihuana is only a foot or two high will give good control. The cost of such a treatment is about one dollar per acre. And 2 miles of fence row about 4 feet wide equals an acre.

Amitrole or amitrole–T are also quite effective. Cost of these would be a little higher but this treatment may be preferable in some areas. Banvel and Tordon are two other effective herbicides for marihuana control but considerable precaution needs to be taken with their use.

Pulling, hoeing, cultivation, and mowing are also helpful for control. We do not recommend burning.

In summary, we have very practical, effective, and economical controls for marihuana. We feel that appropriate and wise use of herbicides to control undesirable plants such as marihuana, poison ivy, and ragweed can *improve environmental quality*.

As you know, marihuana is an annual. It grows only from seed each year. Therefore, preventing seed production is essential for eradication. It is true that some seeds may remain in the soil for several years before germinating; but if no new seeds are added, the supply in the soil will gradually be reduced as some seeds rot and others germinate.

We are fortunate that marihuana is not one of the perennials which are usually more difficult to control. And in some respects we are fortunate that the problem is confined mostly to fencerows, right-of-ways, ditch banks, and the other non-crop areas. This means that control measures can be concentrated on a relatively small percent of our total land area.

Although marihuana was once cultivated in some fertile fields of Illinois, the plant is not a good competitor and is seldom found in cultivated crops such as corn and soybeans. Although it is true that the raising of hemp during World War II likely intensified the problem, marihuana was reported in Illinois as early as 1848 and was probably present before then.

We have the controls and the locations are fairly well known. Now we need to implement control measures.

Especially since marihuana is now classified as a noxious weed in Illinois and it is unlawful to allow it to grow and produce seed, one might expect that landowners would control it voluntarily. But experience has shown that we often need much more motivation, encouragement, and assistance.

Landowners and farmers have come up with some of the following excuses.

1. Marihuana does not cause an economic loss for the farmer since it doesn't spread to cultivated fields.

2. Marihuana is a social problem, so let all of society help in the control.

3. Marihuana spread when the government encouraged hemp production during World War II, so let the government control it.

4. No one enforces the noxious weed laws in some counties so why should the landowner spend money on control.

5. I am busy planting and cultivating when marihuana should be sprayed.

6. In some areas it costs less to pay the fine than to control weeds.

7. The railroads and highways don't spray, so why should I?

On the other side, we could argue:

1. Marihuana can be easily and economically controlled along with other weeds by using a good fence row weed control program.

2. Controlling marihuana helps discourage undesirable trespassers.

3. By controlling marihuana, each landowner helps to improve our environment and reduce social problems.

In Illinois we have county weed commissioners in only about ¼ of the counties. Only about three of our counties in the northern and central part of Illinois—where marihuana is most serious—have county weed commissioners. Some do have township weed commissioners. Largely through the efforts of the personnel of the Division of Plant Industry of the Illinois Department of Agriculture we have county weed commissioners in quite a few southern counties, primarily to encourage control of Johnsongrass.

I am thoroughly convinced that one of the major keys to success is dedicated, conscientious weed commissioners. Although the maximum salary is limited to $20 per day, we have some dedicated men who do a very commendable job. Often the commissioner is a retired or part-time farmer.

In Illinois most of our weed commissioners have not taken a "hard nosed" approach but simply help people recognize the problem and explain control measures. Especially in certain communities it seems to be extremely important to have a local man who is well respected and can motivate without irritating people. The majority of weed commissioners do not do much actual spraying themselves but keep on the lookout for problems, make contacts, and educate.

Monroe County is a prime example of a county that has had a conscientious weed commissioner and a good community spirit. Railroads, when requested, have sprayed within the county up to the county line. Farmers keep Johnsongrass from going to seed. There is a real contrast with surrounding areas.

Mr. Springer, I am not certain what approach you may have in mind but I would like to propose one possibility for your consideration. You may care to expand on this.

A pilot program has been established in Henderson and Cook Counties primarily with educational programs. How about encouraging and initiating more action programs? If you would like to try it on a pilot basis first, I would suggest Champaign County as a good place to start. Mr. Lowell Routh, Route #2, Urbana, Illinois, is chairman of the county weed committee. Mr. Routh has done a commendable job this year to encourage townships to hire weed commissioners and about half the townships now have week commissioners.

I may be mistaken, but I believe considerable progress could be made in 1971 by purchasing spray equipment and hiring a person for three or four months to operate the equipment on a county-wide basis. Perhaps the federal government could assist with some of these costs.

Township commissioners could contact farmers, arrange appointments, and perhaps help with the spraying. Spray equipment mounted in a Jeep or similar vehicle could be used to spray along fencerows early when corn and soybeans are still small or not yet planted. The marihuana would be small and easy to kill. Farmers, still busy with planting and cultivating, should welcome the assistance.

The person operating the sprayer might be a school teacher or someone willing to work part-time in May and full-time in June, July, and August. But he must be conscientious and competent with sprays.

Another important phase, to include might be seeding of a desirable grass such as smooth brome in the trouble spots. Usually marihuana makes little or no growth where there is other vigorous growing vegetation such as brome. Spraying could give short-term benefits and seeding a desirable grass should help provide long-range control. Perhaps the latter could be classified as one means of "biological control."

Such a pilot program might be feasible for 2 or 3 counties and if successful might then be expanded. Perhaps you would be especially interested in trying it out mainly in your district—unfortunately one of the real trouble spots.

If the pilot program proves successful and a real push on marihuana control is desired, I would suggest at least one man in Illinois to devote full time to educational and regulatory activities on control of marihuana. He could coordinate activities between regulatory, extension, and law enforcement agencies. He could see that information on identification and control is appropriately and widely disseminated. He could encourage county boards of supervisors to employ county weed commissioners. And most important, he could see that proper control measures are in effect.

You may even wish to consider appropriations for a state coordinator in one or more states in the very near future rather than to "fiddle" with a pilot program. In many respects I feel we are past the pilot stage and ready for the action stage.

Although the Division of Plant Industry of the Illinois Department of Agriculture, the Illinois Bureau of Investigation, and our Extension Service have been giving increased emphasis to this program, I believe that previously established phases of our respective programs take such a high percentage of our time that we will not be able to put the effort really needed into this one. For example, the Division of Plant Industry is heavily involved in administering the Custom Spray Law to encourage safe and judicious use of pesticides. And our major program in extension has been with weed control in grain and horticultural crops.

The importance of giving expedient action to the marihuana control program was reemphasized this past week when we got the "Johnny Appleseed report" that part of the picking ceremony is also sowing of seed.

I am becoming more convinced that if marihuana control is really to be achieved, landowners will need more incentive and help. One of the major problems is that farmers are extremely busy in May and June when emphasis should be given. A total program is needed which also involves railroads and highways and other landowners besides farmers.

I am confident, Mr. Springer, that with your leadership additional emphasis can somehow be placed on control of marihuana in the United States. Hopefully, this will not only improve the quality of our environment but will reduce crime and help our society to protect our valuable human resources.

I always like the quote from Harvey Wiley, "We are carefully to preserve that life which the author of nature has given us, for it was no idle gift".

And, another Illinois statesman said, "Die when I may, I want it said of me by those who knew me best that I plucked a thistle and planted a flower wherever I thought a flower would grow".—Abe Lincoln

Respectfully yours,

ELLERY L. KNAKE,
*Extension Agronomist.*

P.S.—We are forwarding materials (some requested by Mr. Rebein) that may be of further help.

Mr. Chairman, I have no further requests for time and I reserve the balance of my time.

Mr. JARMAN. Mr. Chairman, I yield such time as he may consume to the distinguished gentleman from Virginia (Mr.

SATTERFIELD) who has worked diligently and constructively as a member of the subcommittee on this bill.

Mr. SATTERFIELD. I thank the distinguished chairman of the subcommittee for yielding this time to me.

Mr. Chairman, I agree with my colleagues who have preceded me about the significance of this legislation and with the fact that it will provide a well rounded approach to this vital problem.

Mr. Chairman, I do not wish to burden this committee now by repeating many of the things that have already been said, but I would like to direct attention to the first title and the provisions which our committee incorporated into this bill which I think are tremendously significant. As a prosecutor and representative I have encountered a problem which I am sure many of my colleagues have also encountered from time to time, with individuals who have a drug problem or who are narcotic addicts and who have contacted me seeking help.

Those who have had this experience would agree with me about what a forlorn feeling it is to know that there is not very much you can do about it. It would seem to me this idea of providing for rehabilitation and for treatment of narcotics addicts and those who have a drug abuse problem in the local community mental health centers and public health hospitals, will make treatment and rehabilitation more available to these individuals. This way they can receive the treatment they need and the rehabilitation they will need to become good citizens, in their own neighborhoods where they live and work, rather than having them to be committed and sent away.

Mr. Chairman, I would like to draw attention specifically to section 4 of title I, which I think brings a significant step forward in that it will provide, in time, the means whereby the normal physician, and particularly those physicians who are performing services in community mental health centers will be able to provide the kind of treatment that these individuals will need.

Also I would like to commend my colleagues on this subcommittee for concentrating to the extent they did to preserve the right of free research. I think we all recognize that in dealing with a law enforcement measure we must exercise utmost care to guarantee to those individuals in our scientific communities the right of free research if we are going to develop the medicinal benefits of various drugs to the fullest extent, and if we are to determine the bad aspects of these drugs as well.

I would also like to mention one other aspect of this bill which gave the committee considerable trouble, and I think we came up with an excellent resolution of it. That is the manner of determining what substances and what drugs should be controlled, in what category they should be placed, and whether or not they shall be transferred from one category to another as need may dictate.

Mr. ROGERS of Florida. Mr. Chairman, will the gentleman yield?

Mr. SATTERFIELD. I am happy to yield to the gentleman from Florida.

Mr. ROGERS of Florida. Mr. Chairman, I would like to interrupt the gentleman just to say that I do not know of anyone who has devoted more time in working on this legislation. Certainly the previous experience of the gentleman from Virginia as an assistant district attorney and the expertise that the gentleman has brought to the committee, as well as that of the gentleman from North Carolina (Mr. PREYER) who is a former district judge, in helping work out these legal difficulties in all of these provisions, and also for their contributions to this legislation. And I commend the gentleman in the well, Mr. SATTERFIELD, from Virginia, and the gentleman from North Carolina (Mr. PREYER).

Mr. SATTERFIELD. Mr. Chairman, I thank the gentleman very much for his comments.

I feel that the entire committee devoted an awful lot of time to this bill, and that is one of the reasons I think it is a very good measure.

Mr. Chairman, to continue, I wish to point out the fact that we have fully protected the medical community in this connection in that expertise, their views and their knowledge will be reflected through the participation of Secretary of Health, Education, and Welfare in this process. I point specifically to the provision which will give the Secretary the power and the authority to prohibit control of a drug which he determines from a medical or scientific standpoint should not be controlled, and by the same token to prohibit transfer of a drug from one category to another.

I commend the committee also for its work with respect to the penalty provisions because, as a former prosecutor, I recognize the extreme difficulty in attempting to dispense justice and in sentencing individuals who have been convicted of violations where a minimum penalty is required. I believe by removing the minimum penalty provision we will afford our courts greater latitude to the end that greater justice will be served better and so that the needs of our people, particularly those who have gone astray, will be also best served.

Mr. KYL. Mr. Chairman, will the gentleman yield?

Mr. SATTERFIELD. I yield to the gentleman from Iowa.

Mr. KYL. Mr. Chairman, I thank the gentleman for yielding, and I would say that following the remarks of the gentleman from Illinois (Mr. SPRINGER) showing how easy it was to obtain cannabis I would like to point out to the gentleman that I have a collection of about 150 dangerous drugs, so labeled by the drug companies, which can be found, not along the Sangamon River, but in the home medicine chest.

We have a very dangerous game among some youngsters now called "fruitful." The youngsters go up to the medicine chest and take out two or three different pills, and put them into a collection of drugs obtained by a whole lot of other youngsters, and then each one draws out two to see what happens.

Under these circumstances even Mom's hormone pills can become dangerous drugs. You do not have to go looking for this stuff along the rivers, you have it in every home, and people do not realize the danger that exists.

Again I thank the gentleman for yielding.

Mr. SATTERFIELD. I appreciate the gentleman's comments because I think he has pointed out the value of this bills approach to the matter. If the attorney general finds that there is indeed an abuse which he feels needs to be controlled, then all that is required is for the Secretary of Health, Education, and Welfare to agree from a medical standpoint that the drug involved or combination of drugs involved substantiate a potential for abuse, then the Attorney General can control these drugs through procedures provided by this act.

I thank the gentleman for raising this point because it focuses upon the type of problem we hope will be solved under language incorporated in this measure.

Mr. JARMAN. Mr. Chairman, I would be remiss if I did not take this opportunity to commend my colleagues on the Public Health Subcommittee for a job well done. They have labored long and hard, and a good bill is the result.

It has a nonpartisan, unified effort, Mr. Chairman, in the best interests of the American people.

For all of us on the Public Health Subcommittee, let me also put on record our sincere appreciation for the able assistance and counsel that we have received from our staff, particularly Jim Menger.

Mr. Chairman, I have no further requests for time.

Mr. BEALL of Maryland. Mr. Chairman, I rise in support of H.R. 18583, the Comprehensive Drug Abuse Prevention and Control Act of 1970. This is one of the most significant measures presented for our consideration this Congress, and we should be grateful for the opportunity to finally take a meaningful positive step in the fight against drug abuse.

H.R. 18583 represents the painstaking efforts of the Committee on Interstate and Foreign Commerce, the Committee on Ways and Means, and the administration. The many different interests affected by this bill have provided input as well, and all viewpoints have been merged into an effective piece of legislation which will serve one basic interest: The health and welfare of the American people.

We need no further evidence to convince us of the extremely serious nature of the drug problem today. We have been given the facts a number of times in a number of ways. It is plain that we need firmer control over the legitimate drug industry, which has a large percentage of its products diverted into the illegal traffic. This bill will regulate the industry more efficiently through a logical system of registration and recordkeeping, inspections, and other controls.

It is clear that today's Federal penalties for drug violations are inconsistent, illogical, and unduly severe in some cases. H.R. 18583 would revamp the entire penalty scheme, substituting a new and flexible system of penalties which will enable courts to truly tailor the punishment in

any given case to fit the crime. Current penalties have little or no deterrent value, as illustrated by the alarming increase in drug related arrests over the past decade. In addition, several Federal offenses have been invalidated by the courts. This new penalty scheme is realistic and enforceable.

The flow of drugs across our borders and through our ports of entry is being vigorously attacked by our enforcement personnel, but they need better tools. This bill contains controls over the import and export of drugs, which will make the job easier for law enforcement agents who guard our borders. We will know a lot more now about what is coming in or going out, and be able to follow and trace shipments of drugs to detect diversion. The Attorney General will be able to exercise better control over the type and amount of drugs coming into this country, a control now largely lacking.

This is a far-reaching and complex bill, and I cannot begin to detail here the many major and minor reforms H.R. 18583 will work as to existing law. I can only state with certainty that the people, who have waited too long for the passage of this measure, are watching us with anticipation and hope. The time to act is now, and I am sure that the bipartisan support we give this legislation will demonstrate to the Nation that we are on the road to recovery from the disease of drug abuse.

Mr. BUSH. Mr. Chairman, respect for and obedience of the law are values which most parents have, for generations, tried to impart to their children. Moderate success has resulted, but the failures in this area explain in part why every civilized nation has criminal laws and penal sanctions to encourage lawful conduct.

Why various people break the law is only partly understood and, even where we can appreciate the root causes, eliminating them is indeed a long-range solution. In the meantime, as always, efficient law enforcement must hold the line against dangerous, antisocial conduct. Nowhere is this more true than in the area of drug abuse.

Mr. Chairman, H.R. 18583, the Comprehensive Drug Abuse Prevention and Control Act of 1970, is a much needed measure which contains extensive reforms in the area of drug abuse control. Of particular interest is the complete overhaul of the existing Federal criminal provisions applicable to drug-related activities, which I believe will improve law enforcement and foster greater respect for the law.

The bill eliminates mandatory minimum penalties, except for professional criminals. Contrary to what one might imagine, however, this will result in better justice and more appropriate sentences. For one thing, Federal judges are almost unanimously opposed to mandatory minimums, because they remove a great deal of the court's discretion. In the vast majority of cases which reach the sanctioning stage today, the bare minimum sentence is levied—and in some cases, less than the minimum mandatory is given. This is particularly true in cases where addict possessors who sell to support their habits are involved, and a great deal of plea bargaining in this area results. Probations and outright dismissals often result.

Philosophical differences aside, practicality requires a sentence structure which is generally acceptable to the courts, to prosecutors, and to the general public. H.R. 18583 does this in several ways. Elimination of the mandatory minimums is one and, at the other end of the scale, severe maximums with mandatory minimums for the true professional is another. In between, penalties are graduated and flexible to cover the type of offense and the type of offender.

An example is the offense of simple possession, which for any drug is the same—a misdemeanor punishable by 1-year confinement and $5,000 fine. Special first offender treatment is also available so that a judge may place a deserving person found guilty of simple possession on probation so that he may eventually earn a dismissal of the charges. On the other hand, one who commits the offense again is exposed to double the original penalties, and the special first offender treatment is no longer available.

As far as trafficking in drugs, penalties vary according to the substance. An offender who deals in the more dangerous items like heroin will face up to 15 years in prison and a $25,000 fine, all of which is doubled for a second offender. One who trafficks in the least dangerous substances like codeine cough syrup, however, will face a maximum of 1 year and $5,000.

There are many other crimes provided for in the prohibited acts portion of this bill, such as fraudulent use of registration numbers, unlawful use of a communication facility to facilitate the commission of a felony under the act, misuse of required symbols or labels, and many others in a comprehensive range of offenses which will render unlawful all drug-related activities which would defeat the purposes of the bill. These offenses have been formulated under the power to regulate interstate commerce, and use of the taxing power—a power which in recent times has come under increasing court attack in this area—has been repealed.

The penalties in this bill are not only consistent with each other, but with the rest of the Federal criminal law—something which cannot be said for present drug laws. As a result, we will undoubtedly have more equitable action by the courts, with actually more convictions where they are called for, and fewer disproportionate sentences.

Mr. Chairman, these penal reforms have been a long time in coming. Now that we have them, let us not delay in moving them to the President's desk.

Mr. BURTON of Utah. Mr. Chairman, I am sure none in this Chamber would deny the serious nature of the drug abuse problem in this country. As legislators, we must admit to a certain amount of negligence in not having squarely faced up to the problem with the enactment of suitable laws.

Now, however, we have before us H.R. 18583, a comprehensive bill which would extensively revise the present law which has proven unequal to the task of controlling drug abuse. I strongly support this measure, and particularly endorse the aids to control and law enforcement contained in the bill.

H.R. 18583 provides, in part B of title II, a system of control which will undoubtedly result in reduction of drug availability in the illicit market. When taken together with the registration provisions of part C, this system should provide a major step forward of a kind we have not seen in more than 50 years of legislative efforts directed at drug abuse problems.

Under part B, the Attorney General will decide whether a particular substance should be subjected to the effective controls provided in the act. He must consider all factors before making his decision, including the medical and scientific advice of the Secretary of Health, Education, and Welfare. If he decides in favor of control, he must then determine into which schedule to place the substance.

Part B contains schedules which include all substances initially subject to control, listed in order of medical utility and potential for abuse. For example, schedule I contains heroin, LSD, and marihuana, all of which are subject to abuse and have no accepted medical use in this country. The Attorney General must accordingly select the appropriate schedule for the drug he wishes to control, since both control mechanisms and penalties for wrongful use depend to some extent on the schedule in which a drug appears.

This use of schedules with specific criteria for inclusion, plus authority for the Attorney General to add to or delete from these schedules, represents a tremendous improvement over present methods of control. In addition, the procedures specified for the control process represent a streamlining of existing procedures under the Food, Drug, and Cosmetic Act which have been cumbersome and time consuming. Under the bill, the Attorney General is allowed to move expeditiously where the situation warrants, with due regard for the rights of other parties. While hearings are provided, a dangerous or potentially dangerous substance could be controlled pending the outcome of hearings and possible judicial review.

Mr. Chairman, this control process is vital to the bill and to our efforts to prevent a proliferation of drugs on the streets which may readily come into the hands of our malleable young people. The system established by part B of title II, H.R. 18583, is just one illustration of the many worthwhile provisions of this bill. We should waste no further time in voting to pass this measure.

Mr. MACGREGOR. Mr. Chairman, I would like to indicate my strong support for H.R. 18583, the Comprehensive Drug Abuse Prevention and Control Act of 1970.

This bill is not, by any means, the entire solution to the widespread drug abuse problem faced by this Nation today. However, it represents a rational and logical approach to limited aspects

of the problem, and is particularly valuable for its reforms of existing control and law enforcement provisions which apply in the area of drug abuse.

H.R. 18583 would make the entire control and enforcement scheme cohesive through the use of the power to regulate interstate commerce as applied to all dangerous substances. The power to tax a questionable device, to begin with, is no longer relied upon. This means, in short, a unified system of laws and derivative regulations. This will directly benefit not only law enforcement personnel, but also the judiciary, private industry, and the general public.

The bill combines a system of classifying drugs according to schedules with a systematic registration plan in order to control the legitimate production and distribution of all drugs in this country. I am certain these systems will drastically reduce the tremendous diversion of legitimately manufactured drugs into illegal channels.

A substantial revision of the criminal laws relating to drugs is also contained in this bill, and I fully endorse both the concept and the penalties provided. Under the bill we will have rational enforcement and appropriate sentencing instead of the varied and inconsistent situations present today.

The bill contains many administrative reforms as well, which would clarify the enforcement powers of the Attorney General and agents of the Bureau of Narcotics and Dangerous Drugs. The situation with regard to subpenas, warrants, powers of arrest, and other related activities is made definite and gives the enforcement people the type of tools they need to handle the criminals who make their living preying on the unfortunate victims of this dread affliction.

And finally, the bill provides tighter controls over the import and export of all drugs, controls which in many respects are presently lacking.

The Committee on Interstate and Foreign Commerce and the Ways and Means Committee are to be commended for their diligent efforts in producing a bill of this magnitude. It now remains for us to approve it forthwith, so that the executive branch may get on with its business of eradicating the drug abuse problem in America.

Mr. Chairman, recently, the Public Health and Welfare Subcommittee of the Interstate and Foreign Commerce Committee completed extensive hearings on various drug abuse and control proposals. From these hearings emerged a clean bill which I believe will be most valuable in dealing with the drug abuse crisis in America today.

The Comprehensive Drug Abuse Prevention and Control Act, H.R. 18583, is a bill which strikes a balance between the law enforcement and the scientific community. It contains proposals encompassing all important areas of concern: treatment and rehabilitation, prevention, research, and control of dangerous substances. Many of the programs are extensions of existing law and many are new.

Title I of the bill is generally concerned with rehabilitation and education. It would amend the Community Mental Health Centers Act to include Federal support for community mental health centers treating not only narcotic addicts but also persons with any drug abuse or drug dependence problems. Considering the scope of drug abuse today, we cannot limit Federal aid to narcotic treatment alone—we must provide aid to combat the whole problem in an attempt to solve the whole problem, as proposed in this bill. I have especially come to realize, in viewing the drug abuse problem in New York City, that there is a crying need in the community for facilities to help that growing population of individuals who will swallow, sniff or shoot any substance they can get their hands on.

In tune with the expanded coverage of the program, authorizations are increased by $75 million over current authorizations for the next 3 years.

Also under title I, authority is extended to include the treatment of dangerous drug abusers and drug persons in Public Health Service hospitals.

A drug abuse education program to be coordinated by the National Institute of Mental Health is also included in title I. Under this proposal, grants could be made to public and private groups for the development of educational materials and school programs. NIMA would serve as the national center for collection and dissemination of materials on drugs, for public information programs and for coordination of Federal activities in the field. I am sure that most of you share my belief that an intensive Federal program in support of drug abuse education, as provided in this bill, is a vital part of any successful effort in preventing drug abuse. It is hard to believe that if young people were truly aware of the consequences of drug abuse, they would not be experimenting with drugs as they are. It is certainly our duty to arm young Americans with information so they will be able to make a rational choice about drugs.

Title II of H.R. 18583 grew out of the Nixon administration's proposal, which came up last year, for a reorganization of all existing narcotic and dangerous drug control laws. The administration wished, with due reason, to replace these laws with a single, unified statute. Generally speaking, the proposals—both as submitted by the administration and as reflected in the Commerce Committee bill—parallel existing law. However, both also make substantial charges. Among changes common to both proposals would be:

First, a more sophisticated classification of controlled drugs;

Second, stricter regulations, in some cases, of the manufacture and distribution of controlled substances;

Third, greater control over the export of depressants and stimulants; and

Fourth, a complete revision of the existing penalty structure, including making any first-time simply possession offense a misdemeanor, regardless of the drug involved, and easing penalties for second-time possessions offenses. Also, mandatory minimum penalties would be eliminated, except for a special class of professional offenders.

Additionally, title II provides for the establishment of a Committee on Marihuana, a panel of experts appointed by the Secretary of Health, Education, and Welfare and the Attorney General. The committee would be charged with keeping us up to date on marihuana research findings, identifying gaps in our knowledge, and examining the effects of marihuana use on our society in general. This is a small but important part of this bill, primarily due to the controversy surrounding this drug.

I have given you but a brief outline of the Comprehensive Drug Abuse Prevention and Control Act, but, I think, a general idea of its major proposals. Mr. STAGGERS and the members of his committee deserve our praise and thanks for their hard work in developing such a fine proposal.

Mr. BOLAND. Mr. Chairman, the epidemic of drug abuse is a grave threat to the health and well-being of our Nation—especially to the young people of our Nation. Despite convincing warnings of the physical, emotional, and social consequences of drug abuse, the numbers of experimenters are growing yearly. The most recent estimates of the National Institutes of Mental Health indicate that 20 million have used marihuana, hundreds of thousands abuse depressants and stimulants, and as many as 150,000 are addicted to narcotic drugs. It is impossible to tell how many have suffered a deep personal tragedy from what began as a casual experiment.

There are a limited number of approaches to attack this problem—preventive steps, aimed at stopping experimentation before it starts; control, to regulate the supply and availability of drugs; rehabilitation, to lead individuals away from drug dependence and addiction. It is my conviction that the Federal Government must make a concentrated effort in all of these areas.

The bill now before us makes such an effort. It goes beyond the law-enforcement-oriented Controlled Dangerous Substances Act, backed by the administration and passed by the Senate early this year. H.R. 18583 contains the much needed revision and synthesis of existing narcotic and dangerous drug statutes found in the Senate bill, but changes some of its more questionable provisions. In addition, the Comprehensive Drug Abuse Prevention and Control Act is truly comprehensive, granting new authority to the Federal Government in research, education, treatment, and rehabilitation.

Certainly, the gravity of the drug abuse problem in the United States today merits a review of the law. In the last 55 years, more than 50 pieces of legislation have been enacted to control the legitimate manufacture of drugs and illicit trafficking, forming a confusing network of outdated statutes, hard to efficiently implement. H.R. 18583 condenses this network into one piece of legislation, reforming control provisions to meet the problem today. It recognizes

new scientific information and the new structure of Federal administration of drug statutes created by the Reorganization Plan No. 1 of 1968.

Primarily, substances with an abuse potential are classified in five schedules—schedules developed according to our current knowledge on the degree of abuse potential of a substance, its psychological and physical effects, and its medical value in the United States. Most important, a penalty structure for violations involving such controlled substances is designed in the bill to coincide with each schedule, mirroring the relative dangers to society of each drug.

Minimum mandatory sentences are prescribed in only one section of the bill for those persons engaged in a continuing criminal enterprise of illicitly manufacturing and selling any of the controlled drugs for profit. Although I would question the wisdom of prescribing any minimum sentence for any offender, this is progress from existing law where all violations—including simple possession—carry a minimum mandatory sentence.

Except when the continuing criminal enterprise section applies, penalties for the manufacture, distribution, and sale of controlled substances vary according to the schedule in which the drug is listed. For instance, if the drug is a narcotic drug and is listed in schedules I or II, showing it has a high potential for abuse, penalties may be up to 15 years imprisonment and up to $25,000 in fines for a first offense. If the drug involved is a nonnarcotic drug in schedules I or II or any drug in schedule III, penalties may be up to 5 years in prison plus a fine of up to $15,000. Schedule III substances are those with a lower abuse potential that those in the former schedules, but their abuse may lead to moderate to low physical dependence and high psychological dependence. Schedules IV and V substances involved in violations carry still lower maximum penalties, and their dangers are accordingly lower.

One of the most striking features of the new penalty structure is that illegal possession of a controlled drug for one's own use is a misdemeanor. This carries a penalty of not more than 1 year and a fine of not more than $5,000 or both. The bill also provides that if a defendant is found guilty or pleads guilty, he may be placed on probation. After the defendant has completed his probation, the court dismisses the charges against him without entering a judgment of guilty. If the defendant is under 21, the court has the authority to clear all records showing information relating to his case, restoring him to the status he occupied before his arrest. This section on simple possession violations reflects the judgment of most authorities that harsh penalties imposed on the user have little deterrent value and often ruin the life of an individual involved. It is unfortunate that the Federal Government rarely has cases of simple possession within its jurisdiction so that this kind of sensible statute could apply. It is hoped that it may serve as an example to the States as they reform their own drug abuse laws.

Beyond these measures to control the illicit traffic in drugs, H.R. 18583 also sets up a closed system of drug distribution to aid the legitimate manufacturers of drugs. It is hoped that a system so established would significantly reduce the widespread diversions of legally manufactured drugs into the illicit market while providing the drug industry with a unified approach toward control of their products.

I mentioned earlier that H.R. 18583 makes some important changes in the administration-supported proposal passed by the Senate relating to the control aspects of the drug problem.

According to provisions of the Senate bill, the Attorney General is required to seek the advice of the Secretary of Health, Education, and Welfare and of the Scientific Advisory Committee established by the bill before adding to, subtracting from or in some way modifying the schedules. He is not obliged to follow their advice. Considering that the scheduling of a substance is based largely on scientific information, it seems most inappropriate that law-enforcement authorities should have the last word on the content of the schedules. H.R. 18583 requires, in the absence of international treaty obligations, that the Attorney General follow the advice of the Secretary of Health, Education, and Welfare on scientific and medical matters and may not control a substance if the Secretary decides it should not be controlled.

Another provision in the Senate bill would allow the Attorney General to refuse to register a person to do research with a schedule I substance if his proposed procedures do not adequately safeguard his supply of the substance from illicit diversion. Under the House bill, he does not have the authority to make this refusal, but instead the Secretary of Health, Education, and Welfare sees that proper controls will be provided.

The Attorney General is limited in his authority to carry out research programs under provisions of H.R. 18583, in contrast to the Senate bill. He is specifically limited to conducting research directly related to enforcement of the law, and all other research relating to drug abuse is to be conducted by Health, Education, and Welfare.

These changes should be pointed out because they show a recognition of the vital part the scientific community should play in establishing an appropriate system for drug abuse control. I think our problem with existing law has been that scientific evaluations and approaches have been all too limited.

I would like to talk about a few other provisions of this bill—provisions that make it a truly comprehensive attack on our drug problem.

Federal support for rehabilitation programs is increased by granting additional authority under the 1968 amendments to the Community Mental Health Centers Act. Such authority would include construction and staffing grants for facilities to treat drug dependent persons in addition to those for narcotic addicts previously provided. This would enable drug dependent persons to be treated at the more than 350 community mental health centers in the Nation that have already been financed under the act.

Narcotic addict rehabilitation support is also increased under the House proposal by offering special assistance in matching grants for construction and staffing of treatment facilities in areas with large numbers of narcotic addicts.

Another provision of H.R. 18583 would clarify for the medical profession in the United States the extent to which they may safely treat narcotic addicts as patients. This would help take a great strain off treatment facilities, allowing more addicts to be helped.

Although statutory authority currently exists for drug abuse education and training grants to individuals, a section of the bill gives special emphasis to the importance of these activities. It amends the Community Mental Health Centers Act to authorize a special program of grants for the development of drug abuse education materials and curriculums. It also establishes the National Institute of Mental Health as the national coordinating center for drug abuse education and information.

The CHAIRMAN. If there are no further requests for time on the part of the Committee on Interstate and Foreign Commerce, under the rule the gentleman from Arkansas (Mr. MILLS) will be recognized for 30 minutes and the gentleman from Ohio (Mr. BETTS) will be recognized for 30 minutes for general debate by the Committee on Ways and Means.

Mr. MILLS. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, the measure now under consideration is designed to deal in a comprehensive manner with a problem of ever-increasing concern and magnitude in this country. Certainly, the illicit use of drugs is one of our major problems, if not the major domestic problem of our time.

The extreme seriousness of the problem is clearly evident whether we look at the cold statistics charting the disturbing upsurge in illegal drug traffic in recent years or whether we consider the tragic social waste involved with respect to those persons who become enslaved to drug abuse.

This measure, Mr. Chairman, is a comprehensive bill in that it brings together some 14 or more statutes on the subject, within the jurisdiction of both the Committee on Interstate and Foreign Commerce and the Committee on Ways and Means.

It brings them into one law and really gives to the Committee on Interstate and Foreign Commerce, as a result of its passage and approval, more jurisdiction in the field than it has today—and the Committee on Ways and Means perhaps less jurisdiction than it has today.

The provisions in which the Committee on Ways and Means exercises jurisdiction are all found in title III of the bill, which may be cited as the "Controlled Substances Import and Export Act." This is the portion of the bill and the

accompanying committee report produced and supplied by the Committee on Ways and Means in cooperation with the Committee on Interstate and Foreign Commerce.

Title III of the bill, as is explained on page 71, part I of the report, has two major purposes: First, it would unify and integrate statutory controls over importation and exportation of narcotics and other dangerous drugs, so as to bring the provisions of existing law into conformity with the proposed new system established in title II which was worked out by the Committee on Interstate and Foreign Commerce.

Second, it is designed to make some improvements in such controls by tightening up supervision of the importation and exportation of depressant and stimulant drugs, to prevent the diversion of these substances into illegal channels. Also the penalty provisions of the existing law were modified so as to coordinate those penalties with the penalties in title II, and to provide a more realistic and more flexible, and therefore a more effective system of punishment and deterrents for violations of the narcotic and dangerous drug laws.

In addition, since the other titles of the bill developed by the Interstate and Foreign Commerce Committee provide for a comprehensive system of regulation of narcotics and dangerous drugs, title III contains the necessary repeals of existing narcotic and marihuana laws in the Internal Revenue Code.

Mr. Chairman, title III makes it unlawful to import into the United States any schedule I or II substance or any narcotic drug contained in schedules III, IV, or V except with the special consent of the Attorney General. Any other controlled substance could be imported only for medical, scientific, or other legitimate uses, and only in accordance with whatever notification or declaration requirements might be prescribed by the Attorney General. No controlled substance could be exported except in compliance with specified procedure.

The title would also specifically authorize the Attorney General to issue regulations exempting an individual from these restrictions if he is merely carrying a legitimate drug for his own personal medical use or for administration to an animal accompanying him, and if he has lawfully obtained it and conforms with whatever notification procedures the Attorney General may require.

Mr. Chairman, the question was raised in the Rules Committee about whether or not the Attorney General would have authority to regulate the supply of drugs that are not narcotic in nature that are to be imported into the United States for medical, scientific, or other legislative uses. Let me make it very clear that it was the thought and the intention in the Ways and Means Committee that if the Attorney General found that some importer of these drugs who alleged that he was importing them for medical purposes was importing far more in quantity than any reasonable person would expect to be used for a medical purpose, the Attorney General would investigate and check into that situation immediately, because we consider that a vital part of the control as they come through Customs into the United States.

Mr. Chairman, there is a table on page 73 of part 1 of the report which shows the changes in the penalty provisions insofar as the importation and exportation are concerned. I would think that all Members would be interested in looking at that table on page 73, because you will notice that in many instances the committee has reduced the present penalties with respect to importation, because it has been utterly impossible in the case of marihuana smuggling into the United States to gain convictions to the extent that convictions should be had, because of the severity of the penalty, the unwillingness of juries, and the unwillingness of the courts to try the individual for smuggling when they can try him for mere possession under much less severe penalty provisions. So we are hoping, under the lesser penalty for such smuggling, that it will be possible for those who are bringing marihuana into the United States, even though in small amounts, to be sentenced for smuggling them into the United States, and, therefore, perhaps deter others from doing so.

Mr. Chairman, the gravity of the problem of drug abuse in this country was clearly established and documented in the public hearings held by the Committee on Ways and Means earlier this year, and I understand also in the hearings held by the Committee on Interstate and Foreign Commerce.

The bill that is before the committee certainly was looked at very carefully and considered fully so far as title III is concerned, by members of the Ways and Means Committee. The committee has endeavored to meet the problems in this area falling within the jurisdiction of the Ways and Means Committee.

Mr. Chairman, the Attorney General told us in executive session of the committee that he was highly pleased with the portion of the bill which had been developed by the Interstate and Foreign Commerce Committee and that he fully supported and endorsed that portion of the bill. He also told us that the title III we had developed within the Ways and Means Committee carried out his recommendations fully and totally, and he supported that title also. So there can be no question but that the administration fully endorses this legislation. All of us know the many times the President has called for its enactment and the emphasis he has placed on it in his efforts to correct this problem, so I urge my colleagues to approve the bill without a dissenting vote, because I know how all Members feel about the necessity for the control of the dangerous drugs and the elimination to the extent possible of their use by the young people of this country.

Mr. BETTS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the distinguished chairman of the Ways and Means Committee has, in my opinion, completely and clearly explained title III as it came from the Ways and Means Committee.

My only comment is that in my opinion—and I am sure the whole committee would agree with me—this represents the unanimous thinking of the entire Ways and Means Committee. As I recall—and the chairman can correct me if I am wrong—the entire Ways and Means Committee unanimously approved title III.

Mr. Chairman, I, therefore, associate myself with the remarks of the chairman of the Ways and Means Committee.

(Mr. MONAGAN asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. MONAGAN. Mr. Chairman, drug abuse in the United States has reached the crisis stage, and in order to deal with this problem I support the Comprehensive Drug Abuse Prevention and Control Act.

The market for illegal drugs in this country has not merely expanded, it has exploded. The Federal Bureau of Investigation has reported that in the 10-year period from 1958 to 1968, the number of persons arrested for narcotic and marihuana violations increased from 9,863 to 162,177. In my own State of Connecticut the number of drug addicts is estimated to be between 6,000 and 12,000, and the drug addiction outbreak has reached the epidemic stage according to the State health commissioner. New laws are needed that are equal to the task of cleaning up the drug problem, and this comprehensive bill demonstrates the concern of Congress and goes a long way to provide effective means of coming to grips with the surging traffic in illegal drugs. Its provisions will not only form a deterrent to those bent on expanding the market in illegal drugs, but they also seek to aid the victims of drug abuse by providing for increased effort to treat and rehabilitate drug abusers and drug-dependent persons so that they may regain their capacity to participate in society.

First, the bill provides authority for the Secretary of HEW to increase departmental efforts in drug abuse and the rehabilitation and treatment of addicts. Rehabilitation and treatment will be accomplished through expansion of community mental health centers and public health service hospitals and facilities.

Second, the bill gives new authority to the Justice Department by strengthening drug abuse laws. Under its terms stringent registration requirements will be imposed upon manufacturers, wholesalers, and retailers in the legitimate drug distribution chain to prevent the diversion of legally produced drugs into the illicit drug traffic. This section also thoroughly revises the criminal penalties for the use, possession and manufacture, or sale of illegal drugs. Criminal penalties for persons selling or manufacturing illegal drugs are substantially increased to reflect the public demand that the stiffest penalties fall upon those responsible for creating and exploiting the

market for drugs in the schools and in the streets. Persons convicted of engaging in continuing criminal enterprises involving violations of the bill, from which substantial profits are derived will be subject to a minimum prison sentence of 10 years and may be imprisoned up to life, with a maximum fine of $100,000, plus forfeiture of all profits. A second conviction as a continual offender provides for a 20-year mandatory sentence. Also, where a violation of the provisions involves distribution of drugs to persons below the age of 21 by a person over the age of 18, the penalty is twice the original penalty.

Where a first offender using a controlled drug is under the age of 21 when the offense occurs, he or she may later obtain a court order expunging from all records all entries relating to the arrest, indictment, trial, and finding of guilt. This procedure is available only once, and a later offense will be treated as a first offense under the act.

The third section of the bill provides for new registration requirements for the import and export of controlled drugs. This section replaces all present law except smuggling on the importation and exportation of narcotic drugs and marihuana. Under this section, it will be unlawful to import into the United States any controlled substance or drug without the special consent of the Attorney General of the United States.

I am pleased that his bill also incorporates H.R. 14981, my proposal to establish a Commission on Marihuana to recommend legislative and administrative action to deal effectively with marihuana use. As I noted upon introduction of my bill, the most important work that the Commission would undertake would be an indepth study of the relationship between marihuana and the use of hard drugs. The present uncertainty surrounding the marihuana-hard drug link not only hampers effective drug abuse education programs, but also impedes the strict enforcement of existing marihuana laws. I am hopeful that the Commission's study and report will rectify this situation.

On the whole, this is a good bill as reported. I do think that some sections are in the need of improvement, and I intend to support perfecting amendments to cover objections.

Mr. BETTS. Mr. Chairman, I yield such time as he may consume to the gentleman from Kansas (Mr. SKUBITZ).

Mr. SKUBITZ. Mr. Chairman, although Kansas is at the center of the United States, Kansas is not, however, at the center of America's drug problem—at least not for the present. Yet, to say that Kansas is not affected by today's drug abuse epidemic would be a misstatement of fact. Like any epidemic, drug abuse is spreading, and I respectfully suggest that no Member of this body can consider the people he represents, from whatever State, immune.

We now have before us H.R. 18583, which may not be the vaccination that will eliminate the epidemic, but is certainly part of the cure. The Comprehensive Drug Abuse Prevention and Control Act of 1970 is must legislation, and we can ill afford to delay or frustrate its passage into law.

For my own part, as a member of the Subcommittee on Public Health and Welfare I am glad we spent so many hours in the consideration of H.R. 18583. The issues have been thoroughly explored, both in the subcommittee and in the full Committee on Interstate and Foreign Commerce. The Ways and Means Committee has also held hearings, and contributed its thinking in the form of title III to the bill.

What we have in H.R. 18583 is a measure which has benefitted from the exchange of many viewpoints. It is a bill worthy of the Congress and, I am sure, acceptable to the administration as well. It is a modernization of over 50 years of sporadic legislation, and I believe its passage will mark the beginning of the end for those who make their living by peddling drugs for profit.

It has been made clear that tighter control is needed over the legitimate drug industry because of the tremendous diversion of lawfully produced drugs into illicit channels. This bill will provide firm, but not oppressive, control over industry.

It has been made clear that many of today's drug penalties are inconsistent and lacking in credibility. This bill contains penalties that are flexible and appropriate, but not too lenient or overly harsh.

It has been made clear that we know too little about, and have too little control over, the many different drugs which cross our borders from both directions. This bill has import and export provisions which will enable us to watch and control the flow more closely.

It has been made clear that we need to know far more about the abuse of marihuana and other drugs. This bill will create a commission to study these problems and submit a comprehensive report to the President and Congress.

H.R. 18583 would accomplish additional reforms too numerous to mention. As an example, I cite section 503(a)(5), which is of particular interest to citizens of Kansas and other States where marihuana grows wild in some abundance. This provision authorizes the Attorney General to conduct programs, in cooperation with appropriate agencies, aimed at eradicating wild or illicit growth of plants which can produce dangerous drugs.

Mr. Chairman, I am proud to have played a small role in the development of H.R. 18583, and I urge its swift passage by the House.

Mr. BETTS. Mr. Chairman, so far as I know, I have no further requests for time, and I reserve the balance of my time.

Mr. MILLS. Mr. Chairman, we have no further requests for time.

The CHAIRMAN. Under the rule, titles I and II of the committee substitute amendment printed in the bill will be read for amendment as an original bill under the rule.

The rule also provides title III shall be considered as having been read for amendment and no amendments are in order to title III of the substitute except amendments offered by direction of the Committee on Ways and Means.

The Clerk will read.

The Clerk read as follows:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Comprehensive Drug Abuse Prevention and Control Act of 1970".

TABLE OF CONTENTS

TITLE I—REHABILITATION PROGRAMS RELATING TO DRUG ABUSE

Sec. 1. Programs under Community Mental Health Centers Act relating to drug abuse.
Sec. 2. Broader treatment authority in Public Health Service hospitals for persons with drug abuse and other drug dependence problems.
Sec. 3. Research under the Public Health Service Act in drug use, abuse, and addiction.
Sec. 4. Medical treatment of narcotic addiction.

TITLE II—CONTROL AND ENFORCEMENT

PART A—SHORT TITLE; FINDINGS AND DECLARATION; DEFINITIONS

Sec. 100. Short title.
Sec. 101. Findings and declarations.
Sec. 102. Definitions.
Sec. 103. Increased numbers of enforcement personnel.

PART B—AUTHORITY TO CONTROL; STANDARDS AND SCHEDULES

Sec. 201. Authority and criteria for classification of substances.
Sec. 202. Schedules of controlled substances.

PART C—REGISTRATION OF MANUFACTURERS, DISTRIBUTORS, AND DISPENSERS OF CONTROLLED SUBSTANCES

Sec. 301. Rules and regulations.
Sec. 302. Persons required to register.
Sec. 303. Registration requirements.
Sec. 304. Denial, revocation, or suspension of registration.
Sec. 305. Labeling and packaging requirements.
Sec. 306. Quotas applicable to certain substances.
Sec. 307. Records and reports of registrants.
Sec. 308. Order forms.
Sec. 309. Prescriptions.

PART D—OFFENSES AND PENALTIES

Sec. 401. Prohibited acts A—penalties.
Sec. 402. Prohibited acts B—penalties.
Sec. 403. Prohibited acts C—penalties.

Mr. JARMAN (during the reading). Mr. Chairman, I ask unanimous consent that the table of contents be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. JARMAN. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the Chair, Mr. MOORHEAD, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 18583) to amend the Public Health Service Act and other laws to provide increased research into, and prevention of, drug abuse and drug dependence; to provide for treatment and rehabilitation of drug abusers and drug-dependent persons; and to strengthen existing law enforcement authority in the field of drug abuse, had come to no resolution thereon.

## GENERAL LEAVE

Mr. JARMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on titles I, II and III of H.R. 18583 and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

## CONFERENCE REPORT ON S. 3558, PUBLIC BROADCASTING FINANCING ACT OF 1970

Mr. JARMAN, on behalf of Mr. STAGGERS, filed the following conference report and statement on the bill (S. 3558) to amend the Communications Act of 1934 to provide continued financing for the Corporation for Public Broadcasting:

CONFERENCE REPORT (H. REPT. No. 91-1466)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 3558) to amend the Communications Act of 1934 to provide continued financing for the Corporation for Public Broadcasting, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows: That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the House amendment insert the following:

"That this Act may be cited as the 'Public Broadcasting Financing Act of 1970'.

"SEC. 2. Subsection (k) of section 396 of the Communications Act of 1934 (47 U.S.C. 396(k)) is amended to read as follows:

"'(k)(1) There are authorized to be appropriated for expenses of the Corporation for the fiscal year ending June 30, 1969, the sum of $9,000,000; for the fiscal year ending June 30, 1970, the sum of $20,000,000; and for each of the two succeeding fiscal years, the sum of $30,000,000.

"'(2) In addition to the sums authorized to be appropriated by paragraph (1) of this subsection, there are authorized to be appropriated for payment to the Corporation for each fiscal year during the period July 1, 1970, to June 30, 1972, amounts equal to the amount of total grants, donations, bequests, or other contributions (including money and the fair market value of any property) from non-Federal sources received by the Corporation under section 396(g)(2)(A) of this Act during such fiscal year; except that the amount appropriated pursuant to this paragraph for any fiscal year may not exceed $5,000,000.'"

*Managers on the Part of the Senate.*

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 3558) to amend the Communications Act of 1934 to provide continued financing for the Corporation for Public Broadcasting, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

SENATE VERSION

The Senate-passed bill provided for a three-year open ended authorization to provide continued financing for the Corporation for Public Broadcasting for fiscal years 1971 through 1973. In addition, the bill as passed by the Senate would have provided for open-end authorizations for the same three years to match grants, donations, bequests, and other contributions received by the Corporation from non-Federal sources. In the foregoing respects, the Senate passed bill was identical to the legislation requested by the Administration.

The Senate bill also contained provisions which would have required each public broadcast station receiving Federal assistance under title III of the Communications Act of 1934 to (1) keep records (including audio recordings) for at least three months of each program which it broadcast which involved an issue of public importance, and (2) furnish such records to the Federal Communications Commission at its request. These latter provisions requiring records were not the subject of hearing in either House. Questions were also raised as to why they should be limited in their application to public broadcast stations receiving Federal grants under title III of the Communications Act of 1934. It was also clear that the impact of these provisions on public broadcast stations which would be subject to them was largely unknown.

HOUSE AMENDMENT

On the other hand, the House amendment to the Senate-passed bill provided for a one-year extension of financing for the Corporation covering fiscal year 1971. Under the House amendment, not more than $30 million would have been authorized to be appropriated to the Corporation for fiscal year 1971, plus an additional amount not exceeding $5 million to match grants, donations, bequests, and other contributions received by the Corporation from non-Federal sources. The one-year extension of financing in the House version was intended to give the House Committee on Interstate and Foreign Commerce closer oversight of the development of a permanent plan for financing the Corporation for Public Broadcasting.

CONFERENCE AGREEMENT

The conference agreement authorizes appropriations for the Corporation for fiscal years 1971 and 1972 at the same level each year provided in the House amendment for fiscal year 1971, namely, not more than $30 million outright, and an additional amount of not more than $5 million for each such fiscal year to match contributions to the Corporation from non-Federal sources.

The recording requirements in the Senate bill were omitted and the Managers on the part of the House agree that legislation similar to the recordkeeping provisions in the Senate bill, but applicable to all broadcast stations, should be the subject of hearings in the next session of Congress.

The authorization of appropriations for the Corporation for one more year than was provided in the House version was accepted by the House conferees because of the delay in passing this legislation. We are convinced and determined that it will not im-

pede the formulation of a permanant plan for financing the Corporation.

HARLEY O. STAGGERS,
TORBERT H. MACDONALD,
LIONEL VAN DEERLIN,

## CONGRESS HAS COMPLETE CHARGE OF PRIMARY ELECTIONS

(Mr. ROGERS of Colorado asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ROGERS of Colorado. Mr. Speaker, I wish to point out that recently the Supreme Court of the State of Colorado rendered an unusual and interesting opinion. It in effect, says that the Congress of the United States has complete charge of the primary elections, the Colorado statutes provide a method of deciding contests. Nevertheless the Supreme Court of the State of Colorado would not assure jurisdiction. They say it belongs to us in the Congress to make this determination. This is a rather unusual and strange situation. I therefore include in the RECORD the opinion of the Supreme Court for the State of Colorado together with pertinent statutes of the State of Colorado.

The opinion and statutes are as follows:

[No. 24904]

BYRON G. ROGERS, PLAINTIFF-CONSUMER *v.* CRAIG S. BARNES, AND BYRON A. ANDERSON, SECRETARY OF STATE, DEFENDANT-CONTESTEE

ORIGINAL PROCEEDING

En banc, Petition Dismissed.

Byron G. Rogers, Jr., Attorney for Plaintiff-Contester.

Arnold Alperstein, Hugh J. McClearn, D. Monte Pascoe, Maxwell A. Snead, Jr., Attorneys for Defendant-Contestee, Barnes.

Duke W. Dunbar, Attorney General, John P. Moore, Deputy Attorney General, Attorneys for Byron Anderson, Secretary of State.

Mr. Chief Justice McWilliams delivered the Opinion of the Court.

Byron G. Rogers, as plaintiff-contester, filed in this Court an original proceeding entitled Petition for Contest of Primary Election and named Craig S. Barnes as a defendant-contestee. Also named as a defendant was Byron Anderson, the Secretary of State for Colorado.

From the petition we learn that Rogers and Barnes were candidates for nomination by the Democratic Party for United States Representative to Congress from Colorado's First Congressional District and that at the primary election held on September 8, 1970 Barnes had apparently won by some thirty votes. By his petition Rogers contests the apparent election of Barnes and as grounds therefor alleges as follows.

(1) that illegal votes were received in eight designated precincts;

(2) that in one precinct an unnamed election judge electioneered for Barnes;

(3) that in one precinct the lever over Rogers' name was faulty; and

(4) that in another precinct there was electioneering for Barnes within the polling place.

As concerns each of these several grounds for contest, Rogers also alleged that but for the described conduct the result of the election would have been changed in his favor.

By way of relief Rogers asks that a hearing be held by this Court to determine the contest and that he be declared the successful candidate in the primary election.

In response to this petition Barnes filed a motion to dismiss which in our view must be sustained for two reasons.

I.

We are of the view that this Court does not have jurisdiction to hear this matter.

Article I, sections 4(1) and 5(1) of the United States Constitution provide, in part, as follows:

"4(1) The time, place and manner of holding elections for senators and representatives shall be prescribed in each state, by the legislature thereof, but Congress may at any time, by law, make or alter such regulations, except as to the places of choosing senators.

* * * * * *

"5(1) Each house shall be the judge of the elections, returns, and qualifications of its own members . . ."

Quite clearly, then, section 5 empowers Congress, and Congress alone, to determine charges of voting irregularity, for example, stemming from a general election and concerning the offices of United States Senator and member of the United States House of Representatives. See, for example, *Laxalt* v. *Cannon*, 80 Nev. 588, 397 P. 2d 466; *Keogh* v. *Horner*, 8 F. Supp. 933; and *Odegard* v. *Olson*, 264 Minn. 439, 119 N.W. 2d 717. Such jurisdiction being exclusive, no other body, including this Court, has the jurisdiction to hear and determine an election contest arising out of a general election for those two national offices. That such is the case is demonstrated by the fact that though the legislature has enacted a series of statutes relating to general election contests, there is no statute providing for contesting the election of one to the United States Senate or the House of Representatives, such right having been reserved by the Constitution of Congress.

The issue here to be resolved is whether the same rule applies to a primary election where competing candidates are seeking a political party's nomination to, for example, the United States House of Representatives. We hold that it does and that this Court is without jurisdiction to hear and determine the matters now sought to be raised by Rogers, nor could it grant the relief which he seeks.

In *United States* v. *Classic*, 313 U.S. 299, 61 S. Ct. 1031, 85 L. Ed. 1368, it was held that the authority given Congress by Article I, section 4 of the United States Constitution, set forth *supra*, includes the authority to regulate primary elections where under the law of the state they are an integral part of the procedure for the choice of representatives in Congress. This rule was reaffirmed in *Smith v. Allwright*, 321 U.S. 649, 64 S. Ct. 757, 88 L. Ed. 987.

The United States Supreme Court having ruled that the provisions of Article I, section 4 of the United States Constitution apply to primary elections for the United States Senate and House of Representatives, it logically follows as a corollary thereof that the provisions of section 5 should also apply to primary elections for those two national offices, and we hold that they do.

*State, ex rel. Wettengel v. Zimmerman*, 249 Wis. 237, 24 N.W. 2d 504 is in point. There an election contest was filed in the Wisconsin Supreme Court seeking to enjoin the issuance by the secretary of state of a certificate that the winner at a primary election was the nominee of the Republican Party for United States Senator. In dismissing the petition the Wisconsin Supreme Court held that a primary election being an integral part of the election process, Congress under the provisions of Article I, section 5 of the United States Constitution has the same jurisdiction of primaries for nomination for United States Senator as it has over general elections for United States Senator. In so holding that court held that such jurisdiction to pass on primary elections for United States Senator was exclusive in nature and that it, the Wisconsin Supreme Court, had no jurisdiction of such matters. We agree with the result and reasoning of *Wettengel*.

To like effect, see *Markwort v. McGee*, 36 Cal. 2d 592, 226 P. 2d 1 where the California Supreme Court relying on provisions in its state constitution similar to Article I, section 5 of the United States Constitution, held that state courts had no jurisdiction to decide state primary election contests, such jurisdiction having been vested, and exclusively so, by constitutional provision in the state assembly. See also *State v. Evans*, 79 N.M. 578, 446 P. 2d 445.

The present action was brought under the provisions of C.R.S. 1963, 49–17–15, which purport to vest this Court with jurisdiction to try election contests arising out of a primary election for nomination to the United States Senate and House of Representatives. For the reasons above stated, this statute, which was first enacted in 1910, as it applies to the parties here before this Court, is held to be in conflict with Article I, section 5 of the United States Constitution and in such situation the United States Consitution must prevail.

II

Independent of the jurisdictional question the petition must be dismissed for its failure to allege sufficient specific facts—as opposed to general conclusions—which would advise the contestee with reasonable certainty of the character of the charges to be met. The statute under which Rogers seeks to proceed requires that a contest be instituted by a petition "setting forth the grounds for the contest." In this regard the several statutes relating to election contests for office other than those of United States Senator and House of Representatives contain similar language. In prior cases we have held petitions containing a higher degree of specificity than does the instant one to be insufficient. See, for example, *Suttle v. Sullivan*, 131 Colo. 519, 283 P. 2d 636; *Cruse v. Richards*, 95 Colo. 485, 37 P. 2d 382; and *People v. Mitchell*, 88 Colo. 102, 292 P. 228. Our study of the petition filed in the instant proceeding leads us to conclude that it is lacking in specificity and fails to meet the "what, how and by whom test" referred to in *Mitchell*.

Accordingly, for these reasons the petition filed by Rogers must be and hereby is dismissed. The order of this Court heretofore entered on September 15, 1970 restraining Byron Anderson, Secretary of State, from issuing a certificate of election to Barnes is hereby vacated. Other matters, including Rogers' motion to strike Barnes' affirmation Defense and Petition, are now moot.

PROVISION OF THE ELECTION LAWS OF THE STATE OF COLORADO

49–17–15. *Contests arising out of primary elections.*—(1) All election contests arising out of any primary election, except contests for national or state offices, shall be summarily adjudicated by the district court sitting for the political subdivision within which any such contest may arise. The court first acquiring jurisdiction of any such contest shall have original jurisdiction subject only to the summary appellate jurisdiction of the supreme court by writ of error. In all cases involving contests for national or state offices, the supreme court shall take original

jurisdiction for the purpose of summarily adjudicating any such contest.

(2) Every such contest shall be instituted by petition to the proper court, setting forth the grounds of contest. The petition shall be verified and a copy thereof shall be served on the contestee within five days after the occurrence of the ground of contest, requiring the contestee to answer under oath within five days after service. If personal service of the petition cannot be procured in the state on the contestee, service may be made by leaving a copy of the petition with the clerk of the court having original jurisdiction of the controversy or contest. The clerk shall thereupon make diligent inquiry and endeavor to procure the contestee to make answer to the petition, and upon the expiration of the time for the answer the court having jurisdiction of the contest shall forthwith set the same for trial on the merits thereof, summarily adjudicating the same.

## THE FUEL SHORTAGE

(Mr. ADDABBO asked and was given permission to address the House for 1 minute, to revise and extend his remarks and to include extraneous matter.)

Mr. ADDABBO. Mr. Speaker, earlier today the New York City congressional delegation attended a breakfast hosted by the mayor of the city of New York, our former colleague, John Lindsay. Many problems affecting the city of New York were discussed including, cuts in poverty programs and other programs; adequate provision by the Federal Government for protection of visiting dignitaries to the 25th Anniversary of the United Nations, without overburdening the people of New York and its police force for supplying this protection; and also a problem which I believe directly affects and will affect the entire Nation: and that is the possibility of a fuel shortage and its resultant effect on heat and power. We here yesterday experienced what the city of New York has been experiencing in the field of power shortage. I believe the memorandum prepared by Mayor Lindsay, which follows, actually applies to all and I commend it to the attention of my colleagues and would request that the administration give full thought to its implementation:

MEMORANDUM

THE CITY OF NEW YORK,
*New York, September 23, 1970.*

Re: Fuel Shortage.
To: New York City Congressional Delegation.
From: John V. Lindsay, Mayor.

The City of New York, as evidenced only yesterday again, is constantly plagued by a growing shortage of adequate power. The clean fuel needed to create that additional power is also in dangerously short supply. This dilemma had to be faced directly in the City's decision to approve one-half of the Consolidated Edison Company's plan to expand its generating plant at Astoria.

We are dismayed by the fact that not only is there no coherent national fuel policy, but that no one agency is responsible for insuring that needs of America's consumers of oil, gas, coal and nuclear fuels are being met. Most importantly, in the context of the Astoria decision, we have been shocked to find that no agency is responsible at this time for developing a "Clean Fuel Policy" to insure that the nation's utilities and homeowners can meet increasingly rigid pollution-control standards. Thus, what could have been a far simpler decision with regard to Astoria became extraordinarily difficult. The complicating factor is the lack of fuels which would have allowed the Astoria expansion to proceed on a virtually pollution-free basis (in this case, natural gas) by 1974.

We have analyzed the City's need for clean energy and find that there is a surpassing need for low-polluting fuels. In analyzing this need, we also find that there is an inadequate supply of any kind of fuel—coal, oil or natural gas. In fact, we are advised by the Chairman of the State Public Service Commission that it is very likely that New York City, along with other cities in the United States, will be required to ration fuel oil and gas (and therefore electricity as well) due to the existing shortage. The consequences of such rationing should be fully understood: We are talking about heatless days in winter, reduced voltage or load shedding for portions of the City in summer, and reduced employment where such fuels are necessary to production of goods and services.

I believe it is essential that the congress inform itself as to the reasons for this state of affairs and that public hearings should be initiated immediately.

The City submits that these hearings will conclude that both the long-term and short-term deficiencies involved require remedies along the following lines:

1. A single national agency should be charged with the responsibility of formulating an energy policy for the United States. It is estimated that by 1980, ten years from now, total energy consumption will have increased by 60 percent. We must develop a coherent policy for insuring that we can meet this growing consumption, reduce it through pricing policies and other devices, where necessary, and develop and utilize the resources and techniques for producing this energy with the minimum possible amount of pollution.

2. Presently, our fuel policy is being increasingly dictated by a few companies and state agencies. The Congress should initiate an immediate inquiry into the formulation of energy priorities and why the anti-trust laws have failed to prevent the growing centralization in this field. We should also know why New York City's fuel supply should be at the mercy of out of state agencies.

3. One of the factors producing this disparate imbalance in our fuel policy is the complicated and elaborate quota system which limits the amount of oil and gas inputs and provides no incentive for the production of desulfurized fuels in the United States as a whole. While the quota system and other restrictions on oil inputs should be thoroughly re-thought, incentives for the production of clean fuel should be adopted immediately within the present system. The "bonus barrel" system applicable to low-sulfur imports in California should be expanded to include the entire eastern seaboard as well. This can be done by a simple change in an Executive Order of the President. The Department of the Interior, in turn, should be pressing for the development of known natural gas reserves, especially in the case of offshore areas where drilling sites are leased by the United States to private producers.

4. The Department of Health, Education and Welfare, through its national pollution-control agencies, should be given a major role in the development of the nation's energy policies now within the exclusive jurisdiction of the AEC, FPC, Department of the Interior and Office of Emergency Preparedness. This expanded role for HEW will require some legislation and close Congressional oversight.

While these are preliminary conclusions which require further discussion, the one premise which underlines all of them is that there is a need for national leadership in the area of energy production. Historically, when the Executive Branch has failed to provide that leadership, Congress has moved to fill the vacuum, and I am therefore strongly urging the New York City Congressional Delegation to urge their colleagues in the Congress to assume the urgently needed role of insuring both plentiful and pollution-free energy, not only to New York City, but to every part of the nation.

## U.N. FAILS AS PEACEKEEPING ORGANIZATION

(Mr. WILLIAMS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILLIAMS. Mr. Speaker, as a Member of Congress, I have consistently voted for every appropriation for this country's continued participation in the affairs of the United Nations in accordance with the terms and obligations of its membership.

I have recognized, of course, that the United Nations has, by no means, ever lived up to the claims of those who conceived it, founded it, and plunged the United States deep into its affairs.

I am as familiar as any one with the U.N.'s shortcomings and with the manner in which our enemies have frequently sought to undermine it, or dominate it, in order to further their own aspirations against us.

Yet, throughout all of this, I have clung to the belief that, however imperfect, such an organization as the U.N. was better than no such organization at all. I have done so in the belief that, for want of some better instrument, the U.N. may develop into a true peacekeeping organization.

I am, therefore, saddened to conclude that the U.N.'s silence in connection with the long-building Middle Eastern crisis strongly suggests that the U.N. will not be able to justify my hopes for it.

I am particularly perturbed that the U.N.'s Secretary General, Mr. U Thant, has frequently gone out of his way to have little, if anything, good to say about the United States while having a lot of very nice things to say about our Communist enemies.

I am certainly aware that the gentleman from Burma has had a lot of criticism of the U.S. effort in South Vietnam, but that he has failed to apply his yardstick of criticism to what Red China and the Soviet Union have been doing in the Middle East.

I note, further, that he has compounded this glaring inconsistency by failing to apply that yardstick to the Syrian move into Jordan in support of the international outlaw band of hijackers, marauders, and peace violators that are the Palestinian guerrilla forces.

I must, therefore, strongly suggest that, unless the U.N. now takes some firm and positive steps to restructure itself as a true peacekeeping organization, the United States should find no

further cause nor interest in continuing its support of that most impotent body.

Thank you.

## VIETNAM

(Mr. ERLENBORN asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ERLENBORN. Mr. Speaker, when President Nixon was a candidate for President in 1968, he pledged to end the war in Vietnam, a war that has now taken the lives of over 40,000 of our fellow American citizens. This war is a trying war that has badly split our country. But I submit, Mr. Speaker, that the President is keeping his pledge from the 1968 campaign; he is ending the war. And he is ending the war in such a way that will bring a real peace, not a false peace which will elude us.

Mr. Speaker, the President has talked a great deal about Vietnamization and the Nixon doctrine for Asia. In order to completely understand the President's Vietnam policy, it is necessary to first understand the basic concepts behind that policy. But, first, let us take a look at the record of American involvement in Vietnam.

Let us take a look at American casualty figures for last week. The Pentagon has reported that American battlefield deaths in Vietnam were the second lowest weekly toll in almost 4 years.

It has now been almost 5 months since American troops were sent into Cambodia to rout out the Communist sanctuaries in that country. What has been the result of that operation? It is probably too early to accurately appraise the effect that the operation will have on the outcome of the war, but it is not too early to take a look at the tactical "pluses and minuses" of that operation. Let us look at the record.

For the 2-month period preceding American intervention into Cambodia, the weekly average of Americans killed in Vietnam was 108. For the 2-month period after the Cambodia operation—up to August 25, 1970—the weekly average of Americans killed in Vietnam has dropped to 70. Not once since the end of the Cambodian operation had the weekly toll of American deaths in Vietnam exceeded 100.

Mr. Speaker, this is a decline of 35 percent in American deaths, and is, I think, a particularly relevant point to indicate the success of the Cambodian operation. But what is particularly significant about the pre-Cambodian figure is that this is a 60-percent reduction below 1969 figures for the same period. Again, Mr. Speaker, I submit that this is proof that the President is winding down American involvement in Vietnam.

Mr. Speaker, I ask unanimous consent to have inserted in the CONGRESSIONAL RECORD at this point a chart showing the decline in war activity in Vietnam since the end of the Cambodian operation. This chart, which was based on Vietnam field reports through August 25, 1970, is from the September 7, 1970 issue of U.S. News & World Report:

HOW WAR IN VIETNAM HAS DROPPED OFF

| | Pre-Cambodia weekly average March–April 1970 | Post-Cambodia weekly average July–August 1970 | Down (percent) |
|---|---|---|---|
| American troops killed in action | 108 | 70 | 35 |
| Enemy terror and sabotage attacks | 490 | 233 | 52 |
| Enemy ground ambush attacks | 40 | 6 | 85 |
| Enemy attacks on population centers | 7 | 4 | 43 |
| Enemy battalion-level attacks | 1 | 1 | (1) |
| U.S. aircraft lost | 40 | 17 | 58 |
| South Vietnamese troops killed in action | 300 | 267 | 11 |
| Communist troops killed in action | 2,561 | 1,558 | 39 |

[1] No change.

Source: Vietnam field reports through Aug. 25. (Reprinted from U.S. News & World Report, Sept. 7, 1970, p. 32.)

Let us look at the level of troop reductions. When President Nixon became President, there were 532,500 American troops in Vietnam. For almost 4 years, there had been a steady increase in the level of American troops in Vietnam. Not once during that period had there been any reduction in the level of American troops in Vietnam. That has all changed under President Nixon. Since the President took office, there has been a reduction of 133,000 American troops from Vietnam—from 532,500 in January 1969 to 399,500 in September 1970. This figure for September 1970 is the lowest level of American troops in Vietnam since January 14, 1967. In other words, Mr. Speaker, over one-fifth the number of troops that were in Vietnam when the President took over are now home. On April 20, 1970, the President announced the withdrawal of 150,000 American troops by the spring of 1971; 50,000 of those troops will have been completely withdrawn by October 15 of this year. Because of the success of the Cambodian operation, there will be no need to put an end to the Vietnamization process of withdrawal.

In an effort to achieve peace in Vietnam, President Nixon has continued the peace talks in Paris. On May 14, 1969, the President announced his proposals for a settlement of the Vietnam war, including the mutual withdrawal of all non-South Vietnamese forces from South Vietnam and internationally supervised free elections. As the President pointed out in a speech to the American people, we seek no bases in Vietnam, but only the right of the South Vietnamese people to determine their own future.

To secure more satisfying results at the peace talks, the United States has made three major steps toward peace. As the President stated in his foreign policy message on February 18, 1970:

> The United States has taken three major steps which we were told repeatedly would lead to serious negotiations. We stopped the bombing of North Vietnam; we began the withdrawal of U.S. forces from Vietnam; and we agreed to negotiate with the National Liberation Front as one of the parties to the negotiation. But none of these moves brought about the response or the reaction which their advocates had claimed.

Because of the Communist's unwillingness to negotiate an end to the war in Vietnam at the peace table, the President has taken other steps to end American involvement in the war and to prevent unwarranted American commitments to Asian countries in the future. However, the President has stated that the process of Vietnamization should not be looked upon as a substitute for negotiations, but rather as a spur to negotiations. The President has accurately detailed what he means by Vietnamization in these words:

> (Vietnamization) is a program to strengthen the ability of the South Vietnamese Government and people to defend themselves. It emphasizes progress in providing physical security for the Vietnamese people and in extending the authority of the South Vietnamese Government throughout the countryside.

Mr. Speaker, the President has reversed the trend of American military engagement from one of deeper involvement to one of less reliance on American troops to carry the burden of the fighting. Depending on three basic criteria, the President has noted, American troops will continue to be withdrawn from Vietnam. These criteria are: the level of enemy activity, progress in the negotiations, and the increasing ability of the South Vietnamese people to assume for themselves the task of their own defense.

The Vietnamization program has been able to proceed smoothly largely because of the last criterion: the South Vietnamese have been assuming a larger role in the defense of their country. As we all know, there has been very little progress at the Paris peace talks largely because of the Communist's unwillingness to go beyond their weekly propaganda format. The only reason for a decrease in enemy activity has been because of the success of the President's Cambodian decision.

Of course, the President will not forget the importance of ending this war through negotiation. As the President has said:

> We shall continue to try to make clear to that (the North Vietnamese) Government that its true long-range interest lie in the direction of negotiations. As we have often said, we shall be flexible and generous when serious negotiations start at last.

But the President's policy in Vietnam goes far beyond just ending this war, Mr. Speaker. To his great credit, the President has devised a plan that will keep the peace without a great expansion of American military power in the Pacific. I am, of course, referring to the Nixon doctrine. In his statement on foreign policy in February of this year, the President defined the Nixon doctrine in this way:

> Its central thesis is that the United States will participate in the defense and development of allies and friends, but that America cannot—and will not—conceive all the plans, design all the programs, execute all the decisions and undertake all the defense of the free nations of the world. We will help where

it makes a real difference and is considered in our interest.

Although the United States will no longer play the role of the world's policeman, this does not mean that we have abandoned our role in maintaining order in the world. The Nixon doctrine maintains that America will share in its responsibility, but that we shall not be responsible for bearing the burden all by ourselves.

The basic tenets of the Nixon doctrine as enunciated by the President in his speech on Vietnam on November 3, 1969, and his foreign policy message on February 18, 1970, are as follows:

First, the United States will continue to keep its treaty commitments;

Second, we shall continue to provide a shield if a nuclear power threatens an American ally, or of a nation whose survival we consider essential to our own security; and

Third, although we shall furnish military and economic assistance when requested and when appropriate, we shall nevertheless assume that the nation directly threatened will bear the major burden for its defense.

The President of the United States is keeping his pledge to end this war, and he is doing it most honorably. As American citizens—not just as Republicans or Democrats, but as Americans—we can all take pride in the fine job our President is doing to end this war, which he inherited from the previous Democratic administration. Just as I joined with the overwhelming majority of the Members of this body on December 2, 1969, by voting my support for the President's Vietnam policy, I reaffirm today my confidence in the President and his policy.

## PROPOSED AMENDMENT OF FEDERAL AVIATION ACT OF 1958

(Mr. MOSS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOSS. Mr. Speaker, the proposed bill to amend the Federal Aviation Act of 1958, as amended, which I have today introduced has four principal objectives:

First. It would replace the terms "supplemental air transportation" and "supplemental air carrier" with the terms "bulk air transportation" and "charter air carrier." This change in terminology is intended to make clear that the role of the charter air carriers—now known as supplemental air carriers—is to carry both passengers and cargo in bulk at rates which reflect the inherent economies of planeload transportation. The term "bulk air transportation" is taken from the President's recent statement of international air transportation policy, which states that "both scheduled carriers and supplemental carriers should be permitted a fair opportunity to compete in the bulk transportation market." The bill defines bulk air transportation as the transportation of 40 or more persons or 5 or more tons of cargo pursuant to a single contract. The purpose of this definition is to eliminate the so-called affinity concept and the discriminatory and restrictive charter regulations of the Civil Aeronautics Board which have impeded the fullest development of charter transportation. The Board would still be authorized to adopt implementing regulations to preserve the distinction between bulk and individually ticketed or individually waybilled transportation, but it would be under a congressional mandate to do so on a nondiscriminatory basis, free of the conceptual and regulatory morass created by its present rules. The Board's authority to regulate tour operators, freight forwarders, and other indirect air carriers would be unaffected.

Second. The bill would direct the Board, as a matter of clear congressional policy, to permit charter carriers a fair and equal opportunity to compete with U.S. and foreign scheduled carriers in providing bulk air transportation.

Third. The bill would seek to negate the unfair competitive advantage now held by scheduled carriers by reason of being able to price their promotional fares without consideration as to their adverse impact on the competition between air carriers; that is, a loss leader price.

Fourth. The bill would express the intent of the Congress that the public interest is served by international agreements which assure that charter carriers are able to secure regular and assured landing and uplift rights in foreign countries under conditions of full reciprocity. At the present time, such international agreements apply only to scheduled services.

I include the following section-by-section analysis:

SECTION-BY-SECTION ANALYSIS

*Paragraphs (1), (2), (3).* These paragraphs amend Section 101 of the Act by substituting definitions of "bulk air transportation": and "supplemental air carrier." "Bulk air transportation" means as to passengers "the transportation of 40 or more persons, or such lesser number as may be authorized by the Civil Aeronautics Board, (and their accompanying baggage) pursuant to a single contract" and as to property "the transportation of 5 or more tons of cargo pursuant to a single contract." "Charter air carrier" means an air carrier authorized to perform bulk air transportation pursuant to Section 401(d)(3) of the Act.

*Paragraph (4).* This paragraph adds two new subsections to Section 102 of the Act, which contains a declaration of policy and sets forth the elements of the public interest, convenience and necessity. The first addition would declare as policy the "encouragement and development of low cost bulk air transportation, and the opportunity for fair and equal competition between charter air carriers" and U.S. and foreign scheduled carriers. The other addition would support "[c]onclusion of international agreements designed to permit the freest possible competition under conditions of full reciprocity."

*Paragraph (5).* In accordance with the changed definitions in Section 101, Sections 401 and 417 would be amended by deleting the terms "supplemental air carrier" and "supplemental air transportation: wherever they appear and substituting therefor, respectively, the terms "charter air carrier" and "bulk air transportation."

*Paragraph (6).* This provision would add a new subparagraph to Section 401(d) to provide a procedure whereby existing "supplemental air carriers" would receive authorization to engage in "bulk air transportation." Under this provision, an air carrier which, within 120 days after the date of enactment of the bill, makes application showing that it holds a certificate of public convenience and necessity issued by the Civil Aeronautics Board to engage in supplemental air transportation and has performed "any portion of such service" would be issued a new certificate to engage in bulk air transportation "in the same manner authorized by" its prior certificate (i.e., in the same geographical markets, providing the same types of services).

*Paragraph (7).* This paragraph would repeal Section 401(n), which contains invidious provisions applicable only to supplemental air carriers. These provisions were adopted in 1962, at an early stage in the development of the supplemental industry, when it was feared that some of the carriers were only marginally fit. In view of the size, stability and excellent safety record of the present generation of charter carriers, there is no further need for Section 401(n).

*Paragraph (8).* This provision would add a new sentence to Section 402(e) of the Act, which empowers the Board to prescribe the terms, conditions, or limitations to be applied to foreign air carriers to prove, as a condition of providing bulk air transportation, that reciprocal rights are afforded U.S. flag air carriers in their home countries. Foreign air carriers would also be required to adhere to the Board's regulations governing bulk air transportation.

*Paragraphs (9), (10).* Paragraph (9) would add a second proviso to Section 1002(d), which provides for the regulation by the Board of rates, fares, or charges in interstate and overseas air transportation. The new proviso would preclude the use of below-cost "promotional" fares as an unfair competitive weapon against any air carrier by making unreasonable as a matter of law any rate, fare or charge "which is determined by the Board to be less than the fully allocated cost to the air carrier of providing such air transportation . . . if such rate, fare or charge adversely affects any air carrier." Paragraph (10) would amend Section 1002(e)(1) requiring the Board, in the exercise of its rate-making functions, to take into consideration "[t]he effect of such rates upon competition between air carriers."

Although neither of these provisions would apply directly to rates, fares or charges in foreign air transportation (which are not regulated by the Board), the Board would nonetheless apply these criteria in determining whether agreements between air carriers fixing international rates or fares meet the public interest standard of Section 412 of the Act (See Section 102).

## CLEAN WATER ACT

(Mr. ROGERS of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROGERS of Florida. Mr. Speaker, I am introducing, along with my colleague from Michigan (Mr. DINGELL), a bill which I think will be the most farreaching clean water bill ever presented to the Congress. It will call for a three-step timetable which will culminate in the 1976 deadline requiring tertiary treatment of all substances en-

tering waterways. The bill also establishes standards and sets aside certain areas where nothing can be disposed of. By January 1, 1972, it will require all sewage and industrial waste to have at least primary treatment. The next step would require that by January 1, 1974, primary and secondary treatment will be required, and by 1976 tertiary treatment or its equivalent would be necessary. In addition, the Secretary of the Interior, after conducting a survey during the coming year will mark certain areas which will be completely off limits. The Secretary will also be directed to consider the potential effect on wildlife and ecology of such things as sludge, landfill, heated effluent, and any other chemicals or solid wastes. One or more could be banned in certain areas, and entire areas could be closed off to dumping. The present approach, which really is just a license to pollute up to agreeable levels, would be done away with and we would really be in a position to clean up the waters of this Nation.

Mr. Speaker, in this past decade, more and more Americans have become aware and concerned over the increasing amount of pollution which has been dumped into the waters of our Nation.

In part, this awareness has come because of the efforts of men who have sought to prevent this ravage of our environment. But it has also come from personal experiences. People find they can no longer swim in lakes, they can no longer fish in rivers and streams and they can taste it in their drinking water as we add more and more chemicals in an attempt to cleanse what we have fouled.

A great portion of our environment—the water in our rivers, streams, lakes, and indeed our oceans—is being denied us because we have violated them. When we look for the culprit, we need not look far, for we are the violators.

Our cities have too long neglected the ultimate situation which results from the dumping of sewage into the convenient catchall of our water systems.

Industry has too long assumed that their business interests did not include the responsibility of keeping rivers clean for the general public and they have continued to use waterways in such a manner that one would think industry had a lifetime lease on any body of water that was convenient to carry waste away.

Ships at sea or in our waterways—and there are 8 million annually—have not felt constrained to consider the ramifications of dumping sewage overboard; rather, it would seem that once free of land, any ship is free of responsibility of keeping water clean.

The indictment of our society leaves very few Americans free of blame. From the farmer to the industrialists, from the housewife to the boater, we have all contributed to the perilous decline of the quality of the water of this Nation.

The sum total of our neglect is astounding and frightening. Eight million Americans drink water from the systems which do not meet Federal standards because of bacteria.

Diseases connected with bad drinking water have risen in almost every State.

The demand for water is increasing annually, but the amount of water available is decreasing.

Fish kills are common to the point that millions of fish float to shore each year.

Lakes and rivers are dying. Lake Erie is a prime example. It has aged 15,000 years since 1920. Yet while we know this is true, man is rushing headlong to convert the Atlantic and Pacific Oceans into the greatest cesspool in the world.

Nearly 6,000 communities with municipal water systems fail to meet existing public health standards although those standards are not stringent and for the most part are not enforced.

More than 1,300 communities discharge wastes without treatment into water.

I must admit that my State of Florida is not without guilt. The Department of Interior is just finishing a report which should be released in the near future detailing this Nation's participation in the growing problem of water pollution.

In Florida, when the 1968 questionnaire was sent out, there were 16 cities which dumped sewage into water systems with less than primary treatment.

And what is more astounding, 11 of those cities dumped raw, untreated sewage into such systems as the Atlantic Ocean, the Escambia River, the St. Johns River, the Caloosahatchee River, the Manatee River, Lake Worth, and the Barron River.

Nine of these cities are still dumping practically raw sewage into water systems although five of the cities have gone to and will soon install secondary treatment plants.

The State of Florida itself has issued 142 citations for various pollution violations to municipalities or industries in two-thirds of the State's counties. All but five were for water pollution.

Newsweek says that the Escambia River is one of the Nation's 10 filthiest rivers.

But it is obvious that this problem is not regional. It is one of the Nation's gravest problems.

Because of this, there has been dozens of bills introduced aimed at encouraging and prodding local and State governments, industry, agriculture, and vessels using water systems to halt pollution.

For the most part they are laudable pieces of legislation and the rhetoric proceeding them is stirring.

The fastest way to eliminate water pollution of all natures is to set a deadline after which the discharging of any waste which has been treated in less than a tertiary manner will not be permitted.

---

## NATIONAL DEVELOPMENT: AN URGENT NEED

The SPEAKER pro tempore (Mr. MOORHEAD). Under a previous order of the House, the gentleman from Arkansas (Mr. ALEXANDER) is recognized for 60 minutes.

Mr. ALEXANDER. Mr. Speaker, the results of the 1970 census are still incomplete and are considered preliminary, but they are complete enough to tell us that disturbing trends are continuing in our Nation. The Census Bureau says the shift of population from nonurban to urban sections is continuing and that the movement of population from the cities to the suburbs is accelerating.

Despite American preoccupation with size and quantity, there are frightening aspects to the census totals. As Rene Dubos said in his book "So Human an Animal":

> Most modern prophets in and out of the academies seem to be satisfied with describing a world in which everything will move faster, grow larger, be mechanized, bacteriologically sterile and emotionally safe.

We cannot continue to operate on the unofficial slogan that "anything that is bigger must be better."

The sad realization that we came to in the decade of the 1960's was that while huge cities might sprout impressive buildings and increase opportunities for some people, they also lead to unacceptable pollution, to unhealthy and dehumanizing overcrowding, to insufficient power sources, to the progressive erosion of public services, to disastrous traffic problems, and to social regimentation.

Residents of the inner cities were apparently learning these lessons during the past decade. Census Bureau Director Dr. George H. Brown has reported:

> The suburban rings have grown rapidly and substantially. The number of people living in the suburbs is now greater than the number of persons living in the central cities, and this in spite of the annexations that have been made in the last decade.

The overcrowding, the pollution, the threat of crime and the loss of identification in the inner cities apparently became unacceptably obvious to thousands of citizens, pushing them to the suburbs. We know, however, that this movement will not solve the problems of the cities, nor will it solve the problems of those persons who are abandoning the central cities.

These shifts in population will not lessen pollution. The criminal elements will continue to follow the population to the suburbs. In other words, long-range solutions are not provided for any of the urban problems by this exodus to the suburbs. The problems will only continue to mushroom.

We know, however, that the problems which we face in this Nation do not belong exclusively to the metropolitan centers—the cities and the suburbs.

In the nonurban sections of the Nation, we have continued to see massive outmigration to the metropolitan centers. The Census Bureau has reported that the farm population declined by approximately one-third during the past decade, dropping from about 15 million to about 10 million persons. More than three-fourths of the national growth occurred in the metropolitan areas, while about one-half of the Nation's counties lost population and another fourth of the counties showed a low rate of growth. Persons were leaving the nonurban sections of the Nation because there were insufficient job opportunities or because the jobs available could not compete with salaries and benefits provided in urban centers. Millions of people rejected nonurban living because of a failure to pro-

vide adequate educational opportunities, sufficient cultural attractions, or acceptable housing conditions.

Just as the rapid movement of persons from nonurban to urban sections of the Nation makes the solving of city problems almost impossible, that same movement destroys the nonurban tax base which could be used to improve living conditions and opportunities for the millions of nonurban residents.

It is my contention, Mr. Speaker, that these trends are not in our best interests and tend to move this Nation toward self-destruction. It is also my contention that this situation need not be accepted as a fact of life—one which cannot be halted or reversed. These trends can, they should, and they must be reversed.

Let me give you an example of what this problem is costing the American taxpayer in both funds and security:

In the District of Columbia with a population of approximately three-quarters-of-a-million people, more than $112 per resident is invested in providing police protection and one policeman is provided for each 120 residents. These averages do not even include Capitol or park police.

Yet, the resident of Washington is almost six times more likely to be the victim of a crime as a resident of Jonesboro, Ark., a town of 26,580. In Jonesboro, the investment in providing police protection is $9.36 per resident, and one policeman is provided for each 862 residents.

This is not an isolated example. Uniformly, the investment increases and the security provided residents decreases as a city continues to grow.

According to the 1969 report of the Federal Bureau of Investigation, almost 6.5 out of each 100 residents of cities of more than 250,000 persons were the victims of crime. This average dropped to: 5.1 in cities of 100,000 to 250,000; 4.0 in cities of 50,000 to 100,000; 3.4 in cities of 25,000 to 50,000; 2.8 in cities of 10,000 to 25,000; 2.3 in cities under 10,000; and 1.3 in rural areas.

I think it would be a fair assessment to say that this same situation applies to the provision of all other services—fire protection, garbage disposal, and other municipal services.

For a Nation that is interested and concerned with the plight of the consumer, what kind of madness provokes us to continue adding to this problem which seems almost devoid of effective solution?

It is a national shame to continue crowding more and more people into smaller and smaller areas, creating demoralizing conditions for adults and unhealthy conditions for children.

It is unforgivable for us to continue trying to provide more and better housing at higher and higher costs under ghetto conditions when there are wide-open spaces throughout this Nation hungering for development.

It is unconscionable when the enjoyment of a forest or a clean lake becomes a once-a-year opportunity for thousands of people, or when the sight and smell of clean air comes only at vacation time.

It is irresponsible when we continue to create urban conditions upon which crime breeds and thrives, and which is growing into a monster that threatens the democratic traditions which have allowed our growth and development.

Why have we allowed this situation to develop and these problems to grow? Who is to blame? How can the short-sighted policies, or the lack of policies, be reversed and solutions to these problems found?

The blame, I fear, lies with all of us—not because we deliberately tried to create these conditions—but because we failed to see the handwriting on the wall and failed to devote sufficient attention to the conditions being created. We are guilty—not of sins of commission, but of sins of omission.

In the Congress and at the national level, we have failed to take into consideration the demographic consequences of our programs and policies. To the extent that the continued location of Federal agencies, offices, and installations have continued to be centered in the crowded metropolitan centers, we have even been directly guilty of adding to our problems.

State and local governments have failed to provide the foresight, the planning, the opportunities, and the consideration orderly population growth requires.

The corporations of our Nation have been guilty of refusing to consider national implications in the location of their facilities, of considering only short-range cost factors rather than the long-range national interest and the health and well-being of their employees.

A national growth policy can and must be established. The consideration of demography can and must be included in the extension and establishment of Federal programs. Questions must be considered within a national context, rather than as a narrow urban versus nonurban conflict.

It is symptomatic to me of the way in which we have ignored these essential considerations that we have a Department of Housing and Urban Development which, by statute, loses all interest in the problems of a community below the 5,000-person dividing line. At the same time. we have a Department of Agriculture which gives little or no consideration to the problems of our cities in the overall formulation of its policies.

Can any systematic approach to these problems emerge when we have multiple agencies administering vital programs relating to housing, to economic development, to vocational and technical training, to the problems of pollution, to our national transportation network, and to health services?

Can an orderly population growth policy be either established or administered under a fractured system of divided authority?

Can the problems of the urban areas be solved by ignoring the opportunities or the problems of the nonurban areas? And, can the problems of the nonurban areas be met by refusing to acknowledge the existence of the problems which plague our urban centers?

The answer to all of these questions is an emphatic "No."

We are still one nation, and our problems can be viewed only as national problems which can be attacked efficiently and effectively only on a national scale. To adopt this approach is not to ignore sectional heritages or obvious loyalties. But, to adopt this approach is to acknowledge obvious realities. We are all bound together, and my problems are not being solved until the problems of my fellow citizens are also being solved.

The President has recognized the need for a long-range approach to this problem with the appointment last fall of a Task Force on Rural Development and of a Council for Rural Affairs. While I might argue that it is shortsighted to focus only on the nonurban sections of our Nation, these two organizations are giving their attention to the need for a concerted effort to achieve a reasonable, a rational, and a realistic solution to the problem of population growth.

It is my feeling, Mr. Speaker, that we in the Congress must also give special attention to this problem and to the implications of our actions, previous and proposed.

What we need in the House of Representatives is a select committee which would give its attention to this problem, and to this opportunity to move into a period of planned growth rather than haphazard expansion.

We cannot allow the 1980 census to tell another story of a decade of neglect of this crucial problem. We cannot allow the headlines in 1980 to read that we are still ignoring our demographic problems and wasting our potential.

The time for we in the Congress to consider this problem is now. This goal can be accomplished through the work of a Select Committee on National Development. This is my goal for the 92d Congress. I hope my colleagues will join me in that effort.

As the Washington Evening Star said in a September 15 editorial on this subject:

> Surely more effective remedies can arise from the trial-and-error ashes of the Sixties.

---

## ALASKAN NATIVE LAND RIGHTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. TUNNEY) is recognized for 15 minutes.

Mr. TUNNEY. Mr. Speaker, the Congress of the United States is currently faced with its final opportunity to deal honorably and justly with American Native peoples. The issue at hand involves settlement of the claims of some 60,000 Eskimos, Indians, and Aleuts to the lands of Alaska, claims which appear to be soundly based upon original and continuing use and occupancy of most of the Alaskan land mass. The obligation of Congress to provide a just settlement of these claims dates from 1867, when the United States purchased from Russia the right to tax and govern Alaska, and from the Organic Act of 1884, establishing a territorial Alaskan government, when Congress specifically recognized the Natives' right to the land. The 1884 act stated that—

The Indians . . . shall not be disturbed in the possession of any lands actually in their use or occupancy or now claimed by them.

But postponed for future legislation the matter of conveying title to the Natives. Congress has yet to act, and now the deadline for justice in Alaska is fast approaching. A complex of social, economic, and political forces threatens to overwhelm the Alaska Natives—to destroy their ancient cultures and to dispossess them of their ancestral lands, upon which they continue to depend for life-giving sustenance.

The issues involved in achieving a just settlement are extremely complex, and now is not the time for a full examination of them. At the heart of the entire matter, however, is the land, and its absolutely crucial importance to the Native cultures. To the Natives the land is life. Arctic Eskimos hunt whale, walrus, and seal in the coastal areas and caribou on the tundra. The Indians of the interior hunt moose, beaver, muskrat, rabbit, and black bear in the forests, and gather berries in the summer. Often, because of the delicate ecology of the area, a thousand acres are required to support one Native. Without secure title to an adequate land base, the Native cultures are doomed.

The Natives continue to use and occupy at least 60 to 80 million acres of the 375 million acres in the Alaskan land mass. These lands have never been taken from the Natives by war, or relinquished by them through sale, treaty or cession. Under the time-honored legal doctrine of original Indian title, these lands actually belong to the Natives. So it is not a question of giving them anything, but rather of equitably settling just claims in such a way as to preserve an adequate land base for the traditional Native cultures, while providing the opportunity for successful transition to our culture, where that option is elected by Native peoples.

Mr. Speaker, I wish to associate myself with a statement recently signed by Mr. Emil Notti, president of the Alaska Federation of Natives, and Mr. Earl Old Person, chairman of the Blackfoot Tribe of Indians and president of the National Congress of American Indians, and to join them in calling for a land settlement of 40 million acres for the Native peoples. I include their statement at this point in the RECORD:

JOINT STATEMENT OF TWO DISTINGUISHED NATIVE LEADERS ON ALASKA NATIVE LAND RIGHTS

"The United States must not repeat in Alaska today the injustices that overwhelmed American Indian tribes a century ago.

"The native people of Alaska—60,000 Indians, Eskimos, Aleuts—are fighting in Congress and the courts to save their lands from expropriation by the State of Alaska.

"They have not sold their land, lost it in war, nor ceded it by treaty. However, only Congress can grant them security of title.

"Time and time again the Native people of Alaska's 200 villages have asked for title to their lands, and they are told that they cannot expect justice from Congress—they must compromise. And so they have. They have reduced their claims for title first to 80 million acres and then to 40 million acres. And now they are asked to compromise even more.

"They are warned that they must accept a bad bargain or there will be no bargain at all. They are told that by asking for enough land to protect their livelihood, they risk losing it all. And their fears are reinforced by Interior Secretary Walter J. Hickel's stated intention to transfer their lands to the State of Alaska unless Congress acts by December 1970 to settle their claims.

"The Alaska Native Claims Settlement Act of 1970 (S. 1830) passed by the Senate on July 15 would extinguish Native claims to all of their lands in Alaska. In return, it provides the Natives with cash compensation and with title to only 10 million acres of land, less than 3% of the more than 350 million acres to which they have valid legal claims.

"The cash compensation offered in the Senate bill will result in a net economic loss to the Native people. The present value of the land for subsistence hunting and fishing and for trapping and gathering, as well as its long-range commercial value, greatly exceeds what the Senate proposes in its cash settlement.

"The cash settlement would be distributed in the form of social services and shares in a Native investment corporation. It is estimated that a Native shareholder will receive dividends on his stock of $53 in 1971, $152 in 1980 and $418 in 1990. By 1990, the Native population in Alaska will have doubled. Yet, none of the Natives born after the passage of the Senate bill will be entitled to shares in the investment corporation. Clearly, the proposed services and dividends will in no way constitute a livelihood for those Natives now living nor for those yet to be born.

"Although the Senate has provided for conditional hunting and fishing rights on the lands that will be taken from the Natives, the history of our nation's treatment of American Indians shows that these rights, without the security of title, quickly disappear.

"We reject the notion that the Alaska Natives cannot receive justice from Congress. We believe that this, the last opportunity to deal fairly with them is worth fighting for.

"A secure and adequate land base is essential to the dignity and survival of Alaska's 60,000 Indians, Eskimos, and Aleuts.

"We urge the U.S. House of Representatives to enact legislation that would confirm to the Native villages of Alaska title to a minimum of 40 million acres of their ancestral lands.

"The Alaska Natives depend upon the land and its inland and coastal waters for their livelihood, hunting and fishing for subsistence as they have from time immemorial. Moreover, the land offers them their best opportunity for sharing in the future economic growth and development of the State and Nation. Equally important, the land is the foundation of their rich and varied cultures and a cherished source of their spiritual life.

"To deny the Alaska Natives an adequate land base of at least 40 million acres will contribute to their dependency, to the disintegration of their communities, and to the erosion of their cultures. To strip the Alaska Natives of their land will destroy their traditional self-sufficiency, and it is certain to create among them bitterness toward other Alaskans and a deep distrust of our institutions and our laws.

"The Natives' request for title to a minimum of 40 million acres of their land is fair, reasonable, and humane. The U.S. House of Representatives has a historic opportunity to secure to the Native people of Alaska a just settlement that will honor the Nation and be a source of pride to future generations of Americans."

EARL OLD PERSON,
*President, National Congress of American Indians.*

EMIL NOTTI,
*President, Alaska Federation of Natives.*

## OEO CUTBACK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. HALPERN) is recognized for 5 minutes.

Mr. HALPERN. Mr. Speaker, the State of New York has been dealt a cruel blow by the Office of Economic Opportunity. We have been informed by OEO that our allotment for the current year will be some $3.6 million less than planned due to a national cutback in the very vital community action programs and Head-start operations.

I and my colleagues from New York State are doing everything possible to rectify this far-reaching decision to cut back these needed funds. We ask that our colleagues in other affected States join us in these efforts.

The results of the cutback will be devastating. I know of no more convincing argument for the restoration of these funds than the factual statement submitted by the New York State People's Mobilization To Preserve Community Action. I commend it to my colleagues and I fervently appeal for support of its aims:

NEW YORK STATE PEOPLE'S MOBILIZATION TO PRESERVE COMMUNITY ACTION—A HAND UP, NOT A HAND OUT

The anti-poverty movement has been alive and serving the many diverse needs of America's 24,300,000 poor persons, since 1964. We are a non-profit, federally funded body that has sought to give hope to the hopeless, find homes for the homeless, find jobs for the jobless and stamp out the ugliness of poverty wherever it exists. Since our inception, the Federal government has stifled our efforts time and time again by refusing us the needed monies to develop new anti-poverty programs and to reach our potential in the struggle against poverty.

The ideology behind the entire poverty program is to train and give jobs to the poor so that they will, in turn, be able to help others who are poor. This basic concept has been the lifeline of our movement. And, once again, it is feared that these people will be forced out of jobs and back into the squalor of poverty as a result of Federal cutbacks. The anticipated national cutback is $20,000,000. The New York region will experience a cutback of $3,600,000. These reductions in anti-poverty appropriations will cost hundreds of people to lose their jobs and it will, moreover, mean that thousands of people will be denied needed service throughout the State of New York.

Much of today's social unrest and turmoil is an outgrowth of despondency. The anti-poverty struggle is aimed at relieving much of this tension by developing constructive programs and avenues of approach for effecting social change. We have reached a critical era in the chronicles of our history and we are not faced with the final decision to move this nation towards either "chaos or community".

Senator Javits from New York—ranking Republican member of the Labor and Public Welfare Committee, has said—"If we are ever going to arrest the trend in this nation toward welfare dependency and to alleviate the despair of many of the poor, we must allocate a higher priority and more funds for these essential programs". It is for this reason that we are here today to protest the Federal government's action to cut back on anti-poverty funds. We entreat all persons whose interests lie in making this a better and more wholesome society for all, to aid us in our fight to eradicate poverty.

The cutbacks will mean:

People, poor people; anti-poverty workers, will have to be laid off.

Riots of frustration will boom in the streets from the young who are no longer patient.

Poor families being denied desperately needed service.

Laid off workers having to return to the welfare and/or unemployment rolls.

Pre-school children being denied a Headstart experience.

Mothers not being able to receive training or to work due to Headstart cuts and being forced to go back on welfare.

Elimination of local emergency food and medical service programs assisting the homebound and elderly poor throughout the State.

Increasing unemployment among the poor: no counsellors, no jobs.

Contributing to the rising inflation.

Neighborhood based services eliminated.

Silencing the only voice of the poor.

Health services for the poor curtailed due to funding cuts.

Specialized youth programming efforts curtailed.

Recreational and vocational education efforts minimized due to lack of funds.

Career development efforts curtailed due to lack of continuing resources.

Headstart expansion impossible.

Local consumer education program efforts minimized.

Adquate legal services to the poor will be affected.

Family counselling efforts affected.

Referral to job training and vocational rehabilitation centers will be further minimized due to lack of adequate staff.

## THE COTTON PROTECTION ACT OF 1970

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. FINDLEY), is recognized for 5 minutes.

Mr. FINDLEY. Mr. Speaker, by this means I appeal to House conferees on the Agricultural Act of 1970 to reject Senate provisions of the cotton program, provisions which will add at least $90 million a year to the tax burden of this outrageous program.

Do cotton interests, who already benefit by subsidies which equal the market value of the crop, deserve another $90 million a year? Or, more importantly, is this where another $90 million a year should be shifted as a matter of highest national priority? Is it more worthy than delayed programs for education, medical and other social services?

This latest outrage comes about by two principal provisions added by the Senate: First the increase in base acreage from 11.5 million acres as provided by the House to 14.5 million acres. The administration estimates this will add about $150 million over the 3-year duration of the bill, or $50 million a year.

The other provision is a change in the maturity date for storage of cotton. Cotton interests have long had a special advantage over wheat, soybeans and feed grains, because the Government has paid cotton producers for storage of cotton under loan—not the other way around, as with feed grains, wheat, and soybeans.

The advantage of storage is about 6 percent a year, or $6 for a bale worth $100. An additional advantage to the owner of stored cotton comes in the form of interest rate subsidy. He borrows money at 3½ percent, less than half the cost of money ordinarily. The subsidy again is provided by the taxpayer.

This gives a strong incentive to the owners of cotton not to sell cotton, but instead to keep it in storage as long as possible. The Senate provisions permit an outrageous extension of the loan privilege, and I have learned from responsible sources that this extension—combining the advantage of storage income with the interest rate subsidy—will add about $40 million a year to the cost of the cotton program.

In the past 3 years the cotton industry has officially requested the U.S. Department of Agriculture to extend the cotton loan maturity date for periods ranging from 3 to 12 months. In 1968 Secretary Freeman refused to approve of such action and when the Nixon administration came to office in January 1969, one of Secretary Hardin's first encounters was with the same special interest of the cotton industry. Secretary Hardin appointed cotton experts to consider the maturity date and in February 1970 the Department wisely denied the request. I am including the USDA study in the RECORD.

The Senate committee now seeks what both Secretaries rejected—the privilege of keeping cotton under loan 1 year from the first day of the month in which the loan is made.

Mr. Speaker, such a provision increases the cost of the cotton program, gives producers and warehouses an undeserved break, and widens substantially the discrimination between cotton on one hand, and feed grains, wheat, and soybeans on the other.

The loan maturity date extension could artificially raise the price of cotton by almost $20 a bale above its present price of $100 per bale and provide scandalous windfall profits to large cotton producers and warehouse operators at substantial increased cost to the taxpayer.

Under wheat, feed grains, and soybean programs a farmer must pay warehouse storage charges during any period the crop is under loan. However, under cotton it is the other way around. The Government pays storage charges. This practice is scandalous when one considers the huge subsidies cotton otherwise receives.

The administration vigorously opposes this provision and I attach here for the record the USDA position as well as newspaper editorials and columns criticizing this measure. One news report even quotes the chairman of the House Agriculture Committee as calling this measure a gimmick.

A gimmick it is, and one which will cost most farmers and all other taxpayers dearly.

I hope House conferees will demand that these two provisions be dropped. If not, I will certainly urge opposition to the conference report, and if it is approved will urge President Nixon to veto the bill.

The documents referred to follow:

### 1970 USDA STUDY OF EXTENDED LOAN MATURITY DATES

(Appraisal of various extended cotton loan maturity dates in relation to the announced 1969 cotton loan program currently in operation)

The Department was requested on September 19, 1969, by a group of National Cotton Council representatives to make a study to determine the possible effects of extended or variable loan maturity dates for 1969-crop cotton in relation to the current program under which loans mature on July 31.

Five possible maturity date schedules were proposed for study in conjunction with several assumptions to serve as controls in the study. These maturity dates and assumptions are listed in the attached Exhibit A followed by six objectives of the study. It was also assumed (1) that 1969 and 1970 production would be about the same as total offtake, (2) that the carryover at the end of each crop year would be the same as it was on August 1, 1969, and (3) that the 1970 loan rate would not change from 1969.

A Department committee composed of cotton statisticians, merchandising specialists, and economists, representing the Consumer and Marketing Service, Economic Research Service, Statistical Research Service, and the ASCS have carefully examined the matter with due consideration to the various factors involved. On the basis of the study, we have these observations:

1. There would be little difference in the final total redemptions under any maturity date that was extended to October 31, 1970, or later. However, the redemptions through July 31, 1970, would be about 800,000 bales smaller under any of the extended maturity dates than under the current program. In other words, with extended dates, cotton would remain under loan for a longer period, and no appreciable increase in total redemptions would occur.

It appears that practically all of the cotton to be redeemed under any maturity schedule will be redeemed before cotton of the following crop becomes freely available. If the maturity date is not extended, cotton needed for the early months of the next marketing year will be redeemed during the period April through July. But an extension of the maturity date will cause a substantial volume of redemptions to be delayed until the August-October period in order to take advantage of CCC's low interest rate as long as possible.

Even though slightly more 1969-crop loan cotton may finally be redeemed under an extended maturity date, more cotton from the following crop will go under loan or less would be sold by CCC because the "free stocks" carried by the Trade will be less if the maturity date is later.

In most instances where loans were extended in the past, the loan rate for the following year was higher. Even then, the redemptions after August 1 were very small. If the loan rate in the future remains the same or goes down and supplies are adequate, it would be highly impracticable to redeem any old-crop loan cotton after the new crop is freely available. (The last crop for which loans were extended was the 1955 crop.)

2. Under the maturity schedules which end in October, November, or December, only a small portion of the acquisitions by CCC would be prior to the last month of the maturity schedule. Under the 14-month plan, the acquisition of 1969-crop cotton would not reach its peak until February and March of 1971.

3. CCC sales in the early season months (September, October, and November) will taper off considerably after the catalog stocks have been picked over and the qualities of cotton which are not freely available from

the new crop or which are in very strong demand have been sold. This selection process will follow the pattern of cataloging the 1968 crop. Most of the sales to date have been the lower grades and shorter staple lengths which are in strong demand. Sales prices have averaged over 23 cents, basis Middling 1-inch cotton, with Mike reading of 3.5 to 4.9.

From July to October, the CCC sales price comes down 135 points as carrying charges are reduced. During this same period, interest and storage on old-crop cotton would go up about 50 points. Thus, by October, loan cotton would lose almost 2 cents per pound of the incentive there was to redeem the cotton in July. This is one of the reasons that, in past years when the loans were extended, there were comparatively few redemptions after October unless the loan rate in effect for the current crop was higher than for the preceding crop or a scarcity of cotton developed.

4. Under any of the extended maturity dates, it is expected that the total supply of "free stocks" (does not include CCC stocks of owned and loan cotton) available to the market at the end of each month will gradually decrease from March through July as redemptions fall. It is estimated that free stocks at the end of July would be about 800,000 bales less than under a July 31 maturity. From August through October, free stocks would build back up to a fairly normal level and then the following March would again begin falling below the level at which they would be under the current program.

5. The change in CCC stocks of owned and loan cotton and its investment in such stocks would be exactly the reverse of "free stocks." Under an extended maturity date, CCC stocks would increase more from March to July than they would under the current program, and on July 31 CCC's stocks would be about 800,000 bales larger with about $80 million more invested. But during the next few months, additional redemptions would reduce the stocks and investments to a level only slightly higher than under the current program.

6. Indications are that any of the extended maturity date schedules would tend to cause some increase in prices. But, under the assumption that CCC would have two million bales of catalog cotton available for sale on July 31, 1970, it is not expected that prices would increase sharply. If CCC's catalog stocks are reduced to a much lower level, a fairly large quantity of 1969-crop loan cotton carried over into the 1970 marketing year with accrued interest and charges would tend to raise the price of 1970-crop cotton to a higher level.

If the loan rate for the following year were increased, or the total supply of cotton were to drop substantially, or CCC's stocks were to be exhausted, a loan extension could have considerably more effect on market prices.

The estimates of the committee were based on past records of the monthly rate of such items as ginnings, offtake, loans made and redeemed, and on the best judgment of the committee. The assumptions used in making the estimates were that (1) 1969 and 1970 production would be about the same as total offtake, (2) the carryover at the end of each crop year would be the same as on August 1, 1969, (3) the 1970 loan rate would not change from 1969, (4) there would be no change in CCC's sales policy, (5) CCC would sell 800,000 bales and its stocks of old-crop cataloged cotton as of August 1, 1970, would be two million bales, and (6) that the volume of 1969-crop cotton that will go under loan during the season will be the same regardless of the maturity date provision.

The estimates reflect these assumptions, but it must be understood that developments during the season, such as weather conditions, size of the crop, quality of cotton produced, foreign production, program changes, and legislative proposals, can affect substantially the volume of loan entries, redemptions, CCC sales, offtake, prices, and the various other factors considered.

---

EXHIBIT A

ASSUMPTIONS AND OUTLINE FOR STUDY

*Study of Possible Effects of Delayed or Variable Loan Maturity Dates for 1969-crop Cotton.*

Analyze five possible maturity date schedules.

1. Continue July 31 maturity date for all cotton.

2. Loans maturing in 10 months but not before July 31 or later than October 31.

3. Loans maturing in 11 months but not before July 31 or later than November 30.

4. Loans maturing in 12 months but not before July 31 or later than December 31.

5. Fourteenth-month so-called anniversary date loans.

Assume no change in announced sales policy.

Assume CCC stocks of old-crop cataloged cotton as of August 1, 1970, will be two million bales. Estimate quantity of 1969-crop cotton (bales and dollars) that will go under loan during season and assume that those quantities will be the same regardless of maturity date provision.

Then: Estimate for each of the five maturity date possibilities:

1. Redemptions each month.

2. CCC takeover under each maturity schedule.

3. CCC sales each month.

4. Total supplies available to the market each month.

5. CCC investment in owned and loan stocks at the end of each month.

6. An indication of probable market-price trends.

---

U.S. DEPARTMENT OF AGRICULTURE'S POSITION ON UPLAND COTTON, SEPTEMBER 21, 1970

1. Item—Cotton loan maturity.

2. Preference—House bill does not establish a loan maturity date. We recommend deleting the words "nonrecourse loans for a term of 1 year from the first day of the month in which the loan is made" from the Senate amendment beginning on page 56, lines 7 and 8.

3. Explanation—The Department recognizes that the present system under which all loans mature on July 31 (the end of the marketing year) creates some problems in marketing the new crop. In developing program provisions under the new legislation, procedures will be devised that will provide variable maturity dates in order to minimize the effect on marketing of the new crop.

4. Reason—Retention of the Senate amendment provision would present many administrative problems for the Department.

---

[From the Journal of Commerce, Sept. 3, 1970]

THE FAILURE OF A COMMITTEE

The version of the farm bill approved last Friday by the Senate Agriculture Committee must be read right through to be believed. Perhaps because it adopts verbatim the $55,000 annual payment limitation voted by the House, Chairman Ellender didn't think anyone would bother to read it through. In that case it would not be discovered until too late how outrageously loaded it is in favor of cotton and against the taxpayer.

It might not be discovered, either, that what the committee proposed taking away from some cotton farmers by means of the annual payment limitation it also proposed giving back to them more or less surreptitiously via a series of changes in the Commodity Credit Corp.'s crop loan program. Just how much extra these changes would cost the taxpayer is problematical. The secretary of agriculture estimates $150 million. Some private estimates run higher.

On Monday Secretary Hardin wrote Senator Ellender that it was imperative to avoid loan levels that would entice farmers to produce for CCC instead of the market; that CCC loans should not be used as a device to hold cotton prices permanently well above the market and that U.S. cotton farmers generally should compete effectively in world markets. The committee's bill fails on all three of these counts.

* * * * *

It is, in fact, an open invitation to cotton farmers to forget competition, forget the market and produce primarily for CCC, which would be saddled with the responsibility for selling as best it could all the noncompetitive cotton it would be forced to accumulate under the nonrecourse loan program.

The committee bill also deals with the wheat program and feed grains, in which it departs somewhat from the House version and would extend the dairy, wool and Public Law 480 programs pretty much as they stand. Cotton is another matter.

In the case of this commodity the agriculture secretary would retain some discretionary powers in fixing the loan rate, allowing production increases and in other matters. Until it is known just how he is going to use this authority over the next three years, it is impossible to estimate just how much it all would cost. But within the trade itself there isn't much doubt of the bill's objectives. It is to force cotton prices up at the very time it is under heavy pressure from other fabrics.

* * * * *

One particular feature of this measure strikes us almost as ingenious. As matters stand now, the secretary can be expected to call in all CCC cotton loans on July 31, the end of the marketing year. Nothing in the House bill would change this. But something in the Senate bill would.

This is a stipulation that the secretary make nonrecourse loans to those covered by the program for a term of one year from the day of the month in which the loan is made. In other words, as interpreted by cotton experts, a farmer could harvest his crop in September, 1971, put the cotton in a warehouse in May or June of the following year and then leave it there until May or June of 1973 before CCC could acquire title to the cotton. And that isn't all. When CCC finally did take title it would owe the producer about 20 months storage and interest costs.

These costs are estimated at $20 to $25 per bale. But that isn't all either. Under this provision large numbers of cotton producers could elect to withhold their output from the market for the purpose of running up prices. If the stratagem worked, they could pay off their loans and reap whatever profit was available. If it failed they wouldn't even lose their storage and insurance costs. These would be met by the taxpayer.

* * * * *

Fortunately the issue is not yet settled. When a measure as important as the farm bill is as thoroughly bad as that approved by the Senate Agriculture Commission, there is always a fair chance that it will run into difficulty on the floor of the Senate itself. If this doesn't happen, it may be changed for the better in the Senate-House conference. And when two versions of the same bill differ as markedly as the cotton sections of the House and Senate committee bills, there is always a possibility of a further floor battle over the conference report.

Finally, if the final bill is as wretched a piece of legislation as that approved by Senator Ellender's committee, there is always the chance of a presidential veto. But we would consider it sad if this should become neces-

sary, for that would mean a reversion to the pre-1965 program, also cotton-oriented. If it does, the administration must bear a fair amount of the blame. For the better part of two years it has seemed content to let congressional farm leaders "follow their own heads" in working out a comprehensive program, even though it did supply some guidelines.

Only within the past few months have President Nixon and Secretary Hardin shown much disposition to carry their battle for the relatively worthy features of the guidelines to Capitol Hill. Once in the fray, they have proved resolute and resourceful but whether they got into it too late remains to be seen. We hope not.

[From the Memphis Commercial Appeal, Sept. 20, 1970]

COTTON COMMENT: ARTIFICIAL MEANS OF KEEPING PRICE OF AMERICAN COTTON OVER WORLD PRICE CALLED FATAL

(By Gerald L. Dearing)

Lifting United States cotton prices above world prices means the end of the American cotton industry, Representative W. R. Poage (D-Texas), chairman of the House Agriculture Committee, told cotton men last week as they gathered in tribute to W. Rhea Blake, retired executive vice president of the National Cotton Council.

Reviewing the rise of synthetic fibers he commented that even the strength of the Council, organized in 1938, and the brilliant leaders it had had could not "stay the glacier-like movement of world economics."

"The United States is no longer the supplier of cotton for the world. In fact, we only supply what may from time to time be needed after all other countries have disposed of their crops. Cotton is no longer the dominant fiber. We produce more synthetic fibers than we do cotton. Last year cotton filled only 40 per cent of the domestic fiber market. While wool, silk and flax supplied only 3½ per cent, with man-made synthetics filling the remaining 56½ per cent.

"It has taken us a long time but I believe that most everybody except some of the farm organizations and a few congressmen have at last realized that we can't give any permanent relief to the cotton industry by pricing it out of the market. I remember when I was bittery criticized for urging that we let the domestic price of cotton drop to whatever it would bring on the world market, and that the government should then pay the difference to the farmer between the cost of production and a fair price. Even today there are very few farmers who are willing to turn loose of the loan and produce simply for the market. Even with government assurance of income supporting payments, and the Agriculture Committee of the House would not vote to treat cotton as we treat wool, and the Senate would not even consider the idea.

"Certainly the National Cotton Council was one of the first organizations to recognize the fallacy of a high loan on cotton. That are still some Senators and Congressmen who do not seem to understand that while a high loan could give us one year of high prices for cotton, it could, and probably would, at the same time destroy our last cotton markets. The House of Representatives has, I believe, at last recognized, as has the Secretary of Agriculture, that we must keep the loan below the world price—and that would doubtless be all right if in fact it stayed below the world price, but there are always those who want to put on so many gadgets that the effective loan price gets above the world price."

That last remark was identified as a blow at the anniversary loan, which would prevent the calling for loans for a year, and the proposal to charge full carrying charges on CCC sales.

"I believe that most of our House Conferees recognize the importance of keeping cotton competitive. I am hopeful that we will be able to do that," he assured the cotton men.

There is no formula under which the farmer can expect to have the government support prices on unlimited acreage, he continued.

He pointed out that he had suggested a continuation of the Act of 1965, but the administration had turned him down. He differs with the administration on the set aside proposals, charging them as being inexact, expensive and not nearly as effective as they should be. He accepted the idea, he said, because he was convinced it was the only way to get a farm program. Without a farm program, he added, the high loans of cotton would return conditions "which would just about finish the use of American cotton."

He endorsed the research and promotion feature of the Senate bill, and added that the $55,000 limitations on payments were the best that could have been obtained from Congress. He admitted that a roll call vote later on could destroy the hope of payments that high.

The House and Senate begin a conference on the program tomorrow in an effort to find a solution. The bills agree only on the matter of $55,000 limitations.

---

[From the Memphis Commercial Appeal, Sept. 13, 1970]

COTTON COMMENT: ADMINISTRATION CITES POINTS OF SENATE FARM BILL IT CANNOT SUPPORT—CHANGES ARE SUGGESTED

(By Gerald L. Dearing)

The administration has turned down the Senate Agriculture Committee's proposals for cotton and has indicated that the bill must be brought in line with the House version before the administration can give approval to it. The suggested changes were contained in a letter from Secretary Clifford Hardin to Senator Allen J. Ellender (D-La.), committee chairman.

The secretary told the senator that marketing quotas must go; that the allotments be 11.5 million acres, not the 14.5 million proposed by the Senate committee. He insisted that there be set aside of land equal to 33⅓ per cent of the cotton allotment. The Senate committee had proposed a diversion of 12.5 per cent of the 14.5 allotment. The secretary would not divert from the allotted acres, but simply would idle land beyond the allotment.

The administration wants the loan to be as it is today—callable at the close of business on July 31 each year. It wants no part of the "anniversary" loan under which the cotton would stay in the loan for a year, then taken by the CCC and sold at 110 per cent of the loan plus actual carrying charges. The administration wants to sell the cotton at 110 per cent of the loan, but it wants to maintain reasonable carrying charges, as is practiced in the sales today. The charges are added at the rate of 15 points a month beginning in November, with the high being reached in July. The charges are lowered 45 points in August, September and October, with no charges in October.

The goal of the anniversary loan advocates is to keep the cotton off the market, force the price of the current crop higher and higher, thus undoing the efforts of the government, which is paying a huge subsidy to make cotton competitive in domestic and world markets.

A farmer could harvest his crop in September—in some years—and put it in storage. In May or June of the following year, he could enter the cotton in the loan, the Journal of Commerce points out. It would be a full year from then before he would have to take the cotton out or let it stay with the CCC. By that time there would be 20 months of charges accumulated. The cost would be $20 to $25 a bale, which the buyer would have to pay above the 110 per cent of the loan if he were to buy from the CCC. Presumably farmers would gear their current crop asking price to the CCC sale price and any competitive edge given cotton through government subsidies would be canceled through the forcefully inflated prices.

The administration also insists that the payment of the subsidy be the difference between the predetermined support level (35 cents) and the average market price for the first five months of the season, but not less than 15 cents. The Senate committee proposed to make the payments the difference between the supports and the loan. This was a device to add about 3 cents a pound to the payments. Between the anniversary loan and payments to the loan, the farmer could, the sponsors believed, milk a rich harvest of dollars from the government.

Their scheme would work if there was an overwhelming demand for cotton, or supplies were short either through a crop failure or a holding movement the first year. But after the first year, demand would be so low that they would have no market other than the loan.

There has been a growing sentiment: Cotton is going out, why not get as much as we can before it goes?

They forget that the $55,000 limitations have not been voted, and that greed causes countersteps. The Senate has voted a $20,000 limitation as an amendment to the Agriculture Appropriations Bill. The $55,000 is for each crop. The $20,000 is for all crops. There is no assurance that the Senate will adopt the $55,000 limit. There is a possibility that the decision is near. There will be a pause in the debate on the electoral reform amendment which will allow the bringing up of the farm bill late tomorrow.

[From the Lubbock (Tex.) Avalanche-Journal, Sept. 20, 1970]

COTTON SHIPPERS TO SEEK CHANGES

(By Duane Howell)

Revisions in carrying charges on Commodity Credit Corp. stocks, removal of the anniversary loan concept, and suspension of marketing quotas will be primary changes the American Cotton Shippers Association will seek in the cotton section of the Senate farm bill.

R. S. Tapp of Lubbock, chairman of the ACSA's National Affairs Committee, will be in Washington this week to keep abreast of negotiations in the joint Senate-House conference committee. The panel is expected to meet Monday to begin reconciling differences in the House and Senate bills.

"We believe the CCC carrying charges and the anniversary loan proposed in the Senate bill could drive our prices out of line in competition with man-made fibers at home and abroad and with foreign growths in export markets," Tapp said.

"The price increase would be only temporary, however. The demand situation soon would reflect the loss in markets for our cotton and prices would adjust accordingly. The end result would be detrimental to the entire industry and to everyone who has a stake in the welfare of cotton."

Under the House bill, CCC cotton would be sold for unrestricted use at not less than 110 percent of the loan rate plus "reasonable" carrying charges.

Under the Senate bill, the minimum price for CCC cotton would be 110 per cent of the loan level plus carrying charges based on commercial rates for storage, warehousing services, and other handling costs, with insurance and interest at rates charged on price support loans.

This could make the resale of CCC cotton substantially higher and, therefore, less com-

petitive, Tapp said. At the same time, he stressed, it is important not to allow the CCC sales to disrupt the movement of "free" supplies through normal trade channels.

Tapp said carrying charges should remain as they are now. He said government stocks under current sales programs have adequately insulated CCC cotton from new-crop supplies in the marketplace.

Under present sales programs, the CCC takes title to unredeemed loan cotton at the end of each marketing year and sells it for 110 per cent of the loan plus carrying charges which accumulate at 15 points per month from November through the following July.

Cotton's marketing year begins on Aug. 1. Carrying charges on CCC cotton are 90 points in August and 45 points in September. No charges are assessed in October. The CCC resale level, some observers say, often affects the market more than the loan level.

Under the anniversary loan setup, a farmer would have about a year from the time the loan was made to reclaim his cotton. Under the House bill, the secretary of agriculture could be expected to call all loans on July 31, as he does now.

Tapp contends the anniversary loan could be used to hold cotton off the market for protracted periods in an attempt to force inflated prices, thus nullifying the use of a government subsidy to make the crop competitive.

"It would be flat economic suicide to allow cotton to be held off the market for 20 months," he asserted, "and this could happen with an anniversary loan program."

Tapp, who returned recently from a business trip to Europe, said there are prospects for a stronger export demand for American cotton this season.

"But if our prices go any higher, the market will go to foreign growths or synthetics," he added. "Cotton is fighting for its life as a major industry, and temporary price advances to artificially high levels during these critical times could do irreparable harm."

Under the Senate bill, a farmer could harvest cotton in the fall of 1971, put it in the loan program in May or June of 1972, and leave it there until the summer of 1973. The cotton then would have 20 months of storage and interest back of it. The cost, Tapp added, would be $20 to $25 per bale.

Marketing quotas would mean all farmers, including those affected by payment limitations, could not plant in excess of their allotted acres without being subjected to stiff penalties, Tapp pointed out.

Payment limitations, once the principle is established in basic farm law, could be reduced at any time. The ceiling, set at $55,000 per crop per person in both the Senate and House bills, could be lowered drastically through riders on appropriations bills, which have to be approved by Congress every year.

Marketing quota legislation, however, would not be considered by Congress until it again took up the basic farm law.

## COST-OF-LIVING INCREASES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. ALBERT) is recognized for 10 minutes.

Mr. ALBERT. Mr. Speaker, I note that a news release from the Bureau of Labor Statistics states that the cost of living of Americans rose less in August than in any month since December 1968.

Any indication that the spiraling cost of living is not rising so rapidly as it has for 18 months of this administration is welcome. However, the terrible burdensome living cost increases which have accelerated the fastest in over 20 years are still much too high.

We should take whatever comfort is available in an environment of inflation, but certainly there is little comfort in an increase of 5.7 percent in living costs since the same month a year ago, or almost 10-percent increase since this administration came into office.

The housewife finds that prices in the grocery stores are still high, that the cost of home services is still going up, that medical costs are rising, that home payments and rent are still advancing, that utilities costs are still increasing.

Let the administration spokesmen take their comfort in statistics; the consumer has found little relief. A stagnant economy, with industrial production flattened now for several months, with unemployment the highest in 6 years, and with interest rates still excessively high for the average borrower, offers little comfort for the millions of Americans who find it increasingly hard to make ends meet.

## AN APPEAL TO REASON

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. HAMILTON), is recognized for 10 minutes.

Mr. HAMILTON. Mr. Speaker, I have joined with 140 Democratic colleagues in condemning efforts to disrupt the campaign speeches of President Nixon and Vice President AGNEW.

We have issued a joint statement calling on all citizens "to accord the President and Vice President and all other public officials and candidates an orderly forum for the presentation of their views."

President Nixon and Vice President AGNEW last week were subjected to the same kind of abuse which dogged the then Vice President Hubert Humphrey during the 1968 presidential campaign.

The text of the Democratic "appeal to reason" is as follows:

APPEAL TO REASON

Efforts to disrupt speeches by President Nixon and Vice President Agnew last week are abhorrent to anyone who believes in free speech. Our democracy cannot function in an atmosphere which makes impossible the exercise of this most basic liberty.

As Members of Congress, we have spoken out vigorously in the past to defend the expression of unpopular views. We speak out with equal force today against attempts to disrupt presentations by the President and Vice President. We are confident that if all sides of a question can be heard the American people will decide wisely.

The right to hear and be heard is the right of every citizen of a free society, whether he be President or ordinary citizen. Without a free exchange of ideas there can be no free society. In such exchange lies the ultimate worth of our democratic system.

We therefore call on all citizens to join us to accord the President and Vice President and all other public officials and candidates an orderly forum for the presentation of their views.

A list of the signers follows:

DEMOCRATIC CONGRESSMEN SIGNING THE "APPEAL TO REASON" SEPTEMBER 23, 1970

Carl Albert, Brock Adams, Joseph P. Addabbo, Bill Alexander, Glenn M. Anderson, Thomas L. Ashley, William A. Barrett, Charles E. Bennett, Tom Bevill, Jonathan Bingham.

Ray Blanton, John Blatnik, Hale Boggs, Edward Boland, Richard Bolling, John Brademas, Frank J. Brasco, George E. Brown, Jr., Bill Burlison, Phillip Burton.

Hugh Carey, Bob Casey, Emanuel Celler, Bill Chappell, Jr., Jeffery Cohelan, John Conyers, Jr., James C. Corman, John C. Culver, Emilio Q. Daddario, John W. Davis.

Charles Diggs, John Dingell, Harold Donohue, Wm. Jennings Bryan Dorn, Thaddeus Dulski, Bob Eckhardt, Ed Edmondson, Don Edwards, Edwin W. Edwards, Frank Evans.

Leonard Farbstein, Dante Fascell, William D. Ford, Don Fraser, Samuel Friedel, Richard Fulton, Don Fuqua, Joseph Gaydos, Sam Gibbons, Henry Gonzalez.

## SPEECH ON STUDENT-UNREST TERMINATIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Oregon (Mrs. GREEN), is recognized for 15 minutes.

Mrs. GREEN of Oregon. Mr. Speaker, the Office of Education at the close of the school year compiles a report on college and university action taken in compliance with legislation passed by Congress to cut off Federal funds from students or faculty members who participated in a riot or major campus disruptive activities. It appears too many institutions of higher education have not taken the law seriously. Both the 1969 and 1970 acts appropriating money for HEW contained provisions prohibiting the use of

the money, in the words of the 1970 act, for "a loan, guarantee of a loan, a grant, the salary of or any remuneration whatever to any individual applying for admission, attending, employed by, teaching at, or doing research at an institution of higher education who has engaged in conduct on or after August 1, 1969, which involves the use of (or the assistance to others in the use of) force or the threat of force or the seizure of property under the control of an institution of higher education, to require or prevent the availability of certain curriculum, or to prevent the faculty, administrative officials, or students in such institution from engaging in their duties or pursuing their studies at such institution."

Let us turn to specifics on what has happened. Three institutions of higher education reported at the end of June that they had terminated Federal assistance to a total of 24 students under these appropriation acts. Of the 24 the Virginia Polytechnic Institution terminated 20, Northwestern University terminated two, and Mesa County Junior College terminated two. Harvard, Wisconsin, Michigan, and others, whose student rampages were the subject of first-page reporting this past year, took no action at all under these appropriation acts.

Six colleges reported terminating aid to a total of 16 students under subsection (a) and (b) of section 504 of the Higher Education Amendments of 1968. These two subsections require the termination of Federal assistance to students or faculty receiving aid who have been found by the university to have participated in acts of violence seriously disrupting the campus—which are either criminal acts for which the student has been convicted or violation of the university's own regulations. Of the 16 students terminated, nine were terminated by Miami University. Here again the universities which have most distinguished themselves by violence by their students and faculty members are conspicuous by their absence on the list.

Section 504 also contains subsection (d) which recognizes the university's right to terminate aid to its students when such action is in its judgment appropriate. Seventy-six institutions out of the 2,600 total in the United States reported action in this category. Harvard and Radcliffe both made this list, and each reported terminating one student.

Michigan University reported no action. Indeed the list of institutions in the State of Michigan reporting action is typical and for that reason worth noting: three institutions reported terminations. The Mid-Michigan Community Colleges terminated one student, the Muskegon Business College terminated 10, and the Northwood Institute terminated four.

Similarly, the University of Wisconsin reported no action. Three institutions in the State of Wisconsin reported action. They were the Dominican College terminating six students, Mount Senario College, Inc. terminating one, and the North Central Technical Institute terminating one. This is an almost incredible report for colleges and universities demanding more and more Federal funds.

Most of the institutions reporting action were small private colleges, community colleges or State colleges. Let me list some of them: Arkansas Agricultural, Mechanical and Normal College, 38; Lassen Community College, California, 15; Florida Keys Junior College, 39; Okaloosa-Walton Junior College, Florida, 23; Draughon's Business College, Kentucky, 28; Dakota State College, South Dakota, 26.

These colleges may very well have had trouble. If so, they received no national reporting that I saw—but, they, at least, do show concern about the law which was passed by the Congress.

Mr. Speaker, this report indicates an almost complete disregard by major institutions of higher education in this country of legislation enacted by this Congress—legislation which was signed by the President and is now law. They have experienced major disturbances of the sort that the Federal legislation was designed to reach. Probably, one-quarter or more of their students receive Federal aid. It would be very difficult to believe that on some of these campuses where riots have occurred that none of their students or faculty members receiving the aid participated in that violence.

Only 86 institutions out of 2,600 report taking any action at all in cutting off funds from those who engage in riots or major disruptions. In most cases, the institutions with the greatest disturbances—did the least in terminating Federal assistance.

I cannot believe that the institutions, whose names have been before us all year as centers of student violence and who have reported almost no terminations of Federal student or faculty aid, have acted in good faith. I do not like what this report tells me of their attitude. At the same time, however, I want to commend those institutions of higher education which have observed both the spirit and the letter of the law. For the information of other Members, I include it in the RECORD.

I also include a study on faculty attitudes about radical student activism in recent years. I am appalled at the percentage in certain departments who "unreservedly approve." This faculty opinion survey deserves the serious study by every Member of the House.

*Number of students whose Federal assistance was terminated during the period July 1, 1969, through June 30, 1970*

FACULTY OPINION SURVEY

The Carnegie Commission on Higher Education has released the tabulations of a Fall, 1969, survey of a sample of 60,447 faculty members in American universities. Results will be analyzed as part of a larger project by Seymour Martin Lipset, Harvard University, Martin A. Trow, University of California, Berkeley, and Everett C. Ladd, University of Connecticut. Many questions were asked of each respondent concerning academic and political life. Those for which distributions were available by discipline follow:

WHAT DO YOU THINK OF THE EMERGENCE OF RADICAL STUDENT ACTIVISM IN RECENT YEARS?

| Field | Unreservedly approve | Approve with reservations | Disapprove with reservations | Unreservedly disapprove |
|---|---|---|---|---|
| Sociology (1,035) | 9.2 | 65.5 | 21.9 | 3.4 |
| Anthropology (458) | 7.0 | 55.5 | 29.5 | 7.0 |
| Psychology (2,111) | 5.3 | 59.2 | 29.2 | 6.0 |
| Economics (1,514) | 5.3 | 50.6 | 35.1 | 8.5 |

## BROWN-OUT HITS EAST

(Mr. RYAN asked and was given permission to address the House for 2 minutes and to revise and extend his remarks and include extraneous matter.)

Mr. RYAN. Mr. Speaker, once again the Eastern United States has been hit by a brown-out. In some portions of the East yesterday there were even electric power blackouts: these were imposed on communities in at least six States and the District of Columbia. Another power shortage is expected today, as the current heat wave continues and demands for electric power remain high.

This is not the first instance of power shortages. Nor will it be the last. This country, which can spend billions to send men to the moon, and which, if the administration succeeds in its plans, will spend hundreds of millions of dollars to develop a plane, the SST, whose purpose is to transport a relatively few people across the Atlantic in a couple of hours, failed yesterday to provide enough power for a family on Staten Island to operate its toaster.

Nor is the shortage of electric power the only peril. We face a tremendous fuel oil shortage this winter, as well. Yesterday, Dr. Wilson M. Laird, Director of the Office of Oil and Gas in the Department of the Interior, testified before a Senate subcommittee that a fuel oil shortage could be avoided this winter only "if everything falls into place, if everything works out all right." He added that it would be "touch-and-go to see whether we can get by this winter," which is expected to be colder than normal for the Eastern and Southern States.

Joseph C. Swidler, chairman of the New York Public Service Commission, has warned that rationing of fuel oil may be necessary in New York State because the shortage has become so severe.

As a start—an urgently essential start—I am today introducing a bill to create a National Commission on Fuels and Energy. I am pleased to join with the distinguished chairman of the House Committee on Interstate and Foreign Commerce (Mr. STAGGERS) and a bipartisan group of our colleagues in supporting this legislation. The commission which it creates would recommend policies and programs for meeting our power needs, and for doing so without further endangerment of the environment.

In addition, I have sponsored House Resolution 932, introduced last April 20, which calls upon the President to implement the recommendations set forth in the majority report of the Cabinet Task Force on Oil Import Control. More than 60 Members have cosponsored this resolution. Implementation of this report would significantly lower fuel oil costs, and increase the supply of oil. Last year alone, oil import controls cost the average family of four an extra $96 for gasoline and heating oil.

In addition, I, along with 53 of my colleagues, have jointly written to the Administrator of the Oil Import Administration, Department of the Interior, urging a much higher allocation of fuel oil imports for the east coast than the President has provided.

For years I have urged the Federal Power Commission to allocate sufficient natural gas to help reduce air pollution caused by the generation of electric power in New York City.

It is essential that there be sufficient fuels available to meet the tremendous demands for energy which exist now, and which are going to increase massively in the next few years.

A National Commission on Fuels and Energy is an important step in the direction of forming a national policy to meet the fuel and energy needs of the Nation. This national energy policy is imperative, as well as is immediate amelioration of the fuel oil shortage which will be upon us with a vengeance this winter, as is the electricity shortage now.

---

## AN OPEN LETTER TO COLLEGE STUDENTS FROM J. EDGAR HOOVER, DIRECTOR, FBI

(Mr. GERALD R. FORD asked and was given permission to extend his remarks at this point in the RECORD, and to include extraneous matter.)

Mr. GERALD R. FORD. Mr. Speaker, J. Edgar Hoover, Director of the Federal Bureau of Investigation, has written an open letter to college students which I believe ranks as an historic document. It is outstanding not only for its perceptiveness of basic American character but also for its commonsense appeal to the good sense of the overwhelming number of fine young people in our colleges and universities.

Mr. Speaker, J. Edgar Hoover has made a national statement which very much needed saying. It is especially appropriate, coming as it does at the start of a new college year. I believe it is instructive not only for our college students but for every man, woman, and young person in America. I commend a reading of it to my colleagues and, with unanimous consent, insert it at this point in the RECORD.

### AN OPEN LETTER TO COLLEGE STUDENTS

(By John Edgar Hoover, Director, Federal Bureau of Investigation, U.S. Department of Justice)

(This open letter to college students from Director Hoover pinpoints eight ploys used by radical extremists in their efforts to steer justifiable campus protests into violent and destructive channels. It was furnished to United Press International on 9–21–70 and is reprinted with permission.)

As a 1970 college student, you belong to the best educated, most sophisticated, most poised generation in our history.

The vast majority of you, I am convinced, sincerely love America and want to make it a better country.

You do have ideas of your own—and that's good. You see things wrong in our society which we adults perhaps have minimized or overlooked. You are outspoken and frank and hate hypocrisy. That is good too.

There's nothing wrong with student dissent or student demands for changes in society or the display of student unhappiness over aspects of our national policy. Student opinion is a legitimate aspect of public opinion in our society.

But there is real ground for concern about the extremism which led to violence, lawlessness, and disrespect for the rights of others on many college campuses during the past year.

The extremists are a small minority of students and faculty members who have lost faith in America. They ridicule the flag, poke fun at American institutions, seek to destroy our society. They are not interested in genuine reform. They take advantage of the tensions, strife, and often legitimate frustrations of students to promote campus chaos. They have no rational, intelligent plan of the future either for the university or the Nation.

The extremists are of wide variety: adherents of the Students for a Democratic Society (SDS) including the Weathermen; members of the Young Socialist Alliance (YSA), the Trotskyist youth group; the Communist Party's Young Workers Liberation League (YWLL). Or they may be associated with the Student Mobilization Committee to End the War in Vietnam (SMC), a Trotskyist-dominated antiwar group.

Many are not associated with any national group. The key point is not so much the identification of extremists but learning to recognize and understand the mentality of extremism which believes in violence and destruction.

Based on our experience in the FBI, here are some of the ways in which extremists will try to lure you into their activities:

1. They'll encourage you to lose respect for your parents and the older generation. This will be one of their first attacks, trying to cut you off from home. You'll hear much about the "failures" and "hypocrisy" of your parents and their friends. The older generation has made mistakes but your parents and millions of other adults worked hard, built, sacrificed, and suffered to make America what it is today. It is their country too. You

may disagree with them, but don't discredit their contributions.

2. They'll try to convert you to the idea that your college is "irrelevant" and a "tool of the Establishment." The attack against the college administration often is bitter, arrogant, and unreasoning. SDSers, for example, have sought to disrupt the colleges by demanding the right to select professors, determine the curriculum, and set grading standards.

3. They'll ask you to abandon your basic common sense. Campus extremism thrives on specious generalizations, wild accusations, and unverified allegations. Complex issues of state are wrapped in slogans and cliches. Dogmatic statements are issued as if they were the final truth. You should carefully examine the facts. Don't blindly follow courses of action suggested by extremists. Don't get involved in a cause just because it seems "fashionable" or the "thing to do." Rational discussion and rational analysis are needed more than ever before.

4. They'll try to envelop you in a mood of negativism, pessimism, and alienation toward yourself, your school, your Nation. This is one of the most insidious of New Left poisons. SDS and its allies judge America exclusively from its flaws. They see nothing good, positive, and constructive. This leads to a philosophy of bitterness, defeatism, and rancor. I would like you to know your country more intimately. I would want you to look for the deeper unifying forces in America, the moods of national character, determination, and sacrifice which are working to correct these flaws. The real strength of our Nation is the power of morality, decency, and conscience which rights the wrong, corrects error, and works for equal opportunity under the law.

5. They'll encourage you to disrespect the law and hate the law enforcement officer. Most college students have good friends who are police officers. You know that when extremists call the police "pigs" they are wrong. The officer protects your rights, lives, and property. He is your friend and he needs your support.

6. They'll tell you that any action is honorable and right if it's "sincere" or "idealistic" in motivation. Here is one of the most seductive of New Left appeals—that if an arsonist's or anarchist's heart is in the right place, if he feels he is doing something for "humanity" or a "higher cause," then his act, even if illegal, is justifiable. Remember that acts have consequences. The alleged sincerity of the perpetrator does not absolve him from responsibility. His acts may affect the rights, lives, and property of others. Just being a student or being on campus does not automatically confer immunity or grant license to violate the law. Just because you don't like a law doesn't mean you can violate it with impunity.

7. They'll ask you to believe that you, as a student and citizen, are powerless by democratic means to effect change in our society. Remember the books on American history you have read. They tell the story of the creative self-renewal of this Nation through change. Public opinion time after time has brought new policies, goals, and methods. The individual is not helpless or caught in "bureaucracy" as these extremists claim.

8. They'll encourage you to hurl bricks and stones instead of logical argument at those who disagree with your views. I remember an old saying: "He who strikes the first blow has run out of ideas." Violence is as ancient as the cave man; as up-to-date as the Weatherman. Death and injury, fear, distrust, animosity, polarization, counter-violence—these arise from violence. The very use of violence shows the paucity of rational thought in the SDS, its inability to come up with any intelligent critique of our society.

Personally, I don't think the outlook for campus unrest this year is as bleak as some prophets of pessimism proclaim. The situation at some colleges is serious, but certainly not hopeless.

Along with millions of other adults, I'm betting on the vast majority of students who remain fair-minded, tolerant, inquisitive, but also firm about certain basic principles of human dignity, respect for the rights of others, and a willingness to learn. I am confident our faith has not been misplaced.

## JAMES M. O'NEILL, OUTSTANDING CITIZEN OF CONNECTICUT

(Mr. MONAGAN asked and was given permission to extend his remarks at this point in the RECORD, and to include extraneous matter.)

Mr. MONAGAN. Mr. Speaker, James M. O'Neill of Lakeville, Conn., died in Watertown, Mass., on September 20 at the age of 88. Mr. O'Neill was one of the outstanding citizens of the State of Connecticut and one of the most scintillating figures in American intellectual life in the last half century.

He was a stanch friend of mine and a fellow alumnus of Dartmouth College and the Harvard Law School, as well as an active member of the Democratic Party. He supported me when I represented the district in which he resided.

He taught at the University of Wisconsin, the University of Michigan, Dartmouth College, and Brooklyn College, as well as at the Hotchkiss School. He wrote or participated in 16 books and was a stanch and eloquent defender of the Roman Catholic Church in America at the time attacks upon this organization were made by Paul Blanchard.

A member of the class of 1908 at Dartmouth, he served as its president from the time of its beginning until the time of its commencement. In the polemics in which he engaged he was always fair and accurate and he was respected by his most active adversaries. His range of interests was very wide and he was among other things a devoted gardener and horticulturist.

His passing is a loss which I feel personally, but it is even more of a loss to the great institutions, educational, religious, and political, to which he gave his allegiance and his strong and loyal support.

An obituary notice from the Waterbury Republican of September 21 is included herewith:

PROFESSOR, WRITER O'NEILL DIES

LAKEVILLE.—James M. O'Neill, 88, of Millerton Road, retired university professor, died Sunday at the Emerson Convalescent Home in Watertown, Mass. after a long illness.

He was born in Victor, N.Y. on Dec. 18, 1881 and had been a resident of Lakeville for more than 25 years. He graduated from the Canandaigua Academy in New York in 1900 and from Dartmouth College in 1907 where he was president of his class and continued to be president until his death.

He studied law at the Harvard Law School and the University Law School for three years and then went into the field of teaching. He was a professor at the University of Wisconsin for 14 years and from 1934 to 1952 he was professor of Speech at the University of Michigan. He also taught four years at Dartmouth and two years at the Hotchkiss School, Lakeville. He was chairman of the Department of Speech at Brooklyn College and while at the University of Wisconsin he established the first department of speech of its kind. He wrote and participated in 16 books including "Catholicism and American Freedom" and "Religion and Education under the Constitution".

He is survived by one daughter, Mrs. Margaret Romagnoli of Watertown, Mass. and Rome, Italy; three sons, Richard W. and Hugh B. of New York City and Paul of Weston, Mass. and 14 grandchildren.

The funeral will be held Wednesday at 9 a.m. in St. Mary's Church, Lakeville. Burial will be in St. Mary's Cemetery. Contributions may be sent to the Scoville Memorial Library in Salisbury. There are no calling hours. Arrangements are being made by the Newkirk Funeral Home.

## NIXON CUTS INTEREST RATES

(Mr. DEVINE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DEVINE. Mr. Speaker, yesterday's newspapers carried front page headlines announcing the lowering of the prime interest rate by many of the Nation's leading banks.

Dropping their rates to 7½ percent from 8 percent were the Bank of America, the Nation's largest bank; the Chase Manhattan Bank, the third largest; Morgan Guaranty Trust, the fifth largest; Chemical Bank New York Trust Co., the First National Bank of Dallas, the First National Bank of Kansas City, North Carolina National Bank, the First National Bank of Denver, and the National Bank of Detroit, as well as many others across the country.

Last week the First Pennsylvania Bank and Trust Co. was the first major institution to take this significant step. A number of remarks were made at that time, scoffing at their action as "premature." But now, only 7 days later, we see solid evidence that the prime rate will be lowered by the Nation's banking institutions and that the 7½ percent rate will soon generally prevail.

As Nat S. Rogers, president of the American Bankers Association, was quoted yesterday as saying:

> The move toward a lower prime rate should be recognized as further evidence that inflationary pressures are lessening and that the economy is returning to a more stable condition in the money and capital markets.

Just as rising interest rates result from, rather than cause, inflation, so do declining interest rates give the welcome signal that inflation is being curbed. The vicious inflationary spiral upward that was bequeathed to the nation by the departing Democratic administration has been brought under control by the Nixon administration.

What will this cut in the prime interest rate mean? Well, in terms that every family can understand, it will mean that it will again become possible for families of average means to finance the purchase of homes, a step many people have postponed because interest rates were too high.

I think the Nixon administration is to be commended for its efforts to reverse the economic trends it inherited from the Democrats. These efforts are at last beginning to yield tangible results which will be measured in the pocketbooks of consumers and businessmen alike.

The aforementioned article follows:

[From the Washington Post, Sept. 22, 1970]

MANY LEADING BANKS LOWER PRIME LENDING RATE TO 7½%

(By Philip Greer)

NEW YORK.—Many banks across the country cut their prime lending rates today, but a significant number of large institutions held out against the move to lower interest rates.

Morgan Guaranty Trust Co., the country's fifth largest bank, initiated the latest reductions this morning, trimming its prime rate to 7½ per cent from 8 per cent.

The prime rate is the interest that banks charge their biggest, most credit-worthy customers, virtually all of them large corporations. All other short-term business loan rates are scaled upward from the prime which had been at 8 per cent since March 25.

Long-term rates, such as home mortgages, are not affected by today's action. Short-term consumer loan rates are not tied to the prime, but do tend to move in the same direction.

Soon after Morgan's announcement, Chemical Bank, the country's sixth largest announced it would also cut its prime rate. The other large banks here took no action until late this afternoon, when Chase Manhattan Bank, third largest in the nation, said its prime rate will be lowered to 7½ per cent Tuesday morning.

Bank of America, in San Francisco, the nation's largest, announced later in the day that it would cut the rate.

President A. W. Clausen said:

"We have long recognized the desirability of bringing the prime rate down from the 8 per cent and higher range. Our own liquidity has improved while loan demand now has eased to more manageable levels than earlier this year."

First National City Bank of New York, the country's second largest, took no action today. Citibank issued a statement which said, "We have been studying the situation for the past several weeks. This latest development simply adds another factor to those we are considering."

Late in the day, after the Chase move, a bank spokesman said there would be no further comment.

Two major Washington-area banks. The First National Bank of Washington and the Union Trust Co. of Maryland, announced cuts today.

Among other banks which announced cuts were First National Bank of Dallas, First National Bank of Kansas City, North Carolina National Bank, First National Bank of Denver and National Bank of Detroit

In Wall Street, announcement of Morgan's reduction touched off a wave of profit-taking that wiped out a mild early rally. The Dow Jones industrial average closed the day with a loss of 6.57 points at 751.92.

Analysts said the market has been buoyed in recent weeks by expectations of lower interest rates and that traders were "selling on the news."

Several small banks around the country have announced reductions in their prime rate in the past few weeks. The first bank of any size to take the step was First Pennsylvania Bank and Trust Co. of Philadelphia, which cut its rate last Monday.

The prime rate cut—although still limited in scope—drew praise from sources in and out of the banking industry.

Nat S. Rogers, president of the American Bankers Association, said, "Today's move toward a lower prime rate should be recognized as further evidence that inflationary pressures are lessening and that the economy is returning to a more stable condition in the money and capital markets. The abnormally high interest levels of recent months have created problems for everyone. We look forward to conditions in financial markets that permit a lowering of the cost of money to borrowers and banks alike."

Treasury Secretary David M. Kennedy, in Copenhagen for a meeting of the International Monetary Fund, said he has been expecting the rate cut because of "the increase in bank reserves and other economic and financial conditions."

Robert H. Pease, president of the Mortgage Bankers Association, issued a statement in Washington which said, "The lower prime rate signals a move toward the restoration of the mortgage as an attractive investment and should provide encouragement to the mortgage-backed security issues that have been waiting for a break in the market."

The Federal Reserve Board disclosed today that its open market committee decided at its late June meeting to continue to allow a moderate growth in money and bank credit.

The 12-member panel, whose actions are made public three months after they are taken, decided that continued money supply expansion was necessary to moderate current pressures on financial markets.

The absence of the usual unanimity in cutting the prime rate reflected the uncertainty plaguing bankers. Under the influence of less restrictive monetary policies of the Federal Reserve Board, short-term interest rates have been sliding for several weeks but banking officials, fearful of a change in policy because of the continuing inflation and noting that demand for business loans is still at a high level, have been divided on the timing of a prime rate cut.

Over the weekend, David Rockefeller, chairman of Chase Manhattan Bank, was quoted as saying that a cut in the prime rate "might be only a matter of weeks away." Chase, of course, cut its rate this afternoon.

## THE INTEGRITY OF THE SECURITY COUNCIL AT STAKE

(Mr. KOCH asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. KOCH. Mr. Speaker, the lack of impartiality and the bias of the Security Council of the United Nations in its handling of matters coming before it dealing with Israel and the Arab States was made readily apparent this week. Whenever Israel, in defense of its people and borders, has reacted with assaults on the terrorists' bases in Jordan, Syria, and Lebanon, there has been an immediate resolution in the Security Council, first, demanding that Israel withdraw its troops, and, second, threatening that beleaguered country with sanctions.

Today, when an unprovoked invasion of Jordan by Syria is taking place, no one in the Security Council calls for a Security Council meeting; no one introduces a resolution demanding that Syria withdraw its armed forces from Jordan sent there to topple Jordan's Government. Is it any wonder that Israel wisely decided that its security and its fate could only be protected by its own resources? Had Israel relied on assistance from the United Nations to resist the three wars waged against it in the last 22 years by Arab States, or the daily terrorist attacks made upon its farms and cities, it would be suffering the same fate now suffered by Jordan where thousands of civilians are dead or dying, as the members of the Security Council turn their collective face away.

To those who say it is senseless to seek a condemnation of Syria because the Soviet Union would veto such a condemnation, I say it is even more important that we speak out against this aggression and hold up to world contempt the Soviet support of that aggression.

I urge President Nixon to instruct our Ambassador at the United Nations to call for an immediate meeting of the Security Council to consider the situation in Jordan and to marshal support for the release of the innocent foreign hostages, 38 of whom are American citizens, being held in Jordan; furthermore, Syria should be condemned for its invasion of Jordan. Let us test whether or not Syria, a member of the Security Council, will submit to the Council's jurisdiction and if she does not, let her seat in the Council be declared vacant.

Mr. Speaker, the Security Council of the United Nations is now on trial. Its very integrity is at issue.

## ROLLCALL VOTES

(Mr. KOCH asked and was given permisson to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. KOCH. Mr. Speaker, I was attending several very important meetings with constituents concerning severe problems in several of the neighborhoods in my district on Monday, September 21, 1970, when the House considered S. 2763, H.R. 14678, H.R. 15911, and H.R. 16710.

Had I been present, I would have voted "yea" on rollcall No. 307, which was on S. 2763, allowing purchase of additional systems and equipment for passenger motor vehicles over and above statutory price limitation. I would have voted "yea" on rollcall No. 308, which was on H.R. 14678, penalties for illegal fishing in the 12-mile fishery zone around the coastal United States. I would have voted "yea" on rollcall No. 309, which was on H.R. 15911, increasing non-service-connected pensions and income limitations applicable thereto. I would have voted "yea" on rollcall No. 310, which was on H.R. 16710, extension of guaranteed housing loans—direct loans to paraplegic veterans—purchase of mobile homes.

## AN OIL POLLUTION TRAGEDY THREATENS LAKE ERIE

(Mr. BETTS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. BETTS. Mr. Speaker, any morning when I arrive at my office I expect to receive frantic calls from citizens in Sandusky, Huron, or Vermilion, Ohio, asking for immediate Federal aid to stop an oil spill in Lake Erie. This oil spill will be creeping across the water bringing impending disaster to fish and fowl, tourism at Cedar Points and other resorts, and require drydocking of thousands of pleas-

ure craft. I would promptly appeal to the Coast Guard, the U.S. Air Force, civil defense units, the National Guard, and private vessel operators. But their ability to respond would be too limited and too late resulting in tons of ugly globs of oil splashing against sandy shores.

Is it precipitous to paint such a calamitous scene? I think not, Mr. Speaker, because recently I read a report on this inevitable situation prepared by the International Joint Commission, a body of Canadian and United States representatives who have studied this problem on Lake Erie, Lake Ontario, and the St. Lawrence Seaway. In a country such as ours we are all too often expending time and money on the "pound of cure," long after the wisdom of an "ounce of prevention" has passed. We can preach all we want about environmental pollution in the abstract, but here is a concrete situation.

Awareness, the first step to problem solving, is behind us. The problem has been amply studied. Official recommendations were presented in April. Now the question is what action is to be taken. I plan to circulate this statement together with the Special Report from the International Joint Commission to officials here in Washington to learn of its implementation.

Mr. Speaker, we all hope no tragedy as this will ever befall our precious resource, Lake Erie. Let us, however, do more than hope. I include the report at this point in the RECORD:

INTERNATIONAL JOINT COMMISSION SPECIAL REPORT ON POTENTIAL OIL POLLUTION, EUTROPHICATION AND POLLUTION FROM WATERCRAFT, APRIL, 1970

This is the third interim report on the water pollution of Lake Erie, Lake Ontario and the International Section of the St. Lawrence River. The first interim report, dated December 1965, informed the two Governments of the then known conditions in Lake Erie and Lake Ontario and the more significant sources of pollution. That report outlined the three phases of the Commission's integrated programme for its investigation. The second interim report, dated August 1968, briefly outlined the progress made by the Commission's two Technical Advisory Boards and also summarized the progress being made in implementing remedial measures on both sides of the boundary.

The first phase of the investigation was completed in 1969. These short-term concentrated studies were designed to secure factual information on the two lakes and the St. Lawrence River as well as the extent, origins and effects of pollution. The second and third phases, involving detailed continuing studies and research, were initiated during the first phase and are continuing.

The International Joint Commission is aware of the anxiety and wide public interest concerning the water quality of these waters. After a thorough inquiry into the pollution problems of Lake Erie, Lake Ontario and the International Section of the St. Lawrence River, the Commission concluded that three items of concern, namely oil pollution, eutrophication and pollution from watercraft, should now be brought to the attention of the two Governments as a matter of urgency.

The Commission will report comprehensively and as expeditiously as practicable on the other aspects of the inquiry undertaken by the Commission at the request of the two Governments. These other aspects will include but will not be limited to such matters as transboundary movement of pollution, water quality objectives and remedial measures. The comprehensive report may also contain further detail regarding the subject matter of this interim report but it will not materially alter the recommendations contained herein.

By reference dated October 7, 1964, the Governments of Canada and the United States requested the International Joint Commission to investigate and report upon the extent, causes, locations and effects of pollution in the waters of Lake Erie, Lake Ontario and the International Section of the St. Lawrence River and to recommend the most practicable remedial measures which might be considered necessary. The text of the reference is appended hereto.

On March 21, 1969, following a serious oil pollution incident off the California coast, the two Governments requested the Commission to make a special report on the adequacy of existing safety requirements applicable to underwater drilling and production operations in Lake Erie to prevent oil escaping into the Lake; the adequacy of known methods of confining and cleaning up any major oil spill that may occur in Lake Erie from any source; and the adequacy of existing contingency plans, and their implementation, for dealing with such oil spills. The text of the letter of March 21, 1969, from the two Governments is also appended hereto.

After an initial review, the Commission made public on October 8, 1969, a detailed Summary Report on the pollution of Lake Erie, Lake Ontario and the International Section of the St. Lawrence River submitted to the Commission by the two Technical Advisory Boards it established for that purpose in December, 1964. The Boards and their Committees consisted of acknowledged experts from the agencies of the two Federal Governments, the Province of Ontario and the States of New York, Pennsylvania, Ohio and Michigan. Similarly, on October 27, 1969, the Commission made public a special report entitled "Potential Oil Pollution Incidents from Oil and Gas Well Activities in Lake Erie", prepared by its International Lake Erie Water Pollution Board. Both reports were given wide distribution and public hearings were scheduled in each country. Notices of the hearings were published in accordance with the Commission's Rules of Procedure and were also mailed to many persons known to be interested.

The public hearings on potential oil pollution in Lake Erie were held in Toronto, Ontario, on December 2 and in Cleveland, Ohio, on December 3, 1969. The hearings on the pollution of Lake Erie, Lake Ontario and the International Section of the St. Lawrence River were held in Erie, Pennsylvania, on January 20; Toledo, Ohio, on January 21; London, Ontario, on January 23; Hamilton, Ontario, on February 2; Rochester, New York, on February 4, and Brockville, Ontario, on February 6, 1970.

At these hearings, all those interested were given opportunity to convey relevant information to the Commission and express their views orally or in writing. In fact more than 200 statements were made by elected representatives, spokesmen for governmental agencies, local organizations, industry and many private individuals.

OIL POLLUTION IN LAKE ERIE

The International Lake Erie Water Pollution Board in response to the Commission's directive of April 1, 1969, and with the concurrence of the Commission, established an ad hoc committee of its members to expedite the examination of drilling regulations and procedures, containment and cleanup of oil spills, and contingency plans. The ad hoc committee consulted responsible provincial, state and federal agencies in both countries. The drilling regulations were reviewed with state and provincial geologists and drilling specialists. The ad hoc committee examined in detail the drilling regulations of Ontario and Pennsylvania and the proposed rules and regulations of New York and Ohio. Pursuant to Michigan's long-standing policy, leases of state-owned bottom land in the Great Lakes are not granted for offshore drilling. The committee also examined the means available to clean up oil spills and the status of contingency planning.

Lake Erie is an essential source of fresh water for some ten million people that live on or near its shores. Thus in its concern with the quality of Lake Erie waters, the Commission must take account of potential as well as current sources of oil pollution. The potential for serious incidents of oil pollution includes but is by no means limited to underwater oil and gas exploration and development. In order to place the threat of pollution from drilling in its proper perspective it is necessary to consider the significant amounts of oil pollution from municipal and industrial sources, shipping, product transfer, shore storage and pipelines.

The Commissioners were appalled at the insidious intrusion of vast amounts of oil from the populous and industrialized communities in the Lake Erie basin. For example during 1969 more than 1000 barrels per day of oil and greases were discharged into the Detroit River, the major tributary to Lake Erie. The Buffalo River is another significant source of oil pollution of boundary waters. These oils and greases occasionally appear as slicks on the water surface but more often are emulsified in the effluents. Some of these pollutants are adsorbed onto the suspended load in the river and are deposited as sediment. Such is the situation in Cleveland Harbor where it was estimated that 17,600 tons of oil and grease were included in the 660,000 tons of dry solids removed during the 1966–67 dredging operations. (These wastes are currently being placed in a dyked disposal area.)

The Commission is concerned about the numerous accidental spills. In April 1969 it was estimated that 2,300 barrels of cutting oil from one industrial spill in the Trenton Channel of the Detroit River entered the western basin of Lake Erie.

The Commission fully appreciates the implications for Lake Erie of the recent grounding of the ships "Arrow" and "Delian Appollon" off the coasts of Nova Scotia and Florida respectively. The Commission was informed that on Lake Erie at any one time during the navigation season 22 lake freighters, 4 lake tankers and 7 deep sea freighters carry an estimated 120,000 barrels of oil as either fuel or cargo. These facts illustrate the gravity of the total oil pollution threat on Lake Erie and the need for adequate controls over the several aspects which comprise the total threat.

Lake Erie is part of a stable geologic basin, the latest movements occurring over 200 million years ago. These structural movements were gentle and did not involve extensive folding and faulting of the strata. The eastern and central basins of Lake Erie are in essentially a gas province. The traps of hydrocarbons are stratigraphic (lateral changes in permeability within widespread rock units), or were formed by ancient porous coral reefs. The bed rock sediments, into which the surface casing required in drilling operations must be cemented, are a minimum of 300 million years old, hard, and competent enough to control any subsurface pressures that might be encountered. The pressures encountered are less than those expected under normal hydrostatic conditions.

In contrast, active oil seeps have been known to exist in the Santa Barbara Channel area for many years. The rate of flow from these seeps has been estimated to be 50 barrels a day or one tenth of the maximum rate of flow that escaped from the blowout on January 28, 1969. The Santa

Barbara area is considered to be an oil province. It is an unstable area. Vertical uplift and subsidence is still being recorded on land. The traps which produce the hydrocarbons are tightly folded anticlinal structures, and complex fault features formed only a few million years ago. Strata underlying the Santa Barbara Channel are unconsolidated and apparently not strong enough to contain the pressures developed in the deeper formations. The pressures encountered are slightly greater than hydrostatic. Thus the hazard of sub-surface fluids breaking through the underlying strata is always great.

This explains why those who know the geology of both areas have assured the Commission that it is highly improbable that a dramatic drilling accident similar to the Santa Barbara incident would occur in Lake Erie.

The essence of pollution prevention from drilling operations is the containment and control of drilling and reservoir fluids. The primary consideration which drilling regulations must take into account for each well are: the design and implementation of effective casing and cementing programs, the adequacy of blowout prevention and related equipment, and the disposal of drilling and reservoir fluids. The regulations must be designed so as to ensure that operators during their drilling and development operations use the best materials and technology available.

The offshore drilling regulations of Ontario and Pennsylvania and those proposed for New York can provide effective protection of the waters of Lake Erie if adequate supervision and enforcement are also provided. A high degree of coordination between interested agencies is necessary to provide adequate but not repetitious coverage. However, if drilling is extensive accidents may occur. Thus it is necessary to have contingency plans prepared to cope with such incidents.

Adequate drilling regulations are only as strong as their enforcement and the willingness of the industry to act responsibly. Drilling and gas production activities in Lake Erie at present are limited to the Ontario portion of the lake. According to testimony received at the Commission's hearings, the Ontario Department of Energy and Resources Management does provide careful inspection and surveillance over the drilling and development operations in the Ontario portion of Lake Erie; and the industry has demonstrated a willingness to cooperate with the Government and has an awareness of the environment in which it operates. The Ontario departmental inspectors are on board the drilling platforms most of the time and are always present during critical periods such as spud-in and completion operations.

In Ontario, the Minister of Energy and Resources Management has discretionary power to suspend a drilling permit in whole or in part at any time or impose any terms or conditions on a permit which he deems proper. Such action is subject to a subsequent hearing and review by the Ontario Energy Board. The Minister can thus move very quickly to halt any operation which might pose a threat to water quality. The best evidence of effective implementation of existing regulations is the successful record of trouble-free drilling for gas in Lake Erie; oil production has not been permitted to date. Furthermore, the Ontario regulations are being progressively strengthened.

At the hearings, an official of the Ontario Department of Energy and Resources Management described the existing safety requirements and procedures in Canada applicable to drilling and production operations in Lake Erie and an official of the State of Michigan described its present policy of not permitting underwater drilling. Although officials of the States of New York and Ohio and the Commonwealth of Pennsylvania cooperated with the Board during the investigation, no officials of these states presented testimony at the hearings to assist the Commission in assessing the safety requirements and procedures applicable in the portions of Lake Erie within their jurisdictions.

Although there have been no oil spills in Lake Erie from drilling (except for a minor incident in 1959 involving an estimated five barrels), the Commission is aware of the many oil spills reported along the shipping lanes in Lake Erie and from land-based sources. The frequent occurrence of accidental spills requires that effective means be available to contain and clean up oil spillages before the legitimate uses of Lake Erie waters are inhibited. Moreover, the collision or stranding of ships are potential sources of major pollution by oil or other hazardous materials in Lake Erie as elsewhere.

The Board on behalf of the Commission reviewed the current methods of containment of oil on water; its removal by mechanical methods, by physical materials and by chemicals; and of protection and clean up of shore areas. According to reports on major oil spills elsewhere in the world the adverse effects of materials used to sink or dispers oil can be more harmful than the effects of the oil itself. An indicated in the Board's report the equipment and techniques for the containment and removal of large oil spills under adverse climatic conditions are primitive.

The Commission is of the opinion that those responsible for the confinement and clean up of spilled oil and other hazardous materials must have at their disposal the best technical advice and the required resources of manpower, materials and equipment. The on-scene commander needs sufficient executive authority to fulfill his responsibilities. Any contingency plan should provide for the discovery and reporting of pollution incidents and for the initiation of prompt action to restrict the spread of the pollutant. Experienced personnel should be available to direct the clean up and disposal of the collected pollutants.

The Board, at the direction of the Commission, examined the state of preparedness in both countries to respond to major oil pollution incidents which might occur on Lake Erie. Regional contingency plans have been developed by the United States for the Great Lakes and provide a response capability for spills that might occur in U.S. waters. However, there appears to be a concentration of responsibility on the federal establishment and little, if any, actual recognition of state and local capabilities or delegation of responsibility. Although the United States contingency plan for the Great Lakes region appears to be generally complete and detailed, its adequacy cannot be fully assessed in the absence of a satisfactory record of experience.

The contingency plan in Canada is still in the embryo stage. Individual agencies such as the Ontario Water Resources Commission, the Ontario Department of Energy and Resources Management and the Federal Department of Transport have internal response mechanisms established. It is understood that a Canadian national contingency plan is being developed. A major oil spill in the Canadian waters of Lake Erie at the present time, however, would be met with only a fraction of the response capabilities available because of the lack of a plan for coordination between the Canadian federal, provincial and local authorities. Furthermore, the Commission notes that there is no formal plan for a concerted international response; only informal notification.

EUTROPHICATION

The Commission in its first interim report on the pollution of Lake Erie, Lake Ontario and the International Section of the St. Lawrence River, dated December 1965, pointed out that the excessive enrichment of these waters was due to nutrients contained in the effluents from municipal and some industrial facilities. At that time the Commission, on the advice of its technical advisers, stated it was satisfied that the removal from such effluents of phosphates, one of the essential plant nutrients involved, would materially retard further deterioration of these waters. Consequently, the Commission recommended that the Governments of Canada and the United States, as soon as possible, and in association with state and provincial governments take appropriate action to ensure sufficient purification of all municipal and industrial wastes before discharge into these waters and their tributaries to achieve the maximum possible removal of phosphates.

The Technical Advisory Boards established by the Commission for the purpose of investigating the pollution problem in the waters under reference reported to the Commission in September 1969 with specific findings and recommendations. The Boards' report is a product of four years of extensive study, research and evaluation. Several hundred scientists and engineers in both countries involved in environmental assessment and pollution control participated in the multi-million dollar study. Their report is a balanced appreciation by experienced and specially qualified experts who collectively are engaged in the solution and control of all aspects of water pollution. The Boards' report summarizes their findings, identifies the critical problems, and briefly describes the measures necessary in both countries for abatement of pollution in these waters.

The Commission is convinced that the pollution problem requiring the most urgent attention of the Governments of Canada and the United States is the increasing euthrophication of the Lower Great Lakes, particularly the western basin of Lake Erie. Continued deterioration would further restrict the legitimate uses of these waters. Thus, this third interim report deals primarily with the inputs of man-derived nutrients into the lakes. This serious problem will be dealt with in greater detail in the Commission's main report, along with the other factors contributing to the deterioration of the quality of the waters of Lake Erie, Lake Ontario and the International Section of the St. Lawrence River.

Eutrophication is the biololical response caused by an increase of nutrients into lakes. The biological productivity depends on the supply of essential nutrients. Lakes well supplied with these nutrients tend to be the most productive. This relationship is the basis for the "trophic" system of lake classification.

Oligotrophic lakes are poorly supplied with nutrients and support little plant growth. The biological production is generally low; the waters are clear; and the deeper waters are well supplied with oxygen throughout the year. Eutrophic lakes are rich in plant nutrients and support a heavy growth of aquatic vegetation. As a result, biological production is high; the waters are turbid due to the dense growth of phytoplankton; and the deeper waters during periods of restricted circulation become deficient in oxygen as a result of the decomposition of great quantities of organic material. Mesotrophic lakes are intermediate between oligotrophic and eutrophic. They have a moderate supply of nutrients, moderate plant abundance and moderate biological production.

If the supply of nutrients to an extremely oligotrophic lake is progressively increased, the lake will become mesotrophic in character, and with further enrichment it will even-

tually become eutrophic, even extremely eutrophic. This whole process of progressively becoming more eutrophic is known as eutrophication. Thus, eutrophication refers to the whole complex of changes which accompany continuing enrichment of waters by the addition of plant nutrients. These include progressive increases in the growth of algae and aquatic weeds, a general increase in biological activity, successive changes in the kinds of plants and animals living in the lake, oxygen depletion in deep water during periods of restricted circulation, and decreasing depth as a result of accumulating organic sediments.

The biological response produced by natural eutrophication is extremely slow. On the other hand, the inputs of man-derived nutrients into a lake can produce in a few decades a biological response similar to that which under natural conditions would take tens of thousands of years.

Increased population, industrialization, intensified agricultural practices and the use of phosphorus-based detergents since the late 1940's have greatly increased the rate of eutrophication of lakes in many parts of the world. Dense nuisance growths of algae and aquatic weeds degrade water quality. *Cladophora*, an attached algae, piles up on the beaches when dislodged by wave action. Blue-green algae accumulate on the shore creating unsightly odorous scums.

These eutrophic conditions inhibit many of the legitimate uses of the lake. Algal growths interfere with domestic and industrial water supplies by causing taste and odor problems and by clogging filters; contribute to the dramatic decrease in the number of valuable species of fish; restrict the use of prime recreational areas such as beaches; degrade shoreline properties; and spoil aesthetic values.

Although all essential elements are required by plants for their growth, phosphorus and nitrogen are recognized as the most important elements responsible for triggering eutrophication because their supply is commonly lowest in relation to nutritional requirements. The reason for focusing attention on phosphorus rather than nitrogen is that it is more controllable both in terms of present technology for removal at sewage treatment plants and in terms of proportion of the total supply to the lakes that is directly attributable to man.

The phosphorus loading to the lakes can be controlled more effectively than nitrogen for several reasons. The percentage of the total phosphorus supply attributable to municipal and industrial sources (70 percent for Lake Erie, 57 percent for Lake Ontario) is higher than in the case of nitrogen (about 35 percent for Lake Erie, 30 percent for Lake Ontario). Thus, complete removal of phosphorus from municipal and industrial wastes would reduce the overall supply to a greater extent than in the case of nitrogen. Appreciable quantities of readily assimilable nitrogen compounds such as nitrates and ammonia are delivered to the lakes in precipitation, whereas the comparable quantities of phosphorus are minute. Finally, during times of nitrogen deficiency blue-green algae and bacteria can convert atmospheric nitrogen into nitrogen salts readily available for algal growth, thus adding to the overall supply. For these and other reasons, control of phosphorus inputs is likely to be more effective in restricting plant growth than would be the case for nitrogen or any other single nutrient. The Commission is encouraged by the fact that the input of phosphorus into the lakes can be controlled because the concentrations of phosphorus in domestic wastes, certain industrial effluents and runoff from some agricultural operations are of our own making.

Massive growths of algae year after year are dependent on a persistent influx of phosphorus and other limiting nutrients from outside the lake. The resultant biological productivity is proportional to the rate of input of these nutrients. Theoretically, plant populations could be controlled by reducing the input of any essential element required for growth. The important feature of phosphorus is that it offers the best combination of a nutrient that is growth-limiting in the lakes and at the same time controllable by man. Phosphates are highly reactive materials and can readily be precipitated, absorbed or adsorbed by a variety of relatively inexpensive methods that remove 80–95 percent of phosphorus during sewage treatment. Comparable technology for the elimination of nitrogen compounds is not in such an advanced state.

The following table summarizes the input of total phosphorus from all sources to Lake Erie and to Lake Ontario in 1967 as reported by the two Boards.

INPUT OF TOTAL PHOSPHORUS IN 1967

[In millions of pounds]

| Source | Lake Erie | | Lake Ontario | |
|---|---|---|---|---|
| Lake Huron | 4.5 | | — | |
| Lake Erie | — | | 9.0 | |
| | United States | Canada | United States | Canada |
| Municipal | 35.7 | 2.5 | 7.7 | 7.0 |
| Industrial | 1.8 | 2.2 | .3 | .6 |
| Land drainage | 9.6 | 3.9 | 1.0 | .6 |
| Unaccounted | — | | 1.1 | |
| Total | 60.2 | | 27.3 | |

It is evident from the above table that the principal input of phosphorus is from the United States and that, in both countries, municipalities are the major source of total phosphorus. In 1967, the input of total phosphorus from United States municipal sources to Lake Erie was 35.7 million pounds, of which 25 million came from detergents. The input of total phosphorus from Canadian municipal sources to Lake Erie was 2.5 million pounds, of which 1.3 million came from detergents. Similarly, the input from United States municipal sources to Lake Ontario was 7.7 million pounds, of which 5.4 million came from detergents. The Canadian municipal input to Lake Ontario was 7.0 million pounds, of which 3.5 million came from detergents. It is apparent from the foregoing that detergents are by far the greatest single source of total phosphorus input into the Lakes.

The reasons for reducing the phosphorus inputs from detergents are several. The first concerns timing. If a replacement for detergent phosphorus could be developed rapidly, a significant reduction of phosphorus inputs would be achieved prior to completion of phosphorus removal facilities at sewage treatment plants. Secondly, the effect would be to reduce phosphorus input from small communities, cottages and individual homes where the installation of phosphorus removal facilities would impose undue financial burdens. Thirdly, it is estimated that treatment costs for phosphorus removal at sewage treatment plants would be reduced considerably by removing phosphorus from detergents.

On the basis of the foregoing the Commission is convinced that the reduction of the phosphorus input into Lake Erie, Lake Ontario and the International Section of the St. Lawrence River will significantly delay further eutrophication and will allow the recovery to begin through natural processes.

POLLUTION FROM WATERCRAFT

The Commission is concerned with the mobile sources of water pollution. Over 600 foreign vessels move cargo through the Great Lakes system each year. The domestic Great Lakes fleet is composed of nearly 600 Canadian and United States vessels. Only a very small percentage have holding tanks or treatment facilities for sewage. It is estimated that over 250,000 pleasure craft use the lower Lakes but relatively few have holding tanks or treatment devices. Only a few of the ports on the lower Great Lakes have facilities to collect and treat vessel wastes. Though an increasing number of marinas are being equipped with pump-out facilities for pleasure craft, the number is still inadequate.

Wastes discharged from commercial and pleasure watercraft include sewage containing human excrement, garbage, litter, oils, bilge and ballast water. They can endanger the health of those using the receiving waters for swimming, water skiing and other water contact sports. They can also damage or kill aquatic and wildlife. Bathing beaches and marinas can be seriously contaminated. Garbage and litter are not only esthetically displeasing but can be extremely hazardous. Critical conditions occur where vessels congregate in harbors, at marinas and along the shoreline. The mobility of watercraft poses a potential contamination threat at or near water intakes.

In a special report on boat and vessel pollution the Board informed the Commission that no single law or regulation in Canada or the United States deals with all aspects of pollution of navigable waters from watercraft; and that many laws are of a token nature and not readily enforceable, because of their impracticability or lack of personnel to perform the task or both. The Commission has been informed that the Ontario, Michigan and New York regulations governing pleasure craft now in force are compatible and satisfactory.

There is uninhibited movement of watercraft across state lines and the international boundary. Serious problems are created when regulations governing the discharge of wastes from watercraft in the several jurisdictions are not compatible. Thus it is essential that federal, provincial and state governments concerned with the control of pollution from commercial vessels and recreational craft which use the international waters of the lower Great Lakes have compatible regulations governing the discharge of all forms of wastes from these watercraft.

CONCLUSIONS

With regard to potential oil pollution in Lake Erie the commission concludes:

1. The safety requirements and procedures applicable to drilling and production operations in Lake Erie of Pennsylvania, New York and particularly those of Ontario, if effectively supervised and properly enforced, are adequate to prevent oil escaping into the Lake so as to produce serious transboundary oil pollution conditions. Drilling is prohibited in the Michigan portion of Lake Erie. The exact status of Ohio regulations is not clear. In the Ontario portion of Lake Erie, the only area where there are at present drilling and gas production operations, the enforcement of the regulations and the required operational procedures have been adequate to date.

2. Current methods of confining, removing, dispersing and cleaning up a major oil spill that may occur from any source are primitive and inadequate. Current methods can deal effectively with large spills only under the most ideal weather conditions. There is no one method that is a panacea. Each oil pollution mishap presents a unique situation in terms of water temperature, winds, currents, type of oil and the ecology of the area. Very little is known on the residual effects on aquatic organisms of materials used to sink or disperse oil spills.

3. The United States contingency plan for the Lake Erie region is generally adequate although the roles of state and local agencies as well as private organizations require clarification. On the other hand, Canada does not yet have a detailed or coordinated

contingency plan to marshal the capabilities of federal, provincial and local agencies or private organizations. Such local plans as exist are relatively uncoordinated. Furthermore there is an urgent need for a formal plan of international cooperation.

With regard to the eutrophication of Lake Erie, Lake Ontario and the international section of the St. Lawrence River the commission concludes:

4. The accelerated eutrophication of these waters is due to the presence of nutrients. The resultant biological productivity is proportional to the rate of input of these nutrients. Of the nutrients involved, phosphorus is the only one that is both growth-limiting in the lakes and can be controlled effectively by man with present technology.

5. The major source of phosphorus is municipal sewage. In the United States 70 per cent of the phosphorus in sewage originates from detergents, most of the remainder from human excreta. In Canada approximately 50 percent originates from each source. Other significant sources of phosphorus are agricultural run-off and some industrial wastes.

6. The input of phosphorus can be reduced by widespread additional treatment of municipal wastes and industrial wastes containing phosphorus. An overall programme to achieve this is essential if eutrophication is to be halted.

7. Because of the practical difficulties in implementing the programme contemplated in the preceding conclusion within the reasonable future, it is incumbent on both countries to reduce the phosphorus content of detergents to the maximum practicable extent at the earliest possible time.

8. The inputs to the waters of the basin of phosphorus, nitrogen and other nutrients from agricultural operations are also a problem that must be recognized.

With regard to pollution from watercraft the commission concludes:

9. Although commercial vessels and pleasure craft are not major sources of pollution when compared with urban centers, they are mobile sources that can discharge pathogenic organisms and petroleum wastes at or near sensitive areas such as water intakes, bathing beaches and marinas.

10. Garbage, litter, bilge and ballast water discharged into the lower Great Lakes system are aesthetically unattractive, restrict recreational activities and interfere with the legitimate uses of these waters.

RECOMMENDATIONS

With regard to potential oil pollution in Lake Erie the commission recommends that:

1. The two Governments in concert with provincial and state agencies and with industry accelerate and expand, as a matter of urgency, their applied research programmes on the containment and clean up of oil spills so those responsible for the execution of contingency plans may have available the best possible technical advice, equipment and support.

2. The Government of Canada, as a matter of urgency, develop a detailed and fully coordinated contingency plan for the Canadian waters of the Great Lakes system; the Government of the United States progressively improve its contingency plan so as to include all available response capabilities; and the two Governments under the general aegis of the International Joint Commission arrange for the development of a coordinated international contingency plan so that both countries may quickly and effectively respond to major accidental spills of oils or other hazardous material in the boundary waters of the Great Lakes system.

3. In view of the urgency of the two preceding recommendations:

(a) the oil production and the production of "wet gas" containing appreciable amounts of liquid hydrocarbons from wells in Lake Erie be prohibited,

(b) all wells in Lake Erie capable of oil production be adequately plugged,

(c) in the western basin of Lake Erie (west of a straight line drawn from the tip of Pelee Point in Ontario to Marblehead in Ohio) all drilling be prohibited,

(d) in the remainder of Lake Erie drilling not be permitted unless the regulating agency having jurisdiction has determined in the light of known geologic conditions that there would be no reasonable likelihood of discovering oil or "wet gas" containing appreciable amounts of liquid hydrocarbons,

Until such time as the two Governments, through this Commission or otherwise, have examined and approved the containment methods and the contingency plans referred to above.

4. The two Governments take steps to exclude from the Great Lakes ships and masters likely to present an unreasonable risk of oil pollution; and also make provision to alert appropriate officials in both countries when hazardous materials are in transit in these waters.

With regard to the eutrophication of Lake Erie, Lake Ontario and the international section of the St. Lawrence River the commission recommends that:

5. The Governments of the United States and Canada in concert implement at the earliest possible date an integrated programme of phosphorus control to include:

(a) the immediate reduction to a minimum practicable level of the phosphorus content of detergents and the total quantities of phosphorus-based detergents discharged into the basin with the aim of complete replacement of all phosphorus in detergents with environmentally less harmful materials by December 31, 1972;

(b) further reduction, as a matter of urgency, of the remaining phosphorus in municipal and industrial waste effluents discharging to Lake Erie, Lake Ontario and their tributaries and to the International Section of the St. Lawrence River, with a view to achieving at least an 80 percent reduction by 1975 and thereafter additional reduction to the maximum extent possible by economically feasible processes;

(c) the reduction of phosphorus discharged to waters from agricultural activities.

With regard to pollution from watercraft the commission recommends that:

6. The federal, provincial and state governments in concert consider and implement at the earliest possible date compatible regulations for the control of water pollution from all classes of commercial vessels and pleasure craft using Lake Erie, Lake Ontario and the International Section of the St. Lawrence River.

Signed this 3rd day of April, 1970, as the third interim report of the International Joint Commission on the pollution of Lake Erie, Lake Ontario and the International Section of the St. Lawrence River.

## COMPUTER TECHNOLOGISTS VERSUS THE HUMANISTS: CAN THE TWAIN MEET?

(Mr. BETTS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. BETTS. Mr. Speaker, in connection with his work on privacy and computer data bases in my office and a Ph. D. program at American University, my Legislative Assistant, G. Russell Pipe, attended the International Conference on Man and Computer in Bordeaux, France, from June 22 to 26, 1970. This was at his own expense and initiative. The Bordeaux event brought together computer and social scientists for discussions on the implications of this new technology on man in the next 30 years.

Following the conference, Mr. Pipe prepared a report highlighting the major papers presented and discussions following the various sessions. I find it to be a document of considerable interest as we in Congress grapple with present-day rights of citizens in an automated age as well as forecasting problems in the years ahead.

Mr. Speaker, I request the report "Computer Technologists Versus the Humanists: Can the Twain Meet?" by G. Russell Pipe, be included at this point:

COMPUTER TECHNOLOGISTS VERSUS THE HUMANISTS: CAN THE TWAIN MEET?

(By G. Russell Pipe)

(NOTE.—The author is a PhD candidate in Political Science at American University in Washington and Legislative Assistant to Congressman Jackson E. Betts of Ohio.)

The unreconciled conceptions of the implications of computer technology on mankind were made abundently clear at the International Conference "L'Homme et L'Informatique" (Man and Computer) held in Bordeaux, France, from June 22 to 26, 1970.

An assemblage of 200 experts representing diverse backgrounds concerned with computer science and humanities from 30 countries gathered in this distinguished wine center under the auspices of the Instituit de la Vie (Institute of Life). The Institute, a well-respected French intellectual organization supported by philanthropies and French corporations, joined with the International Federation of Information Processing, to organize the conference. The very breadth of the technical program presentation together with constant reference to societal implications of computers resulted in a strange dichotomy. The conflict of orientations and objectives resulted in criticism of the conference from many quarters insofar as the interdisciplinary mixture of discussion formats produced and heated disputes from the participants. Nevertheless the wisdom of intertwining value considerations with technological analyses of computers in the frame of future developments was likely calculated to spark conflict. In successive program segments, the technology of central processing units, time sharing, role of telecommunications, software requirements, research theory of information, influence of information techniques on society, information and education and finally the impact of information on man, were presented. The speakers and roundtable discussants were nearly equally divided between Americans and Europeans, with academic-government leaders predominating over officials of private companies (IBM, Bull GE, Siemans, etc.). A view seemed to prevail that the American lead in research and application of computer technology should be given full exploration for their successes, pitfalls and failures will traverse the Atlantic within a decade.

COMPUTER POTENTIALITIES

While projections on future computer technology are not without some restraint, an unchallenged assertion places this instrument as a new core unit in the business-labor-government organization and determining goals and security of entire societies. The next decade will see less emphasis on hardware (computer equipment and machinery) and focus on the software systems

and methods to interface and communicate data through any required components. Operating speeds of computers, miniturization of data bits and integration of many information systems is the challenge ahead. Computer languages, not only the development of a more universal set of words and symbols, but user oriented specialized languages Director of a Sieman's research laboratory, H. Kaufman (Munich) stated:

"The hardware problems of the data processing systems are concentrated upon the areas of the central unit technology, the architecture of the central unit and the technology and organization of mass storage. The central unit technology again can be regarded as a problem of the high speed memory. This memory namely contains beside the memory elements a great number of gates: so the high speed memory is a good representative of the whole technology of the central unit."

From a similar vantage point, John W. Weil of the General Electric Company in Bridgeport commented:

"The first two decades of information systems evolution have been characterized primarily by increased computational capability. It seems likely that the next two decades of evolution of information systems will in fact be dominated by changes in our ability to store, organize and access vast quantities of information efficiently.

"Hardware for economical storage of such large volumes of information, with access times equal to or better than that provided by present magnetic technology, will give the physical capability of establishing such large data bases. Simultaneous progress in the organization, structure and accessibility of large masses of data will make practical the use of these data bases.

"Effective and reliable data base systems will have a profound effect upon the way in which a business organization, a government agency or any other community of interest organizes and thinks about its common information. Broad changes can be expected in the way in which new information is made available to the people who must use it."

One of the observations Mr. Weil made is that the size of these data bases may be so vast and their organization so complex, that it may not be feasible to even print-out this data, certainly not in thousands of files, constantly changing, such as credit profiles. Computer capability will serve the user in these expanded ways: unlimited storage, vast processing capabilities, new data forms and structures, and greatly expanded terminal access. For example, suggested Weil, a new way of publishing may evolve: all submissions go into a data bank and editing takes place there.

As computers grow in impact on data usage, several speakers raised the question of whether the average citizen should be involved directly in use of computers or not. This is beyond the planning of data processing systems, relating to terminals being located in public buildings or even installation of household units (with a special keypunch and screen). Home consoles Professor John McCarthy of Stanford University believes can be practical possibilities through time sharing for ordinary persons not professionally concerned with computing. Among the applications he suggests are retrieving information on advertisements, social and cultural events, direct reading of any book or manuscript, educational instruction and solving mathematical problems. Contemplated costs will prohibit wide use of home consoles for some time, however, with terminals about $500 and real time charges as high as $10 a page for book reading.

Terminals of the future will have up to seven levels (regimes) of purposes, according to J. M. M. Pinkerton, International Computer Limited, London, who related them to the personal service to be expected of computers. "Personal services," said Pinkerton, "will require new communications systems, so we are adapting the telecommunication system to a digetal data network." "We must have an efficient and economical system to link up people to computers and make the system work." The seven rankings of terminal use in which the depth of interaction increases at each level are as follows:

1. Inquiry—requesting and securing specific information.
2. Simple interactive system—looking up data and recording a fact (airline passenger bookings).
3. Online control (such as a computer giving instruction to a space vehicle).
4. Remote computing—providing a program the user devises rather than using those already in the computer.
5. Computer-aided instruction—teaching, special interaction takes place here between machine and human.
6. Text editing.
7. Simulation.

Time sharing exists when a computer with connected console and files maintained outside the core memory tries to service all sources of users at about the same time, according to Professor McCarthy. This potential of giving people a "private" computer of their own is seen vital to democratization of this new technology by Professor Robert Fano of MIT's Project MAC. In 1968 there were only 30,000 terminals in the United States and by 1973 there will be about 250,000, mostly in business, government and educational institutions. This method is growing slower than those wishing to bring in the general public would like, if citizens are to "grow" with generations and sophistication of computer techniques.

One means of maintaining the greatest human orientation for computers is to develop speech synthesis and speech recognition. Also, keeping computer languages largely along written characters and digits of a particular society. The introduction of fuzzy languages may be a way to fill vagueness gaps and uncertainties, according to L. A. Zadeh of the Department of Electrical Engineering and Computer Science of the University of Berkeley:

"One of the basic differences between the intelligence of a human and that of a machine lies in the ability of humans to manipulate fuzzy concepts, that is, concepts which correspond to classes with unsharp (fuzzy) boundaries. By contrast, present day computers can operate only on classes in which the question of belonging can be answered unambiguously. This difference reflects itself in the precision and lack of ambiguity of programming languages, which is in sharp contrast to the fuzziness and ambiguity of natural languages.

"The gap between natural and formal languages can be narrowed by introducing the concept of a fuzzy language, which is a fuzzy set of strings over a finite alphabet. The theory of fuzzy languages constitutes a natural generalization of the theory of formal languages and provides new insight into the relation between human and machine intelligence. Furthermore, it suggests ways of approaching classes of problems whose solution lies beyond the capabilities of conventional (non-fuzzy) computers."

Professor Fujisaki of the Faculty of Engineering, University of Tokyo, pressed this argument to retain "human" languages with vigor even though it is a formidable one in Japan where the Japanese alphabet has 50 characters and the total different characters in the Chinese language is nearly 1,000. An underlying issue at the conference among the technical representatives was how complex and exotic system developments might be devised to facilitate various data memories or innovative telecommunication information flows. Those opting for bending every effort to retain computer characteristics logical to the average human experience seemed in the minority. Precision in language is seen to be the weakness of present traditionally spoken languages as well as machine programs yet developed.

The role of human operation in advanced computer systems is viewed differently. If, indeed, large and comprehensive data bases are technological goals should not the full automation of such systems be a concurrent achievement? Already the computations for a lunar voyage are too multi-faceted and near simultaneous that a computer is utilized in almost every aspect of such missions. Man, for the present, is not expendable. When the day of artificial knowledge transmitted to robots is possible, the role of man for this and other large, complex, difficult or dangerous tasks may be eliminated. Future considerations involve development of policies and techniques with regard to man-machine interaction. The entrance of human operation and a rational man-machine symbiosis remains a future challenge.

"The theoretical problems raised in dealing with computers and their use cannot be properly separated from the methodological problems of dealing with large complicated systems. Perhaps the principal theoretical problem is how to design and maintain large, ever changing data systems, i.e. systems containing computers and their programs, people, and large collections of data.

"An important element in successful design is the attitude of the designer. He must be willing to attack a problem which is being defined while he solves it, as an integral part of the design process itself. Also he must recognize that the problem admits of a multitude of valid, although different, solutions.

"At the same time, the computerized solution itself, once established, defines one, centralized attitude for the people dealing with it. For the people taking part in the design and maintenance of it, this raises a constant dilemma, between on the one hand keeping the system fixed, in spite of its known deficiencies, and on the other introducing deep changes, which in the process of being introduced will impair the function of the system itself."—PETER NAUR, Copenhagen.

As large systems will presumably operate on an uninterrupted basis, accessing new data, reorganizing and purging unwanted or obsolete information, the role of design/operating personnel becomes critical, as was pointed out by Professor Naur.

The focus of conference consideration at mid-week turned sharply toward the implications of computer technology on man and society. While a predisposition of all participants that computer technology represented progress was implied, a somewhat unsual classification of the "humanist" arose. There was an unofficial designation of *optimist* for the computer scientist and *pessimist* to anyone who raised challenges to the societal impact of automation. This notion was occasionally sharpened to the point of embracing utopian panaceas for computer accomplishments contrasted with an "end of the world" abdication by the pessimists. Such unfortunate labeling did not depress a wide ranging search of humanist concerns.

CONCERNS FOR MAN AND SOCIETY

Expositions on futuristic consequences of the computer as the axis of mankind's being were effectively organized by Professor R. Lattes, a mathematician, Director of the Applied Economic and Mathematic Society of Paris, and Professor Pecujlic, a sociologist from Belgrade. Lattes reflected on the ultimate role of man in an automated world and Pecujlic analyzed prospective societal and governmental structures.

The computer has revolutionary implications, noted Lattes, with information its basic ingredient. What will be the impact of an enormous collective memory giving man an external brain making it no longer necessary for man to retain experiences in his mind, he would be freed of holding on to the knowl-

edge gained in school and the observations he has witnessed during his lifetime? Like libraries where books are indexed in card files, so too with data normally housed in brain cells. Two conclusions are obvious: Man is not as strong as his artificial brain and different environmental orientations will be required to adapt man to his new life role. "We can build machines incorporating all data which will reach rational, logical conclusions more accurate and sound than man may achieve," commented Lattes. He further speculated that if we can absorb such vast information and retrieve it, what will be the mathematical inference on man.

Reflecting on the role of language in a computer age, Lattes asserts that language is a reflection on culture. "In 30 years computers will produce universal languages; this could wipe out former cultures." "A society is relationships, language is a characteristic of culture, if mathematicians decide to capture all relationships in a society, then man will be a prisoner of the computer, he will be a prisoner of words, he will stop the development of his culture."

Lattes speculated about the consequence of the computer in approaching problem solving. "We can re-run scientific problems in the computer and the result will yield just one way to do something, because that's the way science developed." "In social problems where there are a variety of choices available, computers will produce scientific results, again yielding only one choice." "So even across oceans, town planning, educational instruction and such could be imposed on people." He was particularly concerned about this impact on decision making which fundamentally, he believes, influences the approach and manner of problem solving.

"In the year 2000 in politics it will require teams of technocrats to help the decision-maker; this could be an unwanted shift of involvement on people who make the decisions." Lattes stated that "in some countries hard thinking is inadequate." "Politicians who are just dialecticians will be outmoded." "Computers will govern more and more, as in the IMF and the technocrats who master the system will dominate it." The need to both separate man from machine and insure human predominance over mechanical decision-making is heavily underscored by Lattes.

"The computer changes the approach to problems—the machine and man must be kept separate. Man can make decisions in the absence of information or incomplete information (which are illogical bases of decision) and so if he has complete information as the computer may provide, his decision must prevail if he is to control the power of decision. As society improves and freedom grows when do the conflicting computer decisions arise? What is the economic good—is what the computer asks. Friendship is not an economic value, not recognized by computers."

Among the conclusions Lattes reaches are:

Computers must have a high degree of adaptability;

As in disciplines like mathematics, the human mind must learn the rules, theories, etc., not rely on the computer brain for everything;

Man's understanding of computers must increase, how they operate, retrieval of information and access methods; and

We should guard against abuses of this technology or of possible disappearance of learning for learning sake.

The second major "humanist" speaker was Professor Pecujlic of Yugoslavia. The relationships of forces of new technology, information cybernetics to the social framework was seen as paramount to Pecujlic. His question was how can he make human progress from the combination of the two? A great transformation is presenting itself, a new industrial revolution which makes obsolete groups of actors, where integrated transformation of sciences, planning, education and so forth are evolving. In this intermediary phase the computer is deeply involved.

According to Professor Pecujlic, two extremities of what may occur are often seen as man's only alternatives: (1) positive utopia where technology is an end in itself, we can automatically solve all human problems (values, ideologies and such are excluded), and (2) negative utopias where machines will rule people, technical dominance over mankind.

"Neither utopia is the solution. Social science must seek ways to link each technical development to the human interest and need. Social science must focus on these questions: What is the best organizational structure for the businessman and worker, democracy and authority? What forms or organization will foster democratic growth? Classical machine tools brought workers under its domain, beaucratic operation was used for maximum efficiency and rational management and organization of work was authoritarian. This is the historical type of economic activity: strict hierarchy—leadership, control. The future can take a much different form. The computer can liberate these traditional ways. It must not become a monopoly in information forces, such as restricting technology to the few, or allow oligopoly cybernetics."

Pecujlic called for three types of reforms:

(1) Greater interpersonal human relations because people don't act like machines.

(2) Human participation in machine made decisions—"the absence of it in decision making would be most dangerous."

(3) Integral production. An effort should be made to bridge over intellectual and physical work. Man can have a change in functions, will be freed of manual labors to participate in planning, development, etc.

As technology advances, Pecujlic sees an ordering of values vital in the qualitative and quantitative needs of man, stress being given to all around development in talents, culture.

"Relationships between human and material factors change, motivation is the prime condition for development." Democratic values emerge, this will be a post hierarchcial organization where no strict division exists of elite and mass in terms of decision making. A new type of leadership emerges where groups will have greater influence. Human needs would be put higher than corporate values. This is a model, I believe suited for the times we are entering. Its fruition depends on forces to carry through with technological and human participation. The key is giving democratic meaning to technical development."

Another report presented during the Information and Society panel was that of Mr. J. Lesourne, Director General, Society of Applied Mathematics of Paris, dealing with economic planning applications of the computer. The reconciliation of computer made economic planning decisions and the desire and need for individuals to participate in the decision-making process is seen as critical. Also, the question of decentralization of planning and decision-making is raised. Overall, the computer's role in economic planning will be of four types:

(1) Short term characterizing of economic forces for a limited period, especially important to monetary policy.

(2) Global long term model—looking for long view solutions and planning.

(3) Decision-making, simulation models, such as cost-benefit analysis.

(4) Structural model, capable of studying vast interactions.

The final rapporteur in this session was Professor Richard Bellman of the University of Southern California, whose remarks probably received the most conference-wide discussion of the week. In his presentation, Bellman tried to allay fears of computer domination of mankind by advancing two personal theories sharply to the contrary. The first is that large systems are inefficient and unfeasible; if created will soon fail. That computer systems, employing the scientific method must involve human judgment was his second hypothesis, Bellman endeavors to defang, as it were, assertions that advancements in computer applications will lead to concentration of large data bases controlling sizable decision-making jurisdictions eventually operating autonomously, devoid of human involvement.

These theories are premised on the belief that large systems grow so complex and require such intricate programs that they become inefficient and inoperable. Thus decentralization takes place. Further, the necessity for judgment will be ever present and the only source of judgment is the human brain. Therefore, decentralized computer systems, resting on human judgment will be needed to monitor any so-called "computerized society," not the reverse.

On the heels of this presentation, Dr. H. J. R. Grosch, National Bureau of Standards in Washington, launched into a roundtable discussion framed as "a jaundiced view of computers and society." His dichotomy was thus posed:

"It works both ways, you know—society expects far too much of computers and computer people, and computer people expect too much of society.

"Example of the first case: most lay types, from taxi drivers to business, government and military executives, really believe information systems can be built to solve (or present usefully condensed and interpreted information needed to solve) major problems. Like whether to put out a new product line, or how much to spend cleaning up Lake Erie, or whether Quick! Quick! to fire an ABM.

"Now, the other side: the computer trade, and other intellectuals, expect a depth of concern on the part of the rest of society that just isn't there—at least, not up until now. In the Pot generation? I certainly hope so. But today's adult, offered a choice between easy credit and privacy, will choose the new Monte Carlo (36 to 1 they didn't finish assembling it!) every time. I've said in recent speeches that our, you should pardon the expression, culture will be driven—by the population explosion, by an overstimulated demand for goodies, by inept education and thrashy entertainment—from privacy through exploitation to faceless anonymity."

Other roundtable participants scored utopian notions of technocracy. Professor Yantsch of Hanover believes there is complexity—uncertainty to be understood and eventually coped with because the computer is unique to make correlations of multivaried character. He believes a social science should be created at normative levels so computers could be directed within a value frame to give pragmatic outputs. Professor Tomovic of Belgrade seconded the views of his Yugoslavian colleague that "we can change the reality of the post-industrial revolution—authoritarianism can be part of the old technology—the computer may be changing all of this."

During the discussion periods throughout the week, these significant observations were made:

(1) Information is dangerous, like electricity. There are costs involved in making computers safe for users. The issue of privacy is not just a technical matter, there are policy problems of management. They involve rules, safeguards and remedies.

(2) A prescription for individual privacy in data age involves policies relating to four categories of concern: (a) protection against commercial exploitation of criminal ele-

ments, or misuse by government agencies of information; (b) restriction on access and allowing persons to inspect their own files; (c) protection of archival storage from physical damage, malicious users, and corruption operations; and (d) policies determing what goes into unique (one storehouse of data as medical records) large systems and what standards are to be maintained.

(3) Information systems are systems for dealing with our society not just arithmetical structures.

INFORMATION AND EDUCATION

The final segment of the conference was devoted to Information and Education. Several kinds of computing were described including administrative data processing, calculation, information systems (medical and library records) vehicle for CAI, CMI, simulation and the teaching medium. It was predicted that in the 1970's about ten percent of the one million elementary classrooms in the United States will be installed with computer terminals, costing from $200–$300 million. Trends in educational usage will be along the lines of contingent response, question and answer sytsems, use of theorem provers and voice to voice interaction between student and program. Presently, there is said to be an inadequate model of the student, such a psychological and pedagogical description is needed. The challenge to develop computer assisted education programs on the primary and secondary level as a standard part of instruction rather than especially for the slow learner or gifted child, is viewed as a major field to conquest.

Troubling educational applications of computer technology as well as government and commercial computer assistance are language deficiencies in creating artificial intelligence. Professor H. L. Dreyfus of the University of Berkeley noted several present problems (1) vagueness and imprecision of languages, (2) subjective properties of terms and concepts resulting in comprehension difficulties (3) context dependence, especially in speech analysis, and (4) pragmatic interpretation of situations (as interpreting the meaning of the command "Stand nearer me").

Assistant Secretary of Commerce Myron Tribus ably presided over this segment of the conference. Most educational applications of computers has taken place in the United States so it came as no surprise that nearly all the speakers were Americans. A joint presentation by Professors Edward Glaser and Frederick Way of Case Western Reserve University stressed the following points:

"Much has been said about the application of the computer to the educational process. Much of this has been predicated upon new and novel applications of the computer. It should be pointed out, however, that there is today a large number of places where the computer can be of immeasurable value in the educational process. Its primary use is making available to the student an environment in which new and meaningful investigation can take place that would not be possible in any other laboratory situation. In addition, because of the unique nature of the computing business, it offers new kinds of environments in which a 'gaming' situation can be established where the student can get a greater insight into the managerial as well as technical problems of this new and rather unique industry."

The principal concluding speaker contributed further positive contributions for computers. Speaking as President of IBM's World Trade Corporation, J. G. Maisonrouge capsuled a glowing array of societal implications, some of which are:

(1) Working men will be freed from routine work. Political leaders will be better able to evaluate their decision possibilities.

(2) A fairer society will evolve, energy applied for a better life will be available.

(3) The fears which are expressed against computer applications are by non-scientists. Those who caution the danger of data bases getting in the hands of the wrong people are raising unreal possibilities. Who would use such data for his own objectives? "I can assure you the people of computer science are not without conscience," he stated.

(4) The role of the computer is to do what it is told. Only those who don't know about computers (will) fear it. Truth is in this era of transition, we haven't reached full control or understanding of the new powers given us.

(5) The possibility of leisure civilizations are on the horizon, a 32-hour week, frequent personal travel, more quality literature, information better diffused and interpreted will be better for public life.

(6) An interdependence of nations will be created. Computers will lead to more homogeniety in the world. The very bright, cleanly scrubbed portrait of a world receiving ultimate benefit from computer technology capped the Bordeaux conference on a positive note. The negatives at Bordeaux were perhaps not so much a "pessimist" worldview as a strong caution signal pointed toward the somewhat overextended claims of computer largesse.

OBSERVATIONS

The prognosis of Bordeaux is far from a utopian conclusion, rather a grey mixture. Grand expectation of computer accomplishments are not diminished, only the nonnormative suppositions about societal impacts and the nonparticipatory decision making role to befall computer controllers. To many participants at the Man and Computer Conference, its heterogeneous collection of personages was ill advised. The fact that some persons were clearly representing the "interests" of man and others those of the computer could be construed as a striking gap in computer understanding.

This chasm illustrates the need for greater cross pollenization of social science and computer technology. A multi-disciplinary commitment seems essential. Consortia of leading specialists in many relevant fields building on the Bordeaux experience could achieve mutual understanding in some sensitive issues. Clearly, the unfortunate labeling of some as "optimists" and others "pessimists" must be abandoned.

The question of whether computer experts impart philosophic or pragmatic biases in the "new revolution" on mankind remains unanswered. It may be that acute recognition of the implications of this man-serving medium should be acknowledged. The decision-making guidance of programs, models, simulations, artificial knowledge and otherwise cybernetic capabilities must be imbued in those whose skills will pilot these machines. Similarly, unless an interdisciplinary role, particularly for governmental officials, academics, and business executives can be instilled, the over-the-shoulder role of policy makers to programmers appears inevitable.

Confusion exists over whether the software specialists program various value judgments or the results of computer operations, set forth from sterile sets of data, unavoidably render decisions giving support to one policy over another.

As data collected on individuals has been manipulated by government officials over the centuries, certain legal and administrative standards have evolved in each state. These reflect the tenets of constitutional, judicial, political, moral and other considerations ingrained in the organization and content of information systems established and modified according to such determinants. The author, believing the foregoing rules of government practice to be inherent in preautomated, manual individual file systems, contended at Bordeaux that the process (program) of mechanization of such files takes cognizance of such requirements.

These value structures are reflected in automated systems, perhaps less conscious and implicit than transforming operatives would realize, but nevertheless present. It is not a question of presence, nor which element in a society may have authored a value quality, rather, the recognition of these qualitative factors present in automated systems. Further, the normal transmission, manipulation of data bases may require additional value oriented regulations, to be prescribed by executives, legislatures, courts or computer program designers. The consciousness of social scientists to this presence and general rejection by computer operatives begs the question of empirical examination of the preautomation (manual state), chanegover phase, and computerized data base stages.

Another significant implication of the ultimate computer impact is its effect on the liberty of organized societies (political states). "Democrats" present at Bordeaux foresaw dramatic freeing of man once computer fruition has been realized. However, certain points believed pivotal to this utopian promise were raised. Broad computer understanding and access is stated as the solution to possible oligarchic control of the new "democratic" state. The Socialist (Communist) representatives from Yugoslavia believe the proletarian state will be further extended. The question of personal liberty contraction or expansion through the evolution of computer application, has only begun to be raised. Forerunners of a year 2000 computerized world should give this matter greater attention.

Innumerable other implications may arise in the minds of those who foresee serious ramification in modes of human life and organization with the fruition of this new technology. These abbreviated observations are designed to highlight some of the questions resulting from this highly informative, and controversial week-long conference under the exceedingly hospitable auspices of the Institut de la Vie of Paris.

---

## COUNTING ALL THE PEOPLE

(Mr. BETTS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. BETTS. Mr. Speaker, my interest in census reform continues as there is substantial unfinished work before the statutes and procedures of the Census Bureau become truly effective enumeration instruments. I am very pleased the Subcommittee on Census and Statistics under the able chairmanship of Congressman CHARLES WILSON is holding 2 weeks of hearings on the accuracy of the 1970 census. Several important municipal officials will appear as well as Census Bureau Director George H. Brown.

As I followed the preparation and execution of the 1970 census from April 1 I have become more and more troubled about the count in my district and many other areas of the country. In an effort to focus on urgent census reforms I have submitted a statement to the Census Subcommittee.

Mr. Speaker, I include my statement at this point:

COUNTING ALL THE PEOPLE

(A statement by Congressman JACKSON E. BETTS)

The basic reason for our national census, indeed the only Constitutional objective, is to count all of the people in the United States. Simple and direct as that statement is,

those charged with conducting decennial censuses have given the complete and accurate count of Americans less than foremost priority. For three years I have urged a number of important reforms in census procedure but inertia in the Census Bureau, opposition by Secretary of Commerce Stans and vested commercial interests have prevented many changes from occurring.

Without important reforms in census laws and procedures I predicted many Americans would never be enumerated by census officials. The 1970 census count began April 1st and its results are beginning to be released. I am deeply troubled with what I hear from local leaders in my area as well as dozens of reports across the country of serious undercounting. Let me indicate where I believe the Census Bureau failed in this census. Hearings by the House Subcommittee on Census and Statistics should underscore further reasons and the magnitude of decennial census problems.

The overall problem as I have often reiterated is that census directors care as much, possibly more, about counting toilets as people. For example, it was more important to extract or verify all but two or three answers to the long form's 100 questions than immediately beginning the job of tracking down millions of persons failing to return mail-out forms. For example, after test results indicated that inner city mail returns might be as law as 33%, this method was relied upon for urban enumeration. For example, highly sensitive questions on fertility, income and others unrelated to a headcount were stressed under penalty of fine or imprisonment.

In testimony before the House Census Subcommittee the 5.6 million undercount in 1960 has been described. It has been stated over and over that problems with minority groups, welfare recipients, hippies and other hostile to lengthy Governmental interrogation would increase in 1970. Knowing all this, only minor changes were made in the questionnaires and a dubious procedure relied on for 60% of the urban areas. I concur in the wisdom of developing an address register containing the identification of every dwelling unit in the country but question the advisability of excluding rural Americans from the mail-out/mail-back procedure. Inner city residents were sent these forms even though census officials planned a near complete recanvas of these localities. I believe the Census Bureau should have saved the cost, time and frustration of the mail technique in central city areas. Door-to-door canvasing should have begun on April 1. Hard to reach rural families should have been mailed their forms as an economy and efficiency measure.

The preoccupation with counting television sets, second homes, women's fertility and greatly detailed housing quality analyses, definitely played a part in an incomplete count. Time was a great factor in the census as a standstill portrait of the country to be made as of April 1, 1970. Reconstructing this profile as late as mid-August in a country as mobile as ours presents insurmountable problems.

The City of Washington is probably a good example of where 3.1% of the people were missed ten years ago and news reports indicate there is little reason to believe a similar percent won't be missed in 1970. Such a 3.1% error is 36,000 citizens, no insignificant figure. I praise the census officials and community organizations efforts to locate these missing persons in July, August and September. However, if a thorough house-to-house canvas began on April 1 the need for vain attempts to up the count would be unnecessary. Because of the approaches the Census Bureau adopted, its spokesmen can only say "we are beginning to feel that they're (the missing people) not out there." I presume no one will ever know if they are or not.

The notion of residency attaching to the place a person may be physically present on April 1 causes serious problems. I understand Columbus, Ohio, may have lost its Ohio State University student body of over 30,000 on vacation April 1 due to the spring vacation. Many communities—especially beach resorts like Fort Lauderdale—probably profited from this Census Bureau rule.

Ohio must be one state where the undercount exists. The *Columbus Dispatch* newspaper conducts regular opinion polls on issues and candidates preferences by voters attention county fairs in the state. One of the questions asked during August was "Were you counted in the U.S. Census?" Results in the four counties I have seen shown from 4–8% of the people were not counted.

Delaying cadres of door-to-door enumerators to inner city areas while the mail-back returns were awaited then batteries of telephone callers were instructed to press for completeness from the respondents was a precarious policy. Since no Census Bureau officials have tested nor prepared evidence on whether a part voluntary census would yield more cooperation and response it is difficult to measure the degree of subjective or overt hostility to the criminal penalty feature. Those who gave false information rebelling from the duress of compulsion will never be known.

Even when "final" population figures are released for every state and locality by December 1 and certified for congressional redistricting, the magnitude of the undercount of distorted count, will not be known. Some Mayors, Governors and Chamber of Commerce spokesmen claim they have such evidence by the time has already passed for recertification. It took four years to "find" the 5.7 million Americans missed in 1960. So we are essentially shadow boxing about the nature of the 1970 population totals.

The preliminary population in 1970 is 200 million. When the final canvas is finished and persons overseas added the count is expected to be 205 million. I can recall a Census Bureau expectation of a 210 million figure based on their own estimates. Perhaps the Subcommittee will explore the basis of that figure. I note Secretary Stans believes the Census Clock estimate on April 1 showed 204,828,260 will be "very close to the final count." Well, when the clock turned 200 million on November 20, 1967, officials acknowledged that the clock was as much as three million low in its population estimate. I feel the structure of the 1970 census was wrong and thousands of voices dissenting from preliminary counts seem to validate the point.

My program for better census policies—census reform—is not a negative program, however. For I have advanced many constructive legislative and procedural alternatives. I look with encouragement to Chairman Wilson's review of the 1970 census and hope Secretary Stans census review panel will act objectively and farsightedly in its deliberations. The time is ripe for a full-scale review of decennial census practices, we have 10 years to enact and refine improvements. My colleagues, the Census Bureau and American people can be assured I will not neglect this essential legislative task.

---

## THE TRADE ACT OF 1970 AND THE RETALIATION ARGUMENT—ANALYSIS BY McDONALD K. HORNE, JR.

(Mr. MILLS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MILLS. Mr. Speaker, during the past few months, when international trade legislation has been before the Congress, there has been some discussion of possible "retaliation" against American exports. The claim has been made that the type of balanced legislation which has been approved by the Committee on Ways and Means will result in massive reductions in foreign purchases of U.S. exports.

Mr. Speaker, such claims simply cannot be supported on any legal or practical grounds.

Mr. Speaker, the Committee on Ways and Means heard all of the arguments, pro and con, with regard to retaliation during our lengthy hearings on the Trade Act of 1970. After careful consideration, the committee approved the bill, not because it ignored the question of retaliation, but because it believed it has little validity.

Dr. McDonald K. Horne, former chief economist for the National Cotton Council, has prepared a careful analysis of possible retaliation as related to the Trade Act of 1970. Because Dr. Horne has spent most of his life working for the raw cotton interests—interests which depend upon a large export market—he is in a unique position to evaluate this subject.

Mr. Speaker, I include Dr. Horne's analysis in the RECORD:

THE TRADE ACT OF 1970 AND THE RETALIATION ARGUMENT

(By McDonald K. Horne, Jr., former chief economist, National Cotton Council)

Would the Trade Act of 1970 provoke retaliation?

The Trade Act of 1970, which is now before the U.S. Congress, contains as Title II some provisions to put restraints on the rising imports of man-made fiber textiles, wool textiles and leather footwear. This Title is a modified version of H.R. 16920, which was introduced earlier by Chairman Wilbur D. Mills of the House Ways and Means Committee and became widely known as "The Mills Bill". We shall refer to it herein as the "Mills Bill". The opponents of this bill argue that some of the countries exporting the affected articles would retaliate against us and thereby trigger an international trade war. It is said that the threat of retaliation comes especially from Japan and applies particularly to our exports of farm products.

This idea has gained wide circulation and has become the chief argument used against the bill. Typical is this editorial comment by a leading newspaper in a great cotton and soybean producing area:

"Japan has let it be known that if Washington should impose quotas on her textiles, she will retaliate by reducing her imports of United States agricultural products."

Japan is the largest importer of our cotton and soybeans. If the retaliation threat is genuine, it is an extremely serious matter. But likewise the import problem is extremely serions.

Two possibilities seem obvious: *Either* the retaliation threat is genuine—*OR* it is a scare tactic, adopted by the interests which profit directly from U.S. imports of these particular goods, and accepted uncritically by all those groups who habitually oppose any trade restrictions.

Which is the true situation?

Many people have strong inclinations to line up rather promptly on one or the other side of this question. For example, any one who depends heavily on an export market is

automatically inclined to oppose anything which raises the slightest threat, however thin and remote, of retaliation against our exports. This is understandable, and it may explain why a good many of our fine citizens have accepted the retaliation argument and are helping to promote it.

But for a cotton economist the issue is far from simple, since cotton is deeply involved with both sides of the argument. We depend heavily on raw cotton exports (now about 2.7 million bales a year) and we are heavily damaged by imports of cotton and man-made fiber textiles (now some 2.1 million bale equivalents per year, and rising steeply).

On the surface, the first inclination may be to accept the retaliation threat at face value. But for those of us who are obliged to look below the surface and search thoroughly for the facts of the matter, the picture is quite different. There seems to be impressive evidence that any responsible foreign government would be most reluctant to retaliate seriously against the mild restraints which the Mills Bill would provide.

The evidence will be summarized largely in terms of the affected imports which are of most concern to cotton people, namely man-made fiber textiles. It will be presented under four headings: (1) The acuteness of the problem and the mildness of the remedy, (2) Japan and our agricultural exports, (3) the policies of 1947 and the conditions of today, and (4) the lack of other arguments.

### THE ACUTENESS OF THE PROBLEM AND THE MILDNESS OF THE REMEDY

The size and momentum of our textile imports really do threaten destruction to great parts of the U.S. economy. In man-made fiber products the imports have nearly doubled in the last two years and now exceed a million cotton bale equivalents. In these, plus cotton products, the imports have more than doubled in the last five years and now exceed two million bales (equal to one-fourth of U.S. mill cotton consumption). The causes are (a) cheap foreign wages combined with worldwide access to textile capital and technology, and (b) the refusal of other advanced nations to accept a reasonable share of the exports from cheap-labor countries, thus forcing the bulk of them onto the relatively open U.S. market. These two factors give every sign that they will cause continued acceleration of the U.S. textile imports if our government policy permits.

In the face of this condition, the Mills Bill is astonishingly mild. Public attention centers on a formula which it provides for the establishment of unilateral import quotas, but few people seem to know that the bill clearly invites all countries to avoid the formula by negotiating bilateral agreements with the U.S. government. In reality the bill merely seeks to establish the same import plan for textiles of man-made fiber and wool, which has been in existence for cotton textiles since 1961. Since that year the cotton textile imports have increased from less than 400,000 to more than a million bale equivalents (and would have gone much higher if the domestic market had not been depressed by inter-fiber competition and a recession). The bill even cites the cotton arrangement as the kind of thing which is needed. Big new loopholes even exceeding those which have been used to expand the cotton textile quotas exist. Presumably the bilateral agreements would be negotiated by the same government agencies, including the State Department, which handled the cotton textile quotas.

The question arises as to how the advocates of important restraints can support the bill at all. The answer has to be that even the mildest restraints seem preferable to the sure economic destruction which otherwise seems in prospect.

### JAPAN AND OUR AGRICULTURAL EXPORTS

A tip-off as to the nature of the retaliation threat may be found in the fact that it is associated primarily with Japan and most of all with her imports of our agricultural products, particularly soybeans. To the superfiscial observer, this is the most likely place to expect trouble; but under any real analysis, it becomes about the most unlikely. Japan has lately become "the second economic power in the free world,"[1] and she has done this despite an "almost total lack of natural resources."[2] An economy built entirely on industry and on exports depends for its life on importations of raw materials and food.

Japan buys our soybeans, for example, because she needs them vitally. She already buys most of China's exportable soybean supply, and there is no practical outlook for much increase in that supply (loose threats to the contrary notwithstanding). In 1969 the world exports of soybeans came from the following countries:[3]

[In millions of bushels]

| | |
|---|---|
| United States | 311.1 |
| Mainland China | 18.2 |
| Brazil | 11.4 |
| All other | 1.7 |
| Total | 342.4 |

China's exports of soybean oil and meal were even less significant.

Last year 13.8 million bushels, or 76 percent, of China's soybean exports went to Japan. Any notion that this source of supply could become a damaging competitor for United States farmers seems far out of keeping with the following comments by the U.S. Department of Agriculture:[4]

"Since 1958, there has been a significant reduction in China's soybean acreage in compliance with the regime's general policy to convert land from low-yielding crops to high-yielding ones. (The soybean is considered a low-yielding crop.)

"Since 1963, it also has been the regime's policy to limit the acreage of 'economic crops' considerably below the 1957 level so that more land is made available for the production of food grains. Thus China's soybean production in the last decade is believed to have been considerably below the level of early 1950.

"Based on data from importing countries, exports of soybeans from Mainland China in 1969 appear to have been somewhat below the 1968 level. Exports in the last 6 years, however, have stabilized around 20 million bushels—far below the levels of the late 1950's and the 41 million bushels exported in 1960. . . . Exports to Japan in 1969 were the lowest since 1965 and no significant change is foreseen in 1970."

When we turn to cotton, the retaliation threat should come into clearer focus. We depend upon Japan as our greatest cotton export market. The Japanese textile industry buys American cotton and sells cotton textiles on the American market. Presumably the most logical place to promote the retaliation scare would be right here. The reason for little mention of cotton, however, is that cotton people have lived so close to this subject for so long that they tend to understand it.

Retaliation would not come from individual Japanese business firms. Quite sensibly, they buy their cotton where they can get the best deal. For example, they purchase about one-half of Mexico's export cotton year after year, although they sell virtually no textiles to Mexico. Last year Japan bought more cotton from Mexico, a near-zero customer for her textiles, than from the United States, her biggest customer for textile exports and for all exports.

Any practical decision to retaliate against American exports would have to come from the Japanese government rather than her business firms. But Japan's meteoric rise to economic power would have been impossible without direct help from this country and without our investment of American lives and treasure in Korea and Vietnam. Japan, like many other countries, has gained upon us in economic power while we bore the cost of defending her vital interests. Even if she were morally capable of striking us now in our time of trouble, she could not do so economically without incredible recklessness. Her strength rests on exports, and nearly one-third of her entire export trade is with the United States. Last year she sent us $5.0 billion worth of goods and imported only $3.5 billion from us. Would she gamble this kind of trade position by arousing our farmers and all our people against her? Would she be so irrational as to risk starting a trade war with a country which buys $1.5 billion more goods from her than it sells to her?

### THE POLICIES OF 1947 AND THE CONDITIONS OF TODAY

The United States "has played the leading role in creating the highly successful liberal world trade environment of the postwar period." These are the very true words of an advertisement sponsored in the *Wall Street Journal* by the Bank of Tokyo and Nissho-Iwai Co., Ltd.[5]

When the General Agreement on Tariffs and Trade was formulated in 1947, the United States had an overtowering advantage in world trade. The GATT was calculated to encourage other countries, prostrate from World War II, to pursue protective trade policies while we stood far out ahead in the liberalism of our own. Today our competitive position in the world is incomparably weaker than it was 23 years ago; great new trading blocs have arisen to weaken us further; and our balance of payments is chronically sick with no real cure in sight. Yet we are still expected to set a liberal trade standard which other countries do not follow.

As Stanley Nehmer, Deputy Assistant Secretary of Commerce, stated recently:[6]

"We are the only major market in the world without quantitative limitations on imports of wool and man-made fiber textiles and apparel. Many importing countries have unilaterally imposed restrictions. Other countries have reached bilateral agreements limiting trade. Japan, for example, has agreements with nine importing nations restricting trade in wool and man-made fiber textiles."

All the major Western European countries have discriminations against Japanese exports[7] and a host of devices to keep our textiles from less developed countries. Secretary of Commerce Maurice Stans testified recently as follows:[8]

"Data now available show that in 1968 while the United States took 20 percent of Japan's textile mill product exports, the European Economic Community imported only 3 percent. We imported 51 percent of Japan's apparel exports and the EEC took only 5 percent . . .

"We imported 38 percent of Hong Kong's apparel exports in 1968 (first half only) while the EEC took 14 percent. In the mill products sector, we imported 32 percent of Hong Kong's exports as against 2 percent for the EEC. We think the reason for this is that the European Community is deliberately keeping these goods out of their market . . .

"In short, our market has been open while others have been closed."

Footnotes at end of article.

The Common Market countries have a system of agricultural price supports which, in the estimate of U.S. Secretary of Agriculture Clifford M. Hardin, costs its citizens about $15 billion per year.[9] He points out with very justifiable concern that for at least two years the Common Market has been threatening to impose an import levy on soybeans.[10]

This serious threat exists quite apart from anything contained in the Mills Bill. It is conceivable, as some claim, that the Mills Bill could be used by the Common Market as an excuse for taxing soybeans; but if so, it would be only a cynical pretext for a step that was taken for other reasons. The Europeans are interested in such a levy as a means of bolstering their domestic markets for butter and coarse grains, as Secretary Hardin brings out. If the Europeans decide to tax soybeans and the Mills Bill is not available as a handy pretext, they can easily find another. We cannot afford to be intimidated by such threats today. We should oppose the soybean tax on its merits with every bargaining weapon at our command, but we should not allow it to divert our attention from the inequities already existing in the textile trade, in which the Europeans are far more protectionist than we are.

THE LACK OF OTHER ARGUMENTS

The suspicion arises that the Mills Bill opponents lean so heavily upon the retaliation argument because, however weak, it is the best one they have left. It cannot be absolutely disproved because no one can be sure that other nations will act rationally. It can only be replied that there comes a point (and we have reached it) when we have to assume that other nations will behave more like equal partners in responsibility, recognizing the up-to-date facts of our situation. But it is easier to wave a red flag of fear and intimidation over this inconclusive situation than to stand seriously upon any other arguments. There are indeed some other arguments which have been valid and powerful in the past. The opponents of the bill mention them fleetingly but do not pursue them, because they will not stand up before today's facts.

One is that "we must import if we want to export." This argument was overwhelming 15 or 20 years ago, when the whole world was obliged to scramble for our dollars. But that situation is long past. During the 1960's our imports grew from $15 to $36 billion while our trade surplus virtually disappeared; our gold holdings dropped by $6 billion; and foreign liquid claims on the dollar doubled and reached $42 billion. Moreover the Mills Bill involves no serious likelihood that our imports will be reduced or even held where they are.

Another possible argument is that any tampering with textile imports might worsen the problem of inflation. This potent theory is shaken badly when put to empirical tests. Across the past two years of rapidly rising prices (June 1968 to June 1970) textile products have been among the *least* inflation-prone. This is true both of cotton textiles (which are already under an import quota system) and of other textiles (which are not).

At the wholesale price level (which is most relevant to imports) the index for all industrial commodities rose 7.3 percent (from 108.8 to 116.7) while that for all textiles and apparel rose only 3.9 percent (105.2 to 109.3), and this increase occurred largely in import-dependent silk and jute products along with apparel. The index for cotton textile products rose only 1.1 percent (104.7 to 105.9), while there were declines of 1.0 percent in man-made fiber textiles (89.9 to 89.0) and of 1.0 percent in wool textiles (103.8 to 102.8).

The explanation is (1) that our fiber prices, on the whole, have declined even in the face of inflation, and (2) that our textile firms, as usual, have displayed the characteristics of an exceptionally competitive industry. The decline in corporate earnings since the second quarter of 1969 saw the net profit on sales of all manufacturers drop 22 percent by the first quarter of 1970 (from 5.1 to 4.0 percent) but that of textile companies dropped 34 percent (from 3.2 to 2.1 percent).

A third argument is the classical one that broad markets encourage efficiency. Free trade directs and stimulates every one to do what is best for all. But we already have within this country the blessings of a larger free trade economy than Adam Smith could possibly have envisioned for the whole world. Our textile manufacturers face the pressure of intense competition at home and of unfair competition from abroad, which is endlessly expanding.

It is time to recognize that competition of this kind can reach a level where it becomes quite damaging to efficiency. Down to the year 1966 our textile industry's investment in new plant and equipment showed a healthy upward trend, in line with the growth of demand and with the investments of other industries. But since 1966 the capital investment of the textile companies has gone into a steep decline (from $820 to $560 million) while the economy continued growing, as did the new investment in the equipment of new technology, but there obviously is increasing doubt that our own textile manufacturers would be wise to continue such investment. Their return on stockholders' equity has declined steeply since 1966 and is now 5.4 percent. It seems now that efficiency would be served by restraining some of the unfair competition, so that our domestic industry can achieve more of its own potential for progress in efficiency. Apparently benefits would accrue to consumers, as well as to the industry's workers, investors, and suppliers.

The Mills Bill is being opposed by an impressive list of economists under the aegis of the Committee for a National Trade Policy. Their appeal is based on the forthright claim that this bill is similar in its significance to the Smoot-Hawley Tariff Act of 1930.

This requires quite a leap of the imagination. The Smoot-Hawley Act of 1930 climaxed several decades of increasing protectionism. It gave us the highest tariffs in our history. The rates were placed so high that in 1931 our customs receipts averaged 53 percent of the value of dutiable imports, and in fact were largely prohibitive. But since that time we have had four decades of ever more liberal trade policies, so that in 1969 the average tariff on dutiable goods was only 11 percent.

A resolution opposing Smoot-Hawley was endorsed by virtually all the leading economists of 1930.[11] Clearly they were right. But we are living now in a completely different era against a background of highly contrasting circumstances. Consider the record of foreign trade leading up to the Smoot-Hawley Tariff as compared with that which now confronts us. These are the figures in thousands of dollars.[12]

| Year | Imports | Exports minus imports |
|---|---|---|
| 1924 | 3,610 | 888 |
| 1925 | 4,227 | 592 |
| 1926 | 4,431 | 281 |
| 1927 | 4,185 | 579 |
| 1928 | 4,091 | 934 |
| 1929 | 4,399 | 758 |
| 1964 | 18,647 | 6,831 |
| 1965 | 21,496 | 4,951 |
| 1966 | 25,463 | 3,926 |
| 1967 | 26,821 | 3,860 |
| 1968 | 32,964 | 624 |
| 1969 | 35,835 | 638 |

In the five years preceding 1930, imports rose by a net of only 22 percent, and exports kept reasonable pace. But in the five years preceding 1970, imports nearly doubled, and exports lagged badly. Prior to Smoot-Hawley, there was no significant weakening in our healthy trade surplus; but from 1964 to 1969, a surplus of about $7 billion largely disappeared.

When the Kennedy Round of tariff cuts was being proposed in the early 1960's our balance of payments was already being threatened, and the emergence of the Common Market as an inward-looking trade bloc was raising further concerns. The rationale of the Kennedy Round was that we could meet this problem by giving the world a further example of leadership in trade liberalism. It was theorized that if we encouraged a faster expansion of imports, we could induce other nations and trade blocs to accept such an expansion of our exports that our *net* export balance would be strengthened. The figures above show that the theory has worked very badly indeed.

Yet we are told now by the eminent economists that the way out of our difficulties is to push on further with the same theory. They say that the Mills Bill would be "as perilous to the nation's interest today as was the Tariff Act of 1930." They insist that even under present conditions our foreign friends would strike back at us for even such a modest effort to cope with our problems. Are other nations so impervious to reality, and our own diplomats so impotent, as to permit a trade war to grow out of this situation?

In 1930 we were carrying no world-wide military and economic burdens like those of today. We did not picture ourselves as a nation with unlimited power and obligation to support the world. In 1930 we held gold stocks as large as our annual imports, and there was no real strain upon our balance of payments.

In the relatively settled days when free trade was installed as a sure virtue in our textbooks, men could hardly dream of the explosive changes which have come to the world in the 1950's and 1960's. They could scarcely have imagined that colonialism would collapse so suddenly, or that communications, capital, and technology would spread in all directions so rapidly.

In 1930 men were accustomed to changes in international trade which came by relatively small increments from year to year. There is nothing in our previous experience which even compares with the pace and magnitude of the expansion in our textile imports during recent years.

Part of the conventional theory is that an advanced economy should be willing to abandon its more labor-intensive enterprises. As Mr. George Ball said recently on television,[13] we should be "moving more and more into the more sophisticated, capital-intensive kinds of production and leaving certain areas for the less developed countries. . . ." Textiles were mentioned as the classic case of an expendable industry. This is all very well for professional world traders and for academicians, but we have never before come up against the harsh reality of letting this theory destroy one of our greatest industries. Does practical judgment really say that this would be wise—wise at a time when we are already striving by a number of other governmental means to maintain our balance of payments? Who is to say that we can do without this basic part of our economy in years ahead?

No other "sophisticated, capital-intensive" nation has ever faced this practical condition and decided to let its textile industry go. As a matter of fact, we need only consider the nations now said to be threatening retaliation if we put very modest restraints on the exports of their *textile* industries. They are the other most "sophisticated, capital-intensive" countries in the world. Theories notwithstanding, they see no wisdom in giving up any potential textile market. Should we?

Footnotes at end of article.

The appeal made here is not to repudiate the men who wisely opposed the Smoot-Hawley Tariff or to belittle the need for expanding world trade. Rather it is that we should be realistic in pursuing policies which are right for our time and place in the world. Ever since World War II, our great and powerful country has been carrying the lion's share of the free world's military and economic burdens. Other nations have thrived on this relationship. In relative terms, our own economic strength has declined tremendously. Our national policy is now moving insistently toward a new relationship, in which other nations are expected to take responsibilities more in line with their capabilities. This is the only possible course for us, and we have to follow it in trade as in other fields. Other nations must not become outraged and vindictive when we take even very modest steps to protect our own economy, as they have long done.

As a matter of fact, there are strong off-the-record indications that responsible members of the Japanese government (and no doubt, of others) understand our position far better than the public is led to believe by the assorted private interests which are kicking up the talk about retaliation. If our diplomats are at all competent, they should be able to explain the need for the Mills Bill so that other governments will accept it with understanding.

Mr. Wilbur Mills of Arkansas, the able and respected Chairman of the House Ways and Means Committee, has long been known for his liberal attitude on trade policy. He makes it quite clear that his principles have not changed, but that neither has his capacity to grasp the realities of a changing world. The Mills Bill should be adopted.

## FEDERAL RESPONSIBILITY FOR UNITED NATIONS EXPENSES IN NEW YORK CITY

(Mr. RYAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. RYAN. Mr. Speaker, on September 16, the House passed the conference report on H.R. 16900, the Treasury, Post Office, and Executive Office appropriation bill. The House also agreed to the Senate amendment providing $1,650,000 for security protection for foreign dignitaries visiting the United Nations this year in connection with that body's 25th anniversary. This money should help offset expenses which would otherwise be incurred by the citizens of New York City.

In voting to pass the conference report, and to agree to the motion that the House recede from its disagreement with the Senate and concur in the Senate amendment, I was particularly mindful of the expenses which the city of New York has experienced in providing police protection to foreign dignitaries visiting, or located at, the United Nations. These expenses have been a constant drain on the budget of the city. And they are an unjustified drain, inasmuch as the United Nations is an international body of which this country is a member, and, therefore, the cost of maintaining such services should be borne by the entire Nation.

I have, in fact, introduced legislation, H.R. 589, which recognizes the on-going nature of the expenses incurred, and provides that the Secretary of State shall annually reimburse New York City for the portion of the costs of its police department which are attributable to providing protection to the United Nations and delegates thereto. I also introduced this legislation in the 90th Congress (H.R. 3161), the 89th Congress (H.R. 10568), and the 88th Congress (H.R. 3990).

It is entirely proper that funds be provided by H.R. 16900 to help assume a national burden which has hitherto been borne by New York City's citizens alone. I would hope, moreover, that, now that the House has by its vote recognized this problem, it will act to pass H.R. 589 and thus provide full reimbursement and ameliorate what is, in fact, a continuing problem.

## LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. LOWENSTEIN (at the request of Mr. KOCH), for today, on account of official business.

Mr. CLARK (at the request of Mr. ALBERT), for today, on account of official business.

Mr. NEDZI, for September 28 to October 8, on account of official business.

Mr. MCMILLAN (at the request of Mr. ALBERT), for today and the balance of the week, on account of official business.

Mr. HAGAN (at the request of Mr. ALBERT), for today, on account of official business.

## SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mrs. GREEN of Oregon, for 15 minutes, today, and to revise and extend her remarks and include extraneous matter.

(The following Members (at the request of Mr. GOLDWATER), to revise and extend their remarks and to include extraneous matter to:)

Mr. SCHADEBERG, on Thursday, September 24, for 30 minutes.

Mr. HALPERN, today, for 5 minutes.

(The following Member (at the request of Mr. SEBELIUS), to revise and extend his remarks and include extraneous matter:)

Mr. FINDLEY, for 5 minutes, today.

(The following Members (at the request of Mr. ALEXANDER), to revise and extend their remarks and include extraneous matter:)

Mr. ALBERT, for 10 minutes, today.

Mr. HAMILTON, for 10 minutes, today.

## EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the RECORD, or to revise and extend remarks was granted to:

Mr. DORN and to include extraneous matter.

Mr. MILLER of California and to include extraneous matter.

Mrs. MAY, immediately following the passage of Senate Joint Resolution 218 today.

(The following Members (at the request of Mr. GOLDWATER) and to include extraneous matter:)

Mr. CEDERBERG.
Mr. CARTER.
Mr. ROBISON.
Mr. HOSMER.
Mr. CONTE.
Mr. VANDER JAGT.
Mr. GERALD R. FORD.
Mr. SHRIVER.
Mr. HUNT.
Mr. BOB WILSON.
Mr. ZWACH.
Mr. RHODES.
Mr. STEIGER of Arizona.
Mr. COLLINS in three instances.
Mr. LLOYD.
Mr. BELCHER.
Mr. MCCLOSKEY in two instances.
Mr. SCHMITZ.
Mr. QUIE.

(The following Members (at the request of Mr. SEBELIUS) and to include extraneous matter:)

Mr. DERWINSKI in three instances.
Mr. DEL CLAWSON.
Mr. TALCOTT in three instances.
Mr. BOB WILSON in three instances.
Mr. AYRES.
Mr. CLANCY.
Mr. SKUBITZ in three instances.

(The following Members (at the request of Mr. STUCKEY) and to include extraneous matter:)

Mr. HANNA in five instances.
Mr. VANIK.
Mr. BINGHAM in two instances.
Mr. DADDARIO in two instances.
Mr. SYMINGTON.
Mr. REES.
Mr. BRINKLEY in three instances.
Mr. O'NEILL of Massachusetts in two instances.

Mr. TUNNEY.
Mr. ANDERSON of California.
Mr. BENNETT in two instances.
Mr. WOLFF.
Mr. WALDIE.
Mr. MONTGOMERY in two instances.
Mr. EILBERG in two instances.
Mr. YATES.

(The following Members (at the request of Mr. ALEXANDER) and to include extraneous matter:)

Mr. EDWARDS of California in two instances.
Mr. GALLAGHER.
Mr. MANN in five instances.
Mr. MOORHEAD in two instances.
Mr. PHILBIN in four instances.

## SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 1074. An act for the relief of Mr. and Mrs. Arvel Glinz; to the Committee on the Judiciary.

S. 2835. An act for the relief of Albert G. Feller and Flora Feller; to the Committee on the Judiciary.

S. 3942. An act to provide for thorough health and sanitation inspection of all livestock products imported into the United States, and for other purposes; to the Committee on Agriculture.

S. 4106. An act to amend the Public Health Service Act in order to provide for the establishment of a National Health Service Corps; to the Committee on Interstate and Foreign Commerce.

S. 4269. An act to provide for employment within the Environmental Protection Agency of commissioned officers of the Public Health Service, and for other purposes; to the Committee on Interstate and Foreign Commerce.

## SENATE ENROLLED BILLS SIGNED

The Speaker announced his signature to enrolled bills of the Senate of the following titles:

S. 406. An act to amend the Federal Property and Administrative Services Act of 1949 to permit the rotation of certain property whenever its remaining storage or shelf life is too short to justify its retention, and for other purposes;

S. 2565. An act to amend the Act fixing the boundary of Everglades National Park, Florida, and authorizing the acquisition of land therein, in order to increase the authorization for such acquisitions;

S. 2763. An act to allow the purchase of additional systems and equipment for passenger motor vehicles over and above the statutory price limitation;

S. 3153. An act to authorize the Secretaries of Interior and the Smithsonian Institution to expand certain sums, in cooperation with the territory of Guam, the territory of American Samoa, the Trust Territory of the Pacific Islands, other United States territories in the Pacific Ocean, and the State of Hawaii, for the conservation of their protective and productive coral reefs; and

S. 3777. An act to authorize the Secretary of the Interior to enter into contracts for the protection of public lands from fires, in advance of appropriations therefor, and to twice renew such contracts.

## BILLS PRESENTED TO THE PRESIDENT

Mr. FRIEDEL, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, bills of the House of the following titles:

H.R. 5365. A bill to provide for the conveyance of certain public land held under color of title to Miss Adelaide Gaines of Mobile, Ala.;

H.R. 13543. A bill to establish a program of research and promotion for United States wheat; and

H.R. 17795. A bill to amend title VII of the Housing and Urban Development Act of 1965.

## ADJOURNMENT

Mr. ALEXANDER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 41 minutes p.m.), the House adjourned until tomorrow, Thursday, September 24, 1970, at 12 o'clock noon.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2396. A communication from the President of the United States, transmitting a proposed supplemental appropriations for the fiscal year 1971 for the Department of Justice (H. Doc. 91–389); to the Committee on Appropriations and ordered to be printed.

2397. A letter from the Chairman, Indian Claims Commission, transmitting a report that proceedings have been finally concluded with respect to docket No. 198–A, *The Confederated Tribes of the Warm Springs Reservation of Oregon, Plaintiff,* v. *The United States of America, Defendant,* pursuant to 60 Stat. 1055, 25 U.S.C. 70t, sec. 21; to the Committee on Interior and Insular Affairs.

2398. A letter from the president, Jewish War Veterans, U.S.A. National Memorial, Inc., transmitting the annual audit report of the corporation for the fiscal year ended March 31, 1970; to the Committee on the Judiciary.

RECEIVED FROM THE COMPTROLLER GENERAL

2399. A letter from the Comptroller General of the United States, transmitting a report on problems in developing the Atomic Energy Commission's fast flux test facility; to the Committee on Government Operations.

2400. A letter from the Comptroller General of the United States, transmitting a report on the need for improved administration of Federal support of shore facilities and vessels for research activities at oceanographic institutions, National Science Foundation, Department of the Navy; to the Committee on Government Operations.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ICHORD: Committee on Internal Security. Report on proceedings against Arnold S. Johnson (Rept. No. 91–1461). Referred to the House Calendar.

Mr. STAGGERS: Committee of conference. Conference report on S. 2264 (Rept. No. 91–1462). Ordered to be printed.

Mr. BARRETT: Committee on Banking and Currency. H.R. 19172. A bill to provide Federal financial assistance to help cities and communities to develop and carry out intensive local programs to eliminate the causes of lead-based paint poisoning and local programs to detect and treat incidents of such poisoning, to establish a Federal demonstration and research program to study the extent of the lead-based paint poisoning problem and the methods available for lead-based paint removal, and to prohibit future use of lead-based paint in Federal or federally assisted construction or rehabilitation; with amendments (Rept. No. 91–1463). Referred to the Committee of the Whole House on the State of Union.

Mr. HOLIFIELD: Committee on Government Operations. House Resolution 1209. Resolution to disapprove Reorganization Plan No. 3 (Rept. No. 91–1464). Referred to the Committee of the Whole House on the State of the Union.

Mr. HOLIFIELD: Committee on Government Operations. House Resolution 1210. Resolution to disapprove Reorganization Plan No. 4 (Rept. No. 91–1465). Referred to the Committee of the Whole House on the State of the Union.

Mr. STAGGERS: Committee of conference. Conference report on S. 3558 (Rept. No. 91–1466). Ordered to be printed.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ASHBROOK:

H.R. 19412. A bill to provide a penalty for unlawful assault upon policemen, firemen, and other law enforcement personnel, and for other purposes; to the Committee on the Judiciary.

By Mr. BURTON of California (for himself, Mr. ASPINALL, Mr. SAYLOR, Mr. CAREY, Mr. STEIGER of Arizona, Mr. JOHNSON of California, Mr. KYL, Mr. TAYLOR, Mr. HOSMER, Mr. DON H. CLAUSEN, Mr. EDMONDSON, Mrs. MINK, Mr. O'HARA, Mr. FOLEY, Mr. RYAN, Mr. KASTENMEIER, Mr. MEEDS, Mr. TUNNEY, Mr. BURTON of Utah, Mr. MCCLURE, Mr. LUJAN, Mr. RUPPE, Mr. ALBERT, Mr. GERALD R. FORD, and Mr. MORTON):

H.R. 19413. A bill to provide that the unincorporated territories of Guam and the Virgin Islands shall each be represented in Congress by a Delegate to the House of Representatives; to the Committee on Interior and Insular Affairs.

By Mr. CORMAN:

H.R. 19414. A bill to amend title XI of the Federal Aviation Act of 1958 to provide that the Civil Aeronautics Board shall require the boycotting of certain movement by aircraft in cases of international aircraft hijacking, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. DULSKI (for himself and Mr. CORBETT):

H.R. 19415. A bill to amend title 5, United States Code, to provide for maximum entrance and retention ages, training, and early retirement for air traffic controllers, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. DUNCAN:

H.R. 19416. A bill to authorize appropriations for the construction of certain highways in accordance with title 23 of the United States Code, and for other purposes; to the Committee on Public Works.

By Mr. KOCH (for himself, Mr. ADDABBO, Mr. BRASCO, Mr. BROWN of California, Mr. CAREY, Mrs. CHISHOLM, Mr. CLAY, Mr. DADDARIO, Mr. DINGELL, Mr. DULSKI, Mr. EDWARDS of California, Mr. FARBSTEIN, Mr. FEIGHAN, Mr. FRASER, Mr. HARRINGTON, Mr. HAWKINS, Mr. HOWARD, Mr. MIKVA, Mr. MURPHY of New York, Mr. OTTINGER, Mr. PATTEN, Mr. PEPPER, Mr. PODELL, Mr. POWELL, and Mr. PRICE of Illinois):

H.R. 19417. A bill to establish a transportation trust fund, to encourage urban mass

transportation, and for other purposes; to the Committee on Ways and Means.

By Mr. KOCH (for himself, Mr. ROSENTHAL, Mr. RYAN, Mr. SCHEUER, Mr. STOKES, Mr. THOMPSON of New Jersey, Mr. CHARLES H. WILSON, and Mr. WOLFF):

H.R. 19418. A bill to establish a transportation trust fund, to encourage urban mass transportation, and for other purposes; to the Committee on Ways and Means.

By Mr. LOWENSTEIN:

H.R. 19419. A bill to make the provisions of the Vocational Education Act of 1963 applicable to individuals preparing to be volunteer firemen; to the Committee on Education and Labor.

By Mr. McCARTHY:

H.R. 19420. A bill to provide a penalty for unlawful assault upon policemen, firemen, and other law enforcement personnel, and for other purposes; to the Committee on the Judiciary.

By Mr. MOSS (for himself, Mr. MILLER of California, Mr. VAN DEERLIN, Mr. BURTON of California, Mr. LEGGETT, Mr. COHELAN, Mr. CORMAN, Mr. HANNA, Mr. SISK, Mr. HOLIFIELD, Mr. ANDERSON of California, and Mr. CHARLES H. WILSON):

H.R. 19421. A bill to amend the Federal Aviation Act of 1958, as amended, to authorize air carriers to engage in bulk air transportation of persons and property; to the Committee on Interstate and Foreign Commerce.

By Mr. ROBISON:

H.R. 19422. A bill to improve and implement programs to assure that U.S. residents have adequate quantities of safe drinking water by protecting them from chemical, biological, and physical contaminants in public water systems which may adversely affect their health; to the Committee on Interstate and Foreign Commerce.

By Mr. RYAN:

H.R. 19423. A bill to establish a Commission on Fuels and Energy to recommend programs and policies intended to insure that the U.S. requirements for low-cost energy be met, and to reconcile environmental quality requirements with future energy needs; to the Committee on Interstate and Foreign Commerce.

By Mr. SCOTT:

H.R. 19424. A bill to provide a penalty for unlawful assault upon policemen, firemen, and other law enforcement personnel, and for other purposes; to the Committee on the Judiciary.

By Mr. SYMINGTON:

H.R. 19425. A bill to extend the powers of the Federal Insurance Administration to make crime protection insurance available to small business concerns; to the Committee on Banking and Currency.

H.R. 19426. A bill to provide a comprehensive Federal program for the prevention and treatment of alcohol abuse and alcoholism; to the Committee on Interstate and Foreign Commerce.

H.R. 19427. A bill to prohibit flight in interstate or foreign commerce to avoid prosecution for the killing of a policeman or fireman; to the Committee on the Judiciary.

H.R. 19428. A bill to improve the administration of criminal justice by promoting professionalization of police, criminal court, prosecutorial, public defender, probation, parole, corrections, and related personnel, and for other purposes; to the Committee on the Judiciary.

By Mr. WYATT:

H.R. 19429. A bill; National Public Employee Relations Act; to the Committee on Education and Labor.

By Mr. BLATNIK (for himself, Mr. HORTON, Mr. CLARK, Mr. ROUDEBUSH, and Mr. OBEY):

H.R. 19430. A bill to amend the act creating the St. Lawrence Seaway Development Corporation to terminate the accrual and payment of interest on the obligations of the Corporation, and for other purposes; to the Committee on Public Works.

By Mr. BUSH:

H.R. 19431. A bill to amend title 10, United States Code, to equalize the retirement pay of members of the uniformed services of equal rank and years of service, and for other purposes; to the Committee on Armed Services.

By Mr. DANIELS of New Jersey:

H.R. 19432. A bill to enable consumers to protect themselves against arbitrary, erroneous, and malicious credit information; to the Committee on Banking and Currency.

By Mr. KOCH (for himself, Mr. LOWENSTEIN, Mr. SYMINGTON, and Mr. BIAGGI):

H.R. 19433. A bill to establish a transportation trust fund, to encourage urban mass transportation, and for other purposes; to the Committee on Ways and Means.

By Mr. LOWENSTEIN:

H.R. 19434. A bill to provide that the United States shall reimburse the States and their political subdivisions for real property taxes not collected on certain real property owned by foreign governments; to the Committee on Foreign Affairs.

H.R. 19435. A bill to reduce pollution which is caused by litter composed of soft drink and beer containers, and to eliminate the threat to the Nation's health, safety, and welfare which is caused by such litter by banning such containers when they are sold in interstate commerce on a no-deposit, no-return basis; to the Committee on Interstate and Foreign Commerce.

By Mr. PATMAN (for himself, Mr. BARRETT, Mrs. SULLIVAN, Mr. REUSS, Mr. ASHLEY, Mr. MOORHEAD, Mr. STEPHENS, Mr. ST GERMAIN, Mr. GONZALEZ, Mr. MINISH, Mr. HANNA, Mr. ANNUNZIO, Mr. REES, Mr. BRASCO, Mr. HARRINGTON, and Mr. HALPERN):

H.R. 19436. A bill to provide for the establishment of a national urban growth policy, to encourage and support the proper growth and development of our States, metropolitan areas, cities, counties, and towns with emphasis upon new community and inner city development, to extend and amend laws relating to housing and urban development, and for other purposes; to the Committee on Banking and Currency.

By Mr. PICKLE:

H.R. 19437. A bill to amend title XVIII of the Social Security Act to modify the nursing service requirement and certain other requirements which an institution must meet in order to qualify as a hospital thereunder; to the Committee on Ways and Means.

By Mr. TUNNEY:

H.R. 19438. A bill to establish a national program to promote conservation and comprehensive development on a regional basis in the United States, utilizing existing Federal programs in conjunction with new forms of Federal assistance, with particular emphasis upon constructive land use, maintenance of open spaces, and preservation of natural resources; to the Committee on Interior and Insular Affairs.

H.R. 19439. A bill to amend the Omnibus Crime Control and Safe Streets Act of 1968 to encourage and assist State and local governments in the development and implementation of certain law enforcement plans and programs, and for other purposes; to the Committee on the Judiciary.

H.R. 19440. A bill to assist in providing urgently needed housing, particularly housing for middle- and low-income families, in the United States; to the Committee on Ways and Means.

By Mr. FASCELL:

H. Con. Res. 748. Concurrent resolution authorizing the printing of additional copies of hearings entitled "Cuba and the Caribbean" for use of the Committee on Foreign Affairs, House of Representatives; to the Committee on House Administration.

By Mr. LANGEN:

H. Con. Res. 749. Concurrent resolution urging the President to determine and undertake appropriate actions with respect to stopping armed attacks on aircraft and passengers engaged in international travel; to the Committee on Foreign Affairs.

By Mr. DADDARIO:

H. Res. 1221. A resolution relating to the creation of a world environmental institute to aid all the nations of the world in solving common environmental problems of both national and international scope; to the Committee on Foreign Affairs.

By Mr. PERKINS (for himself, Mr. AYRES, Mr. THOMPSON of New Jersey, Mr. DANIELS of New Jersey, Mr. DENT, Mr. BRADEMAS, Mr. ERLENBORN, and Mr. ASHBROOK):

H. Res. 1222. A resolution amending House Resolution 200, 91st Congress; to the Committee on Rules.

## PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BROYHILL of Virginia:

H.R. 19441. A bill for the relief of Mrs. Winifred Patricia Christensen-Lonborg Malloy; to the Committee on the Judiciary.

By Mr. KOCH:

H.R. 19442. A bill for the relief of Stefan Schmid; to the Committee on the Judiciary.

By Mr. MOSS:

H.R. 19443. A bill for the relief of Khader Ibrahim Wahhab; to the Committee on the Judiciary.

## PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

597. By the SPEAKER: Petition of the city council, Los Angeles, Calif., relative to the treatment of American prisoners of war in Southeast Asia; to the Committee on Foreign Affairs.

598. Also, petition of the Congress of Micronesia, Saipan, Mariana Islands, Trust Territory of the Pacific Islands, relative to consultation between the United States and Micronesia prior to actions affecting the interests of the people of Micronesia; to the Committee on Foreign Affairs.

599. Also, petition of the Congress of Micronesia, Saipan, Mariana Islands, Trust Territory of the Pacific Islands, relative to the offer of Commonwealth status for Micronesia; to the Committee on Interior and Insular Affairs.

600. Also, petition of the Congress of Micronesia, Saipan, Mariana Islands, Trust Territory of the Pacific Islands, relative to the future status of Micronesia; to the Committee on Interior and Insular Affairs.

601. Also, petition of the Louisiana State Medical Society, New Orleans, relative to medical review organizations; to the Committee on Ways and Means.

602. Also, petition of the Slovene National Benefit Society, Chicago, Ill., relative to the extension of medicare benefits to the entire population; to the Committee on Ways and Means.

# SENATE—*Wednesday, September 23, 1970*

The Senate met at 10 a.m. and was called to order by the President pro tempore (Mr. RUSSELL).

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Almighty and everlasting God, who hast revealed Thy glory among the nations, grant that the vision of peace on earth and good will among men may never fade, however convulsive and violent the moment of history. May our determination to make peace a reality never fail. Grant that this Nation may now as always manifest the spiritual realities on which it is grounded and be a means of leading others to justice, friendship, and fraternity.

O merciful God, cast out all the evil things which cause wars and let Thy spirit rule the hearts of men in righteousness and love.

Through these difficult days give a higher wisdom, a transcendent judgment, and a righteous will to the President, to the Congress, and to all in positions of authority.

In the name of the Prince of Peace. Amen.

## MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States submitting nominations were communicated to the Senate by Mr. Leonard, one of his secretaries.

## EXECUTIVE MESSAGES REFERRED

As in executive session, the President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations received today, see the end of Senate proceedings.)

## THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Tuesday, September 22, 1970, be dispensed with.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## COMMITTEE MEETINGS DURING SENATE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Committee on Foreign Relations, the Committee on Finance, the Subcommittee on Small Business of the Committee on Banking and Currency, the Committee on Rules and Administration, the Subcommittee on Roads of the Committee on Public Works, and the Committee on the Judiciary be authorized to meet during the session of the Senate today.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## OBJECTION TO COMMITTEE MEETING

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Committee on Labor and Public Welfare be authorized to meet on national health insurance during the session of the Senate today.

Mr. SCOTT. Mr. President, I have heard objection on my side and must therefore, by request, reluctantly object.

The PRESIDENT pro tempore. Objection is heard.

## CIVIL SERVICE RETIREMENT OF TEMPORARY EMPLOYEES IN THE POST OFFICE DEPARTMENT

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 1210, S. 2984.

The PRESIDENT pro tempore. The bill will be stated by title.

The legislative clerk read as follows: S. 2984, to permit certain service performed as a temporary employee of the field service of the Post Office Department to be counted toward civil service retirement.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Post Office and Civil Service with an amendment to strike out all after the enacting clause and insert:

That section 115 of the Social Security Amendments of 1954 is hereby repealed.

SEC. 2. (a) The repeal of such section 115, made by the first section of this Act, shall not apply in the case of a person who, on the date of enactment of this Act, is receiving or is entitled to receive benefits under any retirement system established by the United States or any instrumentality thereof unless he requests, in writing, the office which administers his retirement system to apply it in his case.

(b) Any additional benefits payable pursuant to a request made under subsection (a) of this section shall commence on the first of the month following enactment of this Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to permit certain Federal employment to be counted toward retirement."

## AIRPORT POLICE FORCES

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 1211, S. 3958.

The PRESIDENT pro tempore. The bill will be stated by title.

The legislative clerk read as follows: S. 3958, to adjust the pay of employees of the Federal Government, and for other purposes.

The PRESIDENT pro tempore. Is there objection of the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Post Office and Civil Service with amendments, on page 1, line 8, after "(one year)", strike out "the initial rate for GS–7"; and insert "—the rate for GS–7, step 1"; and on page 2, at the beginning of line 9, strike out "thirty days" and insert "on or after the thirtieth day"; so as to make the bill read:

S. 3958

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the annual rates of basic pay of positions on the police forces of the Washington National and Dulles International Airports of the Federal Aviation Administration of the Department of Transportation shall be fixed in accordance with the following classifications:

(1) Private trainee (one year)—the rate for GS–7, step 1;

(2) Private—the rate for GS–7, step 5;

(3) Corporal—the rate for GS–8, step 5;

(4) Sergeant—the rate of GS–9, step 5;

(5) Lieutenant—the rate for GS–10, step 5;

(6) Captain—the rate for GS–11, step 5;

(7) Chief—the rate for GS–12, step 5;

SEC. 2. (a) Section 1 of this Act shall become effective at the beginning of the first pay period which commences on or after the thirtieth day after the day of enactment of this Act.

(b) No rate of basic pay shall be reduced by reason of the enactment of this Act.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to adjust the pay of the police forces at Washington and Dulles Airports."

## THE CALENDAR

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendars Nos. 1227 through 1231.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## NATIONAL EMPLOY THE OLDER WORKER WEEK

The joint resolution (S.J. Res. 74) to provide for the designation of the first full calendar week in May of each year as "National Employ the Older Worker Week" was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the President is authorized and requested to issue a proclamation designating the first full calendar week in May of each year as "National Employ the Older Worker Week" and calling upon employer and employee organizations, other organizations officially concerned with employment, and upon all the people of the United States to observe such week with appropriate ceremonies, activities,

and programs designed to increase employment opportunities for older workers and to bring about the elimination of discrimination in employment because of age.

The preamble was agreed to, as follows:

Whereas many older workers have difficulty finding and retaining employment despite their experience, stability, dependability, energy, and enthusiasm; and

Whereas failure of qualified older workers to find employment is unfortunate from the standpoint of the Nation in that there is a failure to take full advantage of their potentials for helping the Nation to reach its objectives; and there is an increased possibility that they and their dependents will need public assistance and a decreased possibility that they will pay taxes; and

Whereas the unemployability of qualified older workers not only impoverishes them in the present but can also reduce future retirement income due to inability to acquire social security quarters of coverage and credits under other retirement systems; and

Whereas unemployability of qualified older workers may adversely affect younger members of their families as well as themselves; and

Whereas Congress, in enacting the Age Discrimination in Employment Act of 1967 (Public Law 90–202), recognized the necessity of implementing the national policy of prohibiting age discrimination in employment with an active program of education and information concerning the advantages of employing older workers; and

Whereas the American Legion has, for approximately ten years, designated the first week in May of each year as "National Employ the Older Worker Week", which it celebrates by commending employers who have taken the leadership in employing older workers: Now, therefore, be it

## NATIONAL EMPLOY THE PHYSICALLY HANDICAPPED WEEK

The joint resolution (S.J. Res. 110) to amend the joint resolution entitled "Joint resolution to establish the first week in October of each year as "National Employ the Physically Handicapped Week," approved August 11, 1954 (59 Stat. 530), so as to broaden the applicability of such resolution to all handicapped workers was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the first two sentences of the joint resolution entitled "Joint resolution to establish the first week in October of each year as National Employ the Physically Handicapped Week", approved August 11, 1945 (59 Stat. 530), are amended to read as follows: "That hereafter the first week in October of each year shall be designated as National Employ the Handicapped Week. During such week appropriate ceremonies shall be held throughout the Nation, the purposes of which will be to enlist public support for and interest in the employment of otherwise qualified but handicapped workers."

## FATHER'S DAY

The joint resolution (S.J. Res. 187) to authorize the President to designate the third Sunday in June of each year as Father's Day was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S.J. RES. 187

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the third Sunday in June of each year is hereby designated as "Father's Day". The President is authorized and requested to issue a proclamation calling on the appropriate Government officials to display the flag of the United States on all Government buildings on such day, inviting the governments of the States and communities and the people of the United States to observe such day with appropriate ceremonies, and urging our people to offer public and private expressions of such day to the abiding love and gratitude which they bear for their fathers.

## NATIONAL BLOOD DONOR MONTH

The joint resolution (S.J. Res. 223) to authorize and request the President to issue annually a proclamation designating the month of January of each year as "National Blood Donor Month" was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S.J. RES. 223

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That, in recognition of the vital contribution of the voluntary blood donor to medical care, the President is authorized and requested to issue annually a proclamation designating the month of January of each year as "National Blood Donor Month", and calling upon the people of the United States and interested groups and organizations to observe such month with appropriate ceremonies and activities.

## NATIONAL MULTIPLE SCLEROSIS SOCIETY ANNUAL HOPE CHEST APPEAL WEEKS

The joint resolution (S.J. Res. 226) to authorize the President to proclaim the period from May 9, 1971, Mother's Day, through June 21, 1971, Father's Day, as the "National Multiple Sclerosis Society Annual Hope Chest Appeal Weeks" was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the President of the United States is authorized and requested to issue a proclamation—

(1) designating the period from May 9, 1971, Mother's Day, through June 20, 1971, Father's Day, as "National Multiple Sclerosis Society Annual Hope Chest Appeal Weeks";

(2) inviting the Governors of the several States to issue proclamations for like purposes; and

(3) urging the people of the United States and educational, philanthropic, scientific, medical, and health care professions and organizations to provide the assistance and resources necessary to discover the cause and cure of multiple sclerosis and to alleviate the suffering of persons stricken by this disease.

The preamble was agreed to, as follows:

Whereas five hundred thousand Americans, stricken usually between the ages of twenty and forty years, are affected by the ravages of multiple sclerosis and related neurological diseases; and

Whereas two million members of American families are deeply concerned with the financial and emotional problems of this disease; and

Whereas multiple sclerosis predominantly strikes young fathers and mothers in their wage-earning and family-building years and reduces the buying power of such families; and

Whereas such reduction results in a $2,000,000,000 annual economic loss to the Nation and forces the removal of two out of every three disabled multiple sclerosis victims from the Nation's work force; and

Whereas multiple sclerosis remains a disease of unknown causes, unpredictable course, and undiscovered cure; and

Whereas the National Multiple Sclerosis Society, which is celebrating its twenty-fifth anniversary in 1971, has launched a five-year research development plan to explore as quickly as possible promising clues that may lead to methods which will prevent, or more effectively treat, multiple sclerosis: Now, therefore, be it

The title, as amended, was agreed to, as follows: "Joint resolution to authorize the President to proclaim the period from May 9, 1971, Mother's Day, through June 20, 1971, Father's Day, as the 'National Multiple Sclerosis Society Annual Hope Chest Appeal Weeks.'"

Mr. MANSFIELD. Mr. President, that concludes the call of the calendar.

## ORDER FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business with statements therein limited to 3 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## VACATING OF ORDER FOR RECOGNITION OF SENATOR KENNEDY TODAY

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the special order recognizing the distinguished senior Senator from Massachusetts (Mr. KENNEDY) for 15 minutes today be vacated.

The PRESIDENT pro tempore. Without objection, that order will be vacated.

## COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

REPORT ON FINAL CONCLUSION OF CLAIMS OF CERTAIN INDIANS

A letter from the Chairman, Indian Claims Commission, Washington, D.C., reporting, pursuant to law, on the final conclusion of judicial proceedings in Docket No. 198–A, the Confederated Tribes of the Warm Springs Reservation of Oregon, plaintiff, against the United States of America, defendant (with an accompanying paper); to the Committee on Appropriations.

A letter from the Chairman, Indian Claims Commission, Washington, D.C., reporting, pursuant to law, on the final conclusion of proceedings with respect to the claims in Dockets Nos. 105, 106, 107 and 108, the Osage Nation, plaintiff, against the United States of America, defendant (with accompanying papers); to the Committee on Appropriations.

REPORTS OF COMPTROLLER GENERAL

A letter from the Comptroller General of the United States, transmitting, pursuant to

law, a report on need for improved administration of Federal support of shore facilities and vessels for research activities at Oceanographic institutions, National Science Foundation, Department of the Navy, dated September 23, 1970 (with an accompanying report); to the Committee on Government Operations.

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on problems in developing the Atomic Energy Commission's Fast Flux Test Facility, dated September 23, 1970 (with an accompanying report); to the Committee on Government Operations.

REPORT OF THE JEWISH WAR VETERANS U.S.A. NATIONAL MEMORIAL INC.

A letter from the president, Jewish War Veterans U.S.A. National Memorial Inc., transmitting, pursuant to law, a report of the organization for the fiscal year ended March 31, 1970 (with an accompanying report); to the Committee on the Judiciary.

## PETITIONS

Petitions were laid before the Senate and referred as indicated:

By the PRESIDENT pro tempore:

Three joint resolutions of the Congress of Micronesia; to the Committee on Interior and Insular Affairs:

"HOUSE JOINT RESOLUTION No. 82, S.D. 1

"A House joint resolution urging the United States to consult with the Congress of Micronesia and the High Commissioner of the Trust Territory of the Pacific Islands prior to entering into treaties, enacting legislation or issuing administrative orders that would have any effect on the economy or the business interests of the people of Micronesia, or affect the legal interests of the people of Micronesia

"Whereas, on April 2, 1947, the United Nations Security Council by unanimous vote, and on July 18, 1947, the United States Senate did approve a Trusteeship Agreement between the United States and the United Nations regarding the administration of the islands, exclusive of Guam, known collectively as Micronesia; and

"Whereas, by the acceptance of this Agreement, the United States bound itself to act in accordance with the letter and spirit of the United Nations Charter, the International Trusteeship System, and the Trusteeship Agreement itself; and

"Whereas, the said Charter, System, and Agreement demanded of the United States, and of all other signees, certain obligations, which the United States did freely and of its own accord, take upon itself in regard to the islands of Micronesia, hereinafter referred to as the Trust Territory; and

"Whereas, under the Trusteeship Agreement the United States undertook to 'foster the development of such political institutions as are suited to the trust territory' and 'promote the development of the inhabitants of the trust territory toward self-government or independence,' according to the 'freely expressed wishes of the people concerned,' and, to these ends, to give the inhabitants a progressively increasing share in the administrative services of the Trust Territory, and to develop their participation in government; and

"Whereas, the United States released Japan under a treaty signed on April 18, 1969, of all liabilities to the residents of Micronesia for their claims, including debts, against Japan and its nationals in return for an *ex gratin* contribution of $5,000,000 in the form of products and services, when in fact no extensive preliminary public hearings were held in the Trust Territory to obtain reliable figures as to the total damage claims involved and the Congress of Micronesia was not consulted prior to the acceptance of this Agreement by the United States and Japan; and

"Whereas, pursuant to that Agreement, the United States accorded Japanese fishing vessels access to the ports of Truk and Palau for provisioning purposes without prior consultation with the Congress of Micronesia or the High Commissioner of the Trust Territory; and

"Whereas, pursuant to that Agreement, the United States further accorded the Government of Japan and its nationals the opportunity to salvage and freely dispose of ships sunk in the territorial waters of the Trust Territory which were of Japanese nationality at the time of sinking without consulting the Congress of Micronesia or the High Commissioner of the Trust Territory; and

"Whereas, Pan American World Airways is now seeking permission from the United States Civil Aeronautics Board to make a regular commercial stopover in Saipan, and yet neither the Congress of Micronesia nor the High Commissioner has been consulted by the United States; and

"Whereas, Japan Air Lines has reportedly received tentative approval from the United States to commence service between Tokyo and Saipan on January 1, 1971, and yet neither the Congress of Micronesia nor the High Commissioner of the Trust Territory has been consulted or even received notice of this tentative agreement; and

"Whereas, each of these recent actions will have a significant impact on the economy or the business interests of the people of Micronesia or will affect the legal rights of the people of Micronesia against the United States and other nations; now, therefore,

"Be it resolved by the House of Representatives of the Third Congress of Micronesia, Third Regular Session, 1970, the Senate concurring, that this Congress by means of this Joint Resolution and on behalf of the people of Micronesia respectfully urge the United States of America to refrain from entering into treaties with other nations, or enacting legislation, or issuing administrative orders pertaining to Micronesia that would have any effect on the economy or the business interests of the people of Micronesia or affect the legal rights of the people of Micronesia against the United States, Japan, or any other nation unless and until it has consulted fully with the Congress of Micronesia and the High Commissioner of the Trust Territory of the Pacific Islands; and

"Be it further resolved that certified copies of this Joint Resolution be transmitted to the President of the United States, the President of the Senate of the United States Congress, the Speaker of the House of Representatives of the United States Congress, the President of the Trusteeship Council of the United Nations, the Secretary of the Department of the Interior, and the High Commissioner of the Trust Territory of the Pacific Islands."

"HOUSE JOINT RESOLUTION No. 90, H.D. 1

"A House joint resolution declaring that the offer of Commonwealth status for Micronesia in the form that was presented to the Congress of Micronesia through its Political Status Delegation during discussions in May with representatives of the Executive Branch of the United States Government is not acceptable to the Congress of Micronesia

"Whereas, during discussions with the Political Status Delegation of the Congress of Micronesia in May, 1970, a United States Delegation headed by Assistant Secretary of the Interior Harrison Loesch, representing the Executive Branch of the United States Government, submitted an offer of Commonwealth status for Micronesia to the Congress of Micronesia; and

"Whereas, the Political Status Delegation considered this offer during the discussions and found it to be unacceptable because it failed to recognize or conform to the four principles and legal rights which it maintained were an essential and nonnegotiable component of any free association between the United States and Micronesia; and

"Whereas, this Congress has officially endorsed the four principles and legal rights which the Political Status Delegation maintained must be recognized as an essential and nonnegotiable component of any free association, and has declared that any future association between the United States and Micronesia must be in accordance with those principles and legal rights; now, therefore,

"Be it resolved by the House of Representatives of the Third Congress of Micronesia, Third Regular Session, 1970, the Senate concurring, that the Congress of Micronesia hereby declares that the offer of Commonwealth status for Micronesia in the form that was presented to the Congress of Micronesia through its Political Status Delegation during discussions in May with representatives of the Executive Branch of the United States Government is not acceptable to the Congress of Micronesia; and

"Be it further resolved that certified copies of this Joint Resolution be transmitted to the President of the United States; to the President of the Senate and Speaker of the House of Representatives of the United States Congress; to the Secretary General, the Security Council and the Trusteeship Council of the United Nations; and to the High Commissioner of the Trust Territory of the Pacific Islands."

"HOUSE JOINT RESOLUTION No. 102, S.D. 1

"A House joint resolution providing for the establishment of a Joint Committee on Future Status and prescribing its duties and responsibilities

"Be it resolved by the House of Representatives of the Third Congress of Micronesia, Third Regular Session, 1970, the Senate concurring, that there is hereby created a Joint Committee of the Congress of Micronesia, to be known as the Joint Committee on Future Status, hereinafter referred to in this resolution as the Committee, consisting of not more than twelve members of the Congress of Micronesia to be appointed jointly by the President of the Senate and the Speaker of the House of Representatives. The Committee shall remain in existence until dissolved by the Congress of Micronesia. Members shall serve for such terms as the Presiding Officers may prescribe, and the Presiding Officers shall make appointments to fill any vacancy which may occur on the Committee. At their first meeting, members of the Committee shall by majority vote elect a Chairman and such other officers as they deem necessary; and

"Be it further resolved that the purpose of the Committee shall be to continue the work of the Future Political Status Commission and the Micronesian Political Status Delegation relating to the termination of the Trusteeship Agreement and Trusteeship Status and the obtaining of a new political status for Micronesia when Trusteeship ends; and

"Be it further resolved that the Committee shall perform such acts as it deems necessary to carry out the duties and responsibilities assigned to it by the Congress of Micronesia, and shall exercise all the powers and authority of other standing committees of the Congress of Micronesia; and

"Be it further resolved that the Committee shall have the following duties and responsibilities:

"(a) To conduct political education within Micronesia;

"(b) To conduct a study on the economic implications of Free Association and Independence. Such a study should include, but

not be limited to the following: (1) An estimation of the public finance and technical assistance required to provide the current level of governmental services; (2) An investigation of possible sources of financial aid and technical assistance; (3) An analysis of ways and means to increase local revenue; (4) An analysis of labor and capital requirements, especially public investment, necessary for development in each economic sector; (5) An analysis of implications of the Government of Micronesia controlling such economic activities as outside investment, lease of land, trade agreements, tariffs, shipping, airline routes, and alien labor; and (6) An analysis of alternative means to provide the present level of government services at a lower cost;

"(c) To conduct a study of the alternative forms of democratic internal government available, and prepare basic constitutional proposals for submission as working papers to the Micronesian Constitutional Convention; and study and make recommendations concerning the organization and timing of a Constitutional Convention;

"(d) To establish contacts and discuss the status question with appropriate persons and organizations within the United States, and in the United Nations, and solicit understanding and support of the position of the Congress of Micronesia on the status question;

"(e) To continue discussions and negotiations with the United States Government on the future political status of the Trust Territory. In carrying out such activities, the Committee and all its members shall to the best of their ability adhere to the desires and policies of the Congress of Micronesia as expressed by resolution or otherwise, and all actions of the Committee shall be subject to subsequent ratification by the Congress of Micronesia; and

"(f) To perform such other functions or duties as the Congress of Micronesia may by law or resolution prescribe; and

"Be it further resolved that the Committee shall submit reports of its activities, findings, and recommendations to the Congress of Micronesia at each regular session of the Congress of Micronesia. Unless otherwise provided by bill or resolution, the Committee shall keep the people of Micronesia informed as to its work; and

"Be it further resolved that the Committee shall contract or otherwise engage the services of, such professional, technical, administrative, stenographic, and clerical staff as it deems necessary to carry out its duties and responsibilities, and as is provided for by appropriation of the Congress; and

"Be it further resolved that certified copies of this Joint Resolution be transmitted to the Secretary General, Security Council and the Trusteeship Council of the United Nations; the President of the United States, the Secretary of State, the Secretary of Defense and the Secretary of the Interior of the United States; the President of the Senate and the Speaker of the House of Representatives, and the Chairman of the Senate and House Committee on Interior and Insular Affairs of the United States Congress; and the High Commissioner."

## ENROLLED BILLS SIGNED

The PRESIDENT pro tempore announced that on today, September 23, 1970, he signed the following enrolled bills, which had previously been signed by the Speaker of the House of Representatives:

H.R. 5365. An act to provide for the conveyance of certain public land held under color of title to Miss Adelaide Gaines of Mobile, Ala.;

H.R. 13543. An act to establish a program of research and promotion for United States wheat; and

H.R. 17795. An act to amend title VII of the 1965.

## REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. JORDAN of North Carolina, from the Committee on Rules and Administration, without amendment:

S. Res. 458. Resolution authorizing the printing of a history of the Committee on Agriculture and Forestry as a Senate document (Rept. No. 91–1222);

S. Res. 460. Resolution authorizing the Committee on Banking and Currency to expend additional funds from the contingent fund of the Senate;

S. Res. 465. Resolution authorizing additional expenditures by the Committee on the Judiciary for a study of matters pertaining to improvements in judicial machinery (Rept. No. 91–1223);

S. Res. 466. Resolution authorizing additional expenditures by the Committee on the Judiciary for a study of matters pertaining to refugees and escapees (Rept. No. 91–1224);

S. Res. 467. Resolution authorizing the printing of additional copies of Senate hearings on National Science Foundation Authorization, 1971 (Rept. No. 91–1225);

S. Res. 468. Resolution authorizing additional expenditures by the Committee on Commerce (Rept. No. 91–1226); and

S. Con. Res. 81. Concurrent resolution authorizing the printing of additional copies of Senate hearings on Copyright Law Revision (S. 597, 90th Congress) (Rept. No. 91–1227).

By Mr. JORDAN of North Carolina, from the Committee on Rules and Administration, with amendments:

S. Res. 413. Resolution proposing an addition to Rule XVI of the Standing Rules of the Senate (Rept. No. 91–1228).

By Mr. CRANSTON, from the Committee on Labor and Public Welfare, with amendments:

S. 3656. A bill to amend chapter 37 of title 38, United States Code, to authorize guaranteed and direct loans for mobile homes if used as permanent dwellings, to authorize the Administrator to pay certain closing costs for, and interest on, certain guaranteed and direct loans made under such chapter, to remove the time limitation on the use of entitlement to benefits under such chapter and to restore such entitlements which have lapsed prior to use or expiration, to eliminate the guaranteed and direct loan fee collected under such chapter, and for other purposes; (Rept. No. 91–1230);

S. 3657. A bill to amend chapter 34 of title 38, United States Code, to authorize advance educational assistance allowance payments to eligible veterans at the beginning of any school year to assist such veterans in meeting educational and living expenses during the first two months of school, and to establish a veterans' work-study program through cancellation of such advance payment repayment obligations under certain circumstances (Rept. No. 91–1231);

S. 3785. A bill to amend title 38, United States Code, to authorize educational assistance and home loan benefits to wives of members of the Armed Forces who are missing in action or prisoners of war (Rept. No. 91–1232); and

H.R. 370. An act to amend chapter 39 of title 38, United States Code, to increase the amounts allowed for the purchase of specially equipped automobiles for disabled veterans, and to extend benefits under such chapter to certain persons on active duty (Rept. No. 91–1233).

## REPORT ENTITLED "ADMINISTRATIVE PRACTICE AND PROCEDURE"—REPORT OF A COMMITTEE (S. REPT. NO. 91–1220)

Mr. KENNEDY, from the Committee on the Judiciary, pursuant to Senate Resolution 39, 91st Congress, first session, submitted a report entitled "Administrative Practice and Procedure", which was ordered to be printed.

## REPORT ON ADMINISTRATIVE PRACTICES AND PROCEDURES—REPORT OF A COMMITTEE (S. REPT. NO. 91–1221)

Mr. McCLELLAN, from the Committee on the Judiciary, pursuant to Senate Resolution 237, 90th Congress, second session, submitted a report of the Special Subcommittee on Criminal Laws and Procedures, which was ordered to be printed.

## SENATE JOINT RESOLUTION 236—ORIGINAL RESOLUTION REPORTED (S. REPT. NO. 91–1229)

Mr. JORDAN of North Carolina, from the Committee on Rules and Administration, reported an original joint resolution (S.J. Res. 236) authorizing the preparation and printing of a revised edition of the Constitution of the United States of America—Analysis and Interpretation, of decennial revised editions thereof, and biennial cumulative supplements to such revised editions, and submitted a report thereon, which joint resolution was placed on the calendar and the report was ordered to be printed.

## BILLS AND A JOINT RESOLUTION INTRODUCED OR REPORTED

Bills and a joint resolution were introduced or reported, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. COTTON (for himself and Mr. MAGNUSON) (by request):

S. 4383. A bill to provide for the protection of persons and property aboard U.S. air carrier aircraft, and for other purposes.

Mr. MANSFIELD subsequently said: Mr. President, I ask unanimous consent that the bill introduced by Mr. COTTON (for himself and Mr. MAGNUSON), by request, be jointly referred to the Committee on Commerce and the Committee on Finance.

The PRESIDING OFFICER (Mr. McGOVERN). Without objection, it is so ordered.

By Mr. MANSFIELD:

S. 4384. A bill for the relief of Shan W. Wofford; to the Committee on the Judiciary.

By Mr. INOUYE:

S. 4385. A bill for the relief of Violetta Bravo; to the Committee on the Judiciary.

By Mr. INOUYE (by request):

S. 4386. A bill to amend the Federal Aviation Act of 1958 to authorize the Civil Aeronautics Board to permit an air carrier to hold both scheduled and supplemental certification; and

S. 4387. A bill to amend the Federal Aviation Act of 1958 to give the Civil Aeronautics Board the flexibility to approve air carrier-surface carrier control relationships when

such relationships are found to be in the public interest; to the Committee on Commerce.

By Mr. KENNEDY (for himself and Mr. MONDALE):

S. 4388. A bill to amend the act of September 30, 1950 (Public Law 874, 81st Congress), and the Elementary and Secondary Education Act of 1965, so as to improve the quality of education of Indian children in elementary and secondary schools, and for other purposes; to the Committee on Labor and Public Welfare.

(The remarks of Mr. KENNEDY when he introduced the bill appear later in the RECORD under the appropriate heading.)

By Mr. GRAVEL:

S. 4389. A bill to authorize the transportation of passengers and merchandise in Canadian hovercraft vessels between ports in southeastern Alaska; to the Committee on Commerce.

(The remarks of Mr. GRAVEL when he introduced the bill appear below under the appropriate heading.)

By Mr. PROUTY:

S. 4390. A bill to amend the Internal Revenue Code of 1954 to increase the amount and duration of the exclusion of scholarships and fellowship grants in the case of individuals who are not candidates for degrees; to the Committee on Finance.

(The remarks of Mr. PROUTY when he introduced the bill appear below under the appropriate heading.)

By Mr. CANNON:

S. 4391. A bill for the relief of Colin Alvin Ward; to the Committee on the Judiciary.

S. 4392. A bill to amend section 4491 of the Internal Revenue Code of 1954 to exclude the first 2,500 pounds of weight in computing the aircraft use tax on non-turbine engine powered aircraft; to the Committee on Finance.

(The remarks of Mr. CANNON when he introduced S. 4392 appear below under the appropriate heading.)

By Mr. JORDAN of North Carolina:

S.J. Res. 236. Joint resolution authorizing the preparation and printing of a revised edition of the Constitution of the United States of America—Analysis and Interpretation, of decennial revised editions thereof, and of biennial cumulative supplements to such revised editions; placed on the calendar.

(See reference to the joint resolution when reported by Mr. JORDAN of North Carolina, which appears under the heading "Reports of Committees".)

## S. 4389—INTRODUCTION OF A BILL RELATING TO TRANSPORTATION OF PASSENGERS AND MERCHANDISE IN SOUTHEASTERN ALASKA

Mr. GRAVEL. Mr. President, as this distinguished body is well aware, a portion of Alaska has daily ties socially and commercially with the neighboring Canadian Yukon Territory and the Province of British Columbia.

Ten years ago, the Congress and the President of the United States recognized the close relationship in daily affairs between these areas by adopting an act to permit maritime exchanges of passengers and merchandise between American ports in southeastern Alaska and neighboring Canadian ports. The amendment I offer today simply extends what I am sure is the congressional intent to permit Alaskans to enjoy the benefits of evolving technology.

Cushion-air vehicles, known as Hovercraft vehicles, can provide a vital service within the many waterways of southeastern Alaska and western Canada. I am sure that my colleagues agree with me that there is no logical reason to deny the use of Hovercraft vehicles to benefit citizens of both countries. As new technology becomes available, it should benefit mankind.

Congress has occasionally provided exceptions in the past. For example, Congress made such an exception in 1960 for the use of the Italian-built hydrofoil vehicle in Puerto Rico. I call on it to make another one in the case of Hovercraft usage between Canada and Alaska.

I hope, Mr. President, that this amendment will soon become law.

The PRESIDING OFFICER (Mr. HANSEN). The bill will be received and appropriately referred.

The bill (S. 4389) to authorize the transportation of passengers and merchandise in Canadian hovercraft vessels between ports in southeastern Alaska, introduced by Mr. GRAVEL, was received, read twice by its title, and referred to the Committee on Commerce.

## S. 4390—INTRODUCTION OF A BILL PERTAINING TO TAX DEDUCTIONS FOR INCOME RECEIVED AS SCHOLARSHIPS OR FELLOWSHIPS

Mr. PROUTY. Mr. President, I introduce, for appropriate reference, two modifications to section 117 of the Internal Revenue Code which I believe will be of great benefit to our educational system. Taken together, the two changes will benefit those in the academic profession or in medical training.

At present, section 117 of the Internal Revenue Code provides for the exclusion from total income of amounts received by individuals as scholarships or fellowship grants. One amendment would raise from $300 to $500 the amount allowed to be excluded as monthly income. This increase reflects rises in living costs and comparative incomes since the provision was first enacted in 1954. The second amendment would extend from 36 to 60 months the time period during which such exclusions could be made. The extension is necessary because advances in technology and increasing demand for specialization have increased the amount of extended study which may be needed by those in advanced fields of study such as the sciences and medicine.

Mr. President, I have long been interested in use of our existing tax system to aid those who wish to further their educational endeavors. On several occasions since 1963 I have introduced measures which have provided a credit against Federal income taxes for expenses incurred in paying for a college education. With regard to those earlier measures and the one I am introducing today, my rationale is the same. The security and progress betterment of our society are dependent upon the continual intellectual growth of our citizens. While we work to extend the benefits of basic schooling to all our citizens, we must also give incentives to those who seek advanced studies that will enable them to lead our country to levels of greatness. The measure I have repeatedly introduced to give tax credits for college expenses was designed to help our needier students participate equally in the educational system. It has received increased support each time it has been considered, and I am confident that the concept will one day be embodied in law. The measure I am introducing today goes to the second need—to encourage advanced learning. We all recognize the years of sacrifice and study which are requisite to making significant advances in our highly technological society. My measure is designed to encourage more persons to devote themselves to this worthwhile effort and to insure participation by even those who are not wealthy in the endeavor of making this country great.

Prof. Stanley S. Surrey pointed out in a recent article in the Howard Law Review, that more than $45 billion a year is being "spent" through utilization of a long list of tax dodges, special credits, deductions, and preferential rates which are supposed to serve as incentives to encourage an activity in the national interest. Professor Surrey, a former Assistant Secretary of the Treasury for Tax Policy, indicated that the cost of these special privileges in terms of dollars, equity, inefficiency, and taxpayers confidence have far outweighed the benefits. He stated that too often control of the uses has been difficult because these tax provisions have been open-ended and placed no limit on the amount that can be "earned" by taking advantage of the provision. I would like to point out that my amendment does not have this defect for it is directed at a small category of users and will only operate up to limited levels of income for a specified amount of time.

Mr. President, I ask unanimous consent to have printed in the RECORD a copy of the bill and a detailed explanation of its history, justification, and projected costs.

The PRESIDING OFFICER (Mr. SCHWEIKER). The bill will be received and appropriately referred; and, without objection, the bill and a detailed explanation of its history, justification, and projected costs will be printed in the RECORD.

The bill (S. 4390) to amend the Internal Revenue Code of 1954 to increase the amount and duration of the exclusion of scholarships and fellowship grants in the case of individuals who are not candidates for degrees, introduced by Mr. PROUTY, was received, read twice by its title, referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

S. 4390

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That (a) section 117 (b)(2)(B) of the Internal Revenue Code of 1954 (relating to extent of exclusion of scholarships and fellowship grants for individuals who are not candidates for degrees) is amended—

(1) by striking out "$300" and inserting in lieu thereof "$500"; and

(2) by striking out "36 months" and inserting in lieu thereof "60 months".

(b) The amendments made by subsection (a) shall apply to taxable years beginning after the date of the enactment of this Act.

The explanation, presented by Mr. PROUTY, is as follows:

HISTORY AND PROVISIONS OF IRS CODE SECTION 117

Code Section 117 was introduced in 1954 to provide for the exclusion from total income of amounts received by individuals as scholarship or fellowship grants. It was introduced in response to the fact that educational institutions, local, state, and the federal governments and their agencies, and charitable organizations and foundations, placing increased emphasis on advanced education, scholarship, research, and continuing study at the professional level, were engaging at an accelerating pace in the provision of grants-in-aid to individuals to assist them in furthering their educations and to aid them in the pursuit of research and program of study. It was introduced in recognition of the general as well as specific benefits which flow to society and the nation from such activities. Since such grants-in-aid were neither wholly gifts, as defined in Code Section 102, nor prizes or awards, as defined in Code Section 74, nor "salary" or "wages", as defined in the provisions of Chapters 21, 23, and 24 of the Internal Revenue Code of 1954, it was deemed advisable to introduce Code Section 117 to deal specifically with them.

Code Section 117 sharply distinguishes the status of recipients of scholarships and grants into two categories: (1) those who are candidates for degrees, whether undergraduate or graduate, at an educational institution; and (2) those who are not candidates for degrees but who are engaged in the pursuit of study or research. The primary beneficiaries of the provisions of Code Section 117 are therefore scholarship or fellowship grant recipients, who are either (1) students in pursuit of a degree at an approved college or university, or (2) physicians in medical residency training and non-degree candidate members of the academic community, who as individuals are engaged in programs of advanced study, scholarship, or research.

Further, Code Section 117 imposes limitations upon grant recipients in both categories; amounts in excess of these limitations are includible in total income. An inclusive limitation affecting the status of all grants to individuals who are *not* candidates for degrees had to do with the character and condition of the grantor. To qualify for the benefits permitted by Code Section 117 the grantee must be the recipient of a grant from one of the following four kinds of grantor:

(1) a non-profit charitable, religious, scientific, cultural, or educational institution or organization, as defined in Code Section 501(c)(3); or

(2) a foreign government; or

(3) an international organization, or a binational or multinational educational and cultural foundation or commission created or continued pursuant to section 103 of the Mutual Educational and Cultural Exchange Act of 1961; or

(4) a State, local, or territorial government, or the U.S. Government (including its instrumentalities and agencies).

The force and intent of this limitation is to provide tax relief for only those who are, as individuals, engaged in disinterested research and scholarship; it benefits only those persons engaged in programs of inquiry and study which serve the public interest. Code Section 117 specifically withholds its benefits from support of the profit-directed research activities of business and industry.

Finally, Code Section 117(b)(2)(B) imposes further limitations on scholarship and fellowship grants to non-degree candidates. It is within these that this proposal is specifically concerned. The first has to do with limitation of the *amount* of exclusion, i.e., number of dollars, calculated in terms of an amount-per-month formula. At present this amount is $300 per month; this proposal recommends increase of the dollar amount to $500 per month. The second has to do with limitation of the *extent of time* over which exclusion is permitted, i.e., number of months, whether or not consecutive. At present the number of months is 36; this proposal recommends increase of the number of months to 60.

THE $300 PER MONTH LIMITATION

The IRS Regulation effecting this limitation reads as follows:

"In the case of an individual who is not a candidate for a degree, the amount received as a scholarship or fellowship grant which is excludable from gross income under section 117 (a) (1) shall not exceed an amount equal to $300 times the number of months for which the recipient received during the calendar year." para. 1.117-2 (b) (1)

This proposal recommends an amendment which would raise the amount of this limitation from $300 to $500. In 1954, according to U.S. Bureau of Labor statistics, the Consumer Price Index stood at 93.6. In May 1970 the Consumer Price Index stood at an all-time high of 134.6. This is a net increase of 44 points, an increase of approximately 46% since time of enactment of the legislation. On the grounds of comparative costs of living, I believe that a cost-of-living adjustment in the statutory amount of exclusion is necessary and warranted. Further, in 1970 there exists a heightened awareness of the value and importance to the nation of research and sustained educational study at the professional (i.e., non-degree candidate) level, especially by those who, within the provisions of section 117, may not be supported by private, profit-making corporations, industries, or business enterprises. The nation sorely needs the services of physicians with advanced training. We know much better today the benefits to be derived from disinterested study and research than we did in 1954. Therefore, within a recognition of increased costs of living, and the painful shortage of qualified physicians, and an enlarged awareness of the general benefits to be derived from programs of study and research in the general public interest, I believe it is reasonable to raise the limitation on the amount of exclusion from $300 to $500.

THE 36-MONTH LIMITATION

The IRS Regulation effecting this limitation reads as follows:

"No exclusion shall be allowed under section 117(a)(1) to an individual who is not a candidate for a degree after the recipient has, as an individual who is not a candidate for a degree, been entitled to an exclusion under that section for a period of 36 months. This limitation applies if the individual has received any amount which was either excluded or excludable from his gross income under section 117(a)(1) for any prior 36 months, whether or not consecutive." para. 1.117-2(b)(ii).

This proposal would increase the number of months of this limitation from 36 to 60. The sheer increase in the quantity and complexity of knowledge that has resulted from the unparalleled achievements of social, scientific, medical, legal, political and humanistic study and research in the past decade and a half has extended the time necessary to conduct programs of research and study in ways which the 1954 legislation could not possibly have foreseen or anticipated. Consider, for example, advances in such fields as subatomic physics, microbiology, space medicine, urban planning and sociology, and environmental ecology. The simple truth of the matter is that medical training and genuinely productive scholarship and research requires prolonged commitments of time and energy. It seems unduly rigorous in 1970 to regulate the extent of time which may profitably be committed to disinterested study and research according to 1954 conceptions. There is a further consideration. It is likely that only those physicians whose skills are most urgently needed and the most effective, imaginative, and fruitful scholars will qualify for support into the fourth and fifth years. It is not in the national interest to withhold from our finest physicians, researchers, and scholars the incentive of financial relief provided them in the early years of their careers by Code Section 117. I believe we should raise the limitation on the number of months from 36 to 60.

Unfortunately, the question of the eligibility of resident physicians in training for benefits under the provisions of section 117 is very much up in the air. As the June 1970 meeting of the American Medical Association it was determined that clarification and, if necessary and possible, change in the code should be sought. However, under present circumstances, circumstances which this proposal must accept as governing its projections, it is not likely that more than 10% of physicians in medical residency training programs can qualify.

With respect to cost projections, this means that no more than 3500 medical residents may in any one year be expected to avail themselves of the tax relief provided by Code Section 117. Computed at a rate of $2400 per year increased exclusion, and computing the tax rate at an average of 20%, i.e., $480, passage of the amendment recommended in this proposal would result in a cost to the public of 3500 times $480, or $1,680,000.

According to Projections of Educational Statistics to 1977-78 compiled in 1969 by the National Center for Education Statistics of the Department of Health, Education, and Welfare, there were in the academic year 1969-70, 289,000 full-time college teachers for resident degree-credit courses in American institutions of higher learning. This figure excludes part-time and junior instructional staff, graduate student teaching assistants, for example, who at the outset may be omitted from consideration, for they would not normally qualify as non-degree candidates for scholarship and fellowship grants, although some, i.e., graduate student teaching assistants, might well qualify as candidates-for-degree scholarships or fellowships. Of this number, 289,000, it is not likely that more than 2,000 would in any given year qualify for the exclusions permitted by Code Section 117(b)(2)(B). A number of factors operate to make this a reasonable estimate: they include

(1) the degree status of new teaching faculty;

(2) the career goals of "two-year institutions" faculties;

(3) the length-of-service expectations affecting the frequency of grants sought and attained; and

(4) the distinction observed in Code Section 117 between "sabbatical" leave and leaves of absence.

Since fewer than 10% of the 20,000 teachers on leave are likely to have met such rigorous qualifying conditions in gaining non-degree scholarship or fellowship grants, it is safe to estimate that no more than 2,000 are in any one year likely to be beneficiaries of the pertinent provisions of Code Section 117. Computed at the same rate as that employed above in determining the cost to the public of physicians in medical residency training programs, i.e., 2,000 times $480, adoption of the changes recommended in this proposal would cost $960,000 for college teachers. Aggregately, the total projected cost for both physicians and college teachers, $1,680,000 plus $960,000, amounts to $2,640,000.

It is almost impossible to make accurate

projections of the estimated cost of raising the extent of time limitation from 36 to 60 months. I believe that it will be significantly lower than the cost of the dollar amount of permissible exclusion from $300 to $500. Few medical residency programs extend to a fourth or fifth year; comparatively few scholars and researchers will be so signally successful as to warrant non-degree candidate scholarship or fellowship grants extending their studies into the fourth and fifth years. Yet because of the extraordinary promise of such research and scholarship, no reasonable incentive to its fruition should be witheld. A fair estimate of cost to the public would seem to be 10% of the total cost of the proposed increase of the dollar amount of permissible exclusion. This is 10% of $2,640,000, or $264,000.

In conclusion, the total estimated cost to the public of passage of the amendments urged in this proposal is $2,904,000.

SUMMARY

At times when persisting, distressful, economic factors oblige the Congress searchingly to examine, review, and where possible reduce all manner, categories, and kinds of Federal expenditures, it is necessary to distinguish the genuinely mandatory and the mainly desirable.

Basic scholarship and research constitutes the foundation stone upon which the structures of applied scholarship, research and development arise. Even in a time of economic constraint it is essential that basic research and scholarship continue.

The amendments urged in this proposal provide acceptable, economic means of furnishing selective support for disinterested research and scholarship. They extend needed tax relief to individuals pursuing advanced medical studies at a time when their superior skills, knowledge, and services are in extremely short supply, and to scholars and researchers of demonstrated competence and capacity, for only such qualify for relief under the pertinent provisions of section 117. The Congress has recently given signal witness of its commitment to support of medical services for all of our citizens by overriding, for the first time in ten years, the Presidential veto of the Hospital and Medical Family Construction Bill. Surely, it is ready to act affirmatively on a measure of much smaller cost directed toward complementary goals.

COSTS AND CONSTITUENCIES

The cost to the public which would result from the amendments urged in this proposal are difficult to project with confident accuracy. As the publication *Digest of Educational Statistics 1966*, issued in 1967 by the U.S. Office of Education, notes, "Systematic data on educational research as a defined area are not available. Data on State funds expended in conduct of research funded by Federal research grants and contracts are not available." Since these are data which bear directly upon the research and study activities of the two primary constituencies affected by Code Section 117, physicians and academicians, their lack is regrettable. However, there are available certain data which permit reasonable extrapolations and predictions to be made.

According to figures derived from the Directory of Approved Internships and Residencies (Table 27) which appeared in the November 24, 1969 issue of the *Journal of the American Medical Association*, 35,047 physicians in training held approved residencies in the academic year 1968–69. As non-degree candidates engaged in programs of advanced study, they may, as a group, be considered potential beneficiaries of the provisions of section 117. However, because of seemingly conflicting Revenue Rulings and court decisions, it appears likely that fewer than 10% of this number actually can qualify.

## S. 4392—INTRODUCTION OF A BILL TO AMEND SECTION 4491 OF THE INTERNAL REVENUE CODE OF 1954

Mr. CANNON. Mr. President, I introduce, for appropriate reference, a bill to amend section 4491 of the Internal Revenue Code of 1954 to exclude the first 2,500 pounds of weight in computing the aircraft use tax on nonturbine engine-powered aircraft.

Actually, this is an amendment of the tax provisions contained in the Airport and Airways Development Act of 1970. Of great concern as we debated this bill was general aviation. We were concerned that they not be overburdened by either the fuel tax, the registration fees, the poundage assessment, or all three combined.

We in the Senate reduced the administration's proposed 9-cent fuel tax to 6 cents and we exempted all general aviation aircraft from the House-imposed fee and poundage tax.

Unfortunately, in conference the House insisted on their version of the legislation and to get a bill, the Senate receded. The House did finally agree on an exemption from the 2 cents per pound annual yearly tax for aircraft weighing 2,500 pounds or less.

On May 12, 1970, the time the Senate adopted the conference report on the taxation provisions of the legislation, I stated:

Mr. President, I am deeply disappointed that the Conference on the taxation provisions of the Airport/Airways legislation did not follow the Senate amendments on the general aviation fuel tax, and on the annual registration fee.

We of the Commerce Committee worked hard for these amendments. We agreed on a 6 cent fuel tax and the Senate agreed with us. State taxes on aviation fuel already range as high as 8 cents per gallon, and more states are looking into this source of revenue. We are putting too large a burden on the private pilot.

As to the annual registration fee, I had hoped the exemption to general aviation would also be adopted by the Conference, but unfortunately, the Senate receded.

So I am concerned about what we may be doing to our private pilot friends. A fuel tax, a yearly registration fee, pretty soon transponders to go into our larger airports, all this with the states rushing to raise their taxes.

As I stated, I am indeed sorry our Conferees did not approve the Senate Amendments.

Later I stated I would join with Senator MAGNUSON next year in introducing legislation that would lower the fuel tax, and I intend to do just that. Right now, however, the problem this amendment is designed to meet, seems more pressing.

Here is the way the poundage tax works. If you own an aircraft that has a maximum certificated takeoff weight of 2,500 pounds or less, you would only pay the $25 registration fee.

However, if your aircraft weighed 2,600 pounds, you would pay, in addition to the registration fee, 2 cents a pound on 2,600 pounds, or an additional year tax of $52.

This I believe was not the intent of Congress and must be corrected. The 2,500-pound exemption should apply across the board, and many of us expected it to be so applied.

My amendment would apply the exemption across the board, and I hope it can be adopted before we adjourn this year.

The PRESIDING OFFICER (Mr. SCHWEIKER). The bill will be received and appropriately referred.

The bill (S. 4392) to amend section 4491 of the Internal Revenue Code of 1954 to exclude the first 2,500 pounds of weight in computing the aircraft use tax on nonturbine engine powered aircraft, introduced by Mr. Cannon, was received, read twice by its title, and referred to the Committee on Finance.

---

## ADDITIONAL COSPONSORS OF BILLS

S. 2453

Mr. BYRD of West Virginia. Mr. President, on behalf of the Senator from New Jersey (Mr. WILLIAMS) I ask unanimous consent that, at the next printing, the name of the Senator from New York (Mr. GOODELL) be added as a cosponsor of S. 2453, to further promote equal employment opportunities for American workers.

The PRESIDING OFFICER (Mr. HOLLINGS). Without objection, it is so ordered.

S. 3936

Mr. ERVIN. Mr. President, I ask unanimous consent that, at the next printing of S. 3936, to give effect to the sixth amendment right to a speedy trial for persons charged with offenses against the United States, and to reduce the danger of recidivism by strengthening the supervision over persons released on bail, probation, or parole, and for other purposes, the names of the Senator from Nebraska (Mr. HRUSKA) and the Senator from New Hampshire (Mr. MCINTYRE) be added as cosponsors. This bill, the "Speedy Trial Act of 1970" is designed to give effect to the sixth amendment right to a speedy trial for persons charged with offenses against the United States, and to reduce the danger of recidivism by strengthening the supervision over persons released on bail, probation, or parole, and other purposes.

The PRESIDING OFFICER (Mr. HOLLINGS). Without objection, it is so ordered.

S. 4041

At the request of the Senator from Texas (Mr. TOWER), the Senator from California (Mr. MURPHY) was added as a cosponsor of S. 4041, to repeal section 7275 of the Internal Revenue Code of 1954, relating to amounts to be shown on airline tickets and advertising.

S. 4045

At the request of the Senator from West Virginia (Mr. BYRD), on behalf of the Senator from California (Mr. CRANSTON), the Senator from Alaska (Mr. GRAVEL) was added as a cosponsor of S. 4045, to authorize and direct the Secretary of Agriculture to acquire certain lands and interests therein within the San Bernardino National Forest, Calif.

S. 4246

At the request of the Senator from West Virginia (Mr. BYRD), on behalf of the Senator from New Jersey (Mr.

WILLIAMS), the Senator from Pennsylvania (Mr. SCOTT) was added as a cosponsor of S. 4246, to amend the Older Americans Act of 1965 to authorize a special emphasis transportation research and demonstration project program.

S. 4325

Mr. BYRD of West Virginia. Mr. President, on behalf of the Senator from New Jersey (Mr. WILLIAMS) I ask unanimous consent that, at its next printing, the names of the following Senators be added as cosponsors of S. 4325, a bill to prohibit flight in interstate or foreign commerce to avoid prosecution for the killing of a policeman or fireman. The Senator from Utah (Mr. BENNETT), the Senator from Idaho (Mr. CHURCH), the Senator from Mississippi (Mr. EASTLAND), the Senator from Hawaii (Mr. INOUYE), the Senator from Montana (Mr. METCALF), the Senator from Wisconsin (Mr. NELSON), the Senator from Rhode Island (Mr. PASTORE), the Senator from Rhode Island (Mr. PELL), the Senator from Illinois (Mr. PERCY), the Senator from Wisconsin (Mr. PROXMIRE), the Senator from New Mexico (Mr. ANDERSON), the Senator from Vermont (Mr. PROUTY), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Georgia (Mr. TALMADGE), and the Senator from West Virginia (Mr. RANDOLPH).

The PRESIDING OFFICER (Mr. HOLLINGS). Without objection it is so ordered.

## SENATE CONCURRENT RESOLUTION 84—SUBMISSION OF A CONCURRENT RESOLUTION RELATING TO CONSERVATION PLEDGE

Mr. NELSON. Mr. President, I submit, for appropriate reference, a Senate concurrent resolution to express the sense of Congress relative to conservation pledge, which is sponsored by the Outdoor Life magazine. I ask unanimous consent that the concurrent resolution be printed in the RECORD.

The PRESIDING OFFICER (Mr. SCHWEIKER). The concurrent resolution will be received and appropriately referred; and, without objection, the concurrent resolution will be printed in the RECORD.

The concurrent resolution (S. Con. Res. 84) was referred to the Committee on Interior and Insular Affairs, as follows:

S. CON. RES. 84

*Resolved by the Senate (the House of Representatives concurring)*, That it is the sense of the Congress that the conservation pledge, which is familiar to many Americans, should take cognizance of the importance of air as a natural resource and should therefore be amended to read as follows:

"I give my pledge as an American to save and faithfully to defend from waste the natural resources of my country—its air, soil and minerals, its forests, waters, and wildlife."

## SENATE RESOLUTION 470—ORIGINAL RESOLUTION REPORTED

Mr. HART, from the Committee on the Judiciary, reported the following original resolution (S. Res. 470); which was referred to the Committee on Rules and Administration:

S. RES. 470

*Resolved*, That the Committee on the Judiciary is authorized to expend from the contingent fund of the Senate $29,500, in addition to the amount, and for the same purposes and during the same period, specified in Senate Resolution 334, Ninety-first Congress, agreed to February 16, 1970, authorizing an investigation of antitrust and monopoly laws and their administration.

## ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that on today, September 23, 1970, he presented to the President of the United States the following enrolled bills:

S. 406. An act to amend the Federal Property and Administrative Services Act of 1949 to permit the rotation of certain property whenever its remaining storage or shelf life is too short to justify its retention, and for other purposes;

S. 2565. An act to amend the act fixing the boundary of Everglades National Park, Fla., and authorizing the acquisition of land therein, in order to increase the authorization for such acquisitions;

S. 2763. An act to allow the purchase of additional systems and equipment for passenger motor vehicles over and above the statutory price limitation;

S. 3153. An act to authorize the Secretaries of Interior and the Smithsonian Institution to expend certain sums, in cooperation with the territory of Guam, the territory of American Samoa, the Trust Territory of the Pacific Islands, other U.S. territories in the Pacific Ocean, and the State of Hawaii, for the conservation of their protective and productive coral reefs; and

S. 3777. An act to authorize the Secretary of the Interior to enter into contracts for the protection of public lands from fires, in advance of appropriations therefor, and to twice renew such contracts.

## DIRECT POPULAR ELECTION OF THE PRESIDENT AND THE VICE PRESIDENT—AMENDMENT

AMENDMENT NO. 942

Mr. ERVIN submitted an amendment, in the nature of a substitute, intended to be proposed by Mr. ERVIN to amendment No. 711, to Senate Joint Resolution 1, a joint resolution proposing an amendment to the Constitution to provide for the direct popular election of the President and Vice President of the United States, which was ordered to lie on the table and to be printed.

## SOCIAL SECURITY AMENDMENTS OF 1970—AMENDMENT

AMENDMENT NO. 943

AMENDMENT TO WAIVE CERTAIN NURSING REQUIREMENTS WITH RESPECT TO HOSPITALS

Mr. YARBOROUGH. Mr. President, I submit, for appropriate reference, an amendment to H.R. 17550, the social security amendemnts, which would authorize the Secretary of Health, Education, and Welfare under cetrain circumstances to waive the registered nurse requirement of the Medicare Act.

In order to qualify for medicare assistance under present legislation, a hospital must provide "24-hour nursing service rendered or supervised by a registered professional nurse." The original purpose of this provision was to insure adequate professional treatment and supervision of patients on a continuing basis. In practice, however, it is foreclosing the possibility of local medical care altogether in many rural areas of the country.

Small county hospitals are finding it increasingly difficult if not impossible to compete in the marketplace for the services of an already dwindling supply of professional medical talent. These small hospitals simply do not have the financial resources available to match the high premiums that urban hospitals are willing to pay in order to obtain professional registered nurses.

In addition, urban life offers the young, and often single registered nurse an attractiveness that the more sedate rural environment can not match. One only has to turn to the recent census to see that rural areas are fighting a difficult battle in their efforts to recruit and retain qualified professional people.

The unfortunate result is that currently over 400 hospitals across the country are in jeopardy of losing their medicare certification because of their inability to recruit enough registered nurses to staff their institutions on a 24-hour, 7-day-a-week basis. In Texas, where the problem is particularly accute, there are over 140 hospitals, which although given a somewhat extended grace period, are in danger of losing their certification. Loss of certification, of course, means loss of medicare assistance payments. And without this financial help, many of these institutions simply will not be able to survive. Dr. Harry Libscomb, Director of the Institute for Health Service Research, in testimony before the Subcommittee on Migrant Labor, pointed out the seriousness of this problem in Texas by noting:

> The requirement has "recently resulted in the imminent closing of at least six hospitals serving the Rio Grande Valley, which while giving limited health care, nevertheless provided a critical service for the migrant worker and his family.

And this, Mr. President, is what I believe to be the real tragedy of an uncompromising application of this provision. These small rural hospitals, although perhaps not as well-equipped or fully staffed as their urban counterpart, do, nevertheless, provide essential services that are desperately needed and that otherwise might not be conveniently available. Their constitutents often number the poor, and the old, who through inability or unwillingness might not seek needed medical attention if that attention could only be provided in some distant city. Thus, the effect of a rigid application of the registered nurse provision might be to effectively disenfranchise those who the act was designed to protect by closing their only familiar and convenient source of medical treatment.

Mr. President, the amendment that I submit today is designed to ameliorate the harshness of the registered nurse requirement while at the same time insuring that the highest possible level of medical care will be maintained. Basically, I propose that the Secretary of

Health, Education, and Welfare be given the descretion to waive the requirement of section 1861(e) upon a showing by the hospital concerned that it has made a bona fide effort to comply with the requirement, but because of the present acute shortage of registered nurses, has been unable to do so. In order to insure that the original purpose of the requirement will not be frustrated, I have inserted a condition in the waiver requiring that the petitioning hospital make a continuing effort to recruit registered nurses and that failure to do so will result in possible revocation of the waiver. In so doing, I think we will protect the public from those institutions who from laxity or inefficiency simply refuse to make a good faith effort to comply with the act. While at the same time we will insure the continued operation of those hospitals who have in good faith actively sought the services of professional registered nurses. As an additional safeguard, I have placed a 1-year limitation on the duration of the waiver, renewable only upon a continued showing of effort to comply with the requirement.

In conclusion, Mr. President, I think we will be confronted with a most serious situation if we do not soften the impact of the registered nurse requirement. Failure to do so may very well mean the demise of many small hospitals that provide essential and desperately needed services to America's rural population.

Mr. President, I ask unanimous consent that the amendment that I have submitted be printed at this point in the RECORD.

The PRESIDING OFFICER (Mr. HOLLINGS). The amendment will be received and printed, and will be appropriately referred; and, without objection, the amendment will be printed in the RECORD.

The amendment (No. 943) was referred to the Committee on Finance, as follows:

AMENDMENT NO. 943

On page 158, between lines 13 and 14, insert the following:

WAIVER OF CERTAIN NURSING REQUIREMENTS WITH RESPECT TO HOSPITALS

SEC. 265. Section 1861(e) of the Social Security Act is amended by adding at the end thereof the following new sentence: "The Secretary may waive, in the case of any hospital, the requirement (imposed by clause (5) of the first sentence of this subsection) that such hospital provide a 24-hour nursing service rendered or supervised by a registered professional nurse, if the Secretary finds that such hospital has made a bona fide effort to comply with such requirement but is unable (because of manpower shortages) to employ the qualified personnel necessary to enable it to meet such requirement. Any waiver granted under the preceding sentence to a hospital shall be granted (i) on condition that such hospital continue to make a bona fide effort to meet the requirement with respect to which the waiver is granted, and (ii) only for a one-year period; except that nothing in this sentence shall be construed to limit the granting of such a waiver by the Secretary to any hospital on the grounds that such a waiver has been granted to such hospital with respect to any preceding period."

## AMENDMENT TO THE CONSTITUTION RELATIVE TO EQUAL RIGHTS FOR MEN AND WOMEN—AMENDMENTS

AMENDMENT NOS. 944 AND 945

Mr. ERVIN submitted two amendments, intended to be proposed by him, to the joint resolution (H.J. Res. 264) proposing an amendment to the Constitution of the United States relative to equal rights for men and women, which were ordered to lie on the table and to be printed.

## ADDITIONAL COSPONSOR OF AN AMENDMENT

AMENDMENT NO. 756 TO H.R. 17550

Mr. BYRD of West Virginia. Mr. President, on behalf of the distinguished Senator from New Jersey (Mr. WILLIAMS), I ask unanimous consent that, at the next printing the name of the Senator from Maryland (Mr. TYDINGS) be added as a cosponsor of amendment No. 756 to H.R. 17550, to amend the Social Security Act to provide increases in benefits, to improve computation methods, and to raise the earnings base under the old-age, survivors, and disability insurance system, to make improvements in the medicare, medicaid, and maternal child health programs with emphasis upon improvements in the operating effectiveness of such programs, and for other purposes.

The PRESIDING OFFICER (Mr. HOLLINGS). Without objection, it is so ordered.

## NOTICE OF HEARINGS ON S. 4325, S. 4348, AND S. 4359

Mr. EASTLAND. Mr. President, I give notice that public hearings will be held beginning October 6, on three bills designed to deal with the problems of the apparently increasing wave of attacks on police. These bills are S. 4325, introduced by the Senator from New Jersey (Mr. WILLIAMS); S. 4348, introduced by the Senator from Pennsylvania (Mr. SCHWEIKER); and S. 4359, introduced by the chairman of the Committee on the Judiciary. It is expected the hearings on these bills will continue for 4 or 5 days. Any person desiring to appear and testify with respect to these measures or anyone of them, should get in touch as soon as possible with the chief counsel of the Internal Security Subcommittee, Mr. Sourwine, at room 3234 in the New Senate Office Building.

## COMMITTEE MEETINGS—UNANIMOUS-CONSENT AGREEMENT

Mr. MANSFIELD. Mr. President, because of a mistake for which I am solely responsible in calling up the unobjected-to items on the calendar when I did, I ask unanimous consent that despite that fact—and this occured the other day—committees now sitting may sit until the conclusion of the morning business.

I do so because of some commitments which I made to some committees yesterday who were calling witnesses from a great distance. I feel that I am personally on the spot in this respect. I feel sure the Senate will understand.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## ORDER OF BUSINESS

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ERVIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## DIRECT POPULAR ELECTION OF THE PRESIDENT AND THE VICE PRESIDENT—AMENDMENT NO. 931

Mr. ERVIN. Mr. President, I wish to call the attention of the Senate to amendment No. 931 to Senate Joint Resolution 1 and to announce that, at the appropriate time, I propose to ask unanimous consent that this amendment be voted at 4 o'clock tomorrow afternoon under circumstances where no amendment to this amendment would be permitted.

I would do this because this amendment offers a complete substitute for Senate Joint Resolution 1, and it abolishes the office of elector. It provides that every person in the United States will have the right to vote directly for the President and Vice President and that the electoral votes of the States shall be retained and that they shall be divided among the candidates for President and Vice President in accordance with their popular vote in each State.

Unlike Senate Joint Resolution 1, it does not contemplate that we will have a 40-percent President, but that we will have a President who receives a majority of the electoral votes.

It provides that in the event no candidate receives a majority of the whole number of electoral votes, the Senate and House sitting in joint session will elect a President and Vice President from among those candidates for those two offices who received the highest votes.

I do not believe in a 40-percent President. Our good friend, the Senator from Indiana, lays great stress on the fact that Senate Joint Resolution 1, as he says, guarantees that each man's vote will be counted equally with every other man's vote in the United States.

I respectfully submit that it does nothing of the kind. It provides in general that we will have a 40-percent President and that the other 60 percent of the votes shall be thrown away.

Mr. BAYH. Mr. President, will the Senator yield?

The PRESIDENT pro tempore. Does the Senator from North Carolina yield to the Senator from Indiana?

Mr. ERVIN. I have only 3 minutes.

Mr. BAYH. Mr. President, I would be glad to ask unanimous consent that the Senator be permitted to continue from

now until the knell for whatever he wants to do.

Mr. ERVIN. Mr. President, I ask unanimous consent that a copy of my amendment No. 931 be printed at this point in the RECORD.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment, No. 931, ordered to be printed in the RECORD, reads as follows:

Strike out all after the resolving clause, and insert in lieu thereof the following:

"That the following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution only if ratified by three-fourths of the legislatures of the several States within seven years from the date of its submission by the Congress:

"'ARTICLE —

"'SECTION 1. The executive power shall be vested in a President of the United States of America. He shall hold his office during the term of four years, and, together with the Vice President, chosen for the same term, be elected as provided in this Constitution.

"'The office of elector of the President and Vice President, as established by section 1 of article II of this Constitution and the twelfth and twenty-third articles of amendment to this Constitution, is hereby abolished. The President and Vice President shall be elected by the people of the several States and the district constituting the seat of Government of the United States. The electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislature, except that the legislature of any State may prescribe lesser qualifications with respect to residence therein. The electors in such district shall have such qualifications as the Congress may prescribe. The places and manner of holding such election in each State shall be prescribed by the legislature thereof; but the Congress may at any time by law make or alter such regulations. The place and manner of holding such election in such district shall be prescribed by the Congress. Congress shall determine the time of such election, which shall be the same throughout the United States. Until otherwise determined by the Congress, such election shall be held on the Tuesday next after the first Monday in November of the year preceding the year in which the regular term of the President is to begin. Each State shall be entitled to a number of electoral votes equal to the whole number of Senators and Representatives to which such State may be entitled in the Congress. Such district shall be entitled to a number of electoral votes equal to the whole number of Senators and Representatives in Congress to which such district would be entitled if it were a State, but in no event more than the least populous State.

"'Within forty-five days after such election, or at such time as Congress shall direct, the official custodian of the election returns of each State and such district shall make distinct lists of all persons for whom votes were cast for President and the number of votes for each, and the total vote of the electors of the State or the district for all persons for President, which lists he shall sign and certify and transmit sealed to the seat of the Government of the United States, directed to the President of the Senate. On the 6th day of January following the election, unless the Congress by law appoints a different day not earlier than the 4th day of January and not later than the 10th day of January, the President of the Senate shall, in the presence of the Senate and House of Representatives, open all certificates and the votes shall then be counted. Each person for whom votes were cast for President in each State and such district shall be credited with such proportion of the electoral votes thereof as he received of the total vote of the electors therein for President. In making the computation, fractional numbers less than one one-thousandth shall be disregarded. The person having the greatest number of electoral votes for President shall be President, if such number be a majority of the whole number of electoral votes. If no person has a majority of the whole number of electoral votes, then from the persons having the two greatest numbers of electoral votes for President, the Senate and the House of Representatives sitting in joint session shall choose immediately, by ballot, the President. A majority of the votes of the combined authorized membership of the Senate and the House of Representatives shall be necessary for a choice.

"'The Vice President shall be likewise elected, at the same time and in the same manner and subject to the same provisions, as the President, but no person constitutionally ineligible for the office of President shall be eligible to that of Vice President of the United States.

"'The Congress may by law provide for the case of the death of any of the persons from whom the Senate and the House of Representatives may choose a President whenever the right of choice shall have devolved upon them, and for the case of death of any of the persons from the Senate and the House of Representatives may choose a Vice President whenever the right of choice shall have devolved upon them. The Congress shall have power to enforce this article by appropriate legislation.

"'SEC. 2. This article shall take effect on the 10th day of February next after one year shall have elapsed following its ratification.'"

Mr. ERVIN. Mr. President, I am glad to yield to the Senator from Indiana any time I have remaining from the 3 minutes.

Mr. BAYH. Mr. President, is a unanimous-consent request to waive the 3-minute rule in order at this time?

The PRESIDENT pro tempore. A unanimous-consent request is always in order in the U.S. Senate. The Senate can do almost anything except amend the Constitution of the United States.

Mr. BAYH. Mr. President, the Senator from Indiana wonders if it is possible for the Senate to amend the Constitution of the United States by any other means.

Mr. President, I ask unanimous consent that the Senator from Indiana may be permitted to continue for 15 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered. The Senator from Indiana is recognized.

Mr. BAYH. Mr. President, if my friend from North Carolina will permit me, I would like to pursue the logic which he so eloquently expressed to the Senate that under the proposal of the Senator from Indiana all votes would not count the same. Does the Senator from North Carolina know of any other election in which the votes cast for a losing candidate are not disregarded? Is it possible to have two or three winners. If we have a race for county sheriff in the capital county of the State of the distinguished Senator from North Carolina and there are five candidates, is there any way to count those votes cast for candidates who get less than the man who wins?

Mr. ERVIN. Yes; there are a great many primary elections in the United States, such as those in North Carolina, where no man can receive the nomination and become eligible to run for office unless he receives a majority of the votes, if not in the first primary, then in the second primary.

Mr. BAYH. Is the Senator willing to support the contention that we should amend the Constitution to require that a majority of the people be required to vote for a President before we have a President?

Mr. ERVIN. If I were in favor of popular election—and I am not because I do not believe we should have a 40-percent President—I would accept the view that we should have a President who has the support of the majority of the people of the United States. To accomplish that purpose in a reasonable way is why I offer this amendment No.——

Mr. BAYH. No. 901?

Mr. ERVIN. No; it is amendment No. 931.

Mr. BAYH. Amendment No. 931. I would suggest if the Senator from North Carolina really believes as he does—and I do not for a moment challenge his sincerity, it is just the assessment of the facts and the conclusions he reaches that I challenge—but if he really believes that the majority of the people should choose their President, I respectfully suggest that the amendment proposed by my friend from North Carolina does not guarantee that at all. We should come up with an amendment that would do that. Perhaps he should support the amendment of the Senator from Mississippi, which is the only amendment proposed by any Member of the Senate that would suggest we should have a truly majority President. We have a President now who did not have a true majority; we had a President in 1960 who did not have a true majority; and Woodrow Wilson got 41 percent of the vote. Are we going to establish a new criterion?

Mr. ERVIN. If my recollection serves me correctly one President had only a 9,000-vote majority or plurality. I have been so informed.

I will support the amendment if a vote is reached on the amendment of the Senator from Mississippi (Mr. EASTLAND). I would certainly support his amendment but that does not say I would support this resolution in the event the amendment of the Senator from Mississippi is agreed to. All of the inequities of the resolution would still remain, except the amendment of the Senator from Mississippi would remove the 40-percent President from the American scene. That is the only improvement his amendment would make.

Mr. BAYH. But the Senator from North Carolina told the Senate, and the record will so show, that he thinks the President should have the support of a majority of the people. I suppose he means a majority of the voters should choose the President, but he is not willing to amend his proposal or support the only proposal that can guarantee a majority winner.

Mr. ERVIN. I regret my friend from Indiana did not hear my entire statement. I said if I favored popular elec-

tion I would favor vote by the majority, but I do not favor popular election. I do not think this is the time to consider that subject because we have an election coming up in November. If what I read in the daily press and see over television and hear over the radio is true, the people in substantial numbers are thinking the Federal Government is not doing a very good job. I think the people should have an opportunity to obtain a new deal if they wish. Hence, I believe we should postpone action on this matter until the election is had and a new Congress meets in January. Barring that, I think an amendment like amendment No. 931, is the best solution of the problem. I would favor it not only now but in January.

Mr. BAYH. Mr. President, I have the greatest respect for my distinguished friend from North Carolina but it is obvious he looks at one end of the horse and I look at the other and we come up with an entirely different animal. We differ as to what the picture is and what we are trying to accomplish.

I feel in an election we should guarantee that the man who wins is the man who gets the most votes. That is the way we determine any other winner in this country. The electoral college system does not guarantee that the man who wins gets the most votes.

It is one thing for a proposition to be made to win with the most electoral votes or a majority of electoral votes, but it is an entirely different proposition to suggest that the man who gets the support of the most people or the majority of the people should win.

The Senator from Indiana suggested that the rule which is used to elect a President should be the same rule used to elect all other officials in this country, and that is that the man who wins gets the most people to support him. Second, I suggested that everybody's vote should count the same.

## U.S. MILITARY AID PERPETUATES DICTATORSHIPS IN GREECE AND BRAZIL

Mr. YOUNG of Ohio. Mr. President, recently the International Commission of Jurists meeting in Geneva, Switzerland, declared that Brazil's military dictatorship was guilty of torture of dissidents.

Yet this administration continues to support both financially and diplomatically cruel Fascist military regimes, such as in Brazil and also in Greece where political prisoners are scientifically and brutally tortured and where many have died.

In Brazil, at this time, there are more than 20,000 political prisoners. Most of them were arrested in the nighttime without any formal charges filed against them and are now being held prisoners.

Mr. President, it is well known that those brutal colonels, who in the darkness of night, overturned the constitutional Government of Greece and took over in Athens, have imprisoned many thousands of people. It is said that the number presently imprisoned in Greece is somewhere between 34,000 and 50,000 men and women. They have been imprisoned without any trial whatever. Many have died. Most who have survived, when released, are invalids for the rest of their lives, due to the scientific torture administered to them.

In addition, more than 50,000 men, women and children have been exiled to various Greek islands distant from the mainland.

Yet, we read in this morning's Washington Post that the Nixon administration is not only continuing diplomatic relations with these Fascist tyrants who are ruling in Athens, the cradle of democracy, but we learn that our Government is seriously considering renewing full-scale military aid to Greece that would involve spending millions of dollars in the way of heavy war materiel, paid for by American taxpayers.

It is stated the reason for resuming full-scale shipments of heavy war materiel to Greece is, as a member of the NATO community, Greece is an ally that we need in that area of the world. I do not go along with that at all.

Mr. President, I consider that the Nixon administration is serving the American people very ill indeed to continue supplying military and economic aid to the Fascist tyrants now ruling in Athens.

## FLAMMABLE FABRICS ACT

Mr. COTTON. Mr. President, I ask unanimous consent that we be permitted to call up a bill from the calendar during the morning hour, with the understanding that we resume morning business thereafter, and that it does not affect any other legislation.

The PRESIDING OFFICER (Mr. ALLEN). What is the calendar number?

Mr. COTTON. The calendar number is 1047.

The PRESIDING OFFICER. The Chair understands the Senator's request to be that the consideration of the bill would not constitute the transaction of business which would allow any Senator to object to meeting of committees.

Mr. COTTON. That is correct; and I am authorized by the majority leader to call this bill up.

The PRESIDING OFFICER. Is there objection?

Mr. YOUNG of Ohio. Mr. President, reserving the right to object—and I do not have in mind making an objection—may I ask the distinguished senior Senator from New Hampshire whether this has been cleared with the majority members of the Commerce Committee?

Mr. COTTON. Oh, yes; it has been cleared with all members of the Commerce Committee, and it is brought up with the authority of the majority leader and after a careful conference with the members of the Commerce Committee. I am bringing it up on behalf of myself and the distinguished Senator from Washington (Mr. MAGNUSON), chairman of the committee.

Mr. YOUNG of Ohio. Of course, the Senator from Ohio has no objection.

The PRESIDING OFFICER. Without objection, the request of the Senator from New Hampshire is agreed to, and the clerk will state the bill by title.

The assistant legislative clerk read the bill (S. 3765) by title, as follows:

A bill to authorize appropriations for fiscal years 1971, 1972, and succeeding fiscal years to carry out the Flammable Fabrics Act, as amended.

The Senate proceeded to consider the bill, which had been reported from the Committee on Commerce with an amendment to strike out all after the enacting clause and insert:

That this Act may be cited as the "Flammable Fabrics Act Amendments of 1970".

SEC. 2. Section 3 of the Flammable Act (15 U.S.C. 1192) is amended by redesignating subsections (a) and (b) as subsections (b) and (c), respectivelly, and inserting the following new subsection (a) immediately after "SEC. 3.":

"(a) The manufacture for sale, the sale, or offering for sale, in commerce, or the importation into the United States, or the introduction, delivery for introduction, transportation or causing to be transported, in commerce, or the sale or delivery after a sale or shipment in commerce, of any product, fabric, or related material, or any product made of fabric or related material, as to any of which an applicable standard of flammability has been issued or amended under the provisions of section 4 of this Act, which product, fabric, or related material has not been certified by the manufacturer thereof to meet the requirements of the applicable standards or other regulations issued or amended under the provisions of section 4 of this Act, shall be unlawful and shall be an unfair method of competition and an unfair and deceptive act or practice in commerce under the Federal Trade Commission Act. Such certification shall be based upon a reasonable testing program conducted by the manufacturer and approved by the Federal Trade Commission: *Provided*, That this subsection shall not apply to such product, fabric, or related material, or any product made of fabric or related material, which has been exempted from this subsection by rule or regulation issued by the Commission pursuant to the provisions of section 5(c) of this Act.

SEC. 3. Section 7 of the Flammable Fabrics Act is amended to read as follows:

"PENALTIES

"SEC. 7. (a) Whoever performs any act in violation of section 3 or section 8(b) with knowledge that such act is in violation of that section shall be guilty of a felony and upon conviction shall be fined not more than $10,000, imprisoned for not more than three years, or both, in addition to any other penalties, civil or criminal, imposed for such violation.

"(b) Whoever performs any act in violation of section 3 or section 8(b) shall be guilty of a misdemeanor and upon conviction shall be fined not more than $1,000, imprisoned for not more than one year, or both, in addition to any other penalties, civil or criminal, imposed for such violation.

"(c)(1) Whoever performs any act in violation of section 3 or section 8(b), in addition to any other penalties imposed for such violation, shall be subject to a civil penalty of not to exceed $10,000 for each such violation.

"(2) Any such civil penalty may be compromised by the Commission. In determining the amount of the penalty, or the amount agreed upon in compromise, the appropriateness of such penalty to the size of the business of the person charged and the gravity of the violation shall be considered.

"(3) Any such civil penalty may be enforced by the Commission through a civil action brought in the name of the United States by attorneys of the Commission in the district court of the United States in the

judicial district in which the defendant resides or does business."

SEC. 4. Section 8 of the Flammable Fabrics Act is amended by adding after the word "prosecution" in the first sentence the words "or penalty".

SEC. 5. Section 13 of the Flammable Fabrics Act is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 13. There is authorized to be appropriated a sum not to exceed $9,000,000 for the period beginning July 1, 1970, and ending June 30, 1972, to carry out the provisions of this Act."

Mr. COTTON. Mr. President, I send to the desk an amendment in the nature of a substitute, on behalf of myself and the senior Senator from Washington (Mr. MAGNUSON), the distinguished chairman of the Commerce Committee.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. COTTON Mr. President, I ask unanimous consent that the reading of the amendment in the nature of a substitute be dispensed with. I shall explain the substitute.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

That this Act may be cited as the "Flammable Fabrics Act Amendments of 1970".

SEC. 2. Section 3 of the Flammable Fabrics Act (15 U.S.C. 1192) is amended by redesignating subsections (a) and (b) as subsections (b) and (c), respectively, and inserting the following new subsection (a) immediately after "SEC. 3.":

"(a) (1) The manufacture for sale, the sale, or offering for sale, in commerce, or the importation into the United States, or the introduction, delivery for introduction, transportation or causing to be transported, in commerce, or the sale or delivery after a sale or shipment in commerce, of any product, fabric, or related material, or any product made of fabric or related material, as to any of which an applicable standard of flammability has been issued or amended under the provisions of section 4 of this Act, which product, fabric, or related material has not been certified by the manufacturer or importer thereof to meet the requirements of the applicable standards or other regulations issued or amended under the provisions of section 4 of this Act, shall be unlawful and shall be an unfair method of competition and an unfair and deceptive act or practice in commerce under the Federal Trade Commission Act. Such certification shall be based upon a reasonable testing program conducted by the manufacturer or importer which has been approved by the Secretary of Commerce in accordance with procedures established in section 4 of this Act.

"(2) This subsection and the penalties provided in section 7 of this Act, insofar as they would prohibit sale of a product without certification based upon an approved testing program, shall not take effect as to any product for which an application for approval of a testing program has been timely filed with the Secretary of Commerce until thirty days after such application has been finally acted upon by the Secretary of Commerce, or in the case of a rule prescribing a testing program under section 4(g) (6) of this Act, until thirty days after such rules have become effective.

"(3) In approving or prescribing a testing program under section 4(g) of the Act, the Secretary of Commerce may for good cause shown allow an applicant or person required to perform such prescribed testing an additional period of not more than six months within which to implement the approved or prescribed testing program. During such period applicability of the certification requirement of this section and the penalty provisions of section 7 of this Act as they relate to the requirement of certification shall be stayed.

"(4) Neither this subsection nor the penalties provided in section 7, insofar as they relate to the requirement of certification shall apply to any product, fabric, or related material, or any product made of fabric or related material which has been exempted from this subsection by rule or regulation issued by the Commission pursuant to the provisions of section 5(c) of this Act."

SEC. 3. Section 4 of the Flammable Fabrics Act is amended by inserting the following new subsection (g):

"(g) (1) The Secretary of Commerce may approve any testing program upon application by any manufacturer or importer pursuant to the certification requirements of section 3(a) of this Act (i) if such application is submitted in a proper form under regulations established by the Secretary of Commerce and published in the Federal Register, and (ii) if the testing program is reasonably designed to prevent or minimize the manufacture and introduction in commerce of any product, fabric, or related material, or any product made of fabric or related material, which is not in compliance with an applicable standard of flammability established pursuant to this section.

"(2) Unless the Secretary of Commerce has determined to proceed under paragraph (6) of this subsection, then upon promulgation of any new or amended standard of flammability under the provisions of this section, the Secretary of Commerce shall give notice that any person required to make a certification under section 3(a) of this Act and desiring approval of a testing program must submit an application for approval for such testing program within six months after the date of promulgation of such standard or amendment.

"(3) All applications for approval of testing programs must be approved or denied within a reasonable time. The Secretary of Commerce may consolidate similar applications for joint consideration and joint approval or denial.

"(4) A denial of an application for approval of a testing program shall set forth with particularity the reasons for denial.

"(5) Any person who will be adversely affected by such approval or denial may seek judicial review in accordance with procedures set forth in subsection (e) of this section.

"(6) In lieu of approving or denying applications for approval of testing programs, the Secretary of Commerce may promulgate rules prescribing the testing program to be used in the manufacture of any product, fabric, or related material for which a standard of flammability has been promulgated. Rules prescribing a testing program for fabrics, products, or related materials for which a standard of flammability has been promulgated prior to the effective date of this subsection shall become effective within one year from the effective date of this subsection, or six months after the date of promulgation of such rules, whichever is later. Otherwise, rules prescribing a testing program shall become effective on the effective date of any standard, or flammability promulgated, or six months after the date of promulgation of such rules, whichever is later."

SEC. 4. Section 7 of the Flammable Fabrics Act is amended to read as follows:

"PENALTIES

"SEC. 7. (a) Whoever performs any act in violation of section 3 or section 8(b) of this Act with knowledge that such act is in violation of such sections shall be guilty of a felony and upon conviction shall be fined not more than $10,000, imprisoned for not more than three years, or both, in addition to any other penalties, civil or criminal, imposed for such violation.

"(b) Whoever performs any act in violation of section 3 or section 8(b) of this Act shall be guilty of a misdemeanor and upon conviction shall be fined not more than $1,000, imprisoned for not more than one year, or both, in addtion to any other penalties, civil or criminal, imposed for such violation. However, no person shall be held in violation of this subsection if such person establishes that he exercised due care in the application of an approved testing program required under section 3(a) of this Act and that such application disclosed that the product, fabric, or related material was in conformity with applicable standards of flammability established pursuant to section 4 of this Act.

"(c) (1) Whoever performs any act in violation of section 3 or section 8(b) of this Act, in addition to any other penalties imposed for such violation, shall be subject to a civil penality imposed by the Commission of not to exceed $10,000 for each such violation. However, no person shall be held in violation of this subsection if such person establishes that he exercised due care in the application of an approved testing program required under section 3(a) of this Act and that such application disclosed that the product, fabric, or related material was in conformity with applicable standards of flammability established pursuant to section 4 of this Act.

"(2) Upon failure of the offending party to pay the civil penalty, the Commission may request the Attorney General to commence an action in a court of the United States for such relief as may be appropriate.

"(3) Prior to referral to the Attorney General for appropriate action, the Commission may compromise such civil penalty.

"(d) No person shall be subject to prosecution or penalty under this section for a violation of section 3 of this Act if such person establishes that he (1) has received in good faith a fabric, related material, or product certified as required by section 3(a) of this Act signed by and containing the name and address of the person by whom the product, fabric or related material was certified, and (2) has not, by further processing, affecting the flammability of the fabric, related material, or product covered by the certification which he received.

"(e) Notwithstanding the provisions of subsection (d) of this section and section 8 of this Act, an importer who chooses to rely on the certification of a foreign manufacturer under this section for any violation of section 3 of this Act."

SEC. 5. (a) Section 8(a) of the Flammable Fabrics Act is amended by adding after the word "prosecution" in the first sentence the words "or penalty".

(b) Section 8(b) of the Flammable Fabrics Act is amended by adding after the word "guaranty", wherever it appears, the phrase "or certification required under Section 3(a) of this Act".

SEC. 6. Section 13 of the Flammable Fabrics Act is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 13. There is authorized to be appropriated a sum not to exceed $9,000,000 for the period beginning July 1, 1970, and ending June 30, 1972, to carry out the provisions of this Act."

SEC. 7. Sections 2, 4, and 5 of this Act shall become effective one year after the date of enactment. All other provisions of this Act shall be effective upon enactment.

Mr. COTTON. Mr. President, on behalf of myself and the chairman of our Committee on Commerce, the distin-

guished Senator from Washington (Mr. MAGNUSON), who is unavoidably absent, I have sent to the desk an amendment in the form of a substitute.

Mr. President, I believe that a brief explanation of this amendment is in order.

On July 29 the bill S. 3765 was reported to the Senate by our Committee on Commerce. At that time my distinguished colleague, the junior Senator from Kentucky (Mr. COOK), and I submitted individual views. Our principal concern, as expressed in those views, was the fact that this bill started out simply to authorize appropriations for fiscal year 1971 and 1972 to carry out the Flammable Fabrics Act. Yet, in executive session the amount authorized was increased plus substantive amendments providing for substantial and cumulative criminal and civil penalties were added without opportunity for interested parties to be heard. Since this bill is merely an authorization rather than appropriation, I personally found no particular problem with the increased amount. However, my colleague from Kentucky and I were concerned about the substantive criminal and civil penalties and concluded our views by calling for a further hearing for interested parties to be heard.

Mr. President, on August 18 the distinguished chairman of our Commerce Committee, Senator MAGNUSON, graciously acceded to our request for a hearing. The amendment now pending is the product of suggestions advanced by the Department of Commerce and worked out by the staff of our Commerce Committee.

In all candor, I must acknowledge that I understand there still is some concern within the affected industry concerning the amendments; but, by and large, they are viewed as being preferable to the form in which the bill was reported by the committee.

The pending amendment would provide for the following:

First. Certification by the Secretary of Commerce of an approved testing program designed to prevent or minimize the manufacture and introduction in commerce of any product, fabric, or related material not in compliance with flammability standards;

Second. Application of the proposed amendment equally to domestic and foreign manufacturers alike, or the U.S. importer for such manufacturers who chooses to rely on the certification of a foreign manufacturer;

Third. A more realistic timing schedule for the effective date of the testing program certification, recognizing that such is dependent upon the effective date of flammability standards and the need of the industry for sufficient time to implement the standard and the related testing program;

Fourth. An amendment to certain of the penalty provisions eliminating the onerous "no fault" criminal and civil penalties in the bill as originally reported by the committee and provision for a defense of "due care" in the application of an approved testing program required for certification; and

Fifth. To avoid disruption of the marketplace, an effective date of 1 year after enactment for the principal provisions dealing with certification and related penalties.

Mr. President, except for the certification requirement in lieu of simply a "reasonable testing program" and except for the "due care" defense in lieu of one of "good faith" the amendment now pending essentially reflects the recommendations of the Department of Commerce. I, therefore, am constrained, to withdraw my previously stated objection to the bill as passed by the Senate with this amendment in the nature of a substitute.

I have information from my distinguished colleague, the Senator from Kentucky (Mr. COOK), that his principal objection was to the action taken by the committee without a hearing, and that, now that the hearing has been held, through the courtesy and fairness of the distinguished chairman, he, too, is willing to withdraw his objection to the bill in this form.

I hope that the amendment in the nature of a substitute will be agreed to, and that the bill will then be passed.

Mr. President, I ask unanimous consent, in order to complete the record, that a letter addressed to me by George S. Buck, Jr., director of research for the National Cotton Council of America, be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NATIONAL COTTON COUNCIL OF AMERICA,
*Memphis, Tenn., September 5, 1970.*

Hon. NORRIS COTTON,
*New Senate Building,*
*Washington, D.C.*

DEAR SENATOR COTTON: Once again I would like to thank you on behalf of the Council and several other textile and apparel organizations for your very important help in arranging the hearings on S. 3765 last August 18. We feel that your interest and your participation in the hearing enabled us to make our position clear, and we are pleased by the apparent reaction of the Chairman.

As I am sure you know, the Department of Commerce has offered substitutes for the FTC-proposed amendments. In our opinion, and that of other textile and apparel organizations with which we have consulted, the Commerce proposals are reasonable and workable, and far preferable to the amendments originally reported out by the Commerce Committee.

We will suggest one minor change in the Commerce proposals to make the timing more realistic, and we will offer appropriate language to the Committee staff within the next ten days. We hope that you agree that the Commerce proposals will give FTC all the enforcement powers it needs, and that you will support the substitution of the Commerce versions for the earlier amendments.

Once again, may I say that we are all most grateful for your interest and your important assistance.

Sincerely yours,

GEORGE S. BUCK, Jr.,
*Director of Research.*

The PRESIDING OFFICER. The question is on agreeing to the amendment in the nature of a substitute.

Mr. BAYH. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BAYH. I was standing in the back part of the Chamber a moment ago, and was not fully aware of the nature of this unanimous-consent request, but that is my responsibility and no one else's. Could the Presiding Officer repeat that unanimous-consent request, or should I pursue the matter through a series of interrogatories?

The PRESIDING OFFICER (Mr. ALLEN). The Chair understands that the Senator from New Hampshire asked that unanimous consent be granted that the bill be called up for consideration at this time, during the period set aside for the transaction of morning business. Unanimous consent was given. We are still in the period set aside for the transaction of routine morning business.

Mr. BAYH. Would the Senator from Indiana be inaccurate to suggest that normally when a piece of legislative business is transacted during the morning hour, it prohibits committees from sitting, which was permitted, at the desire of the leadership, by the tolerance of the Senate?

The PRESIDING OFFICER. That would be the normal case. However, permission was granted at the outset of the session for certain committees to meet, and they are meeting in compliance with that unanimous-consent agreement until the close of morning business.

Mr. BAYH. But is the Senator from Indiana inaccurate in suggesting that the rules provide that, whenever a legislative matter is brought up, this right is forfeited?

The PRESIDING OFFICER. Yes; that is correct in the absence of a unanimous-consent request, which was made and granted.

Mr. BAYH. Then not only did we move to bring up a piece of legislation but the Senator has also moved to suggest that we are not talking about legislation, so that the committees can continue to meet; is that the accurate effect of it?

The PRESIDING OFFICER. We have not closed the period set aside for the transaction of routine morning business. We are still in that period. The Chair points out that certain committees were, at the request of the majority leader, given permission to meet by unanimous consent, until the close of morning business.

Mr. COTTON. Mr. President, may I say to my friend from Indiana that it was my intent to request, and I think I did phrase my request to that effect, that by unanimous consent this one piece of legislation be disposed of without terminating the morning hour, and that the Senate then resume the morning hour, as it was in progress at the time the request was made.

Mr. BAYH. Mr. President, I appreciate the position of the Senator from New Hampshire. My friend's request was granted.

But I would point out that in order for the Senator's request to be granted, and not have the meetings of the committees which have been given permission to sit terminated and the committees denied the right to sit, it is my understanding

that we have to say, "Well, we are taking up legislation, but we are not really taking up legislation."

The PRESIDING OFFICER. By unanimous consent; that is correct.

Mr. BAYH. By unanimous consent; all right. As soon as his friend from New Hampshire is through, the Senator from Indiana intends to express his concern and his desire, and the steps that he is prepared to take to try to rectify a situation which I think is in derogation of our responsibility as Members of the U.S. Senate. I intend to do that as soon as my friend from New Hampshire has finished. But I did not want to let this opportunity pass without suggesting that I think it is extremely inconsistent for us to follow one course of action with one piece of legislation and not with another.

Unanimous consent has been granted, but merely to say it is inconsistent is, I think, putting it kindly. However, I do not intend to prolong the debate in order to ask for the yeas and nays or anything like that.

Mr. COTTON. Mr. President, I appreciate the attitude of my friend from Indiana, who is always courteous and considerate; but the cold fact remains that the Senate can do anything it chooses by unanimous consent. The unanimous consent request was made when the Senator from Indiana was on the floor. If he had objected to it at that time, of course we could not have brought up this piece of legislation. In view of the fact that he did not, I think we should be permitted to take care of this one piece of legislation, and then, if a Senator tries it again, any Senator will be in a position to stop it.

The PRESIDING OFFICER. The question recurs on agreeing to the amendment in the nature of a substitute offered by the Senator from New Hampshire.

The amendment was agreed to.

Mr. COTTON. Mr. President, I move to reconsider the vote by which this substitute was agreed.

Mr. HRUSKA. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The amendment, as amended, was agreed to.

Mr. COTTON. Mr. President, I move to reconsider the vote by which the amendment, as amended, was agreed to.

Mr. GURNEY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill (S. 3765) was ordered to be engrossed for a third reading, was read the third time, and passed.

The title was amended, so as to read: "A bill to amend the Flammable Fabrics Act to increase the protection afforded consumers against injurious flammable fabrics."

Mr. COTTON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. GURNEY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

---

## COMMITTEE MEETINGS DURING SENATE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Subcommittee on Minerals and the Subcommittee on Parks and Recreation of the Committee on Interior and Insular Affairs be authorized to meet during the session of the Senate today.

I think I should say that this matter, as well as some others, has been cleared, after some discussion on all sides.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. MANSFIELD subsequently said: Mr. President, to make the record clear and to remove any doubts, I again ask unanimous consent that all those committees except the Committee on Labor and Public Welfare be permitted to meet during the session of the Senate today.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. MANSFIELD. Mr. President, with reference to that particular committee, objection was made by request that it be excluded from the request and that other committees be allowed to meet in accordance with the request by the joint leadership earlier this morning.

The PRESIDING OFFICER. Does the Senator's request include other subcommittees of the Labor and Public Welfare Committee?

Mr. MANSFIELD. The request was made, objected to by request, that the Committee on Labor and Public Welfare be authorized to meet. So it refers to the whole committee. This would be the one exception, the Committee on Labor and Public Welfare.

The PRESIDING OFFICER. The Senator's request is that all committees save the Committee on Labor and Public Welfare be permitted to meet after the morning hour.

Mr. MANSFIELD. All other committees requesting it, because there were a number of separate requests and all committees were not given that permission.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. MANSFIELD. Mr. President, it is my recollection that when I asked that all committees, except one, be permitted to meet during the session of the Senate today, the Senate agreed to the request. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. MANSFIELD. So, there is only one committee which will be forbidden from continuing to meet at the conclusion of morning business on the basis of the request made by the Senator from Montana.

The PRESIDING OFFICER. The Senator is correct.

## BORMAN SPEECH ON PRISONERS

Mr. GURNEY. Mr. President, yesterday Col. Frank Borman, the former astronaut who has turned diplomat, gave a very moving account of his efforts in behalf of American prisoners held by the North Vietnamese. It was an excellent presentation and it brought home effectively the large task ahead for those concerned with this issue.

The most serious aspect of the problem as he outlined it is still the matter of actually finding out what has happened to nearly 1,000 Americans listed as missing in action, but whose names have never turned up on any lists furnished by the North Vietnamese. We have identified only some 457 men as being confirmed prisoners, whereas there are nearly 1,500 men missing in action. The fate of the rest is unknown.

This uncertainty is perhaps the most difficult thing of all for the families of these men to bear. They live in hope, but there is always the terrible fear that accompanies the lack of sure knowledge.

The statement by Mr. Borman reinforces for all of us the determination to continue our efforts in behalf of these men and their families.

---

## THE VICE PRESIDENT'S SPEECH IN LOUISVILLE, KY.

Mr. COOK. Mr. President, it was my pleasure yesterday to be with the Vice President of the United States in my home community of Louisville, where he spoke in behalf of a former running mate of mine who is now a Member of the House, Representative WILLIAM O. COWGER.

BILL and I first ran together when he ran for mayor and I ran for county executive.

During the course of that speech, the Vice President of the United States asked those in attendance how much sense it made for a present member of the Federal Communications Commission, Mr. Nicholas Johnson, to quote Eldridge Cleaver in regard to the problems of drugs in this country.

This morning, Mr. Johnson, in rebuttal to the remarks in that speech, made some remarks in the Washington Post. He said:

> Certainly the broadcasting industry will be amused to hear that I am a "super permissive" Government official.
>
> Perhaps it is obvious why Vice President Agnew defends big campaign contributors who are urging our grade school children to take up smoking—after all, he was speaking at a $100-a-plate fund raising luncheon in the heart of the tobacco country.
>
> But I doubt that his rhetoric will provide much satisfaction to the dependents who are left behind by the 300,000 Americans who will die from cigarette related diseases this year.

First of all, Mr. President, I wish to be very critical of Mr. Johnson for so recklessly throwing around the figure of 300,000 lives a year. A number of highly qualified medical scientists would dispute this. I would hope Mr. Johnson would read my speech of December 12, 1969, if he is not opposed to being educated to

the other side of the smoking-health issue.

But, more important, I would like to bring to the attention of the Senate that he said the Vice President was in the heart of the tobacco country. Well, I have to give that credit to the distinguished Senator from North Carolina, because North Carolina is the No. 1 burley tobacco producer in the United States, not Kentucky. As a matter of fact, Kentucky is No. 2 in the agricultural production of tobacco. However, Louisville, which Mr. Johnson was referring to, does not even rank among the top three in the manufacture of cigarettes.

But I will say this to Mr. Johnson, and I think that this is of interest to him, and that he has knowledge of it: It was the Senators from the tobacco States, and it was this Senator, as a member of the Committee on Commerce, who wanted the tobacco industry to go off radio and television last September and not to stay on television through January 1, 1971, so that all the football games could be put on ABC, NBC, and CBS and all the revenue could be paid to the respective broadcasting systems by way of tobacco advertising.

But it was Mr. Johnson's friends on the Commerce Committee who felt that it would be too big a blow to the broadcasting industry to go off that soon. It was those members of the committee who wanted to destroy the entire tobacco industry, but who decided that they would let this advertising go on for the benefit of the broadcasters.

So I would say to Mr. Johnson that I think he knows the facts. I think he knows that every Senator from a tobacco State wanted the industry to go off radio and television last September. Also, the tobacco industry had wanted to go off the air at this time.

I might suggest that it was at an informal meeting of the representatives of the broadcasting industry that I heard one of the most amazing remarks I had ever heard. The tobacco industry pays to the broadcasting industry some $250 million a year. A gentleman from the broadcasting industry said, "If you will just let us keep cigarette advertising for 3 years and phase it out with the nonsmoking advertising, we will convince more people not to smoke." That was an amazing thing for a businessman to say. What he was saying was, "We want the $250 million a year from the tobacco industry. If you will let us stay so we can get the $250 million, we will put the free advertising on that we have to, under Mr. Johnson's policy at the Federal Communications Commission, and we will convince more people not to smoke while we are taking $250 million from the tobacco industry." That was a rather fantastic argument to make in front of Senators from tobacco producing States.

Also, I would say to Mr. Johnson, that not only did the Vice President not cater to the tobacco industry, but he was even critical of the tobacco industry in his speech yesterday. I read from his speech:

> In the course of his exercise in Spockmanship, this official does offer one useful addition to my own argument. He wonders why I have overlooked the use of drug culture language in advertising, and points to the television station that promotes its programming as great "turn-on," or the honey company that suggests we "get high on honey." He's right about that; I notice that both a major network and a cigarette manufacturer have taken as their theme "getting it all together" this fall—a direct use of the drug culture's phrase that can mean either reaching a sense of nirvana through drugs, or shaking off the after-effects of a trip.

I might suggest that the Vice President made one other remark in his speech that I think is very appropriate to the distinguished member of the Federal Communications Commission. He said this in regard to Mr. Johnson's remark:

> This high government official seriously argues that cigarette smoking is a far greater danger to the American public than the drug culture. I suppose the way to convince him that smoking pot is harmful is to show that it leads to smoking tobacco.

Mr. President, approximately 6,000 members of the Tobacco Workers' Union of the AFL–CIO work in my community. I expect that approximately 90 percent of those 6,000 are registered Democrats, whom I am sure the distinguished Senator from Indiana, who is sitting in the chamber, would like to have living in his community. I imagine that the largest percentage of the thousands of people who work in the tobacco fields in my State are registered Democrats, because we are a little better than 2½ to 1 registered Democrats. I would only say to those people in my State who voted for the Democratic Party and for the last Democratic President, who saw to the appointment of Mr. Nicholas Johnson, that Mr. Johnson has spent all his time on the Federal Communications Commission ever since trying to destroy one of the largest and most major industries in my State. It is so major, Mr. President, that it produced 298 million cash dollars to the Commonwealth of Kentucky in 1968; it is 34 percent of the farm cash income in the Commonwealth; it sees to the employment of more than 150,000 of our farm families; and it sees to the further employment beyond that, Mr. President, of 170,000 other individuals in the Commonwealth of Kentucky.

So I can only say to Mr. Johnson, if he wants to get into an argument with Vice President AGNEW, I suggest he get into an argument with him on the issues.

The issue that the Vice President called his hand on is rather flippant. The only recourse that Mr. Johnson had was the fact that the Vice President had made his speech in Louisville, apparently among all the so-called "fat cats" in the center of the tobacco industry in the United States—a rather novel approach. We did not know we were in that position.

Mr. President, I ask unanimous consent to have printed in the RECORD the text of the Vice President's speech; an article published in the Washington Post of September 23, 1970; and the text of a speech I delivered in the Senate on Friday, December 12, 1969, in connection with the smoking and health issue.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ADDRESS BY THE VICE PRESIDENT

I'm delighted to be in Louisville to speak up for my old and valued friend, Bill Cowger.

We've known each other since 1962—and in politics, that's an "old friendship." I came here eight years ago to ask his advice on my campaign for Baltimore County Executive; Bill was Mayor of Louisville at that time, one of the very few Republican mayors in the nation, and his advice must have been good. I won.

Later that year, Bill came to Baltimore to speak at a fund-raising dinner in my behalf. I appreciated that; to be frank about it, the line of elected officials waiting to speak out for me at fund-raising dinners wasn't very long.

In 1967, when I was Governor of Maryland, Bill Cowger invited me to appear before his Congressional Task Force on Urban Affairs, to give my views on problems and solutions in the urban area. The questioning was keen; Bill is known nationally to be one of the foremost authorities on urban affairs.

Bill Cowger is a stand-up guy, a Congressman of proven experience with the courage of his convictions—and I believe the people of Kentucky will return him to Congress with the resounding vote of confidence he deserves.

One of the important areas that Bill's Task Force has researched over the past four years has been that of narcotics and drug abuse, a subject of interest to this Administration. This afternoon, I would like to cover one aspect of that problem with you.

I have been travelling across this country pointing out the need to retire from public life men who are completely out of touch with American life today.

Not all of what I have been saying involves purely political matters. Some concerns itself with social issues that deal with American culture itself. For example, in Las Vegas last week, I discussed in some detail the rise of the drug culture in America. I pointed out how it was being subtly propagandized in many movies, books, and particularly in the lyrics of some of our popular songs.

I quoted some of those songs that put drug use in a favorable light. I could have gone into much more detail; into lines like "I'd love to turn you on," or to a song title that spells out LSD: "Lucy in the Sky with Diamonds."

There can be no doubt, to any objective observer, that some proponents of the drug culture are misusing popular music to get across their message. Most of the time, it is done subtly. Peter, Paul and Mary made very clear just what many rock groups were doing in one of their hit songs: "But if I really say it/The radio won't play it/Unless I lay it between the lines."

The reaction to my speech from some people who have large investments in the music industry was predictable. When I suggested that the song "Eight Miles High" glorified the pleasures of drugs, one rock group manager, in wide-eyed innocence, said the song was all about how high an airplane flies. Others said that I failed to distinguish between the use of marijuana and the use of other, harder drugs—as if urging the use of marijuana were a perfectly legitimate use of the public airwaves.

Others in the music industry came up with a much more constructive reaction. They pointed out how some rock groups recorded songs with specific anti-drug messages. That's fine. They ought to do a lot more of it. But the fact that some examples can be found of anti-drug lyrics does not in any way excuse the use of many more pro-drug messages in many other songs.

As I said, the reaction of the rock music managers was predictable. And perhaps what I said will stimulate them to an awareness that a growing number of Americans are

waking up to what has been going on in music lyrics lately.

But what surprised and shocked me was the reaction of a member of the Federal Communications Commission. This appointee of a previous administration promptly took the side of the rock musicians, and echoed their pronouncements about how many songs were produced with anti-drug lyrics.

However, this man—who is supposed to represent the public in regulating the broadcasting business—went a lot further. He went on to espouse the kind of radical-liberal philosophy of permissiveness and self-flagellation that has encouraged so many of our young people to turn to pot and worst.

Let me quote him fully and in context:

"The issue is whether you, and the rest and the Administration, are—to borrow Eldridge Cleaver's (and VISTA's) phrase—part of the solution, or part of the problem. The question is whether you have done anything to alter the repressive, absurd and unjust forces in our society that drive people to drugs."

There it is, my friends, in all its pristine majesty—the puddle-minded philosophy of the radical-liberal run rampant. He does not blame the use of drugs on the weakness of the users; he does not blame the pushers for their skillful enticements to our young. Quoting Eldridge Cleaver, of all people, to make his point, he says that it is the "repressive, absurd and unjust forces in our society that drive people to drugs."

No, it is never the addict's fault that he is an addict; it is not the pushers' fault that he is a pusher; it is all "society's" fault. You and I are the guilty parties.

This is the sort of fatuous nonsense being perpetrated on the American public by the super-permissive officials that have been allowed to take so much control of our government. It is dangerous nonsense, because by blaming everybody it holds nobody responsible.

This high government official seriously argues that cigarette smoking is a far greater danger to the American public than the drug culture. I suppose the way to convince him that smoking pot is harmful is to show that it leads to smoking tobacco.

In the course of his exercise in Spockmanship, this official does offer one useful addition to my own argument. He wonders why I have overlooked the use of drug culture language in advertising, and points to the television station that promotes its programming as great "turn-on," or the honey company that suggests we "get high on honey." He's right about that; I notice that both a major network and a cigarette manufacturer have taken as their theme "getting it all together" this fall—a direct use of the drug culture's phrase that can mean either reaching a sense of nirvana through drugs, or shaking off the after-effects of a trip.

Many advertising copyrighters seize upon the latest terms in the drug culture in an effort to stay "with it"—and in so doing, unwittingly help glamorize a culture that spreads its own cancer among our young people.

The main thrust of the FCC commissioner's attack, however, is exactly what I predicted in my own speech: that by calling public attention to this subtle propaganda of the drug culture, I was engaging in a form of censorship. This is the conditioned reflex of the radical-liberal to almost everything I say: "censorship, repression." In his opinion, the only kind of criticism that is not repressive is his own criticism of what I say.

But I invite you to consider the extreme to which he says censorship in America has gone. I quote the Commissioner: "The forms of censorship are subtle. This Administration repeats and repeats that it is not censoring—just as the Russians did when they rolled their tanks into Czechoslovakia in August 1968."

There you have it again. There is a statement—not ad-libbed, but carefully written out—that compares our own government's policy toward the media with Soviet dictatorship censorship during the Czech invasion. And the man delivering that remark is not an employee of some other government, not a confused professor lobbing foolish thoughts from behind his shield of tenure, not a misled campus radical—but a man who draws his salary from your tax dollars. And even worse, a man with a lot to say about the future of broadcasting in America.

Fortunately, there are some developments on the brighter side. The National Association of Broadcasters, I understand, will soon issue guidelines to tone down the television image of fantastic changes in mood that happen to a model who takes a pill. And a firm that supplies music programming to many stations has begun a rating system that will alert station managers to the content of each record. And I imagine that now that they know they are being listened to more closely by the general public, some lyricists will think twice before including a drug message in their songs.

Why do you suppose this is coming about? Not because some officials are wondering, and I quote, "How many Americans seek in drugs the solace from a vicious cruel world they did not create, but cannot escape?" Progress against the drug culture is being made because other officials, who reject that ridiculous permissiveness, are demanding that we wake up to the carnage the permissivists have caused.

It was Shakespeare's Hamlet who first complained that "the time is out of joint;" a later poet found himself "a stranger, and afraid, in a world I never made." The political Hamlets of today are with us in force—vacillating, waffling, wringing their hands, wallowing in alienation, blaming society for inadequacies in themselves and in others.

These political Hamlets—this little group of unwilling men—still dominate the Senate of the United States, still hold themselves out as candidates for election, still work their weakening will in the regulatory agencies of government.

But for them, the time *is* out of joint; a new day has arrived. The pendulum is swinging in the other direction at long last. An infusion of good sense, of hardheadedness, of toughmindedness, is running through the American body politic.

This year, I believe, will not be the typical "off-year election." This year, I believe we will see that new spirit of America make itself felt. The American people, in rejecting the men afflicted with self-guilt, tortured by doubt, and laden with anxieties, will turn instead to the affirmative men.

They will send to the Congress of the United States men ready and willing to come to grips with the trouble of our times; decisive men, who will stand with the President of the United States in making this nation the kind of orderly, just and progressive society the American people deserve.

---

[From the Washington Post, Sept. 23, 1970]

AGNEW JOINS DRIVE TO DEFEAT SENATOR GORE

(By William Chapman)

MEMPHIS, TENN., September 22.—Vice President Spiro T. Agnew joined the Republican drive to defeat Sen. Albert Gore tonight with the unusual tactic of belittling Gore's importance as an election-year target.

Gore, said Agnew at a GOP fund-raising dinner, "is flattering himself by exaggerating his importance in the national picture."

He suffers "a paranoiac fear of being the No. 1 political target of the 'silent majority'," said the vice president.

For his part, Gore retaliated in an equally unusual manner by showing up at an airport reception for Agnew and sharing a platform with him at a ground-breaking ceremony later.

"Senator, I heard you were going to be here," said Agnew to the Democratic candidate standing in the airport reception line. "Nice of you to welcome me."

"Welcome to Tennessee," Gore said.

Agnew arrived here for a speech supporting Gore's Republican opponent, Rep. William Brock, in what has become one of the closest and most intensely watched contests of the year.

ADMITTED UNDERDOG

Admittedly an underdog, Gore has played to home-state sympathies by picturing himself as "target number one" of the Nixon administration. He has tried to use the Vice President's visit as an example of Republican outsiders ganging up on him.

But Agnew said, "The senior senator from Tennessee is important only to the radical liberal wing of the Democratic Party. For the incumbent senator from Tennessee is for all intents and purposes Southern regional chairman of the Eastern liberal establishment."

When Gore comes home to Tennessee, Agnew added, "You do not see him bringing down to Memphis the radical-liberal friends he hobnobs with up in Manhattan and Georgetown, because these friends would not fit very well with the people of Tennessee."

He said Gore "incredibly" had voted against two Southern nominees for the Supreme Court, Judge G. Harold Carswell of Florida and Clement Haynsworth of South Carolina, both rejected by the Senate.

"That crowd in the Senate which talks so much about ending discrimination committed an act of discrimination against the South," Agnew charged. "They went over to the Supreme Court and nailed a shingle to the door that reads, 'No Southerner Need Apply."

AIRPORT APPEARANCE

Gore's appearance at the airport ceremony had been predicted by the Agnew staff but they were not certain what kind of scene might develop. It turned out to be only an exchange of polite remarks and some free television time for Gore.

At a $100-a-plate luncheon for Cowger, Agnew launched an attack on a member of the Federal Communications Commission, Nicholas Johnson, who last week criticized Agnew's speech on the American "drug culture."

"POT AND WORSE"

Johnson, he charged, has taken the side of "rock musicians" whose lyrics promote the use of drugs. The FCC member had espoused "the kind of radical-liberal philosophy of permissiveness and self-flagellation that has encouraged so many of our young people to turn to pot and worse," Agnew declared.

[In Washington, Johnson replied:

["Certainly the broadcasting industry will be amused to hear that I am a 'super permissive' government official.

["Perhaps it is obvious why Vice President Agnew defends big campaign contributors who are urging our grade school children to take up smoking—after all, he was speaking at a $100-a-plate fund-raising luncheon in the heart of the tobacco country.

["But I doubt that his rhetoric will provide much satisfaction to the dependents who are left behind by the 300,000 Americans who will die from cigarette-related diseases this year."]

About 250 persons attended the luncheon in Louisville. Local politicians, according to the Louisville newspapers, had anticipated ticket sales of 500 or 600.

Gore also appeared on the speaker's platform where Agnew spoke at the dedication of a new Internal Revenue Service regional center near the airport. A small crowd of Gore's young admirers burst into applause when he was introduced. After Agnew finished his brief speech, Gore was the first on his feet to applaud.

The Vice President, beginning his second week of barnstorming for Republican can-

didates, also dropped in at Louisville today to endorse Rep. William Cowger (R-Ky.), who is in a close race for reelection.

THE HOUSE CIGARETTE HEARINGS—A NEW LOOK AT SMOKING AND HEALTH

Mr. COOK. Mr. President, after 13 days of hearings and 1,807 pages of testimony, the House Interstate and Foreign Commerce Committee has produced a record that casts more than reasonable doubt on the case against cigarette smoking. Indeed, the record reflects an erosion of confidence in the "facts" of the antismoking case.*

But, committee members need solid facts as a basis for decision. One member told of seeing a colleague become so frustrated that he lit up a cigarette; "and the fellow does not even smoke," he added. Another suggested that the committee "investigate the investigators" to resolve the contradictions. A third called for "reopening" the Surgeon General's 1964 study of smoking and health, the basic indictment by the antismoking forces.

What happened to cause this reaction?

Like most people, committee members were well aware of the charges made against cigarette smoking. A constant barrage of antismoking commercials, newspapers stories, and pamphlets buttressed by one-sided reports from the Surgeon General created a bandwagon effect. And like most people, including most physicians, unfamiliarity with the actual scientific evidence led them to accept the notion that where there is cigarette smoke there must also be fire.

However, committee members, unlike the general public, were exposed by experts to the other side of the smoking and health controversy during the hearings. And this evidence was revealing. They heard much testimony that flatly contradicted popular views. For example, they learned:

That medical scientists are not solidly lined up against smoking.

That there are honest and wide differences of opinion among medical scientists about the importance of the reported statistical associations between cigarette smoking and various diseases.

That, according to a number of highly qualified expert witnesses, many reporting on their own research, there is no scientific evidence that cigarette smoking causes cancer and other diseases.

Committee members also learned—and to men in the process of lawmaking the disclosure must have been disquieting—that some of the tactics used against tobacco were below the belt.

Following are some excerpts of the evidence, which casts serious doubt on the theory that cigarette smoking causes disease. To most Americans it would come as a great surprise that such evidence even exists:

DOES SMOKING CAUSE LUNG CANCER?

"A person of true scientific discipline would never make a final judgment on the type of evidence presented in favor of the hypothesis." (Thomas H. Bren, M.D., Professor and Chairman, Department of Medicine of Southern California School of Medicine.)

After at least 30 years of experimental work, and many smoke inhalation experiments in animals, lung cancers of the most common, squamous cell human type have not been produced. It is usually difficult to prove a negative, but if cigarette smoke were a cause of lung cancer, it is indeed surprising that no animal experiments have succeeded in its production. (Sheldon C. Sommers, M.D., Clinical Professor of Pathology, Columbia University Medical College.)

The cause of cancer in humans, including the cause of cancer of the lung is unknown. (Victor Buhler, M.D., Associate Clinical Professor of Pathology and Oncology at University of Kansas School of Medicine, and former president of the College of American Pathologists.)

As of the present date, the cause of lung cancer remains unknown. (Duane Carr, M.D., Professor of Surgery, University of Tennessee College of Medicine.)

The statistical association between smoking and lung cancer is not indicative of cause and effect, because the clinical behavior of the disease does not permit this conclusion. (Hiram T. Langson, M.D., Professor of Surgery, University of Illinois College of Medicine and President of the American Association for Thoracic Surgery.)

As of 1969, our knowledge of the cause or causes of lung cancer remains primitive . . . To date the only evidence supporting this [cigarette smoking] hypothesis is statistical, and there are statistics which fail to support it. (William B. Ober, M.D., Associate Professor of Pathology New York Medical College.)

DOES SMOKING CAUSE HEART DISEASE?

The incrimination that smoking causes or accelerates heart disease from atherosclerosis of the coronary arteries is wholly unwarranted (William Evans, M.D., Former consulting physician The Institute of Cardiology London, England.)

It is very doubtful that such a relationship exists. If heavy smokers suffer coronary thrombosis in a significantly greater proportion than non-smokers, the cause of the phenomenon could be related to the stress that usually goes together with the smoking habit. (Walter S. Priest, M.D., Emeritus Professor of Medicine at Northwestern University Medical School.)

The evidence I feel is still not strong enough for me to say within the criteria of causality . . . that there is cause and effect. (Surgeon General William H. Stewart.)

There is no proof that cigarette smoking causes [diseases of] coronary arteries . . . let's be sure we understand the American Heart Association position. We do not say that we have the data which says cigarette smoking causes coronary artery [disease]. (Campbell Moses, M.D., Medical Director American Heart Association.)

It would be regrettable, if the impact of the prestige of the U.S. Public Health Service led scientists and the public to believe in and accept as firmly established facts which, on the basis of current knowledge, are speculative and lacking in scientific validity. The situation demands not special pleading but scientific truth, namely, what is reasonably established. And, certainly, it has not been reasonably established that cigarette smoking causes coronary heart disease. (Carl C. Seltzer, Ph. D., Senior Research Associate Harvard University School of Public Health.)

DOES SMOKING CAUSE EMPHYSEMA?

The cause or causes of emphysema are not now known. ("Special Report on Emphysema," National Institute of Allergy and Infectious Diseases, N.I.H.)

They stated [the 1964 Surgeon General's Advisory Committee] . . . that a relationship exists between pulmonary emphysema and cigarettes but it has not been established that this relationship is casual (Surgeon General William H. Stewart.)

I cannot find any actual evidence that . . . cigarette smoke or anything else, has a casual relationship to the development of this disease. (Edwin Rayner Levine, M.D., Associate Professor of Clinical Medicine, Chicago Medical School.)

Most authorities agree that emphysema presents a complex problem which awaits scientific explanation. (John P. Wyatt, M.D., Professor and Chairman, Department of Pathology, University of Manitoba.)

The "protagonists of the anti-smoking campaign" have refused to face this paramount question: "If it is true that we do not know what emphysema is and whence it originates, how can they maintain the claim that it is linked to cigarette smoking? How can their position be reconciled with scientific principles?" (Israel Rappaport, M.D., Former Associate Clinical Professor, Columbia University Medical School.)

Testimony such as this, flatly contradictory to "accepted" views, seriously undermine the major conclusions of the antismoking witnesses—and the underlying premise for further punitive legislation. It was not lost on the committee that among the witnesses quoted above were some notable opponents of smoking.

But further doubt arose as expert witnesses also exploded many of the supporting dogmas of the antismoking forces. Under scientific attack, a number of subsidiary assertions, which had bolstered the main charges and lent force to antismoking commercials were weakened. In effect, they were now ended with a question mark instead of an exclamation point.

Following are some of the newly raised questions:

DOES SMOKING TURN THE LUNGS BLACK? OR CAN DOCTORS TELL SMOKERS' LUNGS FROM NONSMOKERS' LUNGS?

The knowledge of what the black pigment represents, namely carbon particles or coal dust, is known to every well trained second-year medical student and . . . it is not possible to equate blackening of the lung to exposure to tobacco products. (Sheldon C. Sommers, M.D., Clinical Professor of Pathology, Columbia University Medical College.)

The color of the lung has to do with the matter of carbon, and I am unable to recognize the difference between a smoker and a non-smoker . . . and I have never been able to correlate it with the use of tobacco. (Hiram T. Langston, M.D., Professor of Surgery, University of Illinois College of Medicine, and President of the American Association for Thoracic Surgery.)

I would estimate that of a thousand pathologists in this country, 998 would say, "I could not tell," and the other two would say "I could tell" and those two who could tell either had some infinite intuition or are not telling the truth. (Irving Zeidman, M.D., Professor of Pathology, University of Pennsylvania School of Medicine.)

I have examined thousands of lungs—and I cannot tell you from examining a lung whether or not its former host had smoked . . . I state flatly and unequivocably and emphatically that cigarette smoke will not turn the lung black. (Victor Buhler, M.D., Pathologist, St. Joseph Hospital, Kansas City, Missouri.)

IS NOT EVERY SMOKER DAMAGED BY HIS SMOKING?

Not everyone gets cancer or heart disease. And, of course, non-smokers, as well as smokers, get both. Indeed, it would appear that, as observed in the first massive review of the smoking research literature, the British Report of the Royal College of Physicians, "most smokers suffer no serious impairment of health or shortening of life as a result of their habit" . . . I hope it is well understood that no medical practitioner can advise patients they can avoid lung cancer or heart disease by not smoking. (Bernice C. Sachs, M.D., Seattle Mental Health Institute.)

---

* HEW Secretary Finch himself noted some gaps in the "facts" on April 25, 1969, during the hearings, when he announced in a news release,

"I believe that industry and government working together offer great promise of finding the answers we need. I am confident our joint effort will yield a cooperative research program which strongly promotes the public interest."

To experienced physicians who examined and observed so many heavy smokers, the most astonishing feature of the present issue over the effects of smoking must be the current trend to simply ignore the overwhelming evidence presented by the tens of millions of smoking men and women going through life without any signs or symptoms of damage to their lungs from many years of smoking—even heavy smoking. (Irsael Rappaport, M.D., Former Associate Clinical Professor, Columbia University Medical School.)

If cigarettes were the cause of lung cancer, I believe we would have an incidence many times greater than we do now, and would not encounter the disease in nonsmokers. (H. Russell Fisher, M.D., Professor of Pathology, University of Southern California School of Medicine.)

IS THERE A LUNG CANCER EPIDEMIC?

The increase in the incidence of lung cancer in the United States . . . reflects the growing and aging population of this country. The apparent increase is also reflected in the increased expertise and improved diagnostic abilities of the medical profession. The increase in the number of members of my own specialty in medicine (Pathology) is directly responsible for some of the apparent increase. (H. Russell Fisher, M.D., Professor of Pathology, University of Southern California School of Medicine.)

Changes in classification of disease have contributed to much of the reported increase in diseases such as lung cancer. (Duane Carr, M.D., Professor of Surgery, University of Tennessee College of Medicine.)

In 1900 the combined crude death rate for respiratory diseases in the United States exceeded 450 per 100,000 and there were no death rates recorded for lung cancer. If only a small percentage of the death attributed to tuberculosis, pneumonia, bronchitis or influenza had been incorrectly diagnosed and were, in actuality, cases of lung cancer, there would be relatively little increase in the prevalence of this disease during the past half century.

The concept that cancer of the lung is a new disease and a byproduct of modern civilization is false and those who promulgate this thesis are misleading the public. The disease was a well known entity for a century before the era of widespread cigarette smoking. The only thing new is our ability to diagnose it before autopsy. (Milton B. Rosenblatt, M.D., President, Medical Board, Doctors Hospital, New York.)

An important aspect of present trends in this country which is generally ignored, is the declining rate of increase. If this feature of the trend continues, the disease will reach its peak among the white male population in the foreseeable future (1983) and then start to decline (A. G. Gilliam, M.D., of the National Cancer Institute.)

The observed decline in the rate of increase of lung cancer is exactly what one would expect, however, if the reported increase were due to constantly improving detection of the disease—or of any other for that matter. (Thomas H. Brem, M.D., University of Southern California.)

DOES NOT GIVING UP SMOKING MAKE ONE HEALTHIER?

Even if cigarette smokers, as a group did not smoke, there still would be a higher proportion of persons with primary cancer of the lung, or coronary heart disease, if you wish, among them than among non-smokers, as a group, since constitutionally they are more disposed to the disease. (George L. Saiger, M.D., Former Associate Professor of Epidemiology, Columbia University.)

The same higher coronary rate was observed in former cigarette smokers as in all current moderate and heavy smokers . . . the incidence of symptomatic infarction was as great in former cigarette smokers as it was in current smokers and was as great in former cigarette smokers as in men smoking more than one pack daily. (Ray Rosenman, M.D., Director, Western Collaborative Study of Coronary Heart Disease.)

[From data in the HEW survey of smoking and illness] consistent pattern is quite obviously apparent. For all categories, present smokers have a much lower incidence [of disease and disability] than do former smokers. (Theodore D. Sterling, Ph.D., Professor of Applied Mathematics and Computer Science, Washington University.)

IS NOT CIGARETTE SMOKING ADDICTIVE?

We would disagree with the contention that cigarette smoking is "physiologically addictive." (Surgeon General William H. Stewart.)

In no sense, pharmacological sense, can one talk about smoking being addictive. (Arthur Furst, Ph.D., Director, Institute of Chemical Biology, University of San Francisco.)

Physical dependence does not develop either to nicotine or other constituents of tobacco. (Charles Hine, M.D., Ph.D., Clinical Professor of Pharmacology and Preventive Medicine, University of California School of Medicine.)

Some confusion arose through use of the word "addiction" in connection with tobacco use. By generally accepted World Health Organization criteria, smoking tobacco is not considered an addiction. (Sheldon C. Sommers, M.D., Director of Laboratories, Lenox Hill Hospital, New York.)

DOES NOT CIGARETTE SMOKING CAUSE EXCESS DEATHS, SHORTEN LIFE, AND INCREASE MORBIDITY?

I know of no such figures which show a higher mortality rate for smokers than nonsmokers, without ambiguity, without difficulties of interpretation, and without leaning very heavily upon a selected number of instances for presentation and hiding some of the others which are probably just as important or just as controversial. (Theodore D. Sterling, Ph.D., Professor of Applied Mathematics and Computer Science, Washington University.)

The widely publicized accusations of hundreds of thousands of deaths caused by cigarettes and of shortening of life expectancy a specific number of minutes per cigarette smoked are fanciful extrapolations and not factual data. (Milton B. Rosenblatt, M.D., President, Medical Board Doctors Hospital, New York.)

Many figures were cited concerning 30,000 or 50,000 or 260,000 persons per year having or dying from lung cancer or the other diseases being considered. Since it is not known what the causes of lung cancer, coronary heart disease, or bronchopulmonary disease are, the multiplication of numbers does not contribute to understanding them any better. (Sheldon C. Sommers, M.D., Director of Laboratories, Lenox Hill Hospital, New York, New York.)

Mr. Preyer: "So you can say there is no significant difference in the mortality rate of smoking and non-smoking twins."

Dr. Cederlof: "Yes . . ."

Mr. Preyer: "Then there is no evidence that non-smoking twins live longer than smoking twins?"

Dr. Cederlof: "No."

(Rune Cederlof, Ph. D., Associate Professor, National Institute of Public Health, Stockholm.)

The [Public Health Service] Morbidity Report expressly conceded that errors in some of the results were too large to permit meaningful conclusions; at the same time conclusions from these results were advanced. This type approach is not scientific, but shows bias and desire to reach predetermined conclusions . . .

[The Public Health Service] has gone even further in using portions of the Morbidity Report, often out of context, as the basis for a condensed propaganda pamphlet entitled "Smoking and Illness." This pamphlet boldly acknowledged in the Morbidity Report. It flatly, and without qualification, asserts precisely how much illness and disease is due to smoking. Nowhere does the pamphlet disclose that the basic data included no medical diagnoses by doctors but only self and proxy diagnoses by lay men. In light of this Critique, the further use and compression of the Morbidity Report in this pamphlet can only be regarded as a dangerous and misleading deterrent to further scientific study. (John W. Sawyer, Ph. D., Professor of Mathematics, Wake Forest University.)

If the contradictory testimony of medical experts raised doubts among committee members, their puzzlement was increased by concessions coming, oddly enough, from the antismoking witnesses. For example:

Paul Rand Dixon, Chairman of the Federal Trade Commission was told "It has never been proven medically, the causal connection between the inhalation of smoke and lung cancer. You know that, do you not?" and he said, "Yes, sir."

No witness disagreed that the type of lung cancer associated with smoking has never been induced in animal inhalation experiments, despite more than 30 years of efforts and many reams of publicity intimating otherwise.

Dr. William H. Stewart, of Public Health Service, testified:

"I have never stated a cause and effect between (cigarette smoking) and heart disease."

Dr. Campbell Moses, of the Heart Association said:

"There is no proof that cigarette smoking causes coronary artery disease."

His colleague, Dr. Lewis January, said:

"There was no specific causal relationship."

Dr. Stewart quoted the National Institute of Allergies and Infectious Diseases as having "stated that a relationship exists between pulmonary emphysema and cigarettes but it has not been established that this relationship is causal."

Dr. John Gompertz, of the Tuberculosis and Respiratory Diseases Association, testified that—

"The cause of emphysema is not clearly understood."

Asked if it was "not known," he said:

"That is true."

Dr. Robert Browning, his colleague, said "we have not any valid statistics yet available" on emphysema.

Doubt, however, was not the only reaction among committee members. Many were understandably concerned that evidence marshaled against cigarette smoking appeared to be patently one sided. Some felt that they, along with the public, had been taken on a "bandwagon" ride. Expert witnesses agreed that both were indeed possibilities.

Some observations on one-sided reporting of research:

I have been disappointed in my failure to find in the Surgeon General's Report of 1964 and in the 1967 HEW Report to Congress, The Health Consequences of Smoking, a discussion of the published reports of those that disagree with their conclusions (R. H. Rigdon, M.D., Professor of Pathology, University of Texas.)

Then I read the (Surgeon General's 1964) report and I realized what had happened. They had simply done a selective review of the literature. They had not investigated all aspects. The report simply didn't cover the entire field, in my opinion. It was a disappointment. (Sheldon C. Sommers, M.D., Director of Laboratories, Lenox Hill Hospital, New York.)

People who tell you that cigarette smoking causes lung cancer do not like to be reminded of (conflicting) data. In fact, they were not

included in the last Surgeon General's report on "Smoking and Health."

I am sorry that the publication presented only one side of the picture. (William B. Ober, M.D., Director of Laboratories, Knickbocker Hospital, New York.)

Doctors don't know any more about it than anybody else does. They pick up a headline in the newspapers and they know as much as any lay person. This is a highly specialized area. . . . The Public Health Service I regret to say, uses misleading data. It is true, but it is not the whole truth. (Milton B. Rosenblatt, M.D., President, Medical Board, Doctors Hospital, New York.)

I think that the attitude of many of my associates in the medical profession is that there are so many things that they have to look into that I doubt if any great percentage have devoted the time and effort to investigating the actual background information, and have tended to . . . accept what is handed them. (Hiram T. Langston, M.D., Professor of Surgery, University of Illinois College of Medicine.)

[Scientists] absorb the general ideas about smoking that is going on in the world around them . . . just because you are a scientist or just because you are a doctor doesn't put you in much better position to know any better than anyone if you don't look at the facts. (Arthur Furst, Ph.D., Director, Institute of Chemical Biology, University of San Francisco.)

[The majority of physicians] have to rely upon published reports and attach some significance . . . to reports of the Surgeon General . . . the number is rather small who have either the time or the inclination to cover the experimental literature. (Duane Carr, M.D., Professor of Surgery, University of Tennessee College of Medicine.)

I am perfectly sure that if you poll the doctors of this country you would get a very strong majority who believe what the Public Health Service Report says, and that there is substantial proof of the causality relationship. But I think there is only one in 10,000 doctors in this country who really has read the papers and evidence on the other side. (Thomas H. Brem, M.D., Professor and Chairman, Department of Medicine, University of Southern California.)

On the "bandwagon" effect:

"Unfortunately, many supposedly well informed officials in the Public Health Service and certain voluntary health organizations have permitted their emotionalism and zeal to outdistance the actual scientific knowledge and proof. This has resulted in misleading the public into believing there is proof where none exists. A bandwagon effect has resulted even in the medical and scientific community where too many have accepted the pronouncements of dedicated zealots, lacking the time to examine the scientific basis, or lack of it, for such pronouncements. (Duane Carr, M.D., Professor of Surgery, University of Tennessee College of Medicine.)

"There is such an emotion-laden question here, there is so much bias, that one is in danger of being ostracized by his colleagues in the scientific community if his data doesn't fall in step with preconceived notions.

"Yet, I feel that because a stone started rolling down a hill, people have continued to take up this crusade—the word I chose to use—with really no evidence, but just the momentum of a stone rolling down a hill. . . . If one wants to be a crusader and remove a social habit from our environment which some people find distasteful they choose a very emotion-laden illness to pin it on to make it easier to get their job done. (Ronald Okun, M.D., Director of Clinical Pharmacology, Cedars-Sinai Medical Center, Los Angeles, California.)"

By the time the hearings ended, committee members were inclined to agree with Representative RICHARDSON PREYER, of North Carolina, who observed:

"I think it was Mark Twain who said, 'It's not what we don't know that hurts us. It's what we know that isn't so.'"

When we talk about words to go on a package that no one ever reads, it is a rather amazing colloquy we hear on the floor of the Senate.

## ELECTORAL REFORM

Mr. ERVIN. Mr. President, I hold in my hand a letter to me from Ed Gossett, who is now a judge in the criminal district court in Dallas, Tex. He tells me that I can use his letter in any way I wish.

Let me read the concluding paragraph:

However, the purpose of this letter is to tell you that the United States Chamber of Commerce's purported endorsement of the Direct Election system is completely false. Notwithstanding, the Senate action in 1950, and notwithstanding the continued efforts of many of us since that time, the United States Chamber of Commerce in taking their so-called poll on the subject completely omitted the proportional system. Their poll was dishonest and misleading. I'm convinced that a vast majority of their membership are strongly opposed to the Bayh Amendment.

Mr. President, I ask unanimous consent that the entire letter and accompanying documents be printed in the RECORD.

There being no objection, the letter and documents were ordered to be printed in the RECORD, as follows:

CRIMINAL DISTRICT COURT NO. 5,
*Dallas, Tex., September 21, 1970.*

SAM J. ERVIN, JR.,
*Senate Office Building,*
*Washington, D.C.*

DEAR SENATOR: No one living has worked longer or harder for Electoral Reform than I. The Lodge-Gossett Amendment—the proportional system of electoral reform—passed the Senate in 1950 by a vote of 64-27. As I recall, at that time, the only Senator advocating the direct election system was Senator Langer.

More recently, I have served on a five-man committee on Electoral Reform, which committee was headed by the late Senator Edwin C. Johnson of Colorado, and also included the late Senator Scott Lucas of Illinois. We secured the passage by 13 State legislatures of resolutions calling for an equitable division of the States Electoral vote (see attached memo). None of us endorsed the direct election formula.

I opposed the direct election system for many reasons, the chief of which is that it would destroy the Federal System.

However, the purpose of this letter is to tell you that the United States Chamber of Commerce's purported endorsement of the Direct Election system is completely false. Notwithstanding, the Senate action in 1950, and notwithstanding the continued efforts of many of us since that time, the United States Chamber of Commerce in taking their so-called poll on the subject completely omitted the proportional system. Their poll was dishonest and misleading. I'm convinced that a vast majority of their membership are strongly opposed to the Bayh Amendment.

Cordially yours,

ED GOSSETT.

P.S.—This letter may be used in any way you wish.

ED GOSSETT.

NATIONAL ELECTORAL REFORM COMMITTEE

Edwin C. Johnson, Chairman, Denver, Colorado, former U.S. Senator and Governor (D).

Ed Gossett, Vice Chairman, Dallas, Texas, former Congressman (D).

Cecil Underwood, Huntington, West Virginia, former Governor (R).

Lane D. Winell, Lebanon, New Hampshire, former Governor (R).

Scott Lucas, Washington, D.C., and Havana, Illinois, former Senator (D).

Uniform Resolution has been passed by the following 12 States: Arkansas, Colorado, Kansas, Kentucky, Montana, Minnesota, Nebraska, New Hampshire, Oklahoma, Texas, Utah, Wisconsin (Illinois makes 13).

The Federal Government has been telling the States what to do about voting equality in Presidential elections.

COPY OF UNIFORM RESOLUTION

A concurrent resolution petitioning the Congress of the United States to call a convention for proposing an amendment to the Constitution of the United States, unless Congress shall sooner have submitted such an amendment, to provide for the election of the President and Vice President in a manner fair and just to the people of the United States; directing the Secretary of the Senate to transmit copies of this resolution to the Senate and House of Representatives of the United States and to the several Members of the said bodies representing this State therein

Whereas, under the Constitution of the United States, Presidential and Vice Presidential Electors in the several states are now elected on a statewide basis, each state being entitled to as many electors as it has senators and representatives in Congress; and

Whereas, the Presidential and Vice Presidential Electors who receive the plurality of the popular vote in a particular state become entitled to cast the total number of electoral votes allocated to that state irrespective of how many votes may have been cast for other candidates for Elector; and

Whereas, this method of electing the President and Vice President is unfair and unjust in that it does not reflect the minority votes cast; and

Whereas, the need for a change has been recognized by members of Congress on numerous occasions through the introduction of various proposals for amending the Constitution;

Now, therefore, be it resolved by the Senate of the Thirtieth Legislature of the State of Oklahoma, the House of Representatives concurring therein:

SECTION 1. That application is hereby made to Congress under Article V of the Constitution of the United States for the calling of a convention to propose an Article of Amendment to the Constitution providing for a fair and just division of the electoral votes within the states in the election of the President and Vice President.

SECTION 2. That if and when Congress shall have proposed such an Article of Amendment this application for a Convention shall be deemed withdrawn and shall be no longer of any force and effect.

SECTION 3. That the Secretary of the Senate is hereby directed to transmit copies of this Resolution to the Senate and House of Representatives of the United States, and to the several members of said bodies representing this State therein.

Mr. BAYH. Mr. President, I do not want to dispute the writer of that letter, but as the Senator from Indiana recalls the testimony of the chamber of commerce—and we can all clear this up by merely looking at the record, and if someone can find to the contrary in the record, I shall be glad to suggest that I

am wrong—but I have sat through two different sets of hearings on this subject and the chamber of commerce testified at both of them. The facts are, Mr. Gossett to the contrary notwithstanding, that the chamber of commerce did cover all the issues. The interesting fact is, despite covering all the issues, a majority of the chamber members voted for direct election. A majority of the chamber members who responded did vote for direct election. In other words, a majority of the chamber members in the country—more members who responded—supported direct election than all the other proposals put together.

I suggest Mr. Gossett had better take a different look at the facts, because that is not the way I recollect them, and I sat there and heard the chamber testify on two different occasions. They testified in support of direct election. To suggest that they did not even include the Gossett plan on the questionnaires makes it seem rather strange to me that they would come to the Judiciary Subcommittee on Constitutional Amendments and support a plan they did not even query their members on.

I do not know what type of subterfuge the writer of that letter is trying to perpetrate on the Senate. I am certain that the Senator from North Carolina (Mr. ERVIN) is not guilty of that, but I should like to suggest that the credibility of that letter be totally destroyed by reading the record contained right here in this book of hearings. It is only about 1,040-some pages. It makes good bedtime reading. If anyone wants to pursue this further, they will find that the chamber did ask all the questions on the issues and the chamber did come to the conclusion that more of its members who responded were in favor of direct election over all other proposals, including Ed Gossett's plan.

Now, Mr. President, I ask unanimous consent that I be permitted to proceed for a period of time outside the normal 3-minute time limitation.

Mr. BYRD of West Virginia. Mr. President, reserving the right to object, and I shall not, would the Senator mind stating the time. Would it be 10 minutes, 15 minutes—whatever he would like.

Mr. BAYH. Not to exceed 15 minutes. I have discussed this request with the majority leader.

Mr. ERVIN. Mr. President, reserving the right to object, and I shall not object. I have to get ready to go to a distant place to make a speech which was agreed on 6 months ago. I have 1 minute before I go about my affairs and I would love to listen to the Senator from Indiana but I cannot do it at the present moment and I would like to have just——

Mr. BAYH. Mr. President, I withdraw that request.

Mr. ERVIN. I do not object.

Mr. BAYH. I withdraw the request. Go ahead.

Mr. ERVIN. Mr. President, I wanted to say that I have no personal knowledge of the matter referred to by Judge Gossett but I did serve in the House of Representatives with Judge Gossett and I have had contacts with him since that time from time to time. I do know that he is a gentleman of the highest character and I would give the greatest weight to anything he says.

I happen to be a member of the chamber of commerce in my hometown, but the chamber of commerce evidently does not attribute very much consequence to my opinions. I was never polled by the chamber of commerce on this subject. I make that statement for the RECORD.

I know of my own knowledge that if the chamber of commerce ever sent me any questionnaire which would have given me an opportunity to express my opinion on this subject, it never reached me.

Mr. President, I ask unanimous consent that the distinguished Senator from Indiana (Mr. BAYH) may have the time he requested without being limited by the morning hour to the 3-minute rule.

The PRESIDING OFFICER (Mr. MCGOVERN). How much time is the Senator from Indiana requesting?

Mr. BAYH. Fifteen minutes, as previously requested, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAYH. Mr. President, the statement that I am about to make is one with which I have wrestled for a good many hours. The consequences of the course of action which I am proposing have not escaped me. In prefacing my remarks I say that because I want all my colleagues in the Senate to know that I did not make these suggestions and I do not intend to follow the course of action suggested without serious consideration and without exploring all other alternative courses of action available.

Mr. President, only upon this serious reflection and only upon concluding that there is no other alternative cause of action available to those of us who feel committed to preventing this Nation from being brought to its knees by a constitutional crisis precipitated by the archaic and outmoded electoral college system, have I decided that the remarks I am about to make must be made.

Mr. President, the pending order of business is Senate Joint Resolution 1. In the judgment of the Senator from Indiana, it is time that the Senate got down to the business of Senate Joint Resolution 1. Today I am taking the steps to insure that we do get down to business.

I take these steps reluctantly, but let the RECORD show that although this course is embarking upon reluctantly it is a course that will be pursued with tenacity and persistence.

The history of Senate Joint Resolution 1 is a continuous record of delay and obstruction, a continuous record of parliamentary chicanery intended to frustrate the will of the vast majority of the Members of this body, and more importantly, the will of the people of the United States.

The Subcommittee on Constitutional Amendments began its recent efforts on electoral reform almost 5 years ago, in February of 1966. I happen to be the chairman of that subcommittee. As proud as I am to have that small opportunity to serve the Senate, I must admit this is not the most prestigious or influential committee in the U.S. Senate. But it is a small responsibility that is mine, and I intend to fulfill that responsibility, to the best of my ability, and in this capacity I report to the Senate that we have held two very lengthy sets of hearings. We have heard from over 100 witnesses. We compiled a record of several thousand pages of printed testimony.

In January of 1969, I introduced Senate Joint Resolution 1, a measure which now has more than 40 cosponsors.

On May 26, 1969, the Subcommittee on Constitutional Amendments reported Senate Joint Resolution 1 in a different form than is now before the Senate. But the subcommittee acted, and it acted 16 months ago.

The subcommittee acted, the minutes of the subcommittee will show, with a full understanding that each member of the subcommittee would be permitted to pursue his individual course of action to substitute for the provisions of Senate Joint Resolution 1 as reported out of the subcommittee.

When the matter reached the full Judiciary Committee, following the subcommittee's action, Senate Joint Resolution 1 languished month after month in the Judiciary Committee, without action, while other business was considered and voted on.

In September of 1969, electoral reform became the pending order of business of the Judiciary Committee.

Mr. President, before proceeding further, I would suggest that although the distinguished chairman of the Judiciary Committee does not share the feelings of the Senator from Indiana relative to the merits of Senate Joint Resolution 1, I think the record will show that he has not been arbitrary in denying the committee the opportunity to vote on this matter. Although I differ with the distinguished chairman of the committee vigorously in his assessment of the merits of the measure, he did not use his prestige and power as chairman of the Judiciary Committee to prevent the Judiciary Committee from working its will. But one member of that committee refused to allow us to discuss the subject of electoral reform. He did not merely oppose Senate Joint Resolution 1, but he refused even to allow the Judiciary Committee to discuss this matter and to come to a vote. Of course, he was within his parliamentary rights. The rules of the committee allow a single member of the Judiciary Committee to take this kind of arbitrary course of action. But I want the Senate to know why it has not had the opportunity to vote sooner on this question.

Let me point out, Mr. President, that the entire Judiciary Committee was not stalled during this period. Month after month, through the fall and into the winter, we put aside the matter of electoral reform in the Senate Judiciary Committee and proceeded to deal with the other business of the Senate and of the committee. But it finally became clear to me as the chairman of the subcommittee that if we were to continue to follow that course, the members of the committee would never act on electoral reform.

We sat there, Mr. President, from September to February with one member of

the Judiciary Committee arbitrarily denying the entire Judiciary Committee the opportunity to work its will.

Finally, in February of 1970, it became necessary for me to use the same kind of arbitrary tactics that were being used against the electoral reform measure.

I said with some feeling at the time that I did so reluctantly because I do not believe in this kind of tactic. But there was no other alternative available. Only when there appeared to be no other alternative available, did the Senator from Indiana choose to fight fire with fire.

At that time there was before the Judiciary Committee a nomination of the President to fill a vacancy on the Supreme Court. Mr. President, I took the position that if members of the committee were not prepared to vote on electoral reform I was not prepared to allow the committee to report a Supreme Court nominee. Only by this action were we able to secure agreement on February 3 that the Committee on the Judiciary would consider electoral reform by April 14 and vote not later than April 24.

At that time the Committee on the Judiciary went to the extraordinary step of holding its own hearings. In other words, we had two sets of hearings on Senate Joint Resolution 1: one, the extensive hearings by the subcommittee; and, two, a special subcommittee chaired by the distinguished Senator from North Carolina. The first list of witnesses brought to the attention of the Senator from Indiana for the second hearings contained only opponents of the present provisions of Senate Joint Resolution 1.

Pursuant to this agreement, the Committee on the Judiciary met on April 23. We considered the whole range of measures proposed for electoral reform. We had a lengthy discussion and a series of votes. And in the end Senate Joint Resolution 1, in the form now before the Senate was ordered reported to the Senate by a vote of 11 to 6. Five weeks later the majority completed its report on Senate Joint Resolution 1.

But that was not the end of the delay. I previously pointed out the other delays, after the subcommittee reported the matter in September, and after it became the matter of pending business, a year ago. A year ago this matter was the pending business in the Committee on the Judiciary. From September to February there was no action at all because of the arbitrary tactics of one member of the committee. There was further delay until April. Finally in April the matter was reported.

But that was not the end of the delay. Week after week the six members of the minority of the Committee on the Judiciary delayed filing their report—April into May, May into June, June into July, July into August, and still the minority views were not filed. Finally, Mr. President, after weeks and months of the very strongest urging—including the urgent request of the Senator from Mississippi, the chairman of the Committee on the Judiciary, who was one of the minority members—the minority finally completed its report. These minority views were not actually filed until August 14, 11 weeks after completion of the majority views, and 16 weeks after Senate Joint Resolution 1 had been ordered reported by the Committee on the Judiciary.

That is the kind of delays we have faced. That is the kind of obstructionist tactics a few men have engaged in. That is the reason we find ourselves in this situation today. I have very little sympathy with anyone who would blame the Senator from Indiana for this delay. The record will show that at each step the Senator from Indiana has been trying to persuade those who oppose the measure to let the Senate work its will.

Mr. President, I have tried throughout my tenure in this body to expedite the business of the Senate. I have tried to go along with subcommittee action, committee action, and floor action. I have tried to do all I could to help my colleagues this year in the effort to bring about early completion of the Senate's business and early adjournment.

The RECORD will show that despite differences of opinion between the Senator from Indiana and supporters of various measures which have come before the Senate throughout the session, I have not objected on one occasion and I have not resorted in any way to the utilization of parliamentary rights to prevent an issue which I opposed from coming to passage.

I am prepared to vote on Senate Joint Resolution 1 today. I was prepared to vote last week and I was prepared to vote the week before last. But there are those who contend we have not had enough debate. I believe we have had enough debate. Senate Joint Resolution 1 has been the pending order of business since we returned from the Labor Day recess, which was terminated on Tuesday, September 8. Today begins the 12th day of debate on Senate Joint Resolution 1. This is the 12th day on which those who have opposed the measure have had an opportunity to make their positions clear.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. BAYH. Mr. President, I ask unanimous consent that I may proceed for 5 additional minutes.

The PRESIDING OFFICER. Without objection, is is so ordered.

Mr. BAYH. Mr. President, 12 days of debate is more debate than the Senate has had on a constitutional amendment in the past 100 years. Let us look, Mr. President, at the amount of debate the Senate required before passing the constitutional amendments that have been ratified over the past century.

The 16th amendment, the income tax amendment, was adopted after only 1 day's debate.

The 17th amendment, providing for the direct election of Senators, was adopted after only 7 days' debate.

The 18th amendment, the prohibition amendment, was adopted after only 3 days of debate.

The 19th amendment, women's suffrage was adopted after only 2 days' debate.

The 20th amendment, establishing the term of office of the President and a date of convening of Congress, was adopted after only 1 day's debate.

The 21st amendment, repealing prohibition, was adopted after only 3 days' debate.

The 22d amendment, limiting the President to two terms, was adopted after only 4 days' debate.

The 23d amendment, giving the District of Columbia a vote in presidential elections, was adopted after 6 days debate.

The 24th amendment, outlawing poll tax, was adopted after 11 days' debate.

The 25th amendment, dealing with Presidential inability, was adopted after only 1 day's debate.

Mr. President, we all know the issues on the question of electoral reform. They have been before this body before. They have been before the country for more than a century and a half. And they have been intensively debated in the widest possible public forum over the past 5 years. I believe now is the time to get down to business.

I am aware that some members continue to feel that there has not been adequate debate on the question of electoral reform. I have tried to provide ample opportunity for those who are opposed to electoral reform to present their case. And in order to cooperate with my colleagues, when no member of the opposition chose to occupy the floor and present his case, I have agreed to let the Senate proceed with other business.

Indeed, Mr. President, it is correct that the Senate has accomplished a good deal of progress in its evening sessions over the past 2 weeks. I have agreed to put Senate Joint Resolution 1 temporarily aside, so that the Senate could vote on important matters. The Senate has passed the public health bill, the bill establishing a "Little Hoover" Commission for the District of Columbia and providing a nonvoting delegate in the House of Representatives for the District. We have passed the Disaster Relief Act, the Civil Service Retirement Act Amendments, a Government Pay Act and a Family Medicine Act. The Senate has passed the farm bill and the Bank Holding Company Act and the manpower bill and the Maritime Act. We have enacted a small business bill, and a bill regulating secret foreign bank accounts, with amendments relating to credit practices and the financing of urban mass transportation. In addition to these measures, Mr. President, the Senate has passed a number of other bills. The Senate has concurred in a number of nominations.

Mr. President, I am pleased that the Senate has been able to perform its business so expeditiously. All I am asking is that the Senate proceed with equal dispatch to deal with the crucial question of how we elect the President of the United States.

I do not believe that we should rush precipitiously to a vote. I have tried repeatedly to secure unanimous consent from the Senate on a timetable so that we could consider each of the alternative plans, every pending amendment to Senate Joint Resolution 1, debate this matter fully, and come to a series of votes. On Tuesday, September 15, after we had been debating Senate Joint Resolution 1 for 1 week, I offered a series of unani-

mous consent requests dealing with every pending amendment.

One of our colleagues objected when I asked that we devote 2 hours' debate to each of the pending amendments and then proceed to vote. So I asked unanimous consent that we devote 4 hours' debate to each pending amendment, and again he objected.

Mr. President, I then proposed that we devote 1 full day's debate to each amendment, and again my colleague objected—even though he is the author of four of the pending amendments. And so we proceeded with more debate. On Monday of this week, and again yesterday, I proposed additional unanimous-consent requests—and again they were objected to.

Every single request to consider every item before the Senate dealing with electoral reform was objected to by our distinguished colleague. So we proceeded with more debate on Monday of this week and again yesterday.

Mr. President, I am prepared to come to any reasonable unanimous-consent agreement. None of the opponents of Senate Joint Resolution 1 have given me any indication as to what they might consider a reasonable unanimous-consent agreement.

I do not think any one Senator should be in the position of saying, "It is either my way or not at all. I either get to pitch or I am going to take my bat and ball and go home." This has not been the position of the Senator from Indiana. The Senator from Indiana does not consider that he would be acting responsibly if he sat idly by and let any other Member of the Senate or any group of Members follow that same course.

Not one of the opponents of Senate Joint Resolution 1 has given me any indication as to what they might consider a reasonable agreement. The Senator from North Carolina suggested yesterday that perhaps he would be willing to come to a vote shortly on the proportional plan. I am certainly prepared to discuss such an agreement.

I listened to him make observations this morning that perhaps there will be some sort of request made on tomorrow.

In the absence of a unanimous-consent agreement, however, I intend to do whatever is necessary to be certain that the Senate attends to the crucial business now before it. I intend to see to it that every Member of the Senate who is interested in electoral reform and who has a proposal on electoral reform be given an opportunity, if physically and humanly possible, to have his proposal voted up or down by the Senate.

As a result of having followed every other avenue available to me, beginning tomorrow I intend to object to the meeting of Senate committees while the Senate is in session. Beginning today I intend to object until 5 p.m. to the laying aside of Senate Joint Resolution 1. Beginning tomorrow, I intend to object to the laying aside of Senate Joint Resolution 1 during both the daytime shift and the evening shift.

These objections, of course, would require Senators who are opposing Senate Joint Resolution 1 to follow the rules of the Senate. This is not imposing any unique criterion upon them, but merely saying, "Let us play by the rules." If Senators who are opposed to Senate Joint Resolution 1 are going to play by a certain set of rules, then those of us who are proposing Senate Joint Resolution 1 and insisting on electoral reform should be permitted to play by the same rules.

I have been reluctant to use these parliamentary rights——

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. BAYH. I ask unanimous consent to have 3 additional minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAYH. I have been reluctant to use these parliamentary rights so long as there was reasonable hope of coming to some agreement, some reasonable promise that the country could see a Senate conclusion of this pressing problem. But if a few Members of this body intend to use their parliamentary rights to obstruct the fair processes of the Senate, then I intend to do whatever is necessary to defeat them.

Mr. President, on Friday, September 18, the Senator from South Carolina, Senator HOLLINGS, made a brief statement concerning the trade bill and his intention to offer it as an amendment to the family assistance plan or the social security plan. Senator HOLLINGS said, and I quote:

> We do not want to get caught in the parliamentary maneuver of defeat by delay.

Let me repeat that:

> We do not want to get caught in the parliamentary maneuver of defeat by delay.

That is a direct quote.

I continue to quote Senator HOLLINGS:

> I do not feel that the U.S. Senate can or should adjourn without expressing its will on the issue as to whether or not industrial jobs of this Nation ought to become another export and whether or not we will continue to contribute to our fast falling balance-of-payments problem.

That is a direct quotation from the statement of our distinguished colleague from South Carolina. I share his concern that the Senate have an opportunity to work its will, up or down, on this important matter. I think that is a fair test for all legislation. I repeat again—"We do not want to get caught in the parliamentary maneuver of defeat by delay."

Mr. President, the trade bill is an important matter before this body. The questions of employment and export and balance of payments are important to all Americans. But there is no question more vital, no problem more dangerous, no issue more pressing than the manner in which the people of this country elect their President. And those of us who feel deeply about the need for this reform are in complete agreement with the Senator from South Carolina when he says, "We do not want to get caught in the parliamentary maneuver of defeat by delay."

Mr. President, with the committees of the Senate not meeting, and with the Senate focusing its attention exclusively on Senate Joint Resolution 1, we are going to have plenty of time for debate. I am prepared to come in early, Mr. President, and to stay late. And I do not intend to occupy the floor with lengthy speeches.

In my judgment, the proponents of electoral reform have made an adequate case. It is the opposition which has said that it needs more time. Before the cloture vote last week, the Senator from Nebraska indicated that, "eight or 10" Senators on his side had made requests to speak.

To the knowledge of the Senator from Indiana, we have yet to hear from any of those Senators. I am anxious that they be heard.

On Monday of this week the Senator from North Carolina indicated that he had a speech prepared for delivery, but did not intend to deliever it. Let the Senate have the knowledge contained in the speech of the Senator from North Carolina.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. BAYH. I ask unanimous consent to proceed for 2 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAYH. It is rather inconsistent for him to say that one must have a chance to discuss this matter, that the Senate has not given him enough time, that he has a statement and then in the very next sentence to say, "But I do not intend to give the speech."

Mr. President, we live in a time when many Americans are challenging the viability of our institutions of Government. A handful of Americans are arguing that we must destroy the Government, pull it down, because only from the ashes of revolution can we build a system that is honest and intelligent and responsive to the needs and desires of the people.

I reject that view. I know that every Member of this body rejects that view. Every Member of this body believes that the Senate is an honest institution, an intelligent institution, a responsive institution.

We are going to have the opportunity in the next few weeks to demonstrate that belief. We are going to have the chance to see how honest, how intelligent, how responsive the Senate can be.

Perhaps when we come to final passage, the Senate will give a two-thirds vote for direct popular election of the President. I recognize that possibility. And I am prepared to abide by that decision, even while 80 percent of the American public favors direct popular election.

But I am not prepared to accept the judgment that the Senate of the United States will not even vote on the question of electoral reform. And I do not believe the American people are prepared to accept that judgment.

Mr. President, there are those who will suggest that when the Senator from Indiana requires those who are delaying electoral reform to conform to the rules of the Senate, he is being arbitrary. There are others who have labored for 5 years in support of electoral reform who are at this moment suggesting that the Senator from Indiana has not been arbitrary enough.

I think the time to take positive ac-

tion has come for those of us who believe there needs to be responsible, responsive change to mute the voices of those who would destroy our society and destroy this land we love. For those who believe that electoral reform is an important ingredient in this type of responsive change, the time has come to be willing to work hard, to be diligent, to risk the wrath of some, to risk being unpopular, but to finally bring this matter to a vote.

Mr. President, I yield the floor. I respect the tolerance of my fellow Senators in listening patiently. I suggest that we get on with the business of the Senate and the business of the country.

Mr. MANSFIELD. Mr. President, I intend to reply to the distinguished Senator from Indiana, but first I suggest that the morning hour should come to a close.

## ADDITIONAL STATEMENTS OF SENATORS

### AN ENLIGHTENED UNIVERSITY PRESIDENT SPEAKS OUT

Mr. PERCY. Mr. President, the continuing pattern of violence on some college and university campuses has been a source of anxiety for many Americans concerned about the future of higher education in this country.

The actions of a small minority of lawless students bent on subverting the educational process constitute a serious threat to the entire academic community. And any development which endangers our educational system, traditionally one of our society's greatest strengths, endangers the Nation.

Mr. President, I have always believed that the complex problem of campus unrest can be best solved within the campus society itself, without unnecessary intrusions by government. But clearly it will require exceptional leadership if colleges and universities are to resume their rightful place as centers of reason and free inquiry. The moderate majority—of students, faculty, and administrators—will have to commit itself to the preservation of peaceful dissent on campus and state its unequivocal opposition to violence.

One university which is particularly fortunate in the quality of its leadership is Northern Illinois University, whose president is Rhoten A. Smith. On September 8, Mr. Smith delivered an address to an opening day convocation of more than 1,000 faculty members at his university. His remarks include a superb analysis of the problem of campus violence and an eloquent statement on the proper purpose of a university.

Mr. President, I believe that Mr. Smith's address deserves to have a broader circulation, therefore, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY RHOTEN A. SMITH, PRESIDENT NORTHERN ILLINOIS UNIVERSITY AT ALL-FACULTY MEETING, SEPTEMBER 8, 1970

It has become our custom, as most of you know, to start the year with an all-faculty meeting, and to use the occasion for comment upon the issues facing us in the year ahead—at least as they appear to one man. A sort of State of the University talk as we begin the year has been the idea.

Like many of you, I have been on a college or university campus almost every September of my adult life. You may have heard me comment before on the fact that one of the pleasures of life in academia is the joy of renewal that one experiences every fall as a new class of students starts college and the familiar process of learning and study begins once more. My own college days were very exciting and joyful days for me, and some of that excitement and joy has always come back to me with the advent of a new academic year.

But one would be less than honest if he did not admit that September, 1970 finds that sense of joy and anticipation of good times tempered somewhat by anxiety about the future. All of us here today, it must be admitted, feel some apprehension about the future and what it holds: for this university, for the whole system of higher education, and, as a matter of fact, for the nation. We are in the midst of a period of great change and the outcome is not at all certain.

Our problem, very simply, is a growing division within our society, a growing frustration and despair on the part of many citizens about the future of American civilization, with the terrifying result being a growing willingness to resort to violence. This spreading malaise affects all of us, but has a special urgency for those of us in higher education, because it is the campus which has become the foremost stage upon which our national problems are presently being acted out.

Since our days of tribulation in May, I have spent many hours talking with others and thinking about our specific problems at Northern. We met this summer with faculty and students, individually and in groups, in an effort to deepen our understanding of what happened. Just last week I met with our residence hall advisors on the same subject. I also spent a good deal of time speaking to community groups this summer, not only to interpret for them the significance of the turbulence on our campus, and of student views, but to elicit from them advice and counsel. While on vacation I visited a number of other universities to share experiences and thinking.

Following this experience, I can assure you that there is one subject, and one subject only, uppermost in the minds of all; and this includes faculty members, students, administrators, and the general public outside the universities. And that subject is not the curriculum, or hiring practices, or even the troublesome economic problems which have come to loom so much larger for us. The fundamental problem is campus unrest, or more specifically, violence and vandalism on campus and the resulting disruption of the educational process.

The reason for this is obvious, of course. We have reached the point where everything is intimately related to and dependent upon what kind of disruption we may be faced with and how we respond to it when it comes.

For example, the exasperation which many people feel about what they see and believe is happening on campus is very real. And it has had a growing political impact, which, I believe, is only beginning to be felt economically. In Illinois we secured six percent increase for salaries this year. The California legislature, in a mood that appears to have been clearly punitive, voted no raises, zero percent, for the state colleges for 1970–71.

As regrettable as this kind of legislative action is, for it punishes all faculty equally, including those who worked very hard for campus peace, it would be naive to be surprised by it. Indeed, although unfair criticism is always annoying, the university is no less subject to legitimate criticism than any other social institution. On the whole, I think we can be proud of what the American university has accomplished over the 350 years of its history. But at the same time, there are many procedures and practices which will not bear very close scrutiny but which we find ourselves defending. Whatever else the future holds, I feel confident that the years ahead will see us challenged time and time again to examine our ways of doing things and to find better and more productive ways to do them.

But as useful as a discussion on this subject would be, or a discussion of any number of other relevant and even urgent problems, the simple question of staying open and operative is so fundamental to everything else, that it is the only appropriate subject for discussion today.

I hope I do not seem melodramatic when I say this. Six months ago it would have sounded that way. But last spring we saw a number of universities throughout the country—one in Illinois—closed involuntarily because continuing had become impossible. This summer we have seen dissent against a particular program of the University of Wisconsin become the pretext for murder by explosive. At my own alma mater, the University of Kansas, two students died by gunshot this summer. I do not think it is too much to say that the very existence of some institutions may be called into question this year.

Among all the people I have talked with over the past three months, I found many who were searching sedulously for signs that perhaps we had now hit bottom and were soon going to see an end to campus violence. I shall always look for hopeful signs and welcome them when they manifest themselves. Indeed, I think we shall see an end to campus disruption sooner or later, simply because it will become intolerable to society. If it takes martial law to do it, it will be ended—but a lot of other values will have been lost by then, too. I am not pessimistically anticipating trouble; I am simply saying that its avoidance, or the proper response to it, are the crucial subjects for discussion today.

What I should like to say about this will represent no great departure from what I think has been our position heretofore. All the talking and thinking we did this summer did not reveal to me any startling new shape for the problem. I have become convinced, however, of the need for a clear, concise statement of our position, a statement no one can misunderstand, a statement that will set forth the conditions I believe necessary for survival. I am indebted to many people for helping me arrive at some of these conclusions, but what I say is my own formulation, a statement of principles that will guide our actions as long as I hold the position of president. I invite your concurrence, of course, in the ideas expressed.

**First*. It must be established that the purpose of the University is education. Our reason for existence is to teach, to learn, to study, to do research, and to disseminate knowledge for the service of the public. It is the function of the university to seek the truth and to encourage the search for truth. But this search for truth is carried on in a pluralistic spirit—every man searching in his own fashion—with no man allowed to establish an orthodoxy.

It seems strange that we should have to reiterate this statement of purpose of the university. But there are so many pressures today from so many sectors of society demanding (how I have come to loathe that word!) that we serve this or that interest, that it needs stating badly. We exist to teach, to learn, to study ;and no one philosophy shall be our master.

**Second*. Through its promulgation of the educational process, and in all its daily oper-

ations, the University can and should contribute to the solution of social problems. War, poverty, racism, pollution—these are undeniably corrosive problems. And through research and teaching we can and will do our bit toward their solution. Furthermore, through programs like CHANCE, in our hiring policies, in our admissions policies, in every way we can, we will as an institution make our contribution to the solution of these ancient problems.

What the university can never do, however, if it is to endure as an educational institution, is to renounce its pluralistic nature, renounce its effort to achieve objectivity, renounce its political neutralism, and enter into direct political action. Even if undertaken in the name of man's highest ideals, such an involvement would destroy the university. We *must* resist the terrible pressures we now feel to take this road.

Having said that, I repeat that there are many legitimate ways in which the university can contribute to social justice. But mankind will be better served if we make our contribution as an educational institution, as a center for unbiased research, as an employer, rather than as a new entry in the propaganda war. To all of you I pledge that we shall always have deep concern for the difficult social problems that face us, but we shall express that concern in a fashion befitting an educational institution.

*Third. If this be our role—as I have defined it—we can carry it out properly and adequately only if certain fundamental prerequisites are met. I see these prerequisites as basic freedoms: Specifically—

(a) the freedom of students and faculty to enter the classroom and to carry out their study without disruption.

(b) the freedom for coercion or duress for all decision-makers, whether they be administrators, faculty bodies, student groups, or what have you.

(c) the freedom of university personnel to carry on their jobs without harrassment or fear. (It is very illuminating, I think, to observe how many of our radical students, who sloganize "power of the people," treat the good civil service personnel who serve them. Their contempt for and arrogance toward these working people is unspeakable; on this point alone they earn my dedicated opposition.)

(d) We are speaking of freedoms. There are others:

(1) the freedom of the instructor to control his own material;

(2) the freedom of the student to disagree with the instructor;

(3) the freedom of every citizen of the university to petition peacefully for the redress of his grievances.

We could name many others. What we are talking about are those freedoms which add up to conditions without which we cannot carry on the teaching and learning process.

Without teaching and learning there is no university. I shall say it again: if these basic kinds of freedom are not protected, the whole educational enterprise is jeopardized. Indeed, I believe it is self-evident that education cannot be successfully pursued in the absence of these freedoms. It is just as simple as that.

*Fourth. Last May I stated before the Illinois House of Representatives that the force of arms is the least satisfactory method imaginable of ensuring order. When so enforced, I said, it engenders the peace and quiet of a prison or of an occupied country. I still believe this to be true.

But if education is difficult under these circumstances, it is impossible, as I have just pointed out, under conditions of unbridled disruption.

The agonizing decision is forced upon us when there is a group of students willing to court *our* use of force by their own refusal to observe the freedoms of others. Last May we were dealing with a wide range of student opinion, but it was the desperate minority to which we ultimately had to react. Time and again we found ourselves having to choose between our reluctance to apply force and our unwillingness to subordinate the interests of the majority to the violent minority. If this situation confronts us again we shall continue to put our major interests as an educational institution ahead of our reluctance to rely upon law enforcement forces. And I submit to you that the responsibility for outside peace officers on campus rests with those who find it in their interest to break the peace! On this point, I should like to quote from the remarks I made in the Field House on May 11 last spring:

"Much has been said this past week about 'tragic events,' in Southeast Asia and in Ohio. One enormous tragedy that none of us can overlook is the resort to force on university campuses. Regardless of who or what is ultimately at fault, the very fact that force is necessary to preserve an uneasy peace means that the educational system is in danger of failing. Nationally, I believe we must turn this around or see the end of an educational system built up through years of effort. The frightening thing is that this is a real possibility today, for there are those on this campus who are quite willing to smash this university out of their own rage and frustration.

"This is not a large number, but it has already been shown that it does not have to be large . . .

"There is an undemocratic and unrepresentative minority here that I think has now clearly said to us: we will force you, through our threats of violence, to do as *we* wish. I do not intend to wilt before that challenge; I call on all of you to join me."

Those words need repeating today.

Let me make it clear what I am saying. We are not talking about peaceful and lawful protest. We are talking about violence, property damage, disruption. No bill of rights protects this behavior, and such behavior must be stopped or the university will not survive. We shall use every method available to us: suspension, injunctions and other legal weapons, and the use of outside police, if this is what is needed to protect the freedom of our faculty and students to engage in teaching and learning. To act otherwise at this point in history would be quixotic in the extreme.

But this can only be a short-range answer. If order cannot be maintained except by force of arms, for the long pull we are surely doomed.

What we must labor for—as a nation and as a university—is the reestablishment of a sense of community. This has become the highest priority item on our agenda, as far as I am concerned; perhaps, for the moment, the *only* item on our agenda. When every student can feel in some realistic sense that this is *his* university, *his* community, he will not stand by when some seek to destroy it or bring it to a halt. When every faculty member begins to see his own responsibility for saving this university as clearly as he sees his responsibility to his career, we will have begun to find the basis for salvation. When every employee thinks of the important service he is performing rather than just a job he has; when all of us realize that our stake in this struggle is a common stake—then we may have found the road back to sanity.

During those dark days of May, curiously enough perhaps, I think we saw the beginning of what I call a sense of community. Many students, numerous faculty, came forward with offers to help, with suggestions, with honest concern. There was a growing comprehension that we are all in this together. On May 11, in the Field House, we had a glimpse, I think, of a sense of common purpose, a common spirit, a sense of community. We shall see this sense again, I vow, and we shall find the will to sustain it. We shall do those things which nourish the sense of community, to the full extent of our ability. To that cause I pledge myself on this September, 1970, and I urgently invite your active participation in the cause.

## NATIONAL PRIORITIES

Mr. MANSFIELD. Mr. President, we are constantly engaged in debate over national priorities. In reality, two debates are going on. The largest—and most vocal—concerns overseas versus domestic priorities. The second, whose consequences we will have to live with long after the war in Southeast Asia is over, is the proper allocation of resources within our country.

We are rapidly becoming an urbanized country. Since an increasing percentage of our population will be living in the cities, it is imperative that they be made decent places in which to live. But the attention given to cities should not obscure the fact that serious rural needs exist, too.

A major problem of the cities today stems from the migration of largely unskilled workers from the rural areas. These workers are forced to move through no fault of their own. The isolation and economic stagnation of smaller communities make it impossible for them to raise their families and make decent livings.

President Nixon, in his state of the Union message last year, pledged to work to "create a new rural environment that will not only stem the migration to urban centers but reverse it." I cannot see that the situation has improved in the interim. In fact, it has worsened. In my State of Montana, for example, several communities were left without scheduled airline service when the Civil Aeronautics Board permitted Frontier Airlines to suspend operations there. The plight of one of them, Lewistown, is graphically told by Reporter Robert Linsey in a front page New York Times article of September 20.

I recommend the reading of this article to Senators and raise this question: Which is more costly to America in the long run: the subsidy or the dying communities, broken dreams, savings lost, and added burdens on our already overcrowded cities?

Mr. President, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SMALL TOWNS LEFT ISOLATED AS AIRLINES CUT SERVICE

(By Robert Lindsey)

LEWISTOWN, MONT., September 17.—Mayor Walter Mondale used to boast that he could live the good life in this small town in central Montana and enjoy the big cities, too. The outside world was never far away so long as the Frontier Airlines plane put down here every day.

Then last April 6 the airliner made its last stop, and Lewistown joined a fast-growing number of small towns from New England to the Far West that have been abandoned by both railroads and airlines.

"It's like we were cut off from the world,"

the Mayor said wistfully this morning as he looked out across the town's empty, silent airport. "We can't even get salesmen in here to sell us things any more."

At a time when airports in the nation's big cities are often choked by too much air traffic, scores of small towns like Lewistown have lost their only airline service. Over the last five years, airlines have stopped serving 66 communities. In the last year alone, Williston, N.D., Rutland, Vt., Winona, Minn.—altogether, 22 small towns have lost their air service.

The nine regional or "local service" airlines that provide most of the service to small town America contend that despite Federal subsidies—$36-million last year—passenger demand in many areas is too weak to offset fast-rising operational costs.

At the moment the Civil Aeronautics Board is considering airline applications to suspend flights at eight more towns. Industry experts estimate that the subsidized regional airlines would drop 100 of the communities that they still serve if the board would let them.

In some ways, the airlines' efforts to cut back on service parallel those of the railroads over the last 20 years. But while the railroads have worked hardest to eliminate long-distance trains, which they say produce the highest losses, the airlines have sought to eliminate short-hop service.

The airline cutbacks often occur at places that need air service badly. Lewistown is an example. It is nestled in the folds of a rolling, green plateau 710 miles north of Denver and 105 miles east of Great Falls, Mont. Long ago it was a frontier cavalry outpost, and it still has the look of a slightly modernized Western movie set.

Lewistown had a gold rush in the eighteen-nineties, an oil boom in the nineteen-twenties and a missile boom in the nineteen-sixties—when the Air Force built silos for 150 Minuteman missiles amid the straw-colored plains just outside town where 100 years ago the Sioux, Blackfeet and Gros Ventre hunted buffalo.

But now the town's economy is stagnant. It is based mostly on beef, wheat and barley, and mechanization on the region's big ranches (which run 25,000 acres and larger) and farms has cost the town hundreds of jobs.

Just this week the town fathers, who have been trying for years to lure industry to Lewistown, learned from new census figures that the town's population dropped from 7,500 to 6,500 in the last decade.

"If we don't get better transportation to the large cities, our town is going to die," said Mayor Mondale, a soft-spoken lawyer with white hair.

"This is a great place to live," he went on, "but it's the guldangedest place in the world to get in or out of. People first homsteaded the town because the railroad came in here in 1903. But the railroad took away our last passenger train in 1960 because they said we had good air service. Without an airline, how are we ever going to get industry in here?"

IMPACT IN HUMAN TERMS

In Lewistown, the impact of the airline cutback on the daily lives and habits of the townsfolk was immediate and sometimes severe:

Letters carrying air mail stamps now take a day longer to reach residents.

Betty Meile, a florist who gets her roses from Salt Lake City, now finds her flowers brown and wilted because the shipment has to come by bus.

Fire Chief Charles Pentacost's largest pumper was out of action for four whole days because it took that long for a bus to bring in a needed spare part from Denver.

The Curtis Breeders Association held a convention at the Yogo Inn and two out-of-town speakers missed their engagement because they had to come by car instead of by plane, as they had expected.

A hardware store owner now has to drive all the way to Great Falls to see wholesale salesmen because, without air service, they won't come to Lewistown.

Bob Brassy, the manager of the Intermountain Bus depot, has suddenly become an important figure to the town, its chief contact with the outside world and as such a focal point of local hopes and disappointments.

"Day in and day out I get chewed out because the stuff on the bus takes so long," he said, not too unhappily. "They complain about not having air service; I smile, but I know it rings my cash register."

NIXON PLEDGE RECALLED

The bus business may be up, but the loss of air service can't help but damage the town's economic welfare over the long run, and Lewistown's problems are springing up throughout rural America.

In fact the deteriorating state of small town air service, some officials believe, may jeopardize a national goal defined by President Nixon in his State of the Union message last Jan. 22. The President said then that he would work to "create a new rural environment that will not only stem the migration to urban centers but reverse it."

But officials of many predominantly rural states say that to attract large numbers of people there must be jobs and industry, and they insist neither industry nor city dwellers will emigrate to the hinterlands unless there is good transportaton.

"Industrial concerns simply will not build a new plant in a location which is isolated from the home office, the key financial centers, and its suppliers and customers," Paul E. Burket, Nebraska's director of aeronautics, told a Senate subcommittee investigating the problems of small town air service last spring.

The Civil Aeronautics Board and the aviation subcommittee of the Senate Commerce Committee, which conducted extensive hearings on the situation this year, have been seeking new approaches to maintaining service in the towns that now have it and to providing new service for the communities that want it.

TOTAL OF $55.6 MILLION LOSS

After the local service airlines reported that last year they had lost a total of $55.6-million above the $36-million subsidy, the Aeronautics Board recommended a steep subsidy increase this year—to a total of $57.8-million. Legislation that would provide the extra aid is pending in the Congress.

The local service airlines—Air West, Allegheny, Frontier, Mohawk, North Central, Ozark, Piedmont, Southern and Texas International—service 544 cities. They are the only airlines now subsidized by Washington. The 11 "trunk," or long-haul airlines such as United and Trans World, which serve 61 cities, stopped receiving subsidies in the Nineteen-Fifties as they became profitable.

Even if it is approved, the proposed additional subsidy for the current fiscal year is not regarded as more than a temporary answer to the small towns' problems.

The problem is rooted in economics, or as one local service airline president put it: "No airplane has been invented which is well suited to economical operation on short hops at low density air traffic points."

In making its case for dropping service here and seven other Montana and North Dakota cities that had been on a 2,200-mile round-robin circuit, Frontier contended that in 1969 it lost $667,000 on the route—even though it received a $448,000 Federal subsidy.

A Frontier executive said: "For every passenger we carried who paid a $20 fare, the Government was paying $20 in subsidy and it was costing us at least as much." Frontier said it was carrying an average of fewer than three passengers on the 50-passenger Convair turbo-props—so it used to serve Lewistown.

Many aviation leaders believe that small "air taxi" operators, using two- to nineteen-passenger planes, be a sound approach to solving the problem.

In 44 of the 66 cities that have lost their regular air service, the Civil Aeronautics Board allowed airlines to suspend flights only if an air taxi line agreed to provide service to an airport with conventional air service.

At many points around the country, especially in New England, local officials say the substitute service has been satisfactory.

But many other communities including Lewistown are unhappy because they say the substitute service tends to be undependable, the small planes are uncomfortable and the tickets are too expensive.

Air taxi operators—there are at least 1,500 in the country, including about 165 that offer some kind of scheduled services—is often shaky and many experts are concerned about safety.

The air taxi operate under much less stringent Federal safety standards than regular airlines, and, as a whole, the air taxi industry has had a poor safety record.

Between 1964 and 1968, the rate of fatal accidents per 100,000 hours of flying was 12 times higher for air taxi companies than for the regular airlines. During the first half of this year, air taxi fatal accidents increased by more than 80 per cent; over the same period in 1969; 65 persons died in 22 accidents.

The Defenders of the "Commuter" airline industry, as the new group of scheduled air taxi companies calls itself, say that most of the accidents have involved underfinanced "fly-by-night" operators. They say the scheduled air taxi lines have had a much better safety record, although there are no Federal statistics yet to back up their claim. The Federal Aviation Administration has recently proposed new regulations that would make the air taxi lines meet more of the safety standards of conventional airlines.

When Frontier stopped its service at Lewistown, an Arizona air taxi company, Apache Airlines began to stop here once a day. But, Donald Browne, president of the First National Bank here said:

"Hardly anybody uses it because the schedules make it difficult to connect with flights out of Great Falls, and you can't depend on it. And for what they're charging, $27, you might as well drive to Great Falls."

In the summer, he said, it is a two-hour drive but, in winter it can take much longer.

The efforts of local service airlines to abandon small towns have raised questions about the wisdom of decisions made by the airlines and the C.A.B. five years ago. Originally, the nine airlines were "feeder" services, carrying travelers from towns like Lewistown to larger cities where there were flight connections to New York, Chicago or other cities.

DECISIONS QUESTIONED

In recent years, they have experienced a dramatic metamorphis. In 1965, the aeronautics board began a program intended in part to reduce the Government subsidy, then running $65-million. The heart of the program was to allow the regional airlines to fly longer and more profitable routes. The idea was that longer nonstop routes would, in effect, subsidize losses at the small towns. But things did not work out that way.

The airlines began a rush to buy expensive new jets for the new routes. In five years, their collective debt increased from $110-million to $550-million. It was a time when interest rates were skyrocketing. The airlines thus got caught in a squeeze compounded by inflation, their agreed-to reduction in subsidies, high interest, and failure of some of their new routes to pay off as expected.

Instead of subsidizing services that the airlines had been created to provide, the new routes added pressure on the lines to get out of many of the small towns.

Wherever the responsibility for today's decline in small town service lies, Aviation experts agree that it can be reversed only by a national effort.

Secor D. Browne, chairman of the Civil Aeronautics Board, says that air transportation "should not be denied citizens who live outside the great metropolitan areas for whatever reason—logistics, legal or economic."

But, he added in a recent interview in Washington, "Somebody is going to have to pay for it. Who pays for it is a decision we as a country have to make."

Meanwhile, the citizens of Lewistown and many other small communities are distressed at what they fear is impending economic hardship and possibly even the need to pull up stakes and find a home somewhere else.

"It's getting harder and harder to keep towns like ours alive," said Leon Jacobs, an airport commissioner here and owner of the E-Jay-S sporting goods store. "Without air service, we're drying up and dying away."

## POWER CRISIS STRIKES AGAIN

Mr. KENNEDY. Mr. President, both the electric power industry and the Chairman of the Federal Power Commission assured Congress throughout the summer months that better times lay ahead. True, there had been equipment breakdowns and unexpected demand during the summer, necessitating voltage reductions and some interruption of service throughout the Northeast United States. True, there were problems to be expected next winter, especially in light of the fuel shortage in New England. But voluntary industry action and regular reports to the FPC should take care of things. No further reliability legislation by Congress will be necessary, said the industry and the FPC.

Yesterday morning the lights were dimmed and elevators slowed in all Government buildings, including congressional office buildings and the Federal Power Commission building. Voltage was dropped 5 percent in Pennsylvania, New Jersey, Delaware, Virginia, and the District of Columbia, and 8 percent in New York. Some areas were blacked out for almost 3 hours. New England reserves dipped to around 5 percent. This morning radio messages carried the plea to electric power customers to cut back on usage until the crisis subsides.

In 1968 and again in 1969 I introduced the Electric Power Reliability Act, designed to reduce blackouts and brownouts and to protect environmental assets. My bill would, among other things, direct the FPC to establish minimum standards of reliability and authorize the Commission to compel steps by the utilities necessary for power reliability and efficiency. The present FPC has opposed this legislation, however.

Earlier this summer my Subcommittee on Administrative Practice and Procedure conducted hearings on procedures used to assure adequate and reliable electric power. We found that very little progress has been made by the industry in complying with key recommendations made by the Power Commission to the President in 1967. I urged Chairman Nassikas to take all steps within his agency's power to insure that massive blackouts and brownouts could not happen again. Mr. President, they are happening again.

At our subcommittee hearings in August FPC Chairman Nassikas observed:

If I find through continual monitoring and surveillance by the staff of our Commission that any region in this country is not going to meet their power needs and can't do this, then at that stage, we would have to have some drastic type of legislation that should be adopted.

The utilities in the Northeast clearly are not meeting the power needs today. They did not meet them yesterday. They could not meet them in mid-summer. They probably will not be able to meet them next winter. Surely we are at that stage referred to by Mr. Nassikas, where drastic legislation is needed.

Mr. President, I ask unanimous consent that an excellent article in this morning's Washington Post, outlining the present power problems, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

POWER DIMS WASHINGTON, MUCH OF EAST

(By Claudia Levy and Joseph D. Whitaker)

A combination of unseasonably hot weather and broken generating equipment caused an electrical power shortage yesterday that swept the East Coast from the Canadian border, through Washington and into the Carolinas, and as far west as Ohio.

The Potomac Electric Power Co. (Pepco), which serves 340,000 customers in the Washington area, asked major users to cut back on nonessential uses of electricity and warned that an overtaxing could lead to a complete blackout.

Pepco blacked out selected areas of Maryland and Washington for periods of up to two hours on a rotating basis. Electricity was cut off for brief periods in parts of New York City and suburban Westchester County to conserve power in the area. Some 40,000 customers on Staten Island and 30,000 in Westchester County were completely without power from 3:50 p.m. to 4:15 p.m.

Full service was restored to Pepco and Vepco customers by 10 p.m. last night. Pepco estimated that 14,000 customers in the Washington area were without power for between one and 2½ hours last night, spokesman said. Vepco said that none of its customers were blacked out.

Parts of New Jersey and Pennsylvania were also without power when several major power generators broke down under the strain of unusually hot weather conditions.

Some major generators in the Pennsylvania-New Jersey-Maryland power production pool were cut off to prevent further overload and possible explosions, according to Federal Power Commission officials.

Officials say that at least part of the power problem resulted when additional generators, which would have been used in a normal emergency, were out of service for scheduled fall maintenance and repairs.

Arthur Proffit, chief of power requirement and supply in the Federal Power Commission, said at least 8 per cent of the area's generating equipment was already out for repairs and another 22 per cent of the equipment was forced out of service by the end of the day.

Temperatures yesterday were generally in the 90s up and down the East Coast. The last day of summer in Washington recorded a high of 95 degrees. The mercury in New York had climbed to a sticky 93 by 4 p.m.

The unseasonably hot temperatures forced businesses and private homes alike to turn on air conditioners earlier in the day and keep them on at full blast.

The latest local and national weather forecasts indicate little change in temperature for today although some cooling thundershowers are expected to hit the Washington area in the late afternoon.

A Pepco spokesman said that the area might face "more of the same" today, depending on how hot it gets and how quickly equipment can be repaired at power plants outside the Pepco service area.

The spokesman said Pepco has sufficient generating capacity for its own area as long as key equipment is not hampered by "unscheduled breakdowns" in other states.

The first news of the crisis came to Washington residents about 10:20 a.m. when Pepco announced a 5 per cent cut back in power production in the area.

Pepco made the reduction in order to sell the extra voltage to New York City, which had already begun cutting back power in several areas of the city.

By 1 p.m. Pepco had almost exhausted its power reserve and generators had become disabled. The company then started buying power from power plants in the Midwest as far as Chicago, where conditions were normal.

Meanwhile, in suburban Northern Virginia, Virginia Electric Power Company (Vepco) officials also announced a 5 per cent cut back in power and asked all customers to cut down on nonessential users of air conditioners, lights, and television.

The 5 per cent power cutback was hardly noticeable to most users. Pepco officials claim that power must be reduced at least 8 per cent before light bulbs, televisions and other home appliances reflect the reduced voltage.

Problems at Vepco developed when the company's largest generator, the No. 6 Unit in Chesterfield, was forced out of operation when workers detected a faulty bearing in the unit.

The year-old No. 6, which can generate double the power of any other Vepco unit, was cut to half its capacity during the morning hours, but was cut off completely by the afternoon.

Two other Vepco units were out of operation yesterday: the generator at Bremo in Fluvanna County, Va., because of a boiler leak, and the unit at Yorktown on the York River, closed for annual repairs.

Yesterday's "brownouts" were the results of a master plan agreed to long ago by the East's major power companies and by the Federal Power Commission.

The master plan is a series of interconnecting electrical "grids," in which power companies in New York, Pennsylvania, New Jersey, Maryland, Virginia and North Carolina pool their electricity and then channel power to whichever state needs it the most.

"The idea is the same as an insurance pool," explains David Freeman, chief energy adviser in the President's Office of Science and Technology. "The bigger and stronger you make it the more likely it is to get people through trouble."

The "trouble" yesterday came from the PJM pool, which is that part of the Eastern grid that's made up of the power companies in Pennsylvania, New Jersey and Maryland.

Through a series of breakdowns, the PJM pool ran short of power early in the day and began to borrow power from other members of the Eastern grid.

Because of the hot weather and high humidity, however, the other grid members soon ran short of electricity too. This caused brownouts, in the form of 5 per cent reductions in electrical load by power companies in the PJM pool, the New York pool and the Virginia-North Carolina pool.

"The brownouts are deliberate," Freeman said. "You reduce voltage to prevent the whole system from failing."

When this proved not to be enough, several utilities in the East ordered selective blackouts in the District of Columbia, suburban Maryland, Staten Island and sub-

urban Westchester County in New York to conserve electricity during the periods of peak need.

"This is part of the routine," Freeman explained. "If it had gotten any worse, more areas would get the selective blackout treatment, like large industries, the most rural regions and then areas that don't need power to keep public transport moving."

The blackout that shut down the entire Northeast five years ago, Freeman said, is just about an impossibility today. He said that power pools have been strengthened through the addition of new pool members and the construction of new transmission lines.

At the same time, utilities have installed massive numbers of relays throughout their transmission systems that detect power reductions elsewhere in the pool and prevent cascading failures like the one that caused the blackout in 1965.

Pepco said it began cutting power to selected streets at around 2:50 p.m. Lines from substations in Rockville, Hyattsville, Viers Mill and the area of 12th and Irving Streets NE were cut off at that time.

During the afternoon scattered streets in scattered areas throughout Maryland and the District were affected, Pepco said. No areas in Virginia, which is served by Vepco, were completely shut off.

A Pepco spokesman said no more than 13,000 to 14,000 were affected by the power outages at any one time. At 6 p.m., only 6,000 Pepco customers were being affected.

Yesterday's power shortage was the third and most critical this year. In May, Pepco was forced to cut power by 5 per cent when the demand for electricity to run air conditioners reached an early peak.

Vepco also was forced to blackout the Mount Vernon area of Northern Virginia when power stations were overloaded by extensive use of home air conditoners.

Last Wednesday, Pepco and Vepco again were forced to reduce power supplies by 5 per cent in order to sell excess electricity to other companies fed by the PJM system.

## UNION FINE CASES SHOW NEED TO PASS S. 1946

Mr. ERVIN. Mr. President, two recent decisions by the National Labor Relations Board serve to illustrate why it is imperative for the Committee on Labor and Public Welfare to report favorably S. 1946, which would amend the National Labor Relations Act to make it an unfair labor practice for any labor organization to impose a fine or other economic sanction against any person for exercising his right not to engage in concerted activities or for invoking any process of the NLRB.

Both of these decisions involved the imposition of fines by unions, and both point out the abusive use of such fines since they were sanctioned by the NLRB and later by the Supreme Court in its landmark Allis-Chalmers decision—388 U.S. 175.

In the first case—Machinists, Lodge No. 405 [The Boeing Co.], NLRB 1970, 75 LRRM 1004—the Board found that the union had violated the Taft-Hartley Act when it imposed fines on employees who broke a strike after resigning from the union. As heartening as this part of the decision was to me, the NLRB went further to find that the union did not violate the same act when it fined those employees who crossed the picket line before they resigned their memberships.

In the second case—Machinists, Lodge No. 504 [Arrow Development Co.], NLRB 1970, 75 LRRM 1008—the Board found that the union did not violate the Taft-Hartley Act when it imposed a $500 fine on a member who crossed the union's picket line during a strike that lasted 4 weeks. During that period, the member earned a net of $511.33. Subsequently, he was fined $500 by the union, which brought suit in the California courts to collect the amount and was awarded a judgment of $528, including costs, against the member. In this particular case, an argument was made that the fine was unreasonable in amount and that the NLRB should find it so. However, the Board ruled that the intent of Congress was not to have the NLRB regulate the amount of union fines or determine their unreasonableness. In applying Allis-Chalmers, the Board rules that—

> The act does not authorize this Board to evaluate the fairness of union discipline meted out to protect a legitimate union interest.

In Allis-Chalmers, the Supreme Court held that section 8(b)(1)(A) of the Taft-Hartley Act, which forbids unions from coercing their members, is not applicable to the conduct of a labor organization's internal affairs. Fines are internal affairs, the Court held, and thus are not included under the section. Now, it seems to me that the Board has said in these two recent decisions that it will forevermore keep hands off union fines cases as long as they are imposed for activities occurring while the victim was a member of the union. Unions apparently will be left alone from now on to run roughshod over their members, until the Supreme Court sees fit to amplify its Allis-Chalmers decision.

By use of fines, some of which in the past have run as high as $18,000 or more, unions are able to coerce their members into almost any type of activity which can be construed as legitimate to the interests of the organization. If an employee chooses to join a union, apparently under the present interpretation of the law he abdicates his right to free speech, his right to work, his right not to engage in concerted activities, and his right to go and come as he pleases. He becomes nothing more than a pawn for the union leadership, to be used as the officials of the organization see fit.

Mr. President, what has happened to the individual in all of this? What has happened to the little man and his right to make a living? What has happened to the rights guaranteed him under the labor laws and under the very foundation of our Government, the Constitution?

I submit that these are bad times for the individual workingman in America, for powerful labor unions have abrogated his personal freedoms in the name of the organization. And the National Labor Relations Board during the past several years has played into the hands of big-time organized labor to the detriment of the liberties of the individual employees.

Under the current Board, already there have been several glimmers of sunshine coming from what otherwise has been a dismal bureaucracy, but we in the Congress should not stand idly by and wait for the Board to change its policies when individual liberties are at stake. It is our responsibility to bring needed reform to the administration of our labor laws and to make substantive changes in the law to protect the rights of individuals.

The Committee on Labor and Public Welfare has an opportunity to strike the first blow for workingmen's freedom by favorably reporting out S. 1946. Authored by Senator FANNIN and me, this bill would go a long way toward restoring the rights of employees to insist that their unions be responsive to their needs, and it would insure that they be allowed to exercise those rights already written into the labor statutes and those guaranteed by the Constitution.

I urge the members of the Labor and Public Welfare Committee to take this bill up and report it favorably in order to give the entire Senate an opportunity to vote for individual freedom.

## AN ECONOMIC ANALYSIS OF THE PAST 18 MONTHS

Mr. MANSFIELD. Mr. President, on August 19, 1970, the Senate Democratic Policy Committee requested Walter Heller, Arthur Okun, and Gardner Ackley, the three previous Chairmen of the President's Council of Economic Advisers, spanning a period from 1961–69, to prepare an analysis of the course of economic development in the country during the past 18 months. These distinguished economists were requested to pinpoint the sources of increasing unemployment and declining profits and to give an overall evaluation of the strategy employed during this period in pursuing price stability. We were very fortunate that all of these eminent men consented to provide a joint evaluation.

On September 18, 1970, they submitted the enclosed report. It contains a crisp and professional evaluation of the economy, and I believe it will bring greater perspective and sharper focus to bear on these matters disturbing so many throughout the country.

I ask unanimous consent that this report be inserted in the RECORD at this point.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

MEMORANDUM FOR THE SENATE DEMOCRATIC POLICY COMMITTEE

The following report is submitted in response to Senator Mansfield's request of August 19, 1970, that we "prepare an analysis of the course of economic developments in the country during the past 18 months, pinpointing the sources of increasing unemployment and declining profits and evaluating the strategy employed in pursuing price stability."

SUMMARY

Our examination of recent economic promise and performance, policies and prospects yields a disturbing picture of accelerated and unduly prolonged inflation; soaring interest rates and financial disruptions; a stagnation of production and jobs, the cost of which continues to grow; policies that have remained long on hopes and short on achievements.

1. *Problem and policy.*—When the present Administration took office, it found a prosperous economy, but plagued by a war-induced inflation. Although fiscal steps already taken had begun to cool the boom, the rise in prices had not yet begun to slow

down. The new Administration's task was to stop inflation with as little cost in jobs and production as possible.

It chose to attempt this mainly through a severely tight monetary policy, and it foreclosed any attempt to influence private price and wage decisions.

2. *Promise.*—President Nixon quickly assured us that "We can control inflation without an increase in unemployment." His economists spoke of bringing price increases down to 3 percent by the end of 1969. Since then, the Administration has repeatedly claimed that victory was in sight. But after nearly two years, prosperity without inflation still remains a distant promise.

3. *Performance.*—In 1969–70, the United States has experienced a fierce financial squeeze and an economic slump, side by side with stepped-up inflation—a combination new in American experience. During 1969, the rate of inflation jumped from 4½ to 6 percent. Now, at last, it shows signs of ebbing—far behind schedule. Even so, prices are still rising more rapidly than when the Nixon Administration took office. But the effort to curb inflation has cost us dearly in both human and material terms:

*In jobs.*—One and one-half million more people were out of work last month than in December 1968. Unemployment had jumped from 3.4 percent to 5.1 percent of the civilian labor force.

*In output.*—U.S. production slipped below its potential a year ago and a $40 billion gap has already opened up between our actual output and our capacity to produce.

*In profits.*—Corporate profits are down 11 percent.

*In housing.*—Homebuilding fell one-fifth and is only now beginning a come-back.

4. *Prospects.*—There are now signs that the economy has bottomed out and is starting a recovery of sorts. But, even as production turns up, unemployment will continue to rise as job opportunities grow less rapidly than the civilian labor force. At best, the current prospect is sluggishness and slack, the full cost of which may reach $150 billion or more of lost production and incomes.

5. *Recommended action.*—Clearly there is more than enough slack in the U.S. economy today to permit a significantly more expansionary policy. The record shows that inflation has never been rekindled when the economy has had this much slack. We believe that.

Monetary policy should be further liberalized to finance a more rapid economic expansion and achieve lower interest rates.

In fiscal policy, the President's own guideline—that "expenditures must never be allowed to outrun the revenues that the tax system would produce at reasonably full employment"—fails to justify his vetoes of health, education, and housing bill. Good economics today fully justifies a more generous funding of vital social programs.

A more expansionary monetary-fiscal policy needs to be coupled not only with structural measures to improve labor and product markets, but also with active and imaginative efforts to induce greater restraint in private price and wage decisions.

THE ECONOMIC RECORD OF 1969–70

When the Nixon Administration took office twenty months ago, the Nation was exceedingly prosperous, but the record was marred by inflation. The prosperity was widespread and pervasive:

Eight years of unprecedented continuing economic expansion had raised the Nation's real production by one-half and the real after-tax income of the average household by one-third.

Unemployment was down to 3.5 percent of the labor force, the lowest since 1953.

Corporate profits before taxes exceeded $90 billion for the first time in history.

Real income per farmer was at a level previously topped only in 1966.

For most groups in the economy, income gains were consistently outpacing inflation.

On the liability side of the balance sheet were the nagging problems of inflation and high interest rates. Between mid-1967 and the end of 1968, both consumer prices and the average price index for gross national product (GNP) had risen at a fairly steady and clearly excessive rate of 4½ percent. Interest rates were uncomfortably high: above 6 percent on most securities and above 7 percent for home mortgages.

The inflation clearly stemmed from the way the Vietnam war had been financed. When expenditures for Vietnam swelled the federal budget in 1966 without a matching rise in taxes, the Nation developed a classical case of inflation—too much spending chasing the available supply of goods. Prices, which had been remarkably stable throughout the 1960–65 period, rose sharply. During 1966, the brakes of monetary restraint were applied with great force, enough to offset the fiscal accelerator. The boom was thus halted, but only at the cost of an upsurge in interest rates, serious dislocations in the availability of credit, and an acute disruption in home building. Price rises slowed down markedly in the first half of 1967. But when the budget throttle remained wide open and the monetary brakes were not applied again, excess demand reappeared.

By mid-1968, when tax and expenditure control measures finally restored the budget to a sound position, the boom had developed enormous momentum and proved difficult to stop. Economic activity did slow down significantly during the second half of 1968, but price increases remained excessive. At the beginning of 1969, it was clear that further restraint was required to curb inflation—and equally clear that the restraint had to be tempered to minimize the sacrifice of jobs and real incomes in an economy already beginning to slow down.

*The promise: Gradual disinflation*

The new Administration stated its objectives explicitly—to halt the inflation gradually while avoiding any appreciable increase in unemployment. As Secretary Shultz spelled out the strategy in March 1969: "Now we are aiming to maintain a relatively stable unemployment rate with a gradual reduction in the rate of increase in prices. . . . By starting now, and holding firmly and steadily to this objective, we can accomplish a worthwhile reduction in the rate of price increase this year, and set the stage for further reduction next year. At the same time, an opportunity will be provided for the economy to create the expanding number of jobs that are required to keep employment in line with the growth in the labor force." President Nixon put it more simply in his first news conference: "we can control inflation without an increase in unemployment."

These were laudable objectives, with which few would disagree. The problem lies in the policies adopted to reach these goals and in the subsequent responses when these policies did not work.

The new Administration made only modest changes in the fiscal posture that it had inherited from President Johnson. Expenditures were altered relatively little. After a considerable and costly delay, President Nixon went only part of the way in renewing President Johnson's request for extension of the tax surcharge during fiscal 1971, substituting repeal of the investment tax credit for the remainder.

But the main instrument of the new campaign against inflation was to be the Federal Reserve's use of monetary restraint. With the active support of the Administration, the Federal Reserve pursued an extremely restrictive monetary policy during 1969, allowing the money supply—currency and demand deposits combined—to increase only 2 percent during the year, and producing an actual substantial contraction in total bank deposits.

In a clearcut shift from Kennedy-Johnson policies, the Nixon Administration ceased any and all efforts to enlist the cooperation of business and labor in restraining price and wage increases. On January 27, 1969, President Nixon stated "I do not go along with the suggestion that inflation can be effectively controlled by exhorting labor and management and industry to follow certain guidelines. . . . The leaders of labor and the leaders of management, much as they might personally want to do what is in the best interests of the nation, have to be guided by the interests of the organizations that they represent."

THE PERFORMANCE: ACCELERATING INFLATION

Regrettably, the new game plan was followed not by a slowdown of the inflationary trend but rather by a distinct acceleration. The rate of advance in the consumer price index, which was 4.7 percent during 1968, stepped up to 6 percent early in 1969 and remained at that rate to the middle of 1970.

Reflecting both the more rapid inflation and extreme monetary tightness, interest rates jumped during 1969 and into 1970. Yields on home mortgages and most longer-term securities are today about 2 percentage points higher than at the beginning of 1969.

Prices and interest rates soared even though economic activity slowed markedly. Real GNP grew at an annual rate of only about 2½ percent in the first three quarters of 1969—substantially less than the 4 percent growth of the economy's potential. Output then actually declined at a 2 percent annual rate over the next two quarters, before levelling off in the second quarter of 1970.

The combination of accelerating inflation and decelerating—indeed, declining—production is unprecedented for the United States. There was nothing new about an economic slump or about stepped-up inflation; but the combination of both at once is unique in American experience.

The acceleration of prices was unforeseen by the Administration. In March 1969, after a meeting with the President and his chief advisers, Congressman Ford reported their general conclusion that the "high-water mark of inflation" had been reached in 1968. Secretary Shultz's forecast, cited above, of a "worthwhile reduction in the rate of price increase" in 1969 was translated into a target of 3 percent by yearend by other Administration officials. Only after prices rose at a 6 percent rate for many months was it suggested that the acceleration of prices in 1969 had been made inevitable by developments during 1968 even though prices were not accelerating at that time. No concrete evidence has been adduced to support this soothing hypothesis.

Some of the blame for the disappointing price record can be placed on erratic and transitory unfavorable factors—such bad breaks as the spurt in farm prices in the first half of 1969, the tightening of international markets for some metals, and the sag in labor productivity. On the other hand, there were alleviating good breaks, such as the light schedule of collective bargaining settlements in 1969.

An important source of the intensified inflation was the President's prompt and unequivocal assurance that prices and wages were no longer considered to be the Government's business—which means the public's business. This was widely read as an invitation for business and labor to cease the self-restraint practiced under the Kennedy and Johnson Administrations. Price increases accelerated most for those industries which had cooperated during 1966–68. For nineteen industries which had been responsive to the Johnson Administration's requests for restraint, prices rose 6 percent during the course of 1969 in sharp contrast with the 1.7 percent annual increase averaged during the preceding 3 years. For the remainder of

industrial wholesale prices, the acceleration from 1966–68 to 1969 was from 2.3 to 3.5 percent. When the indirect impacts on wages and on other prices are included and the cost of abandoning wage restraint is taken into account, a substantial part of the faster inflation of 1969 must be attributed to the renunciation of wage-price policy.

*The uncertain prospect*

In the past few months, there have been some signs that prices may be rising a bit less rapidly than in 1969 and early 1970. In the three months from April to July, the consumer price index increased at a rate of 4.8 percent a year, seasonally adjusted. Industrial wholesale prices rose at a seasonally adjusted annual rate of 2.8 percent from May to August, and the increase in the average of all wholesale prices slowed to 2 percent, as farm and food prices leveled off.

This evidence of improvement must be read with caution. Several times in the past two years, a few months of apparent improvement in the price record were followed by a renewed deterioration. These episodes date back as far as the third quarter of 1968. Nearly a year ago, on October 17, 1969, President Nixon told the Nation: "But now prices are no longer increasing faster and faster. The increases not only have slackened but the rates of increase are actually down." On December 22, 1969, he reported, "The consumer price index was rising at the rate of 6.4 percent per year in the first half of 1969, but the rate has dropped to 5.3 percent per year since June." But the better news on price movements in July, August, September and October was erased by a 7 percent rate of inflation in November and December. On January 30, the President said: "I do expect that the present rate of inflation, which was less in the second half of 1969 than in the first half, will continue to decline." Instead, the increase in the first half of 1970 was even more rapid than in the second half of 1969.

Wholesale prices of industrial commodities have been rising somewhat less rapidly for a considerable period now, but the results have not thus far been translated into improvements at retail. The widely heralded and obviously welcome decline in wholesale prices during August reflected little more than the elimination of an erratic bulge in farm and food prices that had occurred in July. By this time, there have been enough lessons to teach everyone caution about forecasting relief from inflation.

Moreover, on the horizon loom substantial risks of upward pressures from transportation costs and fuel and public utility prices, some of which the Council of Economic Advisers noted in its recent "Inflation Alert." A similar threat, not cited by the Council, is the preliminary announcement by automobile manufacturers that prices of 1971 models will rise at least 5 percent. Such a development will make the consumer price record for October dismal reading when it is released in mid-November. The outcome of the automobile wage negotiations is similarly a matter of national concern; a very large settlement would keep the price-wage spiral turning.

All in all, there is no basis for confidence that price increases in the closing months of 1970 will be less rapid than they were at the start of the Nixon Administration. In that event, two years of a costly battle against inflation will have been spent merely to get the Nation back to where it started in 1969.

*The cost: A stalled economy*

This modest and still uncertain relief in the rate of inflation has been purchased at an extremely high cost in terms of production and jobs. For the first time in nearly a decade, the most basic economic indicators—real GNP, industrial production, nonfarm payroll employment—stand below their levels of a year earlier. The declines are not large—industrial production is down 3 percent; real GNP a fraction of 1 percent; total man-hours worked in the private economy about 1½ percent. But the decreases throw into bold relief the largest and most serious cost of the slump—the failure to grow.

Growth is the fundamental characteristic and requisite of the dynamic American economy. Increases in the labor force and advances in technology steadily and significantly raise the Nation's capabilities for production of goods and services. Thereby, they make expansion in output and employment essential.

Stagnant production means sharp declines in business earnings: corporate profits in the second quarter were 11 percent below a year earlier.

Stagnant employment means surging unemployment: the number of jobless has increased by 60 percent since the end of 1968.

Stagnation of the over-all economy has meant substantial declines for some industries—especially those most vulnerable to tight money: homebuilding activity (in constant prices) fell 19 percent from spring 1969 to spring 1970.

Stagnant markets for industry have meant declining markets for investors: the value of corporate equities has dropped by one-fourth since the beginning of 1969, a loss of some $200 billion.

*The missing $40 billion.*—The best summary measure of the economic slump is the $40 billion shortfall of actual production below the economy's estimated potential in the second quarter of this year. Since it began to emerge in the third quarter of last year, that gap has been the only rapidly growing element in the economy. The $40 billion shortfall means:

Nearly $20 billion in real incomes missing from the pay envelopes of American families;

About $7 billion in after-tax corporate profits absent from the income statements of our business enterprises;

$2 billion of revenues not flowing into hard-pressed city and state treasuries;

About $12 billion missing from the Federal Government's tax collections.

It means, in short, that the mere bottoming out of the economy and the end of a period of decline offer only small comfort. Thus, while real GNP was rising about $1 billion in the second quarter, productive capacity was growing by $10 billion. The net result was a widening of the gap between actual and potential output by $9 billion, and a rise in the unemployment rate by half a percentage point.

*The unwanted workers.*—The 1969–70 slump has demonstrated anew that low unemployment requires a buoyant and expanding economy. Unemployment has surged from 2.6 million persons at the start of 1969 to 4.2 million persons in August 1970. Unemployment rates rose across the board:

For all workers, from 3.4 to 5.1 percent;

For male breadwinners, from 1.4 to 2.8 percent;

For blue-collar workers, from 3.6 to 7.0 percent;

For Negro and other nonwhite workers, from 6.0 to 8.4 percent.

Early in 1969, government officials noted that, during the sixties, relatively stable service industries had experienced a much greater growth of jobs than had the volatile areas of manufacturing and construction. They suggested that this structural change might insulate the Nation from any appreciable increase in unemployment even if economic activity should stall. Unfortunately, those hopes were not realized. Some officials stressed the capability of manpower programs to minimize any increase in unemployment. Those hopes also proved unfounded. Indeed, what has been demonstrated is that manpower programs which rely on the participation of private business firms can succeed only in a strong labor market. When employers were obliged to lay off senior workers, many firms became dropouts from cooperative manpower programs. They found it impractical to keep training disadvantaged workers for new jobs when their existing work force could not be used productively.

The difference between 5 percent and 3½ percent unemployment may not seem large. But for the worker it is a different world:

At the end of 1968, only 944,000 of the 2.6 million unemployed had lost their last job. The rest were entering or re-entering the labor force or else had left their last job voluntarily. In August 1970, the number of job losers had reached nearly 2 million of the 4.2 million unemployed.

The number of persons unemployed for 15 weeks or longer climbed 130 percent from December 1968 to August 1970—from 322,000 to 736,000. And this figure does not yet reflect the full impact of recent increases in joblessness.

In June 1969, there were 240,000 job vacancies in manufacturing and 700,000 unemployed factory workers—or one vacancy for 3 jobseekers. In June 1970, vacancies were only 123,000 while unemployment of factory workers exceeded 1.1 million, a ratio of one vacancy for every 9 jobseekers.

In July 1969, 58 of the Nation's 150 major labor market areas were classified by the Department of Labor as "low unemployment" areas—good places to find a job. Only 24 areas retained that classification in July 1970. Meanwhile, the number designated as having "substantial unemployment"—weak labor markets—jumped from 5 to 24. Only one area of the 150 (Wheeling, West Virginia) registered a year-to-year decline in the unemployment rate.*

*Social strains.*—No statistics on unemployment can reveal some of the most significant social consequences of a weak job market. They fail to reflect the loss of opportunities for overtime work, which to many families provides a vital extra margin for comfort and the amenities of life. Nor do they register the frequent shift from full-time to part-time jobs. In a recent opinion survey, 21 percent of all families reported some loss of employment opportunities in the past year—from layoffs, lost overtime, or part-time jobs.

Millions more have had to worry seriously about job security for the first time in many years, as they saw their neighbors and their colleagues laid off. Surveys of consumer sentiment offer one indication of the pervasive psychological impact of a weak economy. The Index of Consumer Sentiment, compiled by the Survey Research Center of the University of Michigan, has been below 80 since the fall of 1969, down sharply from its range of 91 to 96 in the quarterly surveys between mid-1966 and mid-1969.

A slack economy strains the fabric of society and accentuates conflicting interests. When sales are stagnant, greater incomes for labor can come only through lower incomes for business. Jobs for blacks and the young seem to imply joblessness for whites and the elderly, if total employment is not expanding. One city's progress means a setback for suburbs, rural areas, or other cities if the national economy is not growing. Only in an expanding economy are there fruits of growth ready to be shared among groups and regions.

*The true cause.*—In reviewing the costs of economic slowdown, it is important to recognize that the boom of 1966–68 had to be halted and that this task could not have been painless and costless. But it is vital to know how high the toll has been and to know that its size was set by economic policies.

It is not that people are any less eager to work than they were early in 1969. It is not that foreign competition is a barrier to

* All comparisons are based on the latest available data. Vacancy and area figures are not seasonally adjusted and hence must be compared with the same month of 1969.

full employment today—any more than it was last year or the year before. It is not that defense cuts were responsible for the economic slump or the increase in unemployment. It is that deliberately restrictive monetary and fiscal policy has prevented the private economy from generating enough jobs to absorb the men released from the armed forces and defense plants.

The costs of halting the boom have been large by any standard, and particularly when measured against the Government's own targets and expectations. As the Annual Report of the International Monetary Fund stated this month: "At this juncture, the domestic stabilization plan developed by the (U.S.) authorities early in 1969 is clearly behind schedule in slowing the pace of price and cost increases and, at the same time, it has had a more severe impact on the real economy than was expected or hoped for." The tight money attack on inflation has proved to be a strategy of doing it the hard way—yielding unexpectedly slow and small dividends and imposing unnecessarily large sacrifices of jobs and production.

THE CURRENT CHALLENGE

*The outlook: More sluggishness*

Neither current economic indicators nor the latest statements and actions by the Administration point to any reversal of the growing slack, widening shortfall of production, and rising unemployment that has marked the past year.

The favorable side of recent news is that the economy has "bottomed out." Everyone is relieved that the slump did not turn into a major, cumulative decline. The Federal Reserve contributed to this welcome development by easing up on the monetary brakes at the beginning of this year The Congress contributed by rejecting the President's most stringent recommendations on fiscal policy. The vital margin accounting for the modest increase in real GNP during the second quarter may have been the extra incomes Congress generated by enacting such measures as the increase in social security benefits beyond the President's recommendations.

Recent evidence puts the main danger to the economy in perspective: that threat is not a prolonged collapse or even a slow decline, but rather a chronic and creeping paralysis.

That real threat is nonetheless serious. Based on present policies and current evidence, the economic outlook is for only sluggish growth as far ahead as one can see. If an automobile settlement is reached promptly, output might rise at an annual rate of roughly 2 percent in the second half of this year. Real GNP in the fourth quarter of 1970 would then barely exceed its peak in the third quarter of 1969. The gap of unused resources and wasted productive capacity would be widening. By year end, the production gap would reach $50 billion—$1 billion a week—and unemployment would be moving into the neighborhood of 5½ percent.

The likelihood of a recovery in homebuilding and moderate advances in consumer buying is the source of the prospective modest resumption of economic growth. No great strength is visible anywhere. The latest indicators of consumer buying and of consumer attitudes point, at best, to only a modest decline of currently high saving rates in the period ahead. The most recent evidence on plant and equipment reveals no prospect of a rise in real investment. Unlike previous recoveries, the current situation is unlikely to get significant help from an inventory rebound, simply because inventories never did become top-heavy nor undergo a general liquidation.

The Administration's reading of the economic outlook—as conveyed publicly—appears to be similar to that outlined above. Chairman McCracken speaks of a modest resumption of growth and concedes the probability of a continued rise in unemployment.

Looking farther ahead, there is a sound basis for the concern Chairman McCracken recently expressed about the danger of "an unduly protracted period of excessive slack and unemployment." It is much harder to get back on the road to full employment than to wander off that path. It took only three quarters to create a gap of $40 billion, amounting to 4 percent of GNP. Even at best, it will take much longer to eliminate that costly shortfall.

First, the gap will begin to narrow only when output begins to grow more rapidly than the 4 percent growth of productive capacity.

Second, the gap will narrow only by the *excess* of actual growth over the 4 percent growth of potential.

Third, in view of the dangers of renewed inflation, 6 percent is likely to be a speed limit on real expansion.

Finally, for these reasons, even after the economy shifts into high gear, a period of two years would be necessary to eliminate the 4 percent gap of today.

If, as a result of inadequate economic policies, output should grow only 2 percent between mid-1970 and mid-1971, and even then if it began to expand at 6 percent, it would take until mid-1974 to restore full employment. The total cost of the slack—the loss of output between 1969 and 1973—would exceed $150 billion. If, alternatively, through more expansionary policies, output grows 4 percent over the next year and then rises at a 6 percent rate, the gap would be closed by mid-1973, thus holding the total cost to about $100 billion.

In either case, "an unduly protracted period of excessive slack and unemployment" is already a fact of economic life. But the difference of more than $50 billion between the two cases illustrates the importance of a prompt and healthy recovery.

*A redirection of economic policy*

Such a recovery can be promoted by the same monetary and fiscal tools which induced and engineered the 1969–70 economic slump. They work only with a lag, however, on the ascent as well as on the descent.

Just as the highly restrictive policies of 1969 are holding down the economy today, so the policy choices of today will influence the economy's performance in 1971 and 1972. The time has come for a redirection of fiscal and monetary policies. The task of halting the boom has been done and overdone. Administration policymakers did not wish or plan an unemployment rate exceeding 5 percent; on the contrary, they expressed confidence that it would not get nearly that high. They did not want a production gap approaching $50 billion; their projections at the beginning of 1970 pointed to a shortfall only about half that size. Policies must be geared to the realities of today, rather than the expectations and hopes of a year ago.

Thus far, adjustments of monetary policy have merely ended the severe restraint that choked off growth. But it is no longer enough for economic policy to stop blocking the path of economic growth. Some active support is required. The nature and the extent of the support must recognize the persistence of disturbing price increases. Surely, it would be easier and safer to recommend stimulative policies if prices had already leveled off. But to wait for that development would involve an unconscionable cost in terms of sacrificed jobs and production.

The history of the post-Korean era provides some assurance that renewed expansion in today's slack economy would not mean renewed inflation. Whenever the unemployment rate has exceeded 4½ percent, price rises have within a few quarters, slowed to a moderate level. For all periods when the unemployment rate exceeded 4½ percent, price increases have averaged 1¼ percent; for unemployment between 4½ and 5½ percent, 1⅓ percent.

Squeezing the economy longer and harder will not achieve a significantly quicker or more pronounced disinflation. At this point, restrictive fiscal and monetary policies offer little extra gain in the battle against inflation and impose large social and economic setbacks.

An appropriate redirection of fiscal-monetary policies would not be a turn of 180 degrees. A sharp and abrupt shift to extremely expansionary policies must be avoided, for it would jeopardize the disinflationary process. What the Nation needs is a prudent but decisive shift toward the support of growth, designed to halt promptly the widening of the production gap and the rise of unemployment.

*Fiscal policy for a balanced economy*

The Federal Budget is in deficit today, but its red ink is only a symptom of the weakness of the economy. The shortfall in business and personal incomes has held down Federal revenues from corporate and individual income taxes. This slump-induced shortfall in Federal revenues far exceeds the deficit recorded for fiscal 1970 or the deficit in prospect for fiscal 1971. The budget deficit in 1970 was $2.9 billion. Receipts during that period were about $7 billion below the level that would have obtained in a full employment economy; indeed, they were $5.5 billion below the Administration's own revenue estimates at the start of calendar 1970. If the Administration's hopes for the economy had been realized, the budget would thus have shown a comfortable $2.6 billion surplus.

In fiscal 1971, Federal revenues are even more dramatically depressed by the shortfall in the economy. Even on a rather optimistic economic forecast, Federal revenues will be $15 billion below the full-employment level. That shortfall is a sufficient explanation of the deficit in the current fiscal year. Compared to it, differencs in either direction between the President and the Congress on the desirable levels of Federal programs are relatively small.

In short, the current Federal deficit is not a potential cause of economic overheating, but rather the result of an economic chill. The Federal budget's thermostat is working; and the economy's chill has automatically turned on the fiscal furnace. A weak-economy deficit is very different from a full-employment deficit created by either excessive expenditures or untimely tax reductions—actions which, in effect, turn up the thermostat and almost surely overheat the economy. A slump-induced deficit is no reason to withhold adequate support for high-priority Federal programs and services. To pursue such an approach would depress jobs, incomes, and Federal tax revenues all the more—guaranteeing that both the economy and the budget remained seriously out of balance.

In recent months, the Administration has stated explicitly its own criterion for the boundary line between inflationary and noninflationary fiscal policy. The President, Director Shultz, and Chairman McCracken have all set forth this "basic guideline" for the budget: holding Federal expenditures below "the revenues that the tax system would produce at reasonably full employment." This is a sensible guideline in present circumstances. But the Administration's own fiscal recommendations and actions do not square with it.

That "basic guideline" should be applied consistently and carefully to the budget. Under present tax laws, revenues for fiscal 1971 would be about $215 billion at reasonably full employment. Expenditures proposed by the Administration are estimated at $206 or $207 billion. Thus there is ample room within the guideline for the strengthened social security program enacted by the House of Representatives and for moderate increases in other high-priority programs. The guideline reveals no need for additional revenue action: whatever the merits on other grounds of taxing leaded gasoline and speed-

ing up estate and gift tax collections, these measures are not required for anti-inflationary purposes.

The guideline also shows that the appropriations bills for the Independent Offices and the Department of Housing and Urban Development and for the Office of Education were noninflationary by the Administration's own criterion. Yet the President chose to veto those bills, arguing they were inflationary. His veto messages of August 11 were inconsistent with his own budgetary principles, set forth as recently as July 18. The appropriations bills were responsible fiscal actions; the vetoes had no economic justification.

The Congress should be sure that its actions do square with the reasonable noninflationary guideline of the Administration. It should hold expenditures within the bounds of full-employment revenues, and there is every indication that it will. But the slump-induced deficit must not be allowed to obscure the needs of the Nation for public services, for economic recovery, and for improved job opportunities.

Looking ahead to fiscal 1972, Federal revenues would rise by at least $15 billion along a normal path of economic growth. Given this outlook for revenue growth and assuming a maintained effort to cut defense outlays, it is hard to imagine increases in Federal expenditures outrunning the growth of Federal revenue capabilities in fiscal 1972. Similarly, it is hard to see any sound economic basis for suggestions that tax increases will be needed next year. An increase in taxes would be sensible economic policy only if required to finance a major expansion of social programs.

*The new assignment for monetary policy*

Current and prospective fiscal policy should be viewed against the background of monetary policy. During much of 1970, the statements of the Federal Reserve pointed to a 4 percent growth rate of the money supply as a target of policy. It is not clear whether 4 percent remains a target today.

It would not be an appropriate target under present circumstances. Even as a long-term norm, 4 percent growth of money is by no means a reliable standard. No one knows whether a 4 percent growth rate of money can support a growth of GNP that must exceed 6 percent a year in current prices over the long run.

More important and more specifically, whatever may be appropriate as a norm for the long run is clearly inadequate in today's abnormal situation. The economy has been starved for liquidity as a result of past monetary restraint. The money that was not created in 1969 is still missing; the average growth rate of money since early 1969 has been only 3 percent. Moreover, during the first half of 1970, extreme economic uncertainties and shock waves in financial markets generated extra demands for safe liquid assets. These demands must be accommodated to end the liquidity drag on economic recovery.

The experience of recent months shows that even moderate growth of liquidity can be consistent with declining interest rates—*when the economy is not advancing.* But it is unlikely that the same growth of liquidity could support a continued decline in interest rates once economic activity begins to move ahead with any vigor.

Under current circumstances, monetary policy—which played the stellar role in inducing the economic slowdown—has an equally important assignment in promoting a well-paced recovery. That assignment requires a broad view of liquidity and of the financial requirements for renewed economic growth, rather than a narrow focus on any growth norm for any particular monetary magnitude. To formulate a constructive monetary policy over the year ahead, the Federal Reserve should be sure to ask the right questions. If it does that, it will supply reasonable answers.

The check list of questions should include these:

What is a reasonable target path for homebuilding activity during the course of 1971, consistent with a healthy rebound of the whole economy and with an orderly recovery of that industry?

How much credit should flow to state and local governments in 1971—given their urgent needs and the over-all economic situation?

How can monetary policy strengthen the willingness and ability of consumers to resume more normal levels of spending in relation to income?

What, in turn, is the pattern of interest rates, credit flows, and credit availability consistent with these objectives?

In general, what kind of a downward path of interest rates from their current heights would be desirable, as the disinflationary process continues?

*Wage-price policies: The missing link*

The Administration has still made no effort to enlist the support of labor and business in the anti-inflationary process. This missing link of economic policy has been exceedingly expensive to all Americans. It could have helped—early in 1969—to avoid the acceleration of prices, and—more recently—to speed the shift away from inflation. It is now more than ever essential, in order to provide insurance that the wage-price spiral slows down progressively while fiscal-monetary policies help jobs and markets to recover promptly.

Many constructive and concrete proposals for a cooperative wage-price policy have been put forward in the past 20 months. Since the Administration has rejected one and all, it seems pointless to recommend any particular strategy once again. The first requisite for a successful wage-price policy is determined and dedicated leadership by the executive; the President and only the President of the United States has the moral force to achieve cooperation among the major interest groups in our economy. And that first requisite is not present.

The call for such leadership has been sounded again and again along a wide bipartisan front. In March, the Republican members of the Joint Economic Committee expressed their belief that "this administration has a responsibility to use its considerable powers of moral suasion and its ability to focus national attention on particular wage and price decisions. . . ." The editorial pages of respected, conservative publications such as *Business Week* and *Fortune* have advocated speed limits on wages and prices. Expert voices in international organizations—OECD, BIS, IMF—have called out for action. Articulate officials within the Administration have registered their dissent from the no-policy policy.

The Administration made some move toward a wage-price policy when, on June 17, the President established a Commission on Productivity, announced a White House conference on productivity, called for the preparation of periodic "Inflation Alerts" by the Council of Economic Advisers, and created a Regulations and Purchasing Review Board within the Federal Government.

The elaboration of this program to the press by Administration officials has consistently emphasized what it is *not* intended to do. One Administration aide stated, "It's just a placebo for those who believe we must act." The record does not contradict him. The White House conference has not been held or even publicly scheduled. The Commission on Productivity has thus far been silent. Nor are there visible signs of progress or effort by the in-house Board in its important assignment of removing the Government's own structural obstacles to minimum costs and efficient markets.

The Council's first "Inflation Alert," released in mid-August, was an informative professional review of past price movements and of the anatomy of the inflationary process. But it was almost entirely a backward-looking document, rather than an "alert." It is hard to see how such a review can mobilize public opinion. If private actions and decisions are to be reviewed constructively, they must be measured against standards for responsible behavior. So long as the Administration refuses to discuss and set forth such standards in cooperation with business and labor, there can be no basis for an evaluation of performance. So long as the President countenances whatever use of market power may be made on behalf of private interests, business and labor must be expected to try to protect themselves and to beat others to the draw. So long as the rules of the game are that anything is fair, no self-restraint can be expected. And so long as this posture is maintained, it keeps adding to the cost of living of all Americans and subtracting from the abiilty to achieve full employment with price stability.

## POVERTY AMONG ELDERLY INCREASES

Mr. BYRD of West Virginia. Mr. President, the distinguished Senator from New Jersey (Mr. WILLIAMS) is necessarily absent. I ask unanimous consent that a statement prepared by him be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

POVERTY AMONG ELDERLY INCREASES

Mr. WILLIAMS of New Jersey. Mr. President, during the Committee on Aging's overall study of the "Economics of Aging", we have received much hard-hitting evidence about a retirement income crisis that is worsening, rather than improving.

One out of every four persons 65 and older—in contrast to one in nine for younger individuals—lives in poverty. Yet, many of these older Americans did not become poor until they became old.

This direct relationship between increased poverty with advancing age is unmistakable. In 1969, 7.2 percent of all persons in the 45 to 54 age category were classified as poor. For individuals 55 to 64, the figure increased to 11.1 percent. And for persons 65 and older, it jumped sharply to 25.3 percent.

More importantly, recent Census Bureau statistics reveal that the number of older Americans living in poverty has actually increased by 157,000—from 4,630,000 to 4,787,000—since 1968. In contrast, the number of younger persons who would be considered poor declined by 1,257,000—about a 6 percent reduction.

In the past, the number of elderly persons in poverty has declined, but at a slower rate than for the rest of the population. From 1959 to 1968, more than 1.3 million aged persons moved out of poverty—approximately a 29 percent reduction.

However, the new census statistics show for the first time that the aggregate number of elderly poor persons has increased. And this reversal in trend should be of immediate concern to all Americans, young as well as old.

Unless positive action is taken now, the economic position of aged persons—as well as those approaching retirement—will deteriorate markedly in the years ahead.

These statistics help to demonstrate that piecemeal, stop-gap Social Security measures are not going to be effective for this mounting problem of crisis proportions. Moreover, these figures effectively rebut the arguments advanced by the "floor of protection" advocates.

What is needed now is comprehensive reform, as outlined in my omnibus amendment to the House-passed Social Security bill. This measure would make several vitally needed improvements in Social Security and Medicare, including:

A 32 percent raise in benefits in two steps;

Thereafter, benefits would be automatically adjusted based on increases in the cost-of-living;

Substantial increases in minimum benefits to remove large numbers of the aged from poverty;

Liberalization of the earnings test to enable individuals to supplement their Social Security benefits;

Coverage of out-of-hospital prescription drugs under Medicare; and

Elimination of the $5.30 premium charge for supplementary medical insurance under Medicare.

Mr. President, we in this Nation must recognize that the older population is falling further and further behind in terms of economic well-being. Today, elderly persons are twice as likely to be poor as compared to younger people. Older Americans now comprise about 10 percent of our population, but constitute nearly 20 percent of the total poor population. In 1968 they were 18 percent of the total number of persons in poverty.

These figures present compelling reasons for far-reaching improvements when the Senate considers the 1970 Social Security amendments.

## NEED FOR A U.N. EMERGENCY RELIEF SERVICE

Mr. KENNEDY. Mr. President, reports from the United Nations in New York, and from Europe and the Middle East, tell of a heavy toll being paid by the civilian population as a result of the current conflict in Jordan. It is the usual story of civilian war casualties—tens of thousands suffering and dying every hour of the day. It is the usual story of dislocation and loss of home, of disease, and epidemic. It is the usual story of little food and water. And as always, with the exception of a very limited Red Cross mission, there is no one there to really help those in need—and little evidence of much concern in the councils of government.

I do not speak today to blame or condemn, or to offer any magic solution for meeting the problem of emergency needs in Jordan, but as chairman of the Judiciary Subcommittee on Refugees, I do express a deep personal concern over the plight of the people in Jordan, which seems to be just another link in a chain of neglected, war-ravaged populations stretching around the world over recent years.

Inevitably, the situation of civilians in Jordan is taking second place to the progress of battle—and to the interests of those who have much to lose, or to gain, by the outcome of the battle. But the people of Amman, the people of Irbid, and of the villages and towns scattered throughout the desert, also have interests. For many, apparently, it is mere survival.

The situation in Jordan is particularly distressing. For in that country, and in neighboring areas, there is an operational United Nations presence. It is the humanitarian presence of UNRWA—the United Nations Relief and Works Agency for Palestinian Refugees in the Near East—with a mandate broad enough to respond to any emergencies in the area.

I fully appreciate the chaos in Jordan, the difficulties in landing aircraft at the airport in Amman, the problems in moving supplies into the city, and into the field. But we know, also, that a couple of relief flights have landed at Amman—and so we ask, why can there not be more? And cannot the U.N. concern itself with this problem? Cannot the General Assembly and the Secretary General at least appeal for the safe conduct of mercy missions to a situation which is described as "appalling" by officials at the Department of State—as "very grim" by representatives at the United Nations?

I hope our Government will actively support such a move within the United Nations, in an urgent effort to help salvage a battered people.

Mr. President, the situation in Jordan today is still another example to underscore the need for new international humanitarian machinery. I hope it will give new impetus for early consideration by the United Nations of pending proposals to establish a U.N. Emergency Relief Service.

## CULEBRA

Mr. CHURCH. Mr. President, I wish to express my concern for the strain which the dispute between the 726 U.S. citizens who live on the island of Culebra and the U.S. Navy is imposing on the historically warm relations between the United States and Puerto Rico. Representative Jorge L. Córdova, the distinguished Resident Commissioner of the Commonwealth of Puerto Rico, has stated:

> In Puerto Rico opposition to the Navy's use of Culebra as a target has been unanimously expressed by all political parties." (Cong. Rec., p. 30661, Sept. 1, 1970)

The tiny island of Culebra, which is a municipality of the Commonwealth of Puerto Rico, has been used by the Navy for weapons practice since 1936. Recently, however, the Navy has increased its naval shelling and aerial bombardment of Culebra and its surrounding cays to such a degree that the islanders have finally been moved to protest; indeed, during 1969 the Culebra targets were used an average of 9½ hours a day, 6 days a week, with an additional 3½ hours on Sunday. Such intensive weapons practice, which is carried on day and night, must make life, on an island which is only 7 miles long by 2 miles wide, uncomfortable, to say the least.

I, therefore, wish to express my full support for the efforts of the distinguished Senator from Washington (Mr. JACKSON), who has been inquiring into the Culebra situation in executive session, in an effort to persuade the Navy to find an uninhabited alternative site for its practice. I am confident that the Navy will heed Senator JACKSON's expressed concern about the seriousness of the situation. If, however, the Navy fails to respond, I shall support the Goodell-Cranston amendment to the military construction authorization bill to terminate funding of this nuisance.

## CHANGE OF COMMAND FOR OCEANOGRAPHER OF THE NAVY

Mr. FONG. Mr. President, today marked an end to another chapter in the distingiushed military career of Rear Adm. Odale D. Waters, Jr., the Oceanographer of the Navy. In a change of command ceremony this morning on board the oceanographic research ship USNS *Lynch*, at the Washington Navy Yard, many of our foremost military and civilian leaders in the field of oceanography assembled to pay tribute to Admiral Waters and to welcome his successor, Rear Adm. William W. Behrens, Jr.

Admiral Waters' naval career spanning four decades is a living testimony and an inspiration to those of us who place value on high principle and unselfish dedication to duty and country.

As Oceanographer of the Navy, Admiral Waters played an important role in developing and organizing the operational and oceanographic research capabilities of the Navy so it could respond adequately to our needs for national security. To achieve this, Admiral Waters had to develop a cooperative relationship between broad segments of the national security and the national oceanographic communities, involving economic, scientific, cultural utilization and management of the marine environment. Only one blessed with qualities of leadership and statesmanship possessed by Admiral Waters could have brought together so diverse a group as our national ocean community. The end result was not only a greatly strengthened Navy effort in marine science and technology but the creation of firmer ties with other national marine activities.

Mr. President, the people of my island State of Hawaii attach much significance to the responsible development and use of the vast and bountiful Pacific Ocean which is our unique heritage. I am especially gratified by the initiative which representatives of government, industry, and the academic community have exhibited in responding to the enormous and complex challenges which confront all of us who seek to explore the last of earth's frontiers, the world oceans.

The U.S. Navy, which has a long history of involvement in Hawaii's development and growth, today continues to play an important role in Hawaii's marine affairs. The people of Hawaii enjoy a harmonious relationship with the Naval community and look forward to a continuation of this happy association in the future.

On this occasion, as Admiral Waters completes 5 years of service as Oceanographer of the Navy—the longest assignment ever held by any person in this post—I extend my warmest congratulations to this veteran officer.

And to his successor, Admiral Behrens, I wish him well. The admiral comes to his new post from the position of Director, Politico-Military Division, Office of the Chief of Naval Operations. He faces many challenges but I am confident that he will carry out his new duties in the same effective manner which has characterized his career in the Navy.

## PHILADELPHIA PLAN—IT HAS NOT WORKED

Mr. ERVIN. Mr. President, on September 9, 1970, the Washington Daily News published an article written by Richard Starnes, entitled "The 'Philly Plan' Flap," which described as "moribund" the Nixon administration's Philadelphia plan to increase minority employment in the construction trades.

The article indicated that the plan has been criticized by all parties affected by it, and that it has not been successful during the year that it has been in effect in Philadelphia.

A union spokesman charged that the plan's quota system for minority hiring would ruin his group's apprentice system, and the contractors have brought suit challenging the plan as an unconstitutional exercise of the executive branch's powers.

Mr. President, the Philadelphia plan is no stranger to me, for many of its shortcomings were predicted in testimony before the Subcommittee on Separation of Powers, of which I am chairman, in October 1969. Therefore, I was not surprised by the story in the Washington Daily News, and I highly recommend the article to Senators.

Furthermore, I urge the Labor Department and the Nixon administration to reevaluate the Philadelphia plan in light of what it has accomplished during its first year—which, according to Mr. Starnes' article, is very little.

It has been my stanch conviction that the Philadelphia plan is based on an assumption of power that the executive branch does not have, that it sets illegal quotas for minority hiring in stark contravention of title VII of the 1964 Civil Rights Act, and that it is both unnecessary and unworkable. Apparently the first year of its operation has proven that my predictions were correct.

Mr. President, I ask unanimous consent that Mr. Starnes' article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE "PHILLY PLAN" FLAP

(By Richard Starnes)

PHILADELPHIA.—The controversial Philadelphia plan for employing more racial minorities in building trades brings to mind a venerable vaudeville joke once told about this city—"I like the way the town is laid out. How long has it been dead?"

If not entirely dead, the Philadelphia plan at best seems moribund. Federal agencies responsible for its enforcement have hurriedly assembled a team to try to breathe new life into it, an effort that may be doomed to failure in the face of implacable opposition from labor unions and contractors.

The troubled Philadelphia plan had its inception in a policy directive issued by the Johnson administration, altho it was not put into effect until July, 1969.

The Labor Department, citing a "deplorably low rate of employment" among minority groups in skilled building crafts, ordered Philadelphia contractors bidding on federally assisted projects worth $500,000 or more to submit "affirmative action" plans setting specific goals for employing more members of minority groups.

An ultimate goal of 19 per cent minority employment was set for 1973, altho at the outset contractors had only to prove "good will" attempts to hire more minority workers.

When the plan was instituted labor union sources in Philadelphia estimated that less than 2 per cent of skilled building trades jobs were held by blacks or other minorities. Trades involved in the plan are iron workers, steam fitters, sheet metal workers, elevator constructors, plumbers and pipe fitters.

"It (the plan) is a sham," sneered one spokesman for the National Association for the Advancement of Colored People (NAACP), echoing the all but unanimous opinion among Philadelphia's restive minorities. "Not a handful of blacks have been put to work."

As a result of chronic criticism of the plan a five-man team from the Labor Department's office of federal contract compliance has just completed a hurried survey of its effectiveness.

Of 20 building projects surveyed, the team reports it found 36 minority employes out of 147 men employed in the affected crafts. Altho Labor Department sources say this indicates minority hiring has increased from 2 percent to 25 percent, they concede the claim is based on "some very small subcontracts" and that they as yet have no figure for the total number of men employed in the six crafts in Philadelphia.

One reason effectiveness of the plan is difficult to measure is what contractors here privately call "motorcycle compliance." This means black workmen are moved from jobs not covered by the plan to jobs that are covered until inspectors leave.

"The plan was doomed to failure in the first place," said Robert Johnson, labor director of the metropolitan council of the NAACP.

"It is not supported by the unions. They think it is an infringement on their rights. Everything we try to do (to implement the plan) is blocked by the building trade unions. In reality no progress has been made. The contractors are afraid to try to make it work. They're afraid the union men will slow down and not get the work done. They (the unions) are trying to sabotage it. Only a handful of new jobs have been created."

A spokesman for the AFL–CIO Building and Construction Trades Council conceded that "nothing at all" had happened as a result of the plan. "The quota system (under the plan) will ruin our apprentice system," he added.

"Lack of effective compliance agency action," is one reason cited for complaints by an official associated with the plan.

Prior to the investigation by the five-man federal inspection team, only one contractor had been cited for violation of the plan. That one, Edgley Air Products Co, Inc., of Levittown, Pa., requested a hearing on the charge but one has not been scheduled.

Edgley, however, is a small contractor doing a minuscule percentage of federally funded construction work in the Philadelphia area. Actually under way in this city are 25 projects worth some $88.6 million. Fourteen others worth about $90 million have been advertised for bids.

A total of eight contractors have been found in doubtful compliance in addition to Edgley, but since these have agreed to meet the plan's requirements no further enforcement action has been taken.

The Contractors Association of Eastern Pennsylvania filed suit in U.S. Court here charging the plan was an unconstitutional exercise of executive power, but last March the court ruled in favor of the government. The decision is now being appealed, and likely will be carried to the Supreme Court no matter how the appellate court rules.

The suit, plus a six-week building trade strike here, are the reasons usually cited for the plan's admittedly meager results.

## CULEBRA

Mr. HARRIS. Mr. President, during consideration of the military procurement bill I supported an amendment which would have ended naval shelling on the island of Culebra, which is a part of the Commonwealth of Puerto Rico. This island, inhabited by some 750 people, has been the target for naval training operations for several years, and its inhabitants are now requesting that this shelling be discontinued because of the adverse effect it is having on their economy and upon their children. The New York Times on July 10 and the Washington Post on July 14, 1970, editorialized on the matter of discontinuing shelling of the island of Culebra by the U.S. Navy and I feel made an excellent argument for the cause of the residents of this small island. I am hopeful that the Department of the Navy will voluntarily discontinue their operations on Culebra, and I ask unanimous consent that the two editorials be printed in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Washington Post, July 14, 1970]

WHY BOMB AN INHABITED ISLAND?

It is time that high-level attention be paid to the controversy over Culebra. The Navy, which already owns about one third of this 7,000-acre island in the Commonwealth of Puerto Rico, is trying to obtain another third of it so as to expand its training operations there, with the installation of a Walleye missile target on the immediately adjacent small island of Culebrita. The move is bitterly resisted by most of the 726 inhabitants and many other Puerto Ricans on the ground that the use of the island as a target has already made life there almost intolerable.

The Puerto Rican Civil Rights Commission has described the military training operations on Culebra as "excessively intense, continuous, irregular and dangerous." The cattle business on the island is said to have been virtually ruined. Fishing has been gravely impaired, and since these two industries have been the chief source of income for the families living on the island, the economic impact of the shelling and bombardment has been severe. Equally troublesome is the effect on education. One teacher reports that the school buildings "tremble with every explosion" and that the children are too frightened, distracted by noise and plagued by loss of sleep (from the night bombing) to give serious attention to their studies.

Repercussions from this use of an inhabited island as a target have spread far beyond Culebra itself. Many Puerto Ricans see in it evidence of a general lack of sensitivity in Washington to commonwealth problems. Tensions on the island have risen notably since the shelling and bombing on Culebra have been stepped up. A columnist for the San Juan Star recently suggested that if Congress should grant the Navy's request to take over more of the island it "could swing popular sentiment toward independence or at least away from statehood more effectively than anything else."

Aside from the injustice of inflicting conditions akin to warfare on the people of Culebra, therefore, the Navy's policy threatens to complicate the relations between the United States and the commonwealth. Just now those relations are in a delicate statehood, although a substantial percentage of the people still seem to favor the existing commonwealth status. It would be most unfortunate if the government in Washington should unduly influence the outcome of the

debate now going on in regard to Puerto Rico's future by continuing a shortsighted and inhumane policy in Culebra.

The need for good relations between Puerto Rico and the United States will remain an imperative of the future whether the commonwealth is retained or statehood is requested. For one thing, the Roosevelt Roads Naval Base is the second most important naval installation in the Caribbean. For another, the relations between Washington and San Juan are enormously influential in our dealings with the rest of Latin America. Even though the Navy finds Culebra a convenient area for its training operations, we simply cannot afford as a nation to get into the posture of putting bombs ahead of people.

---

[From the New York Times, July 10, 1970]

CULEBRA AND GOLIATH

Can anyone really believe that the only suitable target area in the entire Atlantic Ocean for testing a new generation of guided missiles and glide bombs is a 7,000-acre island off Puerto Rico which 726 American citizens call home? So says the United States Navy, which already owns a third of the island of Culebra and now intends to lease and eventually buy another third.

What the Navy has really wanted to do for fifteen years is to buy all of Culebra and resettle the island's residents elsewhere. But Culebra is a municipality of Puerto Rico and can be dissolved under the Commonwealth's Constitution only by vote of its residents. A survey indicates that 95 per cent of the Culebrans oppose the Navy's current expansion plan and at least 75 per cent want the Navy to pull out altogether.

Under existing conditions, Culebrans must cope with a nerve-wracking, noise-pollution problem from shelling, bombing and low-flying Navy jets. Culebrans find their freedom of movement curtailed by Navy maneuvers and security requirements, their economy and development menaced by the Navy's expansion plan.

As part of what the Navy calls the "inner range portion" of the Atlantic Fleet Weapons Range complex, Culebra unquestionably offers substantial advantages for the development of new systems. What is equally obvious is that the Navy for a long time remained insensitive to the rising resentment of the Culebrans and dragged its feet on examining possible alternatives to the use of this inhabited island.

It would be a salutary example of what one likes to think the United States is still all about if the mightiest Navy in the world now decided on its own to weigh anchor and go elsewhere to explode its new arsenal, leaving 726 poor islanders in peace and quiet.

---

## COST OF VIOLENCE ON THE UNIVERSITY CAMPUS, BY CHANCELLOR EDWIN YOUNG, UNIVERSITY OF WISCONSIN AT MADISON

Mr. PROXMIRE. Mr. President, today the Subcommittee on Economy in Government of the Joint Economic Committee heard from Dr. Edwin Young, the chancellor of the University of Wisconsin at Madison. The committee is holding hearings on the economic effectiveness of the system of criminal justice. Dr. Young spoke to the problem of violence and unrest which is now endemic on the campuses of the universities of the country.

As he testified, at the University of Wisconsin, the life and purpose of the university itself is at stake. This is true because of the actions of a very small group who are determined to destroy the university both physically, by bombing and arson, and intellectually, by preventing the university from functioning as a place where conflicting views and attitudes can be expressed in a peaceful atmosphere and one where research and contemplation can flourish.

Dr. Young's prepared statement was excellent, and his summary and extended remarks were superb. I was particularly impressed with the balanced views he held and with his determination to be both firm and fair in a situation in which lesser men might have given way to panic.

I ask unanimous consent that Dr. Young's excellent prepared statement be printed in the RECORD. In addition, I ask unanimous consent that a statement signed by over a thousand members of the faculty at the University of Wisconsin in Madison, in defense of the university, be printed in the RECORD.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

STATEMENT OF EDWIN YOUNG, CHANCELLOR, UNIVERSITY OF WISCONSIN AT MADISON

My name is Edwin Young. I am Chancellor of the Madison campus of the University of Wisconsin.

I want to thank the committee for extending me the invitation to appear at this hearing. A few years ago, I would have thought it incongruous for a university administrator to be invited to appear before a Congressional committee inquiring into the effectiveness of our criminal justice system. Times have obviously changed.

The campuses of great universities in this country have never been free from ferment. We have, in fact, consistently encouraged the open discussion of ideas. We have promoted the expression of conflicting ideas in the belief that it is only through such a process that the truth can be established.

While the campus was never a peaceful place in the conventional sense of the word, we did feel that whatever criminal law problems we might encounter could be handled by a small staff of university security personnel. However, university campuses have recently become the focal point for demonstrations, disruptions, strikes, and other expressions of unrest about those conditions which prevail within and without our universites. Now it no longer seems odd for the head of a university to appear before a Congressional committee to express his views about the status and enforcement of criminal law in this country.

I should make it clear at the outset that I make no claims to a special expertise in the fields of criminal law or police problems. But I do speak as one who has had frequent need in recent years to rely on the help of lawyers and police to assist in maintaining the security and continuity of a great educational institution. I also speak as an economist—one who understands the financial ramifications of campus turmoil.

The costs of campus unrest in this country are already considerable. And they are increasing. On my own campus, we are spending large amounts of taxpayer's money for increased protection and security. I lament the fact that we have to spend money for additional police and security officers when we could be using these funds for strengthening our academic programs and for finding ways to improve the quality of life for our citizens.

In spite of this situation, most of us feel quite strongly that the problems of our universities should be solved by those who are directly involved in their operation—students, faculty, administration, and trustees. I personally feel that these are the people who have a proper understanding of the issues and problems as well as the desire to preserve and defend our universities in their present hour of crisis.

If we are to achieve significant reforms within our universities, we must be able to insure an atmosphere that provides for tolerance and respect of differing ideas. We have not been able to achieve this kind of atmosphere in recent years. The level of disruption and destruction has risen on our campuses. Administrators throughout the country have had to call in local and state law enforcement personnel, and in some cases the National Guard, to protect people and property. We have used police to prevent aggressive minorities from imposing their will on others within the university community.

We do not like to have to call police to the campus. However, we feel quite strongly that no group, no matter how supposedly honorable its intentions, should be able to achieve its ends through the tactics of intimidation and terror.

At this point, I think it is important to point out that disorders on the campus are not unique. They have much in common with the disorders that are occurring in other parts of our society. The anonymity and psychology generated by a crowd present special problems for law enforcement officials. Police who are able to deal with volatile crowds are highly valued in a campus crisis. Many of our university and local police officers have had the experience and training to meet the special kinds of law enforcement problems presented by large crowds. But we need to recruit and train more officers who have those personality traits necessary to function effectively in crowd control situations.

The federal government, through allocations of funds to law enforcement programs, could support programs designed to improve the individual officer's capacity to perform well in those tense situations which characterize an increasing number of campus and urban demonstrations. The government could also provide additional crowd control equipment to local agencies. But the key to any creative response to civil disorders is found in the quality of the man who is called upon to face the taunts, obscenities, and assaults of the mob.

I have the impression that another major problem police face in dealing with large civil disorders is the vagueness and inappropriateness of the laws they are called upon to enforce. For example, the unlawful assembly, disorderly conduct, and vagrancy statutes in nearly all jurisdictions are antiquated in their phraseology and overbroad in their coverage. I have been told that there are serious difficulties in interpreting these statutes and that they have, in many instances, been declared unconstitutional, for one reason or another.

There may be several perfectly understandable reasons why such longstanding statutes are just now being found deficient. But the fact remains that the police are left with fewer tools to meet the problems of disorder in its modern dress. It is not surprising that there is oftentimes discouragement among law enforcement officials on this score. Compared with the vast scholarship which has gone into the definition of homicide over the years, the intellectual effort which has been addressed to refining the law's response to broad, civil disorder has been embarrassingly little and late. The formulation of such definitions may be matters for state legislatures, but the research, thinking, and drafting which is needed to restructure the substantive law is a matter where the federal government could be of help. In the process, we must be careful to find ways which will protect the peace of the community and, at the same time, allow for the maximum liberty in the expression of legitimate dissent.

There is another side to this question which I think important for the committee

to consider. Many of our students are deeply concerned about the status of criminal justice in our country. These students believe there are inequities in our judicial system. They perceive certain faults which limit the effectiveness of our courts and the police. They see no identifiable signs of progress toward change or improvement in the conditions which currently restrict our courts and the police.

I realize that there are many complex issues involved in this question and that student perception of these problems may be superficial. But the attitudes students have about the ability of our criminal justice system to respond to present conditions are shared by other people in our society. As a result, I feel that the improvement of our criminal justice system must be considered a top priority item. And I am convinced that effective progress in this area will produce a greater respect for the law—among our students and our citizens.

When I mention federal assistance for the problems which face our campuses and our cities, I think there are several possibilities. You will be able to gauge the relative merits of each better than I. Perhaps one answer can be found in the research carried on by the National Institute of Law Enforcement and Criminal Justice. Or you might consider providing our nation's law schools with funds to permit extensive attention to those questions. Or you may want to involve such respected agencies as the American Law Institute, or the Commissioners on Uniform State Laws.

On the campus, we need to know the answers to specific questions if we are to effectively cope with disorder and disruption of the academic process. It is important to know, for example, whether law enforcement officers can exercise some control over a group before it breaks into violence without violating the constitutional rights of those in the group. Also, we would like to know how officers can properly deal with those masses of students who are present at and contribute to the substance and mood of a demonstration, but who do not directly take part in violent action.

Some of the difficulties involved in understanding what laws can be used dealing with a disruption seem to originate in disagreements between judges who have concurrent jurisdiction. There is no question that many of these differences in interpretation are in good faith. These are also probably inevitable. But we need to narrow our differences. To assist in this, the federal government might promote devices which would encourage smoother coordination of state and federal judges. Chief Justice Burger suggested a beginning recently when he proposed the creation in each state of a judicial council for federal and state judges. I understand that a few years ago, Congress did invite federal judges to meet and work toward minimizing sentence disparity through the Judicial Conference of the United States. Perhaps a similar technique could be used to help provide clearer guidelines to police and university administrators on what the law and the Constitution permit and command.

We naturally want to do the right thing, but we are sometimes uncertain about just what that is. No federal action can wholly resolve this problem, but we would certainly welcome assistance in providing greater clarity and understanding of the law. This would certainly be one of the most effective responses we could make to those challenges that presently face us on the campus.

---

A STATEMENT BY FACULTY FOR DEFENSE OF THE UNIVERSITY OF WISCONSIN

We, the undersigned members of the faculty of the Madison Campus, believe that the University of Wisconsin is facing one of the most critical periods in its history. Not only its greatness but its very existence as an educational institution is threatened. The rising tide of intimidation and violence on the campus in the last few years has made normal educational and scholarly activities increasingly difficult. There has been a steady escalation of destructiveness that has culminated in an act of homicide. Academic freedom, meaning freedom of expression for *all* ideas and viewpoints, has been steadily eroded until now many are questioning whether it exists on the Madison campus. The freedom of students to pursue their education along the avenues of their choice has been seriously curtailed. The result has been a gradual erosion of confidence of the people of the state in the University and the distinct danger that the University will have to further curtail its activities or even shut down.

In order to prevent this calamity we believe that determined action is needed. We do not advocate authoritarian or dictatorial rule on the campus. On the contrary, our purpose is to re-establish an atmosphere of free intellectual inquiry. Only in such an atmosphere can learning and scholarship thrive. We seek not repression but liberty in the University. Toward this end, steps must now be taken by the faculty, the student body, the administration, and the Regents, acting together in a spirit of mutual support and respect, to defend the University. We advocate the following:

1. The disciplinary system must be improved to provide prompt action against all violators of University rules. The acts of a few must not be allowed to endanger the rights and privileges of all members of the academic community.

2. Every member of the faculty and student body must accept a personal commitment to the orderly functioning of the Madison Campus and to restoring and defending the freedom of all faculty and students. We pledge ourselves to support and defend all who accept this commitment.

3. Faculty, students, and administration, with the support of the Regents, must put an end to violence, intimidation, coercion, and harassment on the Madison Campus. We pledge ourselves to support and defend all who accept this commitment.

4. Means must be provided for canvassing student opinion on campus issues and for expressing the full range of student opinion.

5. Students and faculty alike must recognize and discourage the destructive purposes of those who call mass meetings designed to instigate violence.

6. The design and conduct of instruction and research on the Madison Campus must remain the responsibility of the faculty. Student advice and criticism must be welcomed. Decisions, however, must be made by the faculty, subject only to review by the administration and the Regents.

The University of Wisconsin at Madison is in grave danger. We call on the faculty and the student body to stand to its defense as a free university and, in cooperation with the administration and the Regents, to ensure its survival and continued development among the world's great educational institutions.

---

## SHORTAGE OF REFINED CRUDE OIL

Mr. TOWER. Mr. President, I have repeatedly warned that the Nation at present faces dangerous shortages of certain refined crude oil derivatives, such as residual fuel oil, natural gas, coal, and nuclear material. All but about 3 percent of the Nation's large and increasing demand for energy is met by consuming one of these four basic resources.

The reasons for the current energy shortage are many and diverse and often vary with the resource. On August 12 Senator HANSEN, Congressman BUSH, and I explained many of the reasons for our energy crisis and tried to indicate the extent of the crisis. I will not enumerate this information again here, since our statements were entered in the CONGRESSIONAL RECORD. The point I wish to make here is that the national energy shortage was discussed in an open forum and under conditions offering close scrutiny by the general press. Many highly reputable news publications have recently documented the national energy shortages. A partial listing of some of these publications include the Washington Post, the Wall Street Journal, the New York Times, the Baltimore Sun, the Dallas Morning News, Business Week, Time, and U.S. News & World Report.

Others in the legislative branch have also concluded that a serious energy situation presently exists. The House Committee on Interior and Insular Affairs issued such a statement recently after careful study of the situation. The distinguished Senator from West Virginia, (Mr. RANDOLPH), joined by 53 other Senators, introduced a bill calling for an intensive review of the Nation's future energy resources.

In the executive branch of Government, President Nixon has acknowledged the threat of national shortages of energy resources by appointing a Cabinet-level committee to study and recommend solutions to the energy crisis.

Others in the executive branch have recognized the seriousness of the energy situation by initiating similar studies. These include the Department of the Interior, the Atomic Energy Commission, and the Federal Power Commission.

Yet, in this Chamber recently the existence of shortages of energy resources has been questioned. It was questioned because the information relating to national supplies and demands of the resources has been based primarily on industry-generated information.

Mr. President, I have cited above an impressive array of independent, nonindustry-related sources of information. All have access to fact-gathering systems and devices of their own. While some of these sources may not agree as to the causes of the present energy shortages nor even to the best short- and long-range remedies, all have agreed, to the best of my knowledge, that serious shortages of energy resources presently exist.

This dangerous situation will not simply go away by ignoring its existence. And, while I deplore this situation as much as anyone, I feel that we must not spend valuable time attempting to determine the existence of a situation so amply and reliably documented. I am deeply concerned that delays in reaching equitable solutions to the energy problems facing us will only increase the severity and the extent of these shortages. There are already built-in, unavoidable time delays in correcting the situation.

Needed now are well-thought-out recommendations for the best courses of action to relieve the shortages.

My personal recommendations were printed in the CONGRESSIONAL RECORD on August 12, 1970, as I pointed out earlier;

therefore, I will not repeat them at this time. I strongly urge that all due dispatch be employed in studying, deliberating, and implementing the best solutions to the dangerous energy situation presently facing this country.

Let us not consume precious time arguing the fact of these shortages. To do so would be the height of folly.

Let us, instead, get on with the urgent duty of correcting this unfortunate situation.

## TWENTY-THIRD ANNIVERSARY OF POLITICAL EXECUTION OF BULGARIAN PATRIOT NIKOLA PETKOV

Mr. SCOTT. Mr. President, September 23, 1970, marks the 23d anniversary of the political execution of Bulgarian patriot, Nikola Petkov. This freedom lover was brutally murdered by the Communist Party leaders for his courageous opposition to their reign of terror.

Petkov, long a proponent of agrarian reform, led the opposition to the Communist consolidation of power. In the elections of 1946, Petkov's party strongly opposed the Communists. In the Grand National Assembly, Petkov exposed the treacherous intentions of the Communists. He accused them of being Moscow's agents, charging that Bulgaria would become a Soviet province.

This courageous speech meant, of course, that Petkov was doomed. It was not long before he was arrested and tried for conspiracy against the state. In a blatantly unfair trial, Petkov was convicted and sentenced to death. This travesty of justice caused a furor throughout the free world. But all pleas for justice were ignored; Petkov was hanged on September 23, 1947.

His courage and patriotism are now legendary. On the eve of his death, he was offered a pardon if he would sign a confession. His valiant reply was:

> You are even trying to desecrate my sacred memory. My sentence was passed by your Moscow masters and no one can revoke it. I do not seek any mercy from you. I want to die so that my people may be freed sooner.

Thousands of other Bulgarian patriots have followed Petkov's example, sacrificing their lives for freedom. All freedom-loving Bulgarians can draw inspiration from Nikola Petkov's martyrdom to human freedom and independence. This is the man we honor today. His is the cause for which we continue to fight.

## FORT POLK SHOULD BE RETAINED IF TRAINING FACILITIES ARE NEEDED FOR NATIONAL DEFENSE

Mr. ELLENDER. Mr. President, from time to time during the last several months, rumors have spread over the State of Louisiana concerning the closure of Fort Polk, La., one of the 4th Army's major training facilities.

I am well aware that Louisiana is not alone in this respect. Dislocation and economic distress are facing many areas of our Nation as changes take place in the structure of our Armed Forces. Without pleading a special interest, however, I believe that the history of this training installation clearly indicates that the people over a large part of the State have reason to be concerned. In their estimation and in my own, our people in the affected areas have not been treated fairly in the past as a result of the arbitrary declarations of the Pentagon decisionmakers.

A look at the status of Fort Polk since it was initially activated by the Army in 1942 indicates the following:

Activated Mid-1942—World War II.

Inactivated January 1945—End World War II.

Reactivated August 1950—Korean war.

Inactivated June 1954—End Korean war.

Reactivated November 1955—Maneuver rights.

Inactivated June 1959—Reduction in Army strength.

Reactivated August 1961—Berlin buildup.

In short, the post has been opened and closed 7 times in the last 28 years. Naturally, this has caused unsettled conditions throughout a large area of Louisiana.

The situation is made even worse by the fact that the Army holds by direct ownership or by lease from other Government agencies almost 1 percent of Louisiana's entire land area for this one particular base; 99,698 acres are owned outright and an additional 99,334 acres are held under lease. The fact that this acreage is effectively removed from economic production, whether the base is used or not by the Army, puts an economic damper on the entire south-central portion of the State. This is because, even when the Army decides that Fort Polk is no longer needed for the national defense, the Pentagon steadfastly refuses to dispose of the land so that it can be put to productive purposes.

This bears directly upon the main point of these remarks. Fort Polk is one of the few training bases now available to the Army which is not threatened by, or subject to, serious urban encroachment. In the past the cost of training has been cheaper here than any other post in the country. Adequate land is already at hand to preclude future acquisition needs.

I ask unanimous consent that an article from the June 10, 1970 issue of the Shreveport Times, dealing with the lower training cost, be inserted at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. ELLENDER. Mr. President, I am not arguing here for another arbitrary decision that Fort Polk facilities be improved on a permanent basis for no good reason. I have never asked special treatment for Louisiana as opposed to the national interest or our national defense needs. The point I am making is that if training facilities are needed by the Army for future use, the available facilities at Polk should be developed for that purpose rather than new construction, or new acquisition, in other areas where expenses will be unquestionably greater.

In its hearings on the military construction authorization bill for fiscal year 1969, the Senate Appropriations Committee went into this question and reviewed the history of this fort. In its report No. 1486 of the 90th Congress, the committee concluded:

> This history presents the committee with clear justification as to the feasibility of removing Fort Polk from its present interim status and declaring it a permanent installation. Adequate amounts of land have already been acquired by the Army to support the post's role on a continuing, long-term basis without further acquisition. In addition, millions of dollars have been spent on the base since the Korean conflict merely to maintain it on a "temporary" basis. The committee notes that, in light of world conditions, the need for this post is likely to continue into the foreseeable future, and that its continuance in a "temporary" status will only result in further expenditures of an unproductive nature.

Fortunately, shortly after this committee recommendation that Fort Polk be declared once again a permanent Army post, a decision in line with this recommendation was made by the Department of Defense. Unfortunately, however, my efforts and the attempts of others to obtain meaningful improvements at the base for the benefit of the men stationed there have generally been of little avail. An adequate base hospital is badly needed to replace the hodge-podge firetraps that attempt to serve this purpose. Permanent family housing is badly needed. Both the Armed Services Committee and the Senate Appropriations Committee have recognized this need for adequate family housing. Two hundred and sixty units were authorized last year and $5.5 million in funds were made available for the construction. To date, these funds have been neither used nor obligated.

Frankly, I find this very disturbing. In going over the hundreds of individual items requested in the gigantic multibillion dollar defense appropriations bill for fiscal year 1971, as ranking member of the Defense Appropriations Subcommittee, I have not failed to note the millions of dollars asked for expenditures overseas, nor have I failed to note the many items requested in the Military construction bill also before the Appropriations Committee. Much of this money will be spent abroad; much of it will go for questionable purposes. Yet, for some reason, it seems to be difficult for the Pentagon to agree on expenditure of a relatively minor sum for this domestic facility.

I have called this matter to the attention of the appropriate authorities in the past. Fort Polk has been used as a "crisis base" to fill the needs of the Nation when more American boys are needed in various parts of the world. In turn, this has created an economic crisis, a crisis which threatens once again the lives of thousands of Louisiana citizens. I do not believe this is necessary, and I express the hope that the appropriate authorities in their wisdom will avoid bringing such a situation to pass once again.

EXHIBIT 1

POLK TRAINING COSTS LESS, FIGURES SHOW

FT. POLK.—It costs less to train an Infantry soldier at Ft. Polk than at any other training center in the nation.

Figures compiled by the Comptroller, U.S. Continental Army Command, Ft. Monroe, Va., show significant savings at Ft. Polk in a dozen military occupation specialties (MOS) over other training centers.

One example is that of an Infantry Direct Fire Crewman. According to the keeper of the Continental Army Command pursestrings, it costs $1,694.94 to turn out each soldier in this MOS at Ft. Polk.

The same source sets the price tag at $2,639.94 at Ft. Gordon, Ga.; $2,239.00 at Ft. Dix, N.J.; and $1,922.00 at Ft. Jackson, S.C.

Ft. Polk trains light weapons infantrymen at a cost of $1,474.67. This is $226.81 less than Ft. Lewis, Wash., is able to train the same MOS and $645.33 less than Ft. Gordon.

Continental Army Command statistics covering total direct and indirect costs per trainee during fiscal year 1968–69 show Ft. Polk with no loss in training lower than those at Ft. Ord, Calif.; Ft. Lewis, Ft. Gordon, Ft. Dix, Ft. Jackson, S.C., and Ft. Leonard Wood, Mo.

In its 30-year history Ft. Polk has trained well over 10 million soldiers for the Army. Even today the demand for well trained Infantry soldiers is heavy. But the spiraling cost of defense had been held down at Ft. Polk with no losses in training effectiveness.

A number of factors affect the cost of training in southwest Louisiana. Special seasonal clothing, construction and fuel costs are minimized by the mild climate. Loss of vital training time due to inclement weather is almost nonexistent.

## REACTION TO THE VICE PRESIDENT'S SPEECHES

Mr. THURMOND. Mr. President, I note with interest the alacrity with which the radical liberals in and out of Congress respond to Vice President AGNEW's speeches.

This is only natural, especially when the one who responds has much to defend in a record that includes permissiveness on law and order, permissiveness on the drug and hippie culture, a disastrous fiscal policy, and a ruinous foreign policy.

Nevertheless, Mr. President, I believe it is going too far when the radical liberals seek to polarize the Nation with Vice President AGNEW as the issue.

Yet, this is what they are doing. Any criticism of them, any criticism of the radical liberal failures in the areas of law and order, drug control, inflation, by the Vice President are immediately labeled as an effort to pit rich against poor and black against white.

Of course, this is not so. Let us call it what it really is: It is an effort to marshal all law-abiding Americans against the law breakers; it is an effort to marshal concerned Americans against the radical liberals whose permissiveness and distorted sense of values has led to runaway inflation—only now being controlled by President Nixon's tough policies—has led to an epidemic in drug usage, violence on and off the campuses and a breakdown in the individual responsibilities that threatens our very existence as a free nation.

Mr. President, what the Vice President is saying crosses the lines of color and the boundaries that separate rich and poor, young and old.

His is a rallying call for decency and responsibility, not a cry of dissent. I would suggest that those who hear him differently either listen more closely or reexamine their own motives.

## PROPOSAL TO DECLARE GENOCIDE AN INTERNATIONAL CRIME FIRST MADE IN 1933

Mr. PROXMIRE. Mr. President, few people in this country are aware of the important contribution by Prof. Raphael Lemkin to the field of international politics. Professor Lemkin was a Polish lawyer, who escaped the Nazi invasion of Poland in 1939. Prior to 1939, he submitted a proposal which was to become the basic principle of the United Nations Genocide Convention. His proposal, submitted to the International Conference on the Unification of Criminal Law in 1933, "declared the destruction of racial, religious, or social collectivities" to be an international crime. Unfortunately, his proposal was defeated, and it was not until the horrors of World War II were over that the world became aware of the need for this type of international law.

In an article published in 1944, he coined the term genocide from a Greek word meaning race or nation and a Latin suffix which means killing. In less than 5 years, the word "Genocide" became the name of a major convention of the United Nations, and has since been ratified by 75 nations.

A few people in our country have argued against ratification of the Genocide Convention on the grounds that something so terrible as the persecution of the Jews by Nazi Germany could not happen in the civilized world again. Let us not forget that in 1933 the international community thought the proposal of Professor Lemkin to be irrelevant and needless, but within 7 years, the world was shocked by the atrocities committed by the Nazis.

It is my fervent desire that the U.S. Senate will ratify the Genocide Convention early in the 92d Congress. I hope we do not need to wait for another crisis of mammoth proportion, but can act on the principle, first stated by Professor Lemkin, which is embodied in the Genocide Convention. I urge the Senate to act on this Convention without further delay.

## NATIONAL BELLAMY AWARD TO McCOLLUM HIGH SCHOOL, SAN ANTONIO, TEX.

Mr. TOWER. Mr. President, I invite the attention of Senators to an honor which was recently bestowed upon San Antonio's McCollum High School. This fine public school received the 1971 National Bellamy Award, presented largely on the basis of the contribution which a school makes toward enabling its pupils to become responsible citizens with an understanding of the principles upon which our Nation was founded and a comprehension of the governmental process. I ask unanimous consent that an article from the San Antonian by Mr. William Ochse concerning this award be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BELLAMY AWARD PRESENTED TO McCOLLUM HIGH SCHOOL

San Antonio's McCollum High School has brought an important honor to our city in being named to receive the 1971 National Bellamy Award.

The Bellamy Award honors the memory of Francis Bellamy, author of the Pledge of Allegiance, and is awarded annually to one outstanding public high school from a different state each year.

This will be the first time a Texas school has received the award in the 30 years the organization has been in existence and 50 years will pass before another school in this state will be so honored.

The stated purposes of the National Bellamy Award are important to an understanding of the significance of this award. They are:

To help young people renew and rededicate themselves to the democratic ideals explicit in the Pledge of Allegiance, and implicit in the aspirations of our country.

To give conspicuous acknowledgement to the vital role the public has played in helping to mold and realize the ideals of our country.

To confer signal recognition upon public secondary schools in their respective states as representatives of all quality schools.

To help broaden and deepen the meaning of the words of the Pledge so that we in the United States can become "one nation, under God, indivisible with liberty and justice for all."

The selection of McCollum High was based on a study of its curriculum, the quality of its administrators and faculty, the performance of its present student body and graduates, the quality of its school publications and the evidence of a healthy emphasis on good citizenship.

On behalf of the business community, I wish to commend and congratulate the McCollum faculty and student body, and the entire Harlandale School District on this outstanding achievement.

## IN MEMORIAM: NICOLA PETKOV, "THE BRAVEST DEMOCRAT OF ALL"

Mr. DODD. Mr. President, today, September 23, marks the 23d anniversary of the execution of Nicola Petkov, the heroic leader of the democratic resistance in Bulgaria, by the Bulgarian Communist regime.

The story of Nicola Petkov is one that deserves telling and retelling. In my opinion, it ranks among the great stories of human heroism of all time. For Nicola Petkov knew the danger that confronted him. He knew how ruthless the Communists could be. He knew that the penalty he would have to pay for his unflinching opposition was death.

But he deliberately chose the path of martyrdom in preference to surrender. Against impossible odds, he led the democratic opposition in the Bulgarian Parliament in their incredible struggle against the Communist juggernaut.

Dr. G. M. Dimitrov, who was Petkov's chief colleague in the Bulgarian democratic opposition, and who today heads the Bulgarian liberation movement in exile had this to say about Petkov in an article which he wrote for the Saturday Evening Post in December 1947:

No man believed more sincerely in the possibility of collaborating with the Soviets than did Nicola Petkov. No man paid more dearly for this belief. No man conducted himself with greater courage when once he discovered his error, nor confronted his executors with greater dignity.

Mr. President, I ask unanimous consent to have printed in the RECORD at the

conclusion of my remarks the complete text of Dr. Dimitrov's article. I hope that Senators will find the time to read it, because, as dramatically as any article I have yet come across, it portrays the ruthlessness and inhumanity of Communist regimes.

The memory of Nicola Petkov must be marked in secret observance by the millions of Bulgarian patriots who still look upon Petkov as their national hero. We in the free world have the special duty of keeping this memory alive in the public record of the world community.

I therefore think it proper that on this day we should all join in saluting the memory of Nicola Petkov, a man who was justly described by American Congressmen who visited Bulgaria, as "the bravest democrat of all."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Saturday Evening Post, Dec. 6, 1947]

BRAVEST DEMOCRAT OF ALL

(By Dr. Georgi Dimitrov, as told to David Martin)

NOTE.—A coincidence in names: Dr. Georgi Dimitrov, leader of the Bulgarian Agrarian Party until Soviet pressure compelled him to resign his post in favor of Nicola Petkov, is an almost legendary figure in Balkan politics. He has the unique distinction of having been arrested by both the fascists and the communists, and having been condemned to death *in absentia* by both the fascists and the communist regimes. By a strange historical coincidence, Dr. Dimitrov, whom the Communist International regards as its archenemy, bears the same name as his polar opposite, Georgi Dimitrov, premier of Bulgaria and one-time Secretary of the Communist International.

—THE EDITORS.

Nicola Petkov is dead. Bulgaria has lost a truly great patriot, the democratic world has lost a leader who was a moral giant. The three visiting American congressmen who, a week after his death, placed a wreath on his unmarked grave in a Sofia cemetery, did not exaggerate when they described him as "one of the greatest democrats of all time." I think he was the bravest democrat of all.

No man believed more sincerely in the possibility of collaborating with the Soviets than did Nicola Petkov. No man paid more dearly for this belief. No man conducted himself with greater courage when once he discovered his error, nor confronted his executors with greater dignity.

His is a tragedy pregnant with significance for a democratic world that is still contemplating, Hamlet-like, the pros and cons of the very problem on which Petkov met his doom.

Petkov was deprived of his parliamentary immunity on June fifth of this year and immediately arrested. Shortly afterward he was brought to trial on a fantastic list of charges—that he had acted as an agent of foreign powers, that he had participated in a military conspiracy to overthrow the Bulgarian government, that he had urged the peasants to sabotage the regime by destroying their crops. On August sixteenth he was convicted and sentenced to death.

On August eighteenth the State Department addressed a note to the Soviet deputy acting chairman of the Allied Control Commission, urging that the commission review the case of Petkov. The note spoke of "a gross miscarriage of justice" and indicated that the State Department considered the trial of Petkov a violation of the Yalta Agreement, which ostensibly guaranteed the rights of the opposition.

The Soviet replied that intervention on behalf of Petkov would be a violation of Bulgaria's national sovereignty. In the early morning of September twenty-third, Petkov was hanged in Sofia prison. To the last, he stubbornly refused to appeal for clemency, because he held that he had been unjustly convicted.

In striking at Petkov, the dark powers that rule Bulgaria were aiming not so much at Petkov the man as at the United States and western democracy. "If we execute Petkov," reasoned Premier Georgi Dimitrov and the communist hatchetmen, "this will demonstrate to the entire opposition how powerless the great democracies are to defend them, and how senselessly futile their opposition to communism has therefore become. And now that the democracies have made their empty protests on his behalf, our little demonstration will be doubled, reinforced."

Ever since January, 1945, when, under communist pressure, I handed over the secretaryship of our party to Petkov, I have been in direct or indirect touch with either Petkov or mutual colleagues. Before that, I had known him intimately since 1931. I think that I am in a better position than any other man to tell the story of Nicola Petkov and of his disastrous efforts to collaborate with the communists.

Petkov died in the tradition of his family—he came of a family which seems to have been uniquely destined for martyrdom. His father, Dimitar Petkov, lost an arm in the war against the Turks and was decorated by Czar Alexander II of Russia for his bravery. But when he realized that the Russians planned to convert Bulgaria into a province of their own, he turned against them and led an agitation that resulted in the expulsion of Alexander's generals from the country. Several years afterward a grateful people elected him Premier. A stanch upholder of the constitution, he soon came into conflict with the autocratic King Ferdinand I. In 1907, Dimitar Petkov was shot down on Boulevard Alexander II in Sofia by agents of the monarchy.

Petkov's brother, Petko D. Petkov, assumed the leadership of the Agrarian Party after the assassination of the great Alexander Stambulisky on June 14, 1923. Undeterred by threats, Petko Petkov from his seat in parliament mercilessly excoriated the increasingly fascist nature of the regime of Professor Tsankov and continued to fight for Alexander Stambulisky's ideal of Balkan and European federation. On June 14, 1924, one year to the day after the assassination of Stambulisky, he was shot down by assassins directly in front of the palace. When the day of his funeral arrived, Sofia was inundated by a sea of peasants who flowed to the capital from all over Bulgaria to pay homage to their leader. And now the communist reaction has taken the life of the last male member of the Petkov family.

I first met Nicola Petkov in Paris in 1930. The opposition in Bulgaria was preparing to make a bid for power, and we were anxious to have him join us. Petkov at that time was leading the life of a young aristocrat and had no profound interest in politics. But he was strongly influenced by the memory of his father and his brother, and shortly after the triumph of the opposition in the elections of June, 1931, he assumed the editorship of our party organ.

My first impression of Petkov was not altogether favorable. Though his shoulders were broad and his body seemed strong, he had suffered from various maladies in consequence of which he walked with an awkwardly limp slouch and his hands frequently trembled. His manner was so diffident that his circle of friends was restricted. When he spoke, he invariably looked down to avoid the eyes of his company. This young aristocrat obviously lacked the common touch that his brother Petko had possessed, and it also seemed to me that he lacked the will power and courage of his brother. In this estimate, as events have proved, I was completely mistaken. The limp posture, the trembling hands, the downcast eyes, concealed a spirit as courageous and uncompromising as Petko Petkov at his greatest.

The period of legality lasted for only three years after Petkov's return. In May, 1934, the reaction staged a coup d'état and installed a dictatorship under the premiership of Kimion Georgiev, who today holds the post of Foreign Minister in the communist government of Bulgaria. In 1938, however, the government again agreed to hold elections, and Petkov was elected deputy. In parliament he conducted himself with boldness, with the result that he was soon expelled by the reactionary majority.

Then came the war. After the defeat of Poland and France, the German pressure on the Balkans grew immeasurably stronger. Aware that this might involve us in the conflict, I approached the leaders of all the democratic and anti-German parties to suggest joint action against such an eventuality. On February 21, 1941, we forwarded to King Boris a memorandum signed by the leaders of ten parties, in which we urged a termination of the government's pro-German policy and adherence to strict neutrality. At four o'clock next morning, I was arrested by the police. When the inspector in charge turned his back to argue with my wife, I escaped out of the kitchen door and over the garden wall.

Anticipating my arrest, I had taken Petkov with me to our final meeting and had introduced him to our leaders. The understanding was that if anything happened to me, he would take over in my stead. I myself, after a period in hiding, escaped from the country via Yugoslavia. When German forces entered Bulgaria on March 1, 1941, Petkov was sent to a concentration camp. He was released some three months later.

Although a tyro in underground activity, Petkov now took to it with the skill of a veteran. My one difference with him was that he collaborated somewhat too closely with the communists. He was sympathetic to Russia and he was impressed by the audacity of the Bulgarian communists. He helped them liberally not merely with his personal funds but even with the funds of the Agrarian Party.

The original united front against the government's pro-German policy had consisted of ten parties ranging from the Communist Party on the left to the conservative democratic parties on the right. Now Petkov was engineered into abandoning this coalition in favor of the Fatherland Front, which included only three major parties—the Agrarians, the Communists and the Socialists—and two minor groupings. Although the program adopted by the Fatherland Front was all that a democrat could have asked, it was obvious from the beginning that the communists would exert far more influence than they could have exerted in a broader coalition.

Petkov was interned again in January, 1944, but released in time to play a leading role in the coup d'état of September 8, 1944. During August, the government of Premier Bagrianov had entered into negotiations for an armistice with Britain and America. For some reason never explained, the British and Americans hedged and made conditions—as though the proximity of the Red Army to the Bulgarian frontier meant nothing at all. On September sixth the government of Moraviev, which had superseded that of Bagrianov on September first, decided to declare war on Germany. The proclamation was not published because certain crypto-communists close to the Minister of War urged postponement until September eighth. On September eighth the Soviet Union, in an act as Machiavellian as its pact with Hitler, declared war on Bulgaria. The Red Army poured over the frontier. That same day the

Fatherland Front, with the support of the Military League, staged a coup and arrested the government—which had already declared war on Germany! But the Red Army continued its advance until it stood on Bulgaria's southern frontier, menacing Turkey.

I returned to Sofia on September twenty-third. The moment I crossed the frontier, I was met by a delegation of party members. They said the situation was rapidly building up to catastrophe. Communist-controlled police and the communist-organized militia had already instituted a reign of terror. Hundreds had been arrested, scores had been shot. They implored me to do something.

The narrowness of the Fatherland Front and the timing of its coup had worked in favor of the communists. After the coup, a provisional government had been set up in which the communists had reserved for themselves the Ministry of the Interior and the Ministry of Justice, as well as effective control of the Ministry of War. To their partners of the Fatherland Front they tossed posts of lesser importance; Petkov himself was given a ministry without portfolio.

Petkov was beginning to realize the importance of the concessions which, out of sheer political naiveté, he had made to the communists. His first words to me when we met were, "Thank God you've come back! I'm afraid we've made an awful mess of things!"

He explained that, at the time the government had been formed, the communists, with Russian backing, had posed the matter in such a way that the alternatives seemed to be either a coalition on the terms of the communists or else a government of the Communist Party. "Frankly," he said, "I didn't realize how much I was conceding, otherwise I should have refused."

On October 12, 1944, Petkov left for Moscow as a member of an armistice delegation representing all parties in the Fatherland Front. The armistice was signed on October twenty-eighth. When I met Petkov on his return from Moscow, there was the look of a hunted man in his eyes. "I must speak to you in private," he said in a furtive whisper.

A few hours later we met in his apartment. Petkov, his hands trembling more than usual, began speaking—for the first time in our long friendship he looked directly into my eyes as he spoke. "The Russians want to split our party. Central Europe belongs to the Soviet sphere, they said, and our party could only hope to survive if it purged itself of Doctor Dimitrov and the other anti-Soviet elements. They urged me to assume the leadership to carry out such a program. I tried to tell them that you were a friend of the Russian people, but it wasn't of any use. George Dimitrov especially is dead set against you."

"It isn't just a matter of splitting our party," I replied. "The communists want to destroy our party because they see in the peasant movement the chief obstacle to their dictatorship."

Toward nine o'clock the other ministers of the Agrarian Party came to the apartment. Petkov reported to us on certain personal observations he had made in Russia. The thing that appalled him more than anything else was the fantastic luxury in which the proletarian bureaucrats basked whilst their people were starving. The Bulgarian delegation had been invited to dinner by Georgi Dimitrov, one-time leader of the Bulgarian Communist Party, now a Russian citizen for more than twenty years. The dinner was Oriental in its extravagance. There was course after course after course—caviar, and roast duck and other viands, and rare delicacies that Petkov had seen nowhere since before the war, and vodka served in glasses of pure crystal.

In December, 1944—six weeks after his return from Moscow—the communists informed Petkov that I would have to resign as general secretary of the party, or else. Realizing there was no alternative at this stage, I handed over my office to Petkov, whom the communists made clear they favored. For his part, he still believed he could effect a reconciliation with them. So, Dr. Georgi Dimitrov, the anti-Soviet fanatic, had been removed, and Nicola Petkov, lifelong friend of the Soviets, had taken my place. In a speech on January 21, 1945—the day of my resignation—Communist Vice-Premier Dobre Tarpeshev gushed, "If I were a woman, I can think of no one I would rather marry than Nicola Petkov!"

But it was not long before the communists came forward with new demands. They asked Petkov to dismiss the entire central committee and replace them with men they designated. Petkov, whose resistance was still in the process of hardening, compromised to the extent of accepting a few communist stooges in subordinate positions and in the youth organization. Further than this he refused to go. For more than three months the communists plied their pressures, waiting for Petkov to weaken. Instead, his attitude grew more stubborn. Finally, realizing that their plan to capture the party through Petkov had failed, they decided on a frontal attack.

Through our own agents in communist headquarters we learned that they were preparing to arrest me and several score of our party leaders. I was to make a "confession," and then disappear in the manner of Bela Kovacs. The others were to be brought to trial, and through my own "confession" and their "confessions" the Agrarian Party was to be so compromised that they would have a legal pretext for outlawing it.

On April twenty-third, while convalescing from a serious attack of pneumonia, I was formally placed under house arrest. Before the police disconnected my telephone, my wife put through a call to Petkov. Ignoring the danger to himself, he immediately came to see me. Trembling with anger, he called the Minister of the Interior, demanding the reason for my arrest. The minister answered coldly that I had been arrested "in the interest of national security."

"In the interest of the national security," replied Petkov, "you are arresting the man who has done more to promote the national security than any other living Bulgarian. Someday you will regret your action."

The Petkov I saw at this last meeting was a completely changed man from the Petkov of eight months previously. Gone were his illusions about co-operating with the communists. The man with the diffident manner and the downcast eyes had become a lion. He looked both friend and foe squarely in the eyes, and when he spoke to his foes, he literally roared.

On May eighth, the communists convoked a special convention of the "Agrarian Party" attended by several hundred picked stool pigeons. The convention voted in a "new executive." The Ministry of the Interior ruled that our party headquarters, our newspaper, our treasury and all our possessions were the rightful property of this newly elected executive of "the Bulgarian Agrarian Union."

Petkov alone of the old executive was invited to join the new executive. He refused point-blank. Instead, he set up party headquarters in his own home and began to plan a campaign of resistance in open defiance of the secret police.

On May twenty-fourth, I slid down a drain pipe, walked out of the alley dressed in overalls, walked past the communist military guards surrounding the house, and took refuge in the American Embassy. My escape threw a monkey wrench into the preparations the communists were making for their sham trial. Without my confession, the performance would have impressed no one. The trial was called off.

In July the government announced that elections would take place within one month and that there would be only one ticket, the list of the Fatherland Front. Petkov immediately sent a strong letter to the Allied Control Commission, demanding that it guarantee the right of the opposition to its own electoral ticket in accordance with the terms of the Yalta Agreement, and urging that the elections be supervised by an international commission. In early August, without any prior notification to Petkov, the government announced that Petkov had "resigned" his ministry. In protest, all the remaining ministers of the Agrarian Party, the Socialist Party and the Independent Intellectual Party, resigned from the government.

At this point the British and American governments intervened. Apparently yielding to their pressure, the Bulgarian Government agreed to postpone the elections, and to permit opposition candidates. Petkov was permitted officially to re-establish party headquarters and to publish his own newspaper.

But the improvement did not last very long. In violation of their August agreement, the government announced that the elections would be held on November eighteenth. Though the three opposition parties decided to boycott the elections, the campaign was so bitterly fought that the Peasant Party alone had more than a score of its followers killed. The opposition, in a statement signed by Petkov for the Agrarians, Lulchev for the Socialists, and Professor Stoyanov for the Independent Intellectuals, declared that the majority of the people had not voted and that the government had therefore lost the election. They demanded an investigation. The communists replied that the Fatherland Front had got more than 75 per cent of the eligible vote. Their collaborators of the Zevono Group, however, put out the slightly more modest figure of 65 per cent. The discrepancy made the people laugh.

At the Moscow Conference of December, 1945, the Russians made one of their many meaningless compromises. They agreed to advise the Bulgarian Government of the desirability of including in the government, during the interim period, two representatives of the opposition. It was no less a person than Deputy Foreign Minister Vishinsky who went to Bulgaria to implement this arrangement. Vishinsky summoned Petkov and two other opposition leaders and said to them—as bluntly as this, "It is the order of Generalissimo Stalin that two members of your combined opposition enter the government immediately and unconditionally."

"I do not take orders from any foreign power," replied Petkov coldly. "I take orders only from my people and my party." Lulchev and Stoyanov backed him up. The conversations with Vishinsky ended.

The communists were worried by Petkov's recalcitrance because they knew that he accurately reflected the temper of the people. After Vishinsky's departure, the government again approached him. This time to the amazement of all, they accepted almost all of Petkov's conditions, including separate electoral lists and an Agrarian Minister of Justice. The agreement was concluded in the afternoon on March 28, 1946. That same evening, the Soviet minister to Bulgaria, Kirsonov, delivered an ultimatum protesting the agreement. The following morning a government was constituted minus the opposition—and it was announced that there would be elections to a Constituent Assembly on October twenty-seventh.

Petkov now began a campaign which, for sheer heroism, is unsurpassed in the annals of any opposition. With the Red Army still in the country, and with the communist-controlled police breaking up their meetings, the opposition attacked the government and the communists and Soviet intervention as

recklessly as though they enjoyed the protection of the American Constitution. Petkov's paper, during the pre-electoral period especially, was an inspiration to read. "What our people must show," said the Banner for October twelfth, "is *de l'audace, et encore de l'audace, et toujours de l'audace!*" The following day, under the caption WHERE ARE THE AGRARIAN DEPUTIES? it charged that the Agrarian Party had not been permitted to put up candidates in 25 per cent of the constituencies and that of the candidates for the other constituencies, almost fifty were under arrest. "Freedom does not come on a silver platter," wrote Petkov on October fifteenth. "Freedom is something for which you must fight."

To the communists' protestations that they had no intention of taking the peasants' property, Petkov replied with the most devastating slogan of the electoral campaign: "As the wolf cannot watch over your flocks, as the fox cannot befriend your hens, so the communists cannot protect private property. Electors! Vote without any fear against the communist constitution, against the communist dictatorship!"

On October twentieth, the opposition finally was granted permission to hold an open meeting in Sofia—without loud-speakers or lights. Despite all the restrictions, more than 200,000 angry peasants swarmed into Sofia and joined the city workers and middle class in the most impressive demonstration of the entire electoral campaign. "Down with the dictatorship!" they roared. "Down with red Fascism! We want Petkov!"

The success of the meeting resulted in an intensification of the terror. In the three days before the elections, twenty-four members of the Agrarian Party were killed. The communist leader, Georgi Dimitrov, who had been a resident of Russia for thirteen years and who had returned to Bulgaria only two days before the election—it is not clear whether he resigned his Soviet citizenship—thundered against Petkov in his first declaration, "We have to remind the leader of the opposition of the fate of Drazha Mihailovich!"

When the election results were announced, the opposition was credited with 101 deputies against 364 for the Fatherland Front. The Agrarian member sent a protest to the Election commission in which he gave details of the terror against the opposition. "What has taken place," he said, "was not an election, but a war between the police and the people. . . . The elections were without any question fraudulent."

When the Constituent Assembly convened on November eighth, the opposition opened the session by shouting, "Long live liberty! Down with the dictatorship!" In the sessions that followed, the figure of Nicola Petkov, hurling castigation and defiance at the communist majority, completely dominated the assembly. Georgi Dimitrov, who, as a proletarian revolutionary, had towered over his Nazi prosecutors at Leipzig, now, as a totalitarian bureaucrat, shrank to the stature of a pygmy. Without either moral or rational ground to stand on, he could do nothing but reply to Petkov with abuse—"anti-Soviet dog" was one choice term—or with crude threats.

When Georgi Dimitrov shouted that the future belonged to the communists, Petkov intervened, "The future belongs not to you, Mr. Dimitrov, but to the people. You are not a god, Mr. Dimitrov, though you may deceive yourself on this score by taking into your party only those who accept you as their god. . . . Your program is one word: Dictatorship! Our program is also one word: Liberty!"

On January 30, 1947, Dimitrov made his first direct threat to Petkov. After roaring that "Koev must be hanged!" (Petar Koev was one of Petkov's chief aides) he went on to say that the government possessed documents involving the leader of the opposition. The following is a condensation of the exchange that took place.

PETKOV: Are you a satrap, that you issue such summary condemnations? After all, you are not a god—you are not even a qualified judge. As for the documents of which you speak, I challenge you to produce them.

DIMITROV: Very soon you will receive your documents. When you do, not one of you will remain in this assembly. There is no place in this assembly for foreign agents.

PETKOV: You speak of foreign agents. . . . For twenty years, you, Mr. Dimitrov, were a citizen of a foreign country. You became a Bulgarian citizen only two days before the election. You have no right even to speak as a Bulgarian.

The battle grew in intensity. On April third, one of the opposition deputies got up and made the accusation that under Article 4 of the armistice, the Communist Party was a fascist organization and should accordingly be dissolved. The communists, outnumbering the opposition almost four to one, rushed across the floor and engaged them in a terribly unequal battle in which many of the opposition were injured. The opposition left the chamber *en masse*, by way of protest.

The next day they were back in their places to renew the struggle. An Agrarian woman deputy charged that the Communist Party was squandering public funds by making all of their members eligible for the special allotments voted to active partisans. Again the communist majority charged the opposition. Again the opposition left the chamber with their heads bloody. Again they came back the following day.

And so it went, until the final arrest of Petkov and the dissolution of his party.

The bulk of the evidence against Petkov consisted of confessions purportedly made by his "fellow conspirators." The most important of these was the "confession" of Petar Koev, the Petkov aide who had been arrested in mid-January, 1947. Koev had been arrested once before, in August, 1946. While he was in prison he had been elected to parliament and, in consequence of parliamentary immunity, he had been released. On his release he sent a letter to his leader, Petkov, which Petkov had the courage to read to the assembly.

"They reduce you to a state of utter moral and physical prostration," said Koev's letter, "in which you become indifferent to your fate and to life itself, so that you desire some solution—any solution—so long as it will put an end to the intolerable suffering. . . . Contrary to normal juridical procedure, you are condemned first, and it is only afterwards that they begin to search for accusations and proofs. These are obtained by means of three types of torture: physiological torture—hunger, lack of sleep, thirst; physical tortures—beatings and being compelled to stand upright for days and nights on end; psychological tortures—insinuations that your family has been incarcerated, etc.

". . . I remained for twenty-one days in solitary confinement without being interrogated. During this time they subjected me to the hunger treatment—a bit of bread and water each day. . . . The obvious purpose of this treatment is to produce physical attrition and a corresponding weakening of your will. At eight a.m. one Saturday they took me up to the fourth floor to be interrogated. The interrogation went on for five days without interruption, twenty-four hours a day. The interrogator was changed every three hours, while I was compelled to remain standing, handcuffed, without sleep, unable to support myself either against the table or against the wall, without food and—what was cruelest of all during those suffocatingly hot August days and nights—without water. Every three hours the same questions were repeated until I became unconscious. . . . My bare feet swelled to unimaginable proportions. The interrogators showed not the faintest pity. . . . On the fifth day they threw me into an empty cell, where I slept like a dead man for more than twelve hours."

On the four succeeding nights Koev was trussed and beaten on the soles of his feet for three or more hours on end, with interludes during which he was questioned by Inspector Zeyev.

"During the balance of my detention," concluded the letter, "I was asked no questions, but I remained the object of a campaign of moral pressure and psychological terror. They applied refined tortures of such a kind—allusions to the fate of my family, the safety of my children, etc.—that I would honestly have preferred physical tortures."

When Koev was deprived of his parliamentary immunity on the occasion of his second arrest, he made this final declaration before leaving the parliament, "I am innocent. I know, however, that through me you are attempting to strike at the general secretary of our party, Nicola Petkov. My final words are that only the declarations which I made before you now correspond to the truth, and that, if it should happen later that, after a period of 'instruction,' I should make some 'confessions,' they will have been extorted from me by means of violence."

Koev made his "confessions" and was sentenced to twelve years. He will never emerge alive. Petkov, though he defended himself heroically and admitted nothing, was sentenced to death.

I salute the memory of one of the great spirits of our time. To Nicola Petkov there can be no other monument than the liberation of his people from communist tyranny.

## AN IMPORTANT COMPARISON

Mr. HANSEN. Mr. President, citizens the world over today are deeply concerned and troubled over events in the Middle East, as well they might be. The possibility of continued and stepped-up fighting, perhaps involving additional nations, is frightening, as is the thought that the United States might be required to assume a military role.

There has been a limited amount of discussion on the floor of the Senate in the recent past concerning the relationship of Middle Eastern events to those in Vietnam. Perhaps there has not been enough discussion of this subject.

Mr. President, in an editorial published September 18, James Flinchum, the editor of the Cheyenne, Wyo., State Tribune, discussed the possible similarity between U.S. responsibilities in Vietnam and in the Middle East.

He notes that:

There seems to be growing sentiment not only in the United States but around the world, at least the western nations, to do something about the guerrillas. The irony of all this in contrast to the Vietnam War and U.S. action in Southeast Asia seems to be totally lost on a lot of people in this country as well as abroad.

Mr. Flinchum further points out that:

Peace has become an issue for all sorts of crusaders in this country who have even sought to topple the government, by legal as well as illegal means, using it as an alleged issue; yet virtually no one questions the possibility that this country employ one of the mightiest weapons at its disposal to step in and restore order in the Middle East. Why the difference?

I have a feeling that a great many people in this country view the possible military involvement of this Nation in the Middle East conflict with great alarm. I would hope that this possibility might be discussed by the Senate in relation to the likely parallel with events in Vietnam as well as on the basis of events only in the Middle East.

Mr. President, I ask unanimous consent that Mr. Flinchum's editorial entitled "Comparison: Vietnam and Middle East," be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

COMPARISON: VIETNAM AND MIDDLE EAST

There seems almost an eagerness to have the United States employ its big Sixth Fleet to settle the Middle East crisis, insofar as the Palestinian guerrillas are concerned, once and for all. This latter is an assumption, that being that the employment of force can be carried off by this country without far-reaching consequences.

A survey of editorial comment in the British press compiled by the BBC and distributed by the British Information Service is most interesting.

The Manchester Guardian, both a cap-L and small-l liberal newspaper, warns: "If King Hussein does not emerge triumphant, a disorderly transmission of power will ensue, and Israel will probably intervene. What remains of the American peace initiative will then be really shattered." The implication here is that someone other than Israel should intervene; certainly there is no warning against such action.

The Daily Telegraph is even more explicit in this regard. It asks: "What is to be done about Jordan?" Then it indirectly supplies the answer: "A handful of determined men has the so-called civilized world by the shirt tails, and the civilized world which has nuclear weapons and aircraft carriers at its disposal, appears to all intents and purposes powerless to do anything about it. This is something we cannot long endure." It adds: "One thing is certain. If the challenge to world order presented by Jordan goes unchecked, there will with great rapidity be dire consequences, perhaps in totally unexpected directions."

There seems to be growing sentiment not only in the United States but around the world, at least the western nations, to do something about the guerrillas. The irony of all this in contrast to the Vietnam War and U.S. action in Southeast Asia seems to be totally lost on a lot of people in this country as well as abroad.

There is a great similarity between the action of the guerrillas in Southeast Asia and those in Jordan, despite surface disparities. These surface differences occur merely in length of time, the parties involved, the area of the world under stress, and precisely who is behind each of the most abrasive groups, meaning the guerrillas.

The Southeast Asian guerrillas proceeded from a double base of power: one provided by Peking, the other by Moscow. They had at first the covert, and finally the overt, sanction of a duly constituted government, the Hanoi communist regime. In Palestine, the Palestine Liberation front apparently lacks firm support from Moscow despite its Marxist orientation; the Peking communists seem to be the shadowy power here.

But the purpose remains basically the same as that of the Southeast Asia communists, and that is the overthrow of a government, that of Israel, unfriendly to the communist powers. No matter what the Palestine guerrillas' stated aims may be, the ultimate consequence of their terrorist activities is the destruction of the government of Israel, which is the goal of the communist powers both in Moscow and Peking.

One thing must be pointed out: while the world recoils in horror and hand-wringing at the work of the Palestine Liberation front, let it be pointed out their activities are strictly a schoolyard exercise compared with the communist guerrillas of Vietnam. The Palestine guerrillas have destroyed three jetliners worth approximately $40 million and have held as hostage upwards of 300 persons. Other than some irregular fighting between them and Jordanian and Israeli army troops, there have been relatively few persons killed by their activities.

Yet the western world has displayed shock at what the Palestinian guerrillas have done, and now seemingly is demanding that the United States immediately step in and commit its Sixth Fleet to restore order; while at one and the same time, mostly condemning this country for intervening in Vietnam where guerrillas have killed upwards of three-quarters of a million civilians in their bloody campaign of terror to topple another free world government.

In America's efforts to counter a much bloodier regime, and restore order, and prevent incursions much more serious than those of the Middle East, both the Johnson and Nixon Administrations have been assailed at home and abroad, by leading spokesmen in Free World nations and many others.

Peace has become an issue for all sorts of crusaders in this country who have even sought to topple the government, by legal as well as illegal means, using it as an alleged issue; yet virtually no one questions the possibility that this country employ one of the mightiest weapons at its disposal to step in and restore order in the Middle East.

Why the difference?

That is what we should like to ask, unless it is that the Soviet Union, now concerned with the meddling in this mess by the Chinese Communists, and suddenly more fearful of the latter than of the West, has remained strangely mute in the Palestinian affair, seeing it possibly as a threat to itself as well as the western and Levantine nations.

So Moscow remains quiescent, and so do a lot of people here and abroad who take suggestions from it in one form or another.

In the meantime, the irony ought not to be overlooked, even though it may become necessary for the U.S. to employ its power in the Mediterranean the same as it has found it necessary to do in Southeast Asia.

## OCEANS

Mr. NELSON. Mr. President, many marine scientists are predicting that with the present accelerating pace of pollution, productive life in that astonishingly fragile environment, the sea, will be destroyed in 25 to 50 years. And in its report last year, the President's Panel on Oil Spills said that with present rates of undersea oil development—we are drilling 3,000 to 5,000 new ocean oil wells every year—and with the inadequate technology to control or clean up marine oil spills, we can expect a Santa Barbara scale disaster once a year by 1980.

It was with these grave problems in mind that I introduced last February the Marine Environment and Pollution Control Act, S. 3484, comprehensive legislation which, among other things, would halt all dumping of solid wastes into the sea from the United States by 1975.

And last March, I introduced a bill—S. 3631—which would declare a moratorium on the drilling of new offshore oil wells until we develop the technology to protect the marine environment from oil disasters and until we need the oil. The legislation would establish a National Marine Mineral Resources Trust to accomplish this, and would also initiate a broad program requiring environmental management plans for our ocean activities.

Clearly, there is rapidly growing interest in taking the necessary strong national and international steps now to protect the marine environment from further grave damage which probably we would never be able to undo.

As an instance, the President's Council on Environmental Quality reportedly is recommending to the President the establishment of a tough new Federal policy to stop the use of the oceans as a garbage dump. Though the specifics of the report, which is being prepared at the President's request, are not yet known, tough Federal action to deal with this assault on the sea by the annual dumping of tens of millions of wastes is critically needed now.

And regarding the gigantic threat to the marine environment by ocean oil drilling and transportation, the Legislative Reference Service, in a just-released background study for the Joint Economic Committee, has this to say:

All of this would appear to raise a policy question of withholding or delaying further offshore lease and development until fully adequate technology is more nearly in hand for producing and transporting such petroleum. The very high public and private costs incurred in offshore development in the recent period, the possible irreparable damage done to some resources and the fact that several aspects of technology, legislation and law are yet to be worked out or clarified would seem to suggest a "go slower" policy.

We have the opportunity to take action now to prevent the sea from becoming the same kind of mess we now see in our rivers and lakes.

And it is because we so urgently need to resolve the questions on how to protect the marine environment that I have introduced Senate Resolution 433 to reject Reorganization Plan 4 that would establish a National Oceanic and Atmospheric Administration—NOAA—in the development-oriented Department of Commerce.

No one is arguing that we should not strengthen our national capability to wisely utilize the resources of the sea, which is the primary mission of the proposed NOAA in the Commerce Department. But before an oceans agency with this resource development mission is ever established, we should make it absolutely clear that we do not intend such an agency to have major environmental responsibilities beyond compliance with the National Environmental Policy Act. Marine environmental planning and management, standard setting and enforcement, and the coastal zone management program should be in agencies entirely independent from NOAA and the Commerce Department.

This would be in line with the principle of the separation of the development

programs from environmental activities as so clearly stated by the President in explaining the need for establishing the Environmental Protection Agency, proposed in plan 3 which has my strong support. And it would avoid the built-in conflict of interest which is now seen in Federal agencies charged both with developing and protecting a resource.

Mr. President, I ask unanimous consent that the following three articles be printed in the RECORD: One, a Los Angeles Times Service report, published in the Milwaukee Journal, describing the ocean dumping control recommendations being prepared by the President's Council on Environmental Quality: two, an article published in the Christian Science Monitor, describing the worldwide problems being caused by the dumping of wastes into the sea by many nations; and three, an article published in the Washington Post on the Legislative Reference Service study urging that the United States go slow on offshore oil drilling until we know what we are doing.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

[From the Milwaukee (Wis.) Journal, Aug. 16, 1970]

UNITED STATES CONSIDERING BAN ON ALL DUMPING INTO OCEANS

WASHINGTON, D.C.—The Federal Council on Environmental Quality is preparing a report urging the Nixon administration to ban all dumping of toxic materials into the oceans.

Concerned that increasing use of the sea for every conceivable form of waste jeopardizes its long term use as a critical food source, the government's top environmental advisers are expected to ask US leadership in stopping worldwide use of the oceans as garbage dumps.

A solid waste expert in the Department of Health, Education and Welfare said the US, is now dumping some 48.2 million tons into the sea each year.

Of this, 38.4 million tons are spoils from dredging operations, 4.7 million tons of industrial wastes including chemicals and pesticides), 4.5 million tons of sewage sludge, 600,000 tons from construction and demolition operations and 26,000 tons of garbage and trash.

The HEW spokesman said the Bureau of Solid Waste Management had no statistics on obsolete weapons, explosives and other materials being dumped into the sea by the military.

However, it is known that the practice has been going on for years.

Outside the Pentagon, little is known about what the military has dumped into the sea in the past. The House Oceanography Subcommittee has asked the Army for a list, but has not received it.

---

[From the Christian Science Monitor, Aug. 27, 1970]

DUMPING AT SEA MAKES WAVES

(By David Anable)

BOSTON.—More than just a few startled squid have been stirred by the scuttling of the LeBaron Russell Briggs and its lethal cargo of nerve-gas rockets.

For when the rusty Liberty ship sank hissing and bubbling into the depths 245 nautical miles off the Florida coast it focused all eyes on the fact that "freedom of the seas," applied to the dumping of chemicals, spells anarchy.

Take a boat. Sail out beyond national territorial limits. And dump whatever you please—except oil or radioactive materials. There is virtually nothing to stop you.

EUROPEANS ON EDGE

So far, no government has really begun to work out ways of developing and imposing controls. For the most part, the world's dumping of chemicals is left to the self-regulation of industry, or to individual government agencies working within territorial limits.

In Europe especially, the last voyage of the LeBaron Russell Briggs has stirred anxieties that already were close to the surface. Europeans are fast becoming aware that the sea in general, and their own waters in particular, are far more polluted with dangerous chemicals than even experts realized a few years ago.

Prof. Otto Kinne, head of Heligoland's Marine Biology Research Station, calls the North Sea "the industrial cesspool of Europe." Reportedly some 1,200 tons of sulfuric acid a day are dumped within 12 miles of his station. Off Norway, one cannery is said to dispose of 18,000 tons of formalin a year.

The Baltic also suffers. So much mercury has been disposed of there that many fish cannot be eaten because they contain too much of this toxic chemical. Oceanographers believe that pollution generally is behind the fact that the Baltic's bottom waters are what they call "dead." They are concerned that the upper waters, too, may eventually have their fish productivity impaired.

RHINE FISH KILLED

Tons of stultifying waste also surge down to the sea through Europe's rivers. The problem was illustrated dramatically last fall, when insecticide poisons killed all fish in the lower Rhine.

The industrial wastes building up in Europe's seas cover the spectrum of noxious chemicals used commercially, including cyanides. In addition old dumps of poison gas present a constant hazard.

Toward the end of World War II and shortly thereafter the Germans and the Allies, including the Russians, dumped thousands of tons of poisonous war substances into Europe's seas. Some of these appear to be returning to haunt succeeding generations.

In West Germany, for instance, officials have launched an operation to locate and detoxify poison gases dumped in the Baltic Sea. The operation gained urgency when fishermen who hauled up an old canister of mustard gas were temporarily blinded, and when five children playing with seaweed near Lübeck received skin burns.

IRISH SEA MYSTERY

In Britain the Ministry of Defense recently admitted that it might have been poison gas leaks that caused the widely reported and mysterious deaths of birds and sea animals in the Irish Sea last December.

In Scandinavia reports have come in over the past year or two of swimmers and fishermen receiving burns, apparently from mustard gas leaking out from seabed dumps. And some fishermen have suffered burns when hauling contaminated gear, and even old gas bombs, aboard their craft.

A slightly different incident was reported recently from Britain when the Royal Navy admitted being the source of canisters of ferris chloride that washed ashore on the Isle of Wight. The Navy had dumped the chemical some weeks earlier in nearby waters.

Though ferric chloride is comparatively harmless, national concern over the incident prompted the Ministry of Defense to detail its extensive dumping operations since World War II and to reassure the public that since 1957 all dangerous chemicals had been disposed of by chemical or burning processes.

JAPANESE CONCERN RUNS HIGH

On the other side of the globe, in Japan, public concern is very great, especially when it comes to dangerous discharges from factories, including cadmium and mercury. Antipollution feeling among Japanese is higher than ever. Almost every day newspapers tell of ugly discharges into Tokyo Bay and other waterways.

But Japan's laws are weak. The national water-quality-control law sets purity standards against mercury, cadmium, lead, arsenic, cyanide, organic phosphorus, and two others. Penalties, however, are inadequate and seldom, if ever, imposed.

CALL TO ACTION SEEN

Considering the state of their own backyards, other nations have hardly been able to take a holier-than-thou attitude toward America's deep-sea disposal of its nerve gas—especially now that Washington has stated flatly that no more chemical weapons will be dumped in the ocean. (New equipment, it is affirmed, makes it possible to dispose of these weapons on land.)

Hence, while resenting the American action, many non-Americans have taken it as one more indication of an urgent need to work out effective international controls and safety rules for ocean dumping. Europeans, for example, are reported as not being chauvinistic about such controls but as tending to trust international cooperative efforts more than they do their own national regulations.

The situation with radioactive wastes stands out in contrast to the anarchy of chemical waste disposal. With a large body of knowledge on hazards and safety to rely on, atomic authorities are strict in controlling waste disposal both nationally and internationally.

Recently, when Britain's Windscale atomic center proposed to raise the level of wastes it puts in the Irish Sea, an independent scientist study calmed public concern. It found that safety had been so carefully worked out it could readily recommend that permission be given.

FRENCH PROJECT ABANDONED

The reverse happened 10 years ago in France when the French authorities proposed, as an experiment, to put radioactive waste in the Mediterranean. The public outcry was so vigorous that the project was abandoned.

But a similar operation was carried out in the Atlantic in 1967 and the French Government made two other such experiments in 1968 and '69 sponsored by the European Nuclear Energy Agency.

In the Soviet Union the authorities say they take every precaution to prevent pollution of the air and water from radioactive wastes.

According to a Soviet study published in 1967, highly radioactive hard wastes from atomic plants are buried in concrete containers placed above ground-water level. Less contaminated wastes are dumped into clay-sealed trenches.

Radioactive gases are first purified and then released into the atmosphere through stacks high enough to ensure that by the time the substances fall to the ground they have a radioactivity content lower than that permitted for air in populated places. Liquid radioactive wastes are also subjected to various purification and disposal processes.

The study concludes that the host of measures and precautions taken fully assures the safety of the population living in the areas where these enterprises are located. There is, however, no way to confirm this claim.

PROBLEM MULTIPLIES

The nation most sensitive about radioactivity is Japan. It faces a rapidly multiplying waste-disposal problem.

Radioactive waste from its 20 reactors used for experimental purposes currently can be stored in sealed containers in separate buildings on the site of each facility. But in a small country this process cannot serve indefinitely. Decisions will have to be taken soon on the merits of alternative plans: dumping deep at sea; burying underground; isolating on uninhabited islands or in remote fields in Hokkaido, where only 5 million people live.

Much more serious, though, is the waste from atomic power stations. Japan now has two; another starts operating in October; five more are under construction. Current law demands any sea dumping be at least to a depth of 2,000 meters. Japanese experts are concerned that this soon may not be adequate.

One alternative suggested is to store nuclear wastes inside unused power plants. Another, offered only partly tongue in cheek by one expert, might be "loading the waste on a rocket and shooting it out of the earth's atmosphere altogether."

CUMULATIVE DANGER SEEN

With the industrialized world turning more and more toward the atom to meet its accelerating power demands, the problem of waste disposal simultaneously multiplies. A pool of knowledge of the dangers and needed safety standards for dumping radioactive material at sea does exist. But an anxiety lingers:

Could sea-buried radioactive wastes though individually harmless, accumulate over the years? Could some living organisms, known to be able to reconcentrate such radioactive elements, pose an unknown hazard?

Of much greater urgency is the need for study of other marine pollutants. There is no pool of knowledge about chemical dumping and its dangers; almost nothing from which to draw in compiling an effective range of measures to control this menace.

If it does nothing else, the scuttling of the LeBaron Russell Briggs and its deadly load may help build pressure toward this objective.

---

[From the Washington Post]

DRILL ON LAND, NOT AT SEA, OILMEN TOLD

The petroleum industry should confine its drilling to land and delay further offshore operations to protect the environment, a federal study suggests.

The study cited eruption of an oil well in California's Santa Barbara channel in January 1969 and pollution resulting from an oil fire off the Louisiana coast last February as examples of offshore operations damaging the environment.

The study, released today by the Joint Economic Committee of Congress, was prepared by the environmental policy branch of the Library of Congress.

The oil industry, the report said, has improved its record of containing blowouts on land, and pollution, when it occurs, is localized.

Much of the United States has not yet been explored in depth for oil, the report said, and there are opinions that large areas are favorable prospects for oil and gas.

Offshore, the report noted, aspects of federal-state proprietary and administrative relations are not fully resolved, oil spills are harder to contain, and the need for workable rules to protect the environment presents problems.

---

## STATES' PREFINANCING OF SEWAGE TREATMENT FACILITIES

Mr. GOODELL. Mr. President, for some months I have been attempting to obtain figures from the Department of the Interior and the Federal Water Quality Administration to reflect the total amounts prefinanced by States and municipalities for construction of sewage treatment facilities authorized under the Water Quality Improvement Act.

Officials of those agencies would provide figures for only that portion of the obligations that had been advanced and expended—the actual out-of-pocket costs—for projects under construction.

The estimates did not include the commitments States and municipalities had made to prefinance the Federal share of the cost. These are costs the Federal Government will have incurred by the time construction of the projects had been completed.

I do not know the reason these figures have been withheld. Surely, this is vital information of Congress is to plan to meet the commitments of the Federal Government.

The Assistant Secretary of the Interior, Carl L. Klein, has now responded to my request for this additional information. I ask unanimous consent that his letter of September 18 be inserted in the RECORD at this point, along with tables showing total reimbursables and new obligations as of June 30, 1970, and as of December 31, 1969.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
*Washington, D.C., Sept. 18, 1970.*

Hon. CHARLES E. GOODELL,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR GOODELL: This will acknowledge your telegram of September 12 and expand on advice given your office by telephone late Wednesday afternoon. You requested figures by state of the potential reimbursement entitlement; i.e., the total amounts for which the projects could be eligible when construction of sewage treatment plants is completed and the full Federal share has been expended by state and local agencies. You further acknowledged receipt of information from us on the amounts eligible for reimbursement as of December 31, 1969, and as of June 30, 1970.

For purposes of clarity, we presently refer to future entitlement as new obligations rather than potential reimbursements since the language of the act is quite clear that a reimbursement is a repayment of a state or local expenditure. Reimbursements are, therefore, defined as being money from any allotment made under Section 8 of P.L. 84–660, as amended, for the repayment of state or local prefinancing of the Federal share of the cost of construction, subject to the following criteria:

1. Proper audit.
2. Appropriate state water pollution control agency approval.
3. Determination by the Secretary:
(a) As meeting requirements of Section 8, and
(b) Having been built without Federal assistance partially or in toto
4. For those construction costs actually paid out.

New obligations cannot and shall not be qualified for or designated as reimbursements until such time as payment shall have been made by the state or local government and then (1) only to the amount of the Federal share of the actual payment, and (2) only to the extent that actual payments exceed the state's allotment for the program.

With these definitions in mind, the Federal Water Quality Administration determination of reimbursements and their estimates of new obligations have been prepared and are tabulated by States from the enclosed sheets.

I trust that this is the information and material that you are seeking, and if we may be of further service, please do not hesitate to call.

Sincerely yours,

EARL L. KEEM,
*Assistant Secretary*
*Water Quality and Research.*

Mr. GOODELL. Mr. President, since these tables do not include a column showing the total funds committed for prefinancing and which have not yet been paid, I ask unanimous consent to include additional tables in the RECORD. The first column of these tables is the total commitment, and the second column shows the amounts due and payable as of June 30, 1970, and December 31, 1969.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

PREFINANCING: CONSTRUCTION OF SEWAGE TREATMENT PLANTS

[Status: June 30, 1970]

| State | Number of projects | Total prefinanced | Now eligible for reimbursement |
|---|---|---|---|
| Alabama | 2 | $5,308,000 | $138,000 |
| Alaska | 4 | 9,385,980 | 801,070 |
| Arizona | | | |
| Arkansas | | | |
| California | | | |
| Colorado | 1 | 15,226 | 15,226 |
| Connecticut | 54 | 101,128,100 | 14,285,136 |
| Delaware | 5 | 895,600 | |
| District of Columbia | 7 | 52,788,250 | 712,306 |
| Florida | 3 | 7,510,110 | |
| Georgia | 4 | 10,736,250 | 59,400 |

| Puerto Rico | | | |
| Virgin Islands | | | |
| Total (33 States and District of Columbia) | 815 | 794,041,415 | 145,312,133 |

Mr. GOODELL. Mr. President, the total commitment of funds prefinanced by 35 States and their municipalities by June 30, 1970, was $1,341,118,383, and they had actually spent $198 million of this commitment.

The total commitment by December 31, 1969, was $794,041,421, and they had actually spent $145 million of this commitment.

The law provides that these out-of-pocket expenditures will be repaid when and if adequate Federal funds are appropriated. It is clear that appropriations to actually commit the Federal Government for its full share of the costs have fallen far short of the need.

The fiscal year 1971 public works appropriation bill earmarks $200 million for those States that have prefinanced. However, for a State to reduce its reimbursement commitment only serves to delay approval of new projects.

For example, if New York were to reduce its eligible reimbursement by its full fiscal year 1971 allotment, estimated at about $182 million, the State would have no funds available for new projects.

Likewise, if Maryland were to use its fiscal year 1971 allotment of approximately $24 million toward reimbursement of out-of-pocket expenditures of $27 million, the State would have no funds available for new projects.

Reductions of eligible reimbursements by other States would similarly affect their plans for new projects.

Although the figures in these tables reflect the lion's share of the national prefinancing debt has been for commitments by New York State, other States will soon face the same financing dilemma as New York. We have only to observe events in the Washington metropolitan area to find an example of what is developing nationwide.

Last Friday the Federal Water Quality Administration approved a $530 million expansion of the Blue Plains plant, which is the principal facility serving the Washington metropolitan area. I noted with interest that 55 percent of the cost would be provided by the Federal Government if Maryland, Virginia, and the District of Columbia can come up with their 45 percent share of the costs.

The Federal share of $291.5 million, or 55 percent of the cost of the project, must come from FWQA allocations to Maryland, Virginia, and the District of Columbia. Yet, Federal funds available through next June 30 to those three juridictions total only $65.5 million.

I ask unanimous consent to place in the RECORD a table summarizing available Federal funds to Maryland, Virginia, and the District of Columbia through June 30, 1971.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

*Federal grants available through June 30, 1971 to Maryland, Virginia, and the District of Columbia for construction of sewage treatment facilities* [2]

| | |
|---|---|
| *Maryland's allocations:* | |
| Fiscal year 1970 allocation | $13,550,900 |
| Granted by June 30, 1970 | 9,956,777 |
| Balance for use until May 15, 1971 | 3,594,123 |
| Fiscal year 1971 original allocation | 13,550,700 |
| Additional allocation anticipated | [1]10,680,000 |
| Total available to June 30, 1971 | 27,824,823 |
| *Virginia's allocations:* | |
| Fiscal year 1970 allocation | 17,302,800 |
| Granted by June 30, 1970 | 6,257,947 |
| Balance for use until May 15, 1971 | 11,044,853 |
| Fiscal year 1971 original allocation | 17,295,300 |
| Additional allocation anticipated | [1]1,160,000 |
| Total available to June 30, 1971 | 29,500,153 |

[1] From $200 million earmarked in Public Works Appropriation bill for fiscal year 1971 based on earned reimbursable grants.

[2] Sources: Tables on all states provided by the Federal Water Quality Administration.

| *District of Columbia's allocations:* | |
|---|---|
| Fiscal year 1970 allocation | 3,780,500 |
| Granted by June 30, 1970 | 0 |
| Balance for use until May 15, 1971 | 3,780,500 |
| Fiscal year 1971 original allocation | 3,788,000 |
| Additional allocation anticipated | [1] 600,000 |
| Total available to June 30, 1970 | 8,168,500 |
| Total for above three jurisdictions | 65,493,476 |

Mr. GOODELL. Mr. President, even if the three jurisdictions agree to commit their entire Federal allocations of $65.5 million to the project, this is only 12.2 percent of the cost, rather than 55 percent for which the project is eligible. Therefore, the only avenue the three jurisdictions can take if they wish to go ahead with the improvement of the Blue Plains plant is to agree to prefinance the remaining 42.8 percent of the cost for the Federal Government, or $226 million, along with $238.5 million for the "local" share of 45 percent. This is a total of $465 million that must be raised by the three jurisdictions through high-cost municipal bond issues.

The alternative is to postpone upgrading of the plant for several years until adequate resources are available to finance it.

Difficult decisions such as this are probably being faced by the majority of the States. In this connection, it would appear that a table of "State Investment Intentions" recently provided me by the Department of the Interior is hopelessly out of date.

I ask unanimous consent to place the table at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

*State investment intentions*

| | *Millions of dollars* |
|---|---|
| Alabama | 35.0 |
| Alaska | 12.0 |
| Arizona | 86.0 |
| Arkansas | 33.0 |
| California | 651.8 |
| Colorado | 133.0 |
| Connecticut | 280.5 |
| Delaware | 28.0 |
| District of Columbia | 355.0 |
| Florida | 200.0 |
| Georgia | 150.0 |
| Hawaii | 14.4 |
| Idaho | 0.5 |
| Illinois | 437.2 |
| Indiana | 152.6 |
| Iowa | 33.3 |
| Kansas | 61.0 |
| Kentucky | 62.6 |
| Louisiana | 140.0 |
| Maine | 140.9 |
| Maryland | 236.9 |
| Massachusetts | 438.0 |
| Michigan | 253.7 |
| Minnesota | 136.3 |
| Mississippi | 40.0 |
| Missouri | 390.0 |
| Montana | 13.5 |
| Nebraska | 62.0 |
| Nevada | 28.6 |
| New Hampshire | 138.0 |
| New Jersey | 880.0 |
| New Mexico | 9.9 |
| New York | 1,900.1 |
| North Carolina | 69.3 |
| North Dakota | 22.0 |
| Ohio | 432.5 |
| Oklahoma | 65.3 |
| Oregon | 135.0 |
| Pennsylvania | 432.0 |
| Rhode Island | 51.5 |
| South Carolina | 75.0 |
| South Dakota | 27.0 |
| Tennessee | 105.5 |
| Texas | 525.0 |
| Utah | 11.7 |
| Vermont | 70.0 |
| Virginia | 151.0 |
| Washington | 160.0 |
| West Virginia | 44.3 |
| Wisconsin | 243.7 |
| Wyoming | 12.0 |
| Guam | 6.2 |
| Puerto Rico | 28.9 |
| Virgin Islands | 15.4 |
| Total | 10,217.1 |

Mr. GOODELL. Mr. President, the table of investment intentions for a 5-year period was developed last year based upon estimates submitted by the States.

The estimate for New York of $1.9 billion for 5 years was based upon reports from regional engineers and applications from municipalities. Subsequently there was a reassessment of New York's program, and the State now expects to spend $1.5 billion in fiscal year 1971 alone.

The investments for this 5-year period estimated by Maryland, Virginia, and the District of Columbia total $743 million. This is only $213 million more than has been estimated to improve the Blue Plains plant.

A clean environment is essential to our survival, and too little has been accomplished because of the high costs. We can no longer afford these delays.

## THE RIGHT TO READ PROGRAM

Mr. PROUTY. Mr. President, on Friday, September 11, the National Reading Council convened its first meeting. Conceived to implement the right to read program, the Council was appointed by President Nixon to advise the Office of Education on priorities in its reading programs and to oversee operations of a National Reading Center.

As one who is proud to serve on the National Reading Council, I would like to call its activities to the attention of the Senate. I wish also to explain the unique partnership between public and private agencies that it embodies. Finally, I would like to underline the principles of operation it has defined, for they are of great importance to our educational system as a whole.

In a Nation having one of the highest literacy rates in the world, many millions still suffer reading deficiencies. Some 3 million adults are completely illiterate; another 5 million youths seeking employment are functionally illiterate; 25 million jobholders—or 1 in 5—are so deficient in reading as to be denied advancement and most importantly, 15 million of our 51.5 million students—or 3 in 10—suffer from reading deficiencies severe enough to impede their learning progress. It is in recognition of these disturbing facts that this Administration is sponsoring a massive assault on reading problems that will assure every citizen the right and thus the ability to read. Responsibility for the program will not rest solely on the Federal Government. Instead, a partnership is being formed that incorporates the educational community, business, labor, the communications media, government at all levels, and the public.

As one who has long espoused greater reliance upon the public at large and the private sector instead of big government, I am most pleased to see this movement get underway. For too long we have assumed that Federal initiatives and money alone will accomplish our objectives, but this is not so. We are now learning that cooperation and involvement of all groups affected are necessary in order to bring about improvement. When broad participation is not assured, program objectives often become muddled as smaller subgroups vie for control. When broad participation is assured, each person involved becomes more committed to the objectives because he understands them better and knows the benefits that will be derived.

The National Reading Council includes representatives of a wide range of groups and will act as the coordinating sponsor of this reading endeavor. It will establish a National Reading Center with Federal funds. It will be independent of the Office of Education to act as the staging area for coordination and utilization of all efforts that are entertained by the participating members of the partnership represented. I will shortly ask that a more complete explanation of the partnership embodied by the National Reading Council and its functions be included in the RECORD. Before I do so, however, I invite attention to the unique way in which the public will participate in this reading campaign.

In addition to broad representation of the public through the earlier-mentioned participants, utilization of the private National Center for Voluntary Action and Federal Office of Voluntary Action will insure direct participation of the public at large. Together with the thousands of volunteer organizations, these bodies will unite in a national program for voluntary action which will lend suggestions, manpower, and services to the reading campaign.

Very early in his administration, President Nixon established a Cabinet Committee on Voluntary Action headed by Housing and Urban Development Secretary George Romney and including five other domestic agency chiefs from the Cabinet. In April of 1969, Secretary Romney established the U.S. Office of Voluntary Action to act as the service arm of the Cabinet committee and to help develop the national program of voluntary action. Then, on February 20, 1970, a National Center for Voluntary Action was established to act as a private intermediary in mobilizing and integrating the efforts of Government, voluntary groups, individual volunteers, and other organizations. Thus, this National Center for Voluntary Action is

the "private partner" in the creative partnership evolved to carry out the right-to-read program and other domestic endeavors.

I believe this involvement of the private sector to be most worthwhile, not only for the good to be achieved in this program, but also for the model of operation it will establish.

In remarks to the National Reading Council, Mrs. Elinor K. Wolf, senior program officer of the U.S. Office of Voluntary Action, spelled out how the private sector hopes to function in the partnership. In so doing, she also outlined some basic presumptions about the right-to-read program that I believe are relevant to a wide spectrum of other education efforts. She also drew attention to supportive material developed for the Council. These resulted from a sincere and conscientious effort to contribute materially to the initial development of the program and show much careful work and consideration by the volunteer organizations. I request my colleagues to consider her remarks carefully, for if they are heeded in this program and others, the likelihood of success will be greatly enhanced for all.

Mr. President, I ask unanimous consent that descriptive material about the National Reading Council and the remarks of Mrs. Wolf before the group at its first meeting be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

REMARKS OF MRS. ELINOR K. WOLF, U.S. OFFICE OF VOLUNTARY ACTION, DELIVERED TO THE FIRST MEETING OF THE NATIONAL READING COUNCIL, SEPTEMBER 11, 1970

The Office of Voluntary Action, concerned as it is with increasing the quantity and quality of the voluntary component in federal domestic efforts was pleased indeed to be asked by Mr. Straley to prepare an initial plan for your consideration.

In fact we, and our private partner, the National Center for Voluntary Action, work jointly to extend voluntary opportunities to all people, not as a substitute for appropriate government action but as a supplement to enhance the right of all citizens in every nook and cranny of our nation to participate in improving the quality of our American life.

Specifically, the Office of Voluntary Action (OVA) has and is taking firm steps to assure that voluntary groups have optimum access to financial and technical assistance available to them from federal resources. As a catalytic agent OVA packages projects utilizing federal and private voluntary resources to demonstrate what can be created in a genuine partnership between government and voluntary agencies or individual volunteers.

Therefore our effort to assist you in your inaugural deliberations is simply doing what comes naturally to us. We hope at least some of the suggestions we have made in the overly large package before you will be helpful as you select your initial objectives and begin comprehensive planning for the long labor required to achieve a fully literate America. As you look at the initial objectives and plans on the front of the kit we prepared for you, let me share with you several concepts we had in mind.

1. The involved professional educator remains the key to the success of the Right to Read program. However, the voluntary component would *not* have been included in your discussions today if the professional educators, administrators and legislators had been entirely successful in achieving the standards which they undoubtedly set for themselves.

2. The school systems as presently constituted cannot achieve the goals of the Right to Read program alone. Fortunately, today, they acknowledge it and seek new partners. They welcome aid from many varied sources: from millions of citizens who hopefully will vote "yes" on school financing from more than 160 business firms experimenting with innovative performance contracts or from individuals, neighborhood residents, parents, college or school students who today have demonstrated their adaptability and reliability as supplemental aides both within and without our schools.

3. The greatest human need is to avoid wherever possible the failure syndrome, the child becoming addicted to failure at an early age when the "illness" is preventable and the future cost of reversal and rehabilitation would be high and unnecessary. Too many juvenile delinquents and unemployed youth show the effect of home-school neglect of the most basic tools of learning.

4. We know more about learning and reading than we are willing to admit or to try. We are pragmatists rather than purists. Though we don't know all; we will not allow ourselves to be paralyzed by nagging doubts or fearful of what we still have to learn about the learning process. Research and evaluation are still necessary but in establishing priorities we must concentrate on what we do know and *act now*.

5. Voluntarism and volunteering have become the "in-thing." People of all ages and all backgrounds want to relate and seek to become involved. President Nixon has reaffirmed the importance of voluntarism to our national life. United Fund studies have shown that the trend is away from the check book and toward the text book. Volunteer programs exist on most college and university campuses; major conferences of lawyers, sociologists, doctors and other professionals are examining new aspects of voluntarism. Universities give courses, a few even give degrees in volunteer coordination and training. Today the Civil Service Commission gives credit for responsible voluntary service in evaluating employee eligibility for establishing Goverment Service grade levels and the Department of Defense considers voluntary activity when examining for promotion.

6. More and more educators and school systems have recognized the heretofore unused potential of the parent in early childhood learning. Parents in the past were warned to refrain from "teaching" their children. It was considered the prerogative of the professioal. Now we have come to accept the parent as an ally and in most situations it is recognized that the parent *is* the child's first teacher and in family situations can and should be encouraged to play a reinforcing and even a specific tutorial role. Early childhood Parent Assisted Learning and reading programmed projects have been evaluated using parents of all ethnic backgrounds and the positive results are astonishing. In addition, youth tutoring youth or peer tutoring has produced quite unexpected results. Certainly the tutee has received benefits, but, in addition, the tutor—often a potential drop out—has been turned around through his new role, through a sense of being needed and an opportunity to give genuine aid to another human being. Recent Headstart and Follow-thru studies also attest to the effectiveness of heretofore untried parents as teachers.

With these thoughts in mind, we have placed in your packet the first steps we believe are necessary to harness the private, the parental, or the voluntary power ready and willing to be tapped. We mention the voluntary agencies and special projects already in service; we mention also some of the Federal departments in addition to the U.S. Office of Education such as the Department of Defense and the Department of Labor which wish to assist the Reading Council as your plans proceed. We cite, pertinent existing federal legislation and guidelines which need to be expanded and strengthened if your efforts are to be successful. Yet if we are realistic these efforts and programs are only a meager beginning of the major task which you have set for yourselves.

Specifically we suggest 4 immediate objectives and possible steps you might take to achieve them:

1. Further mobilization of volunteers and non-profit agencies in the National Right to Read program. We propose to do this by establishing a permanent subcommittee of the National Reading Council of already involved national non-profit organizations which have a special and long time interest in reading or early childhood programs—thru regional committees, training institutes, and further expansion of school volunteer programs to include students parents, senior citizens, businessmen on released time and, the utilization of stipends permitted under Title I ESEA to reimburse those who could not otherwise volunteer without financial sacrifice.

2. Organization of state, regional and local reading programs. We suggest this be done through a tightly knit coordination of HEW regional offices, the regional laboratories, the educational resources information centers and the non-governmental, state, regional and local reading committees. The Regional reading committees would spread out through state councils along lines already in being in Washington, Florida, Michigan and New York. The State Committees in turn would concentrate on those cities having a high level of educational difficulties and which, in turn, with the cooperation of the School superintendents, have encouraged expanded development of local and highly trained volunteer personnel. We suggest an award system to be developed as soon as possible both for in-school and extramural volunteer programs.

3. The development of training plans and training materials which will assist the volunteer to develop his maximum effectiveness. We are aware that only a few well designed materials exist for the upgrading and, frankly, the satisfaction of the volunteer working in a one-to-one relationship with a student. The volunteer himself is demanding better training and more useful materials. We suggest ways and means of satisfying these valid demands.

4. A major continuous information and dissemination system to cover evaluated or innovative programs, a calendar of national regional and local meetings, conferences, institutes and training programs as well as multi-media materials, books and films. It would be impossible to overstate the need for the mechanical accumulation and dissemination of what is known and available. As we mention in our report, a small informal meeting on September 2nd of private and government representatives was unanimous in its desire for a retrieval system. In the space age to continue to use a quill when data processing is available is surely short sighted in the extreme. We recommend techniques and methods for sharing information from multiple sources through the varying levels of our complex society.

The financial resources to support the above initial efforts may not be unlimited but the will, the desire and the support needed to begin these first steps exists throughout the country. Both OVA and the National Center for Voluntary Action are available and willing to do all they can to assist the National Reading Council. We can see particular areas of cooperation which we have not included in our written presentation but which we believe are of special relevance. For example, we are deeply concerned with

the delivery of eye screening and follow-up services to children with correctable eye defects. We also have uncovered the distressing lack of school library facilities particularly in elementary schools and have been asked by some 40 state school librarians to assist in securing volunteers to serve in existing school facilities. Volunteer action centers in 30 cities should be in operation within a few months. We have already packaged what we hope is a model program in five cities using specially trained volunteers to work with children having learning difficulties.

Programs of this nature provide us and you with a mutuality of interests which we would be eager to explore and develop should you wish it. As the National Center for Voluntary Action and the Office of Voluntary Action make up a federal-private partnership (do please look at the simple description of our joint program in your kit) we can see numerous opportunities for joint action with the National Reading Council. We might be the convenor of national organizations to supplement your plans in a variety of fields as I have just mentioned or as an additional hand to develop models of government-private cooperation which are an integral part of your long haul.

We see the National Program for Voluntary Action and the National Reading Council with our similarly inclusive approach toward the solution and resolution of a national need ready to demonstrate an effective and cooperative partnership, whenever in your judgment you believe it wise.

---

NATIONAL READING COUNCIL—A NEW PARTNERSHIP TO HELP THOSE WHO NEED TO READ

15 million school children cannot read well enough to make full progress in school.

1 child out of 20 cannot advance to the next grade.

25 million job holders may be denied advancement by reading weakness.

8 million adults are functional illiterates.

"The basic ability to read is a right that should be denied to no one, and the pleasures found in books and libraries should be available to all. President Richard M. Nixon.

A NEW PARTNERSHIP

When we decided to put a man on the moon, we marshalled money, minds, and every scientific and industrial resource needed for success. And we succeeded. But most of us were not direct participants.

As we set off to cure America's reading disease during the 1970's, we require a quite different marshalling of resources. Reading achievement requires active participation by millions of Americans. The methods are less important than simple determination, widely held, to produce a better result.

We must begin by designing the goals themselves because, while our failures in reading are clear, there are no generally accepted standards of success.

As educators we have tended to measure our effort in terms of money, materials, facilities. Now we must set standards of student achievement in reading and judge ourselves by the accomplishment of our students. These accomplishments must meet standards which spell opportunity in the world of work.

Vast resources outside the teaching profession are available to help with this goal-setting and accomplishment. We must invite to a full new partnership parents, other volunteers, business and industry, public and private organizations.

More money may be required as this direct effort to produce reading skills intensifies. The first need, however, is to build a new structure which will permit resources already available to join in improving results.

SUB-LITERACY IN THE UNITED STATES

The literacy level in the United States is among the highest in the world.

Pride in this has led many Americans to be complacent about certain less congenial truths.

The dark side of U.S. literacy is that there are millions of Americans who read so poorly they rarely read at all. There are many millions more whose lack of reading skill means they are denied full opportunity in our society.

There are an estimated 3,000,000 adult illiterates in the U.S., completely unable to read or write.

Approximately 5,000,000 youthful job seekers are functional illiterates, unable to read or comprehend any work-related materials.

An estimated 8,300,000 Americans over the age of 25 have been classified as functional illiterates.

An estimated 25,000,000 job holders—one in three—have reading deficiencies which are serious enough to deny them advancement.

Even more disturbing, despite the long-standing effort of U.S. schools to overcome reading disabilities, more than 15,000,000 of our 51,500,000 students—three out of every ten—suffer from reading deficiencies which prevent their full progress as students.

Every 20th child has such severe reading problems that he cannot go on to the next grade.

An estimated 8,000,000 children suffer from reading disorders requiring special remedies.

Reading problems are encountered even at junior college and college levels. Officials at many junior colleges have reported that among entering students 30 to 50 percent require reading help before they can progress with their regular studies.

Reading failures occur in rural, suburban and city areas and affect every race and every income level.

SOCIAL AND ECONOMIC COSTS

The United States cannot afford either the economic or social costs of having a substantial sub-literate minority in our population.

Ability to read with skill and understanding is central to every citizen's chance to take full advantage of the opportunities which exist in our country.

American industry operates in an increasingly technical setting which demands a steadily rising level of skills on the part of its employees. Unless reading competence becomes a reality, millions of young Americans will enter the work force during the 1970's lacking sufficient reading skill to make the kind of contribution that is needed or to earn a satisfactory living.

Programs of business to improve reading skills of employees may cost billions of dollars in the 1970's. Such costs must be borne by customers and taxpayers as government helps in this treatment of the symptoms of our reading disease. Increasingly, our educational emphasis must be directed to curing the reading disease and eliminating the human and dollar penalties of treating symptoms.

Among the 700,000 youngsters who drop out of U.S. schools each year, the evidence is that all are two to three years behind their age group in reading skill. For many of these youngsters, reading inadequacy becomes the prelude to life at the low end of the economic scale, oscillating between despair and hostility.

The cost to tax payers of holding one out of 20 school children in the same grade has been estimated at $1,700,000,000 a year.

In America's urban ghettos and rural slums, our inability to achieve a reading breakthrough threatens to doom another generation of young Americans to second-class status because of sub-literacy.

Indeed, since our political system depends for its progress and survival on the discretion of an informed citizenry, the very processes of democracy itself are damaged by the fact that so many Americans lack basic reading tools.

MARSHAL ALL RESOURCES

Public recognition that reading deficiencies are a serious problem for American education is not new. Particular schools or school districts, employing a variety of teaching techniques, have produced reasonably dramatic improvements in the reading skills of limited groups of students. Reading methodology is not the principal problem. The evidence is clear that we can teach individual children to read. The central problem is that we must teach millions who are not taught adequately now.

What has been missing in making a national reading effort a reality is a partnership structure which will bring to bear the skills and resources of the educational community, the communications media, business, labor, government at the local, state, and federal levels, and the public at large.

A striking example of what a partnership approach can achieve is provided by the recent report of the Children's Television Workshop on the educational impact of its widely praised series, "Sesame Street." The program, supported by the Office of Education, the Carnegie Corporation, the Ford Foundation, the Markel Foundation and the Corporation for Public Broadcasting, is designed to improve the basic language, numerical and reasoning skills of pre-school children, particularly in low-income families.

Before-and-after tests reveal that following the first six weeks of programming, children who watched "Sesame Street" made gains in recognition of letters, numbers and geometric forms amounting to two or three times the improvement shown during the same period by a control group of non-viewers. While the evidence is preliminary, it suggests that effective use of television techniques adapted from the world of commercial advertising can make a significant contribution to pre-school education. Similar cooperative efforts between the public and private sectors are a principal goal of this program.

The best hope for breaking the cycle of sub-literacy during the decade of the 1970's lies in the preventive approach—teaching the young before deficiencies develop and grow more and more deep-seated. An out-of-school program for dropouts and adults, while important, is substantially more difficult to organize and less certain to achieve the desired results. Emphasis in a nationwide drive must therefore go first of all to reaching our children.

THE PARTNERSHIP STRUCTURE

To begin a massive new effort, in which the federal government intends to be partner rather than proprietor, President Nixon is appointing a National Reading Council, headed by a board of trustees drawn from many segments of our society.

The National Reading Council will advise the Office of Education on priorities in its reading programs. Members of the Council will also assume key roles in directing and operating a National Reading Center.

The National Reading Council will include representatives of the education profession, state and local governments, labor unions, business and industry, the communications media, the foundations, youth groups, volunteer groups, etc., as well as individuals whose experience in such fields as publishing, public relations, advertising, entertainment and the arts may contribute to the achievement of the program's objectives.

The operating arm of the National Reading Council will be the National Reading Center, which will be established with federal funds outside the official apparatus of the Office of Education. Its primary purpose will be to carry out the partnership approach, coordinating the efforts of contributing organizations, organizing the training

of citizen volunteers, developing public support, and helping the states to undertake similar programs.

After the National Reading Center has operated for enough time to evaluate its own performance, each of the 50 states may be invited to establish a comparable State Reading Center. The 10 regional offices of the Department of Health, Education, and Welfare will each have Reading Coordinators to work with the State educational leaders on behalf of the National Reading Center. These coordinators will be directly responsible to the National Reading Center.

National Reading Council: Board of Trustees, Honorary Chairman, Chairman, Associate Chairman, Executive Committee.

National Reading Center: Director—Staff.

Nine Major Functions:

1. Assist Office of Education in setting of reading priorities of resources and effort.
2. Coordinate efforts of educational organizations and associations.
3. Ombudsman for non-professional educational interest.
4. Clearinghouse for business and industrial reading training contributions.
5. Organize national media efforts to improve reading achievement. Publishers and other media.
6. Lead organization and development of citizen volunteer reading trainers.
7. Develop award and other incentive programs for reading accomplishment.
8. Operate a National information Program to create added public support and effort.
9. Set guidelines for State Reading Centers and assist states in their organization and functioning.
10. Regional reading coordinators: State reading centers.

OFFICE OF EDUCATION

Within the Office of Education, it is recommended that an *Office of Reading Progress* be established, consisting of three branches—the Professional Aid Section, the National Reading Laboratory, and the Office of Education Regional Offices.

*The Professional Aid Section* will be the center of assistance to the reading-teaching professional. It will evaluate the results of research and demonstration projects, gather available information about reading progress, and disseminate such information to anyone in a position to use it. In addition, this section will be the central coordinating agency of all federal projects related to reading, including those administered by agencies other than the Department of Health, Education and Welfare, and will coordinate all activities concerned with teacher training programs in reading.

*The National Reading Laboratory* will have responsibility for research. It will conduct, contract for or stimulate research projects, some of which may come from suggestions of the National Reading Council. It will work on development of methods for testing and measuring reading performance. It will also work with other public and private groups to mesh research efforts on the causes of reading impairment, on training techniques, and on the development and improvement of educational hardware and software.

*Office of Education Regional Offices.* The Office of Reading Progress will have representatives in each of the Office of Education's regional offices to work with professional educators. They will be counterparts of coordinators responsible to the National Reading Center.

*Reordering Educational Priorities.* If we are to make the desired progress, reading achievement must be assigned a top priority in American education at the federal, state and local level.

This new partnership structure will provide a mechanism both at the federal level and at state levels to enable distinguished non-educators to counsel with education professionals in setting reading priorities. It will also serve as a channel for groups and individuals prepared to assist in improving student accomplishment. Development of techniques to make such assistance effective will necessarily be among the earliest of the new partnership's tasks.

Among specific issues it will consider are these:

1. How best to incorporate into the overall program the efforts of private firms, institutions and individuals so as to derive maximum benefit from their innovative contributions to reading-learning achievement.
2. How to make effective use of the resources and capabilities of the communications media, including book publishers, magazines, newspapers, commercial and noncommercial television radio broadcasters and others.
3. How to assist the states to establish meaningful reading achievement standards supported by effective testing programs.
4. How to furnish assistance through the states to recognize and reward school administrators and teachers for achievements in teaching reading.
5. How to improve federal programs intended to assist teacher-training institutions to upgrade the skills of classroom teachers and of remedial reading specialists.
6. How to create particular focus on efforts in kindergarten through third grade where the reading-learning process is most critical.
7. How to enlist and train more young and adult volunteers to assist and supplement professional educators in teaching children to read.
8. How to assist the states in making widely available special materials which can be used effectively by parents and adult volunteers to help their own children and other children to improve their reading performance.
9. From state standards of reading achievement, and measurements of performance against those standards, the National Reading Council will make an annual report to the President and to the Congress on progress in realizing gains in reading achievement.

Anyone knowledgeable about current trends in American education will immediately recognize that this is a formidable and controversial agenda.

It would not be possible today, for example, to prepare a truly meaningful national report on reading achievement. Statewide standards of reading achievement are conspicuously absent in many states and there is no general effort to measure statewide reading performance, much less any agreement about testing techniques. There is a plethora of argument about teaching methodology, and competing approaches often exist side-by-side in the same school system. Yet the evidence is that no single methodology is best for every student and every teacher, and that skill in whatever method is selected, and commitment to accomplishment are more important.

Whatever the techniques, dramatic national improvement in reading achievement will require support of all groups in our society. It will necessitate systematic analysis of current efforts and the development of priorities for the allocation of available resources. Our approach emphasizes structure rather than program because only a new structure can provide the total resources needed finally for real reading achievement.

At the federal level, we must begin our national reading effort for the 1970's with the undramatic but necessary task of organzing our national resources in such a way that we can be of maximum usefulness to the states and the school systems. For it is there that most student achievement takes place.

In this decade, we must add to the magnificent accomplishments of our educational system, the curing of our reading disease. Let us organize ourselves so that every needed resource may be brought to the battle. This is the meaning of OUR NEW PARTNERSHIP.

## CIVIL SERVICE RETIREES DESERVE GREATER INCOME CONSIDERATION

Mr. PROUTY. Mr. President, I have repeatedly reminded the Senate of the problems facing older Americans. I would like to take a few minutes today to speak about a very specific subject related to a tendency I have often noticed for many of us to think of older Americans as a single group all making up a statistic for the country as a whole.

We all know that there are nearly 22 million Americans age 65 or over. We often think that they all have the same problems, the same benefits, and the same needs. That simply is untrue.

Earlier this week, I testified before the Committee on Finance. Among other things, I urged the members of that committee to extend eligibility under the so-called Prouty amendment. Specifically, I asked that one be made eligible for the Prouty amendment if he becomes age 70 before 1972. Under the present law, one had to be age 72 on or before December 31, 1967, in order to be considered for eligibility under the Prouty amendment.

In numerical terms, adoption of my amendment would mean an additional 700,000 older Americans would be eligible for the benefits under the Prouty amendment.

It is interesting to know that since my amendment was adopted, in March of 1966, nearly 2 million older Americans have benefited.

More than 654,000 of those beneficiaries are still living, and as a group they receive nearly $25 million each month.

The individual benefit under my amendment has increased from its original $35 a month to its present $46 a month.

I hope that the monthly payment will be increased to at least $50 a month during this Congress.

When I submitted my amendment in 1965, I had done a considerable amount of research into the economic status of older Americans. I was shocked for a number of reasons which I will not go into now. I shall mention, however, the facts that I found to be most shocking.

As the country's largest employer, the Federal Government has a unique responsibility to its two and a half million civilian employees. These are the men and women who actually make this country work. They are the individuals who provide the services which insure the security and well-being of their 200 million other fellow Americans.

Their jobs reach into almost every aspects of our lives. The mail we send depends upon them. The safe quality of the meat we eat depends upon them. The safety of the cars we drive depends upon them.

I could go on and on, but let me simply say that our domestic wellbeing, our foreign policy, and our national defense depend almost exclusively on the good work of the Federal employee.

In 1965 I took a particularly close look at the type of retirement system we have provided for Federal employees and the amount of retirement benefits retired Federal employees were receiving. I was appalled. The Federal civil service retirement system did not provide adequate income replacement for its dedicated workers. I realize that we had amended the Civil Service Retirement Act in 1963 to provide an automatic cost-of-living benefit increase provision. But we had not made up for the past. We had failed to increase the basic civil service retirement benefits.

While the automatic cost of living provision may have eased our consciences, it did little to fill the empty pocketbooks of retired civil servants.

I recall when I was successfully arguing in 1966 for my amendment to provide a special benefit payment for those who had been missed under social security coverage a piece of evidence that did more to convince Senators that my amendment was good than any other piece of evidence I had used.

Let me read a memorandum that I read then:

MEMORANDUM ON FEDERAL RETIREMENT ANNUITIES

Of the more than 200,000 surviving widows and children of civil service retirees, 38 per cent receive less than $50 a month; 79 per cent receive less than $100 a month; 93 per cent receive less than $150 a month. Ninety-nine per cent of all surviving widows and children receive less than the so-called poverty level of $3,000 a year. Of the 170,000—some widows on the civil service retirement rolls as of June 30, 1965, the average age was 65.8, the average annuity a meager $80 per month.

The situation of surviving widows and children is not necessarily the most desperate. Look at the unfortunate figures relating to employee annuitants: 49,700 receive less than $50 a month; 126,100 receive less than $100; 214,300 receive less than $150 per month; 307,600 receive less than $200. Viewing the so-called poverty level as $250 per month, 377,500 civil service employee annuitants out of a grand total of 508,500 receive less than poverty-scale annuities.

Alarmingly enough, nearly 74 per cent of all civil service employee annuitants receive less than the magical poverty level.

I was alarmed by those statistics then, and I continue to be alarmed by similar statistics now.

As the country's largest single employer, the Federal Government should be providing retirement protection for its employees second to none. Instead it has a retirement system basically the same as Congress intended in 1921 when it enacted the civil service retirement system. Certainly it has been modified by subsequent Congresses, but basically it continues to be a staff retirement designed more for worker retention than for retirement protection.

For example, when survivor benefits under the civil service retirement system are compared to survivor benefits under social security the disparity is disgraceful. Did you know, Mr. President, that the surviving widow and one child of a deceased civil service employee earning $500 a month and with 5 years' Federal service would receive a $78 a month benefit while had her husband been under social security instead she would get $266 a month.

Did you realize, Mr. President, that for that widow of a civil service employee to get that $266 a month her deceased husband would have had to been employed for 40 years in the Federal Government. I could repeat example after example showing the complexity and inadequacy of the civil service retirement system, but my purpose today is not to overhaul or revamp that system.

Within the next couple of weeks, the Senate will be debating amendments to the Social Security Act. Let there be no doubt about it: social security must be improved. We must develop in this rich country an adequate income maintenance system for older Americans. However, when that debate takes place, let us remember that not all older Americans are covered under the social security system. Most important, let us not forget more than 800,000 beneficiaries of the Federal civil service retirement system.

I realize that we have made progress in improving Federal civil service retirement benefits. We have increased the benefits and have liberalized the formula by which benefits are computed. But, quite frankly, we have not done enough.

The Federal Government should be setting the example for all other employers in this country. It is not. In the newspapers within the last couple of days we have read that the auto workers are unhappy with a retirement plan proposal which would grant them $500 a month after 30 years of service. The Federal civil service retirement system does not even match the pension available to the United Auto Workers. But even more significant is the fact that the United Auto Workers are able to receive social security benefits in addition to their private pension benefits. I am hopeful that Congress will move in the near future to provide the retired Federal civil servant with a retirement system second to none.

---

## JUSTICE DEPARTMENT OPPOSES SPECIAL INTEREST RIDER IN ONE-BANK HOLDING COMPANY BILL

Mr. PROXMIRE. Mr. President, last week the Senate passed a bill which ostensibly regulates one-bank holding companies, although an amendment added in committee would exempt 82 percent of one bank holding companies from Federal regulation. The companies exempted include some of the Nation's largest conglomerates such as Gulf & Western, Tennaco, Minnesota Mining & Manufacturing, and Sperry & Hutchinson, otherwise known as the S&H Green Stamp Co.

On September 17, 1970, Mr. Donald Baker, Deputy Director of Policy Planning, Antitrust Division, Department of Justice, delivered a speech at the Federal Bar Association Convention in Washington. In the speech, the Justice Department official blasted the so-called conglomerate amendment which the Senate unfortunately voted to retain by a narrow vote of 37 to 34. Mr. Baker states that:

We in the Justice Department have strongly opposed this special interest rider, which is inconsistent with the whole thrust of the 1970 legislation; and we shall continue to urge the House-Senate Conference to eliminate it.

Mr. President, it is encouraging that the administration has taken a strong position on the one bank holding company bill. We need to enact legislation free of special interest exemptions and I am hopeful that the House-Senate conference committee can reach an adequate solution.

Mr. President, I ask unanimous consent that the text of Mr. Baker's remarks before the Federal Bar Association convention be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

BANKING AND BIGNESS—AND THE SEARCH FOR A BETTER TOMORROW

(Remarks by Donald I. Baker, Deputy Director of Policy Planning Antitrust Division Department of Justice)

In Washington—this great mecca of reporters, lobbyists, and pundits—it sometimes seems more important to be topical than to be absolutely right. Anyway, with this excuse, I am going to be topical. Today I am going to talk about bank holding company legislation.

It now seems clear that such legislation will be enacted this year; and that it is directly relevant to today's discussion of economic concentration. Of course, we cannot tell exactly what final form the legislation will take, but the House and Senate versions are close enough in various fundamental respects for us to proceed on some reasonably confident assumptions on fundamental points.

In the first place, the 1970 legislation will deal squarely with what can be called the Zaibatsu problem—the danger that a few huge industrial-financial enterprises might come to dominate our economy. Both House and Senate would henceforth bar holding companies from controlling both banks and non-financial enterprises. This is a sound decision: no significant economic gains are seen from allowing banks to become major elements in general commerce and industry; and such a development involves economic and political risks which are not worth running even if they were remote. In saying this, I recognize that it is fashionable among various economists to scoff at the Zaibatsu risk—perhaps because the problem is only partially an economic one in an immediate sense. It has social and political implications as well. Anyone who saw the success of a few of the nation's largest banks in promptly getting special legislation[1] to reverse an adverse antitrust decision would think twice before allowing such a bank to combine with, say, General Motors, Lockheed, or CBS, *even assuming there were no direct or immediate economic effect involved.* Those with political power often have it within their capacity to secure exemption for competition on the basis of justifications which few economists can subscribe to.[2] That simply is the fact of life in Washington (and in the state capitals around the country). It should not be ignored.

Unfortunately, the Senate has just illustrated this point again by passing the so-called "Williams Amendment"[3] to the pending bank holding company legislation—an amendment which would permit a group of individual conglomerates to keep control of banks they now hold.[4] We in the Justice

---

Footnotes at end of article.

Department have strongly opposed this special interest rider,[5] which is inconsistent with the whole thrust of the 1970 legislation; and we shall continue to urge the House-Senate conference to eliminate it.

While the industrial-financial Zaibatsu is out, banks are going to be given greater flexibility to enter other financial areas via the holding company route. This again is a sound decision—since real economic gains may be realized in this area. The traditional boundaries in finance may well have become less meaningful in this age of the computer; banks and bank holding companies may be sources of new competition and new innovation in a variety of other financial markets. It is for this reason that the Administration has been actively supporting legislation to permit bank holding company expansion into other financially related fields, subject to adequate regulatory supervision.

Such a course does involve some competitive risks, which I shall discuss in greater detail. We recognize these risks, but we believe that they can largely be dealt with by the types of regulatory action which I shall discuss. We think that such a pragmatic approach is altogether preferable to what the House did last November in creating the celebrated "laundry list" of activities prohibited to banks and bank holding companies. This "laundry list" prohibits banks and bank affiliates from:

(1) engaging in the securities business (including mutual funds);

(2) engaging in insurance (other than credit life insurance) as principal or agent;

(3) operating a travel agency;

(4) providing auditing or other accounting services;

(5) providing data processing services—other than (a) payroll services or (b) leasing of computer capacity;

(6) leasing of property (except where such lease in effect constitutes a sale).

This detailed list represents *the most inflexible way* of dealing with a legitimate concern about the risk of creating giant financial combines, made up of very large banks, insurance companies, and mutual funds. In so doing, it ignores both antitrust remedies and the opportunity for more selective regulatory action by the Federal Reserve Board. The reason for this is clear. The "laundry list" does not represent a careful Congressional weighing of the economic advantages and disadvantages of bank entry into particular financial fields—rather, it represents a barometer of political clout among those who fear new competition from banks. The Administration strongly opposes this inflexible and unwise provision; and we shall urge the Senate conferees to press for its elimination (perhaps they might give up the "Williams Amendment" in exchange!)

Assuming that the "laundry list" is eliminated, the main responsibility for enforcing this legislation is going to fall heavily on the Federal Reserve Board (which is, happily, one of the most capable regulatory agencies in town). The Board will have to determine what financial activities banks will be able to enter and what particular entry transactions are to be permitted. This being so, I am going to take this opportunity to offer a little free advice, from the antitrust perspective, on how the legislation should be enforced.

The statute is likely to give the Board authority to authorize banks' entry into an activity of a financial or fiduciary nature provided that the Board finds that (i) the activity is "functionally related to banking;" and (ii) it "can reasonably be expected to produce benefits to the public, such as greater convenience, increased competition or gains in efficiency that outweigh possible adverse effects such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices."[6] This should give the Board substantial latitude to exercise its experienced judgment in weighing the competitive and other benefits and detriments.

In administering such a standard, the Board will be faced at the outset with some traditional public policies in this field. We have a long-standing policy of separating banks from other areas of activity. This policy rests on a number of considerations, including a desire to insure bank solvency and a populist fear about the power of these unique money institutions and the danger of economic concentration. A second general policy is that banks be tightly regulated to insure their solvency. This heavily reflects the bleak days of the early 1930's. Under this policy, entry is controlled, branching and other expansion is limited, and detailed business practices are supervised.

The Board may well have to rethink aspects of these policies as it enforces the 1970 Act. Bank solvency is still a basic consideration—because a bank failure is a community disaster—but it is not the only consideration. The American public should have the benefit of innovation and efficiency in banking, and competition is, I submit, the surest source of these traditional economic virtues. Bank regulatory restrictions on entry and on competition, born under the shadow of the Blue Eagle, are not necessarily the answer to today's needs. I would point out in this connection, that most recent bank failures have not been associated in any way with competitive pressures—but have been the product of insider dishonesty, fund brokering, and the like. Bank regulation should be directed more to those problems and less to maintaining restrictions on entry or the encouragement of anticompetitive mergers. In sum, there is, without doubt, a good case for abandoning some of the traditional fetters on banks. Banks are, as Professor Wallich says, overly regulated and overly protected against new entry into their own field of activity.[7] They (and their affiliates) should be given greater flexibility as to the financial areas which they are permitted to enter. Banking is not a static form of activity; modern bankers can and do offer a variety of specialized services which would have been entirely unknown to their predecessors of a few generations ago. This type of innovation should be encouraged. And it should provide the basis for bank entry into other financial markets where, for example, competition may be weak, or old-fashioned ways still dominate.

The Federal Reserve Board is also going to have to wrestle with real competitive dangers associated with bank entry into other markets. The basic danger is that of monopoly power, particularly in local markets. It is well recognized that banks tend to enjoy a significant degree of at least local economic power. This rests on a number of considerations. Banks are protected by regulation from both free entry and full competition. Also, banks enjoy power vis-a-vis borrowers because the borrowing relationship tends to be a continuing one, with little effective opportunity for "shopping around" for most borrowers, and such a relationship requires considerable disclosure of confidential internal business information necessary for credit evaluation. In times of tight money, banks "ration" a scarce and essential commodity to "good" customers.[8] When banks "ration" credit, rather than raising the price to the point that supply and demand meet, the process produces unexercised monopoly power—power which must be abandoned or used through transfer into some other market. This combination is a source of real economic power. Such power is probably more pronounced in small markets where competitive alternatives are fewer and oligopoly conduct is the rule.[9] Given this situation of local market power, bank expansion into other activities in the same geographic area produces some real dangers. Needless, to say, the threat of having one's credit withdrawn may be a powerful discipline for both competitor and customer in the non-bank field.

These competitive risks can take a variety of different forms. Overt tying and reciprocity are possible. So is outright favoritism of bank affiliates—for example, on credit. By and large, these can be dealt with by legal remedies against the specific conduct.

More serious are what one might regard as *structural* dangers, dangers which inevitably result from the bank's market power vis-a-vis the borrower. No coercion is involved. Rather, the borrower, recognizing the bank's discretion and economic power, is tempted *voluntarily* to patronize bank-affiliated enterprises in the hope of improving his chances to obtain credit from the bank or to obtain it on favorable terms. In antitrust parlance, this is now called "tying effect"—to emphasize that the economic effect is just as serious as with overt tying.

The tying effect problem can be easily illustrated. Thus, for example, without any coercion, a loan applicant might offer to place his casualty insurance business with a bank-affiliated insurer, hoping that this would improve his chance of the bank granting him a mortgage loan on the insured premises. The banker, sitting solemnly across the table, has done nothing wrong; he is the silent beneficiary of a tight money market in which credit is being rationed. And yet the borrower's action has the same effect as a tie-in: competition in the tied product (i.e., insurance) is affected to the extent that customers no longer purchase it entirely on its economic merit. The problem becomes progressively more serious as a pattern of such bank-insurance affiliations develops, thereby increasing the potential degree of foreclosure in the tied field.

This problem is intensified because legal tools are inadequate to deal directly with such voluntary tie-ins. Coercive tie-ins can be reached by direct legal prohibitions and sanctions, but what *conduct* is there to prohibit with the voluntary tie-in? Do we prohibit the loan applicant from *thinking* that his self-interest may be served by patronizing the bank's insurance affiliate? Do we prohibit the banker from sitting there solemnly? Clearly not—unless we wish to turn the marketplace into a Mad Hatters' Teaparty.

Instead, what we must do is prevent the creation of market structures in which such voluntary tie-ins seem likely to flourish. In particular, leading banks and leading sellers of related products *in the same market* should be prevented from combining. The Board will have to deal with this problem.

Tying effect and tying may be the most serious competitive problems—but are not the only ones involved. Let me mention a few others.

*Elimination of Direct Competition.* Bank holding company acquisitions in other financial markets may involve elimination of direct competition where the bank and the non-bank institution provide the same product in the same geographical area. Thus, for example, an acquisition by a leading bank of a leading savings and loan institution in the same community is likely to involve elimination of direct competition for residential mortgage loans and various forms of time and savings deposits in that community. Another example may be bank acquisitions of consumer finance loan companies (as the Government alleged in its recent *Wachovia Corporation*[10] case). Analysis

Footnotes at end of article.

of such transactions will require regulatory use of specialized financial sub-markets; in its recent *Phillipsburg* decision, the Supreme Court noted that this approach ". . . would be clearly relevant . . . in analyzing the effect on competition of a merger between a commercial bank and another type of financial institution." [11]

*Reciprocity.* Bank expansion no doubt involves expanded opportunities for reciprocity—a practice that the Department of Justice is vigorously attacking under the Sherman Act.[12] We know that a considerable amount of reciprocity already exists in financial industries. One example will suffice. It has long been customary, as the SEC's 1963 *Special Study* recognized,[13] for banks to allocate securities brokerage service on the basis of deposits maintained by the broker at the bank. This is plain old-fashioned reciprocity. We have recently warned the banking community through the American Bankers Association that we regard such reciprocity as illegal; and that, if it continues in the future, we will bring suit for injunctive relief to deal with the problem. Needless to say, the opportunities for reciprocity expand with diversification: the example I have just mentioned arises from combining deposit and fiduciary functions in the same institution. As banks expand into new areas, even greater opportunities will arise. These risks are clearly something the Board will have to deal with.

*Voting Control.* A third problem is presented by the role of bank trust departments, a topic of lively concern these days. The Justice Department's *Cleveland Trust* case is aimed at the trust departments' exercising effective voting control over major competitors in the same industry (it is also concerned with director interlocks resulting from trust department shareholdings).[14] I note in this connection that the FCC has proposed a rule that would limit the ability of bank trust departments to control stock in competing local broadcasting stations in the same market [15]—which shows that others are concerned about the same problem. Obviously the situation becomes even more complex when one contemplates bank holding company expansion into new financial markets; if the bank enters, say, data processing, and at the same time its trust department controls an influential block of shares in its principal local data processing competitor, the community is likely to suffer some loss of actual and potential competition. Clearly the Board must be concerned about this problem.

*Director Interlocks.* A fourth related problem is that of director interlocks—already covered to some extent, albeit obscurely, by Section 8 of the Clayton Act. (This is a provision, incidentally, which both the Board and the Department of Justice are charged with enforcing). We know that there are quite a lot of director interlocks between banks and other financial institutions. This alone raises some problems, but clearly these will become considerably worse as banks move into new areas of financial activity and the traditional barriers between banks and other financial institutions are lowered. The Board will clearly have to take a hard look at the interlock problem in administering its responsibilities under the new Act.

Let me now turn from this general discussion of competitive problems to some more specific suggestion as to how the Board might deal with them.

1. In exercising its general responsibility to authorize bank entry into particular financial fields, the Board should give primary weight to its judgment on the economic performance of the industry involved. The level of efficiency and competition in that industry are particularly important. Bank entry involves some competitive risks, but where the industry involved is inefficient and non-competitive to any marked degree, then the case for running those competitive risks is fairly strong. This is particularly true where banks or bank affiliates can be expected—or perhaps required—to offer an innovative approach to the problems of that industry. For example, bank entry into a financial field generally characterized by high-cost selling methods would be particularly useful if it could be expected to offer low sales cost alternatives. Thus, it might be appropriate for the Board to authorize bank entry into "no load" mutual funds but not into front-end load funds. Another example is life insurance: in such states as New York and Massachusetts savings banks have been authorized to offer what amounts to "no load" life insurance. This is a useful competitive alternative to traditional high-cost insurance selling methods. And the Board should consider allowing bank entry here, even if it were to keep banks out of the general life insurance business. (This discussion of mutual funds and insurance naturally assumes that these items will be dropped from the House-passed "laundry list" of prohibited activities).

2. Bank holding company expansion should be preferred, or at least simplified, in geographic areas where its banks do not operate. This is the surest way to avoid any elimination of direct competition and the risks of tying previously discussed. As I have already indicated, the risk of *voluntary tying* (or "tying effect") is particularly significant here; it is a structural phenomenon, based on customer recognition of the bank's market power rather than on overt coercion by the bank. It is particularly serious where the bank and non-bank enterprise are significant sellers of related products to the *same* customers; since most banking is a local service business, this is most likely to occur where the bank and the other business operate in the same geographic market and hence face the same potential customers. This has important practical implications for the Board. It suggests that normally the Board should insist on careful case-by-case scrutiny of proposed bank entry in related financial fields through acquisition of another enterprise serving the same geographic market; and such inquiry might sometimes be necessary for *de novo* entry in the same geographic market where the risk of tying or tying effect is significant. On the other hand, the Board might develop general guidelines which would allow for more or less automatic approval for bank entry into appropriate fields, where the entry is to take place in an entirely different geographic market. Such "automatic" approvals might have to be conditioned on the acquired enterprise not expanding into the bank's geographic area without subsequent Board approval. This approach (which might have to be qualified for the very largest banks) would tend to channel expansion into areas where the bank holding company could use its skill, capital, and know-how, but not its market power, as a competitive tool.

3. When dealing with particular acquisitions, the Board—which already bears responsibility for Clayton Act enforcement—should look generally to the principles that it and the courts have been developed under Clayton Act § 7 (and under the similar standard of the Bank Merger and Bank Holding Company Acts of 1966). The Board should not permit a bank holding company to acquire a significant competitor in the same field. For example, a bank heavily engaged in consumer lending should not be permitted to buy a significant finance company in the same geographic market. Moreover, the Board should recognize here (as it has already done in banking) that it is important to preserve sources of potential competition into concentrated financial markets.[16]

4. A bank's trust department holdings should be considered when the Board is faced with the question of whether to authorize a particular holding company transaction. This seems to me to have two aspects. First, the Board should not authorize a bank to enter a field where its trust department has the right to vote a significant proportion of the stock of any competitor in the particular product and geographic market involved. Moreover, the Board order approving any such expansion should specifically prohibit future trust department holdings of competitors in the affected field. Secondly, when a bank holding company seeks to expand into mutual funds or insurance (assuming these prohibitions are struck from the negative "laundry list" in the House-passed bill), the Board should probably consider whether this is likely to augment extensive voting power already held by the bank's trust department. In such circumstances, it might be necessary to think in terms of the over-all voting power of the combined bank-mutual fund-insurance enterprise. For this reason, the Board might—and I stress might—wish to prohibit the banks with the very largest trust departments from entry into mutual funds or insurance. Alternatively, the Board might consider imposing an over-all limitation on the combined holdings *in a single company* of the trust department, mutual fund, and insurance company; for instance, the Board might require that combined holdings not exceed 5% of the voting stock of any company (a limitation already generally used in connection with open-end investment companies under the Investment Company Act of 1940).

5. The Board should not permit a bank holding company to enter a field where there are substantial director or management interlocks between the bank and any other significant competitor in that field. This result may well be required by Clayton Act Section 8—and certainly is in accordance with the policy behind that section. Unfortunately, Section 8 is, as I have already noted, a rather obscurely drafted provision; and the Board may want to avoid some difficult questions of interpretation by conditioning Bank Holding Company Act approvals on continued compliance with its own (hopefully) clearer rules.

6. The Board should resist the inevitable pressures for "small bank" or "small market" exemptions from general prohibitions. A small bank in a small market may be closer to the Jeffersonian ideal, but vis-a-vis its borrowers it tends to have the same kind of economic power that I have already discussed. Indeed, such power is probably more pronounced in small markets where the competitive alternatives are necessarily fewer and where oligopoly conduct—if not outright collusion—is a way of life. We cannot allow our concern about large banks in major money market centers to obscure real competitive problems that can and will occur if bank expansion is not appropriately regulated in small markets as well. This incidentally is the clear and cogent message of the Supreme Court's *Phillipsburg* decision: Competition is as important on Main Street as on Wall Street.[17]

To conclude, there is a nice expression among practicing lawyers: "free legal advice is worth what you pay for it." No doubt, free non-legal advice is worth even less.

FOOTNOTES

[1] On March 10, 1965, the District Court ruled that the consummated merger of Manufacturers Trust Company and Hanover Bank violated Sherman Act § 1 and Clayton Act § 7. *United States* v. *Manufacturers Hanover Trust Company*, 240 F. Supp. 867

(S.D.N.Y. 1965). No appeal was taken. However, 26 days later (on April 5, 1965), Chairman Robertson of the Senate Banking and Currency Committee introduced the bill (S. 1698) to (1) exempt bank mergers from the anitrust laws and (2) give retroactive forgiveness to the *Manufacturers Hanover* merger and four other consummated bank mergers still under prosecution by the Justice Department. This came almost two years after the Supreme Court's *Philadelphia National Bank* decision (June 17, 1963) and almost a year after its *Lexington* decision (April 6, 1964). Senator Robertson's bill progressed rapidly in the Senate: on June 8, 1965 it was reported out of the Senate Banking and Currency Committee, after only three days of hearings, and it passed the Senate three days later on a voice vote. In the House of Representatives, a major battle developed and S. 1698 was substantially amended. This led to compromise contained in the Bank Merger Act of 1966, 80 Stat. 7, 12 U.S.C. 1828(c), enacted February 21, 1966. This legislation included (1) the antitrust special procedure and a special "convenience and needs" defense applicable to bank merger cases; (2) a bar against future antitrust challenges (except under Sherman Act § 2) to prior unchallenged bank mergers; and (3) special forgiveness provisions retrospectively validating the *Manufacturers Hanover* merger and the two other consummated pre-*Philadelphia* mergers then in litigation—namely, *Lexington* and *U.S.* v. *Continental Illinois Bank and Trust Company of Chicago*. However, no such forgiveness was provided for the three other consummated post-*Philadelphia* mergers then pending in California, Tennessee, and Missouri. Three days after the passage of the 1966 legislation, Manufacturers Hanover sent a letter to its stockholders suggesting that they let Senator Robertson know they "appreciated his attitude and efforts." *The New York Times*, June 17, 1966, p. 27 (quoting from letter dated February 24, 1966).

[2] Various forms of outright statutory exemption from the antitrust laws cover agriculture, labor, transportation, insurance, professional football, and newspapers. In addition, other industries are subject to statutory schemes of regulation which may allow "regulatory" considerations to override antitrust law in particular circumstances; included in this group are commercial banking, securities exchanges, broadcasting, common carrier communications, pipelines, and others. See generally Volume 33 of *A.B.A. Antitrust Law Journal* (1967).

[3] The "Williams Amendment" (Section 103(7) of the Senate Committee Print) provides two kinds of exemptions. The first exempts commercial corporations' ownership of banks with a *net worth* of not more than $3m. The second is for diversified conglomerates: it exempts such corporate control of a bank with up to $50m. in net worth provided that that bank's net worth is not more than 25% of the net worth of the holding company. A bank's total deposits tend to run about ten times its net worth. This provision is in addition to a "grandfather" clause (Section 103(b)) which would exempt holdings as of March 24, 1969; many of the smaller one-bank holding companies covered by the $3m. limitation in the Williams Amendment would also be covered by the grandfather provision.

[4] See *National Journal*, July 18, 1970.

[5] See letter from Richard W. McLaren to Senator Proxmire dated June 30, 1970, reprinted in Senate Banking Committee Report on H.R. 6778 (August 10, 1970) at pp. 40–41.

[6] This language is contained in both the House passed bill and the bill reported by the Senate Banking Committee.

[8] Credit rationing occurs because banks do not generally charge the full monopoly price on credit in times of tight money. Such "profit maximizing" conduct is restrained by a variety of factors—including usury laws, the intense political and public resentment against high interest rates in this country, and the habits bred in continuing customer relationships.

[9] As, for example, suggested by Paul M. Horvitz and Bernard Shull, "Branch Banking, Independent Banks, and Geographic Price Discrimination," 14 *Antitrust Bulletin*, 827–844 (1970).

[10] *United States* v. *Wachovia Corporation, et al.* Civ. 2656 (W.D.N.C.) filed April 24, 1970, preliminary injunction denied, 1970 CCH Trades Cases ¶ 73,213.

[11] *United States* v. *Phillipsburg National Bank and Trust Company*, 1970 CCH Trade Cases ¶ 73,245 (1970).

[12] *See e.g., United States* v. *United States Steel Corp.*, Civ. No. 69–729 (W.D. Pa., filed June 13, 1969), consent judgment, 1969 CCH Trade Cases ¶ 72,826; *United States* v. *Inland Steel Co.*, Civ. No. 70 C 1305 (N.D. Ill., filed June 1, 1970), consent judgment, 1970 CCH Trade Cases ¶ 73,197; *United States* v. *Republic Steel Corp.*, Civ. No. C 70–609 (N.D. Ohio, filed June 29, 1970), consent judgment filed (1970 Trade Cases ¶ 73,246). The Department has also attacked mergers possessing high potential for reciprocity. *See, e.g., United States* v. *International Telephone and Telegraph Corp.*, Civ. No. 13319, 13320 (D. Conn., filed August 1, 1969) (two cases), motion for preliminary injunction denied, 1969 Trade Cases ¶ 72,943.

[13] *Report of the Special Study of Securities Markets of the Securities and Exchange Commission*, Part 2, pp. 859–861 (1963).

[14] *United States* v. *Cleveland Trust Co.*, Civ. No. C–701–301 (1970).

[15] *Notice of Proposed Rulemaking*, FCC Dkt. 18751 (November 9, 1969).

[16] *Se, e.g., BT New York Corp.*, 53 Fed. Res. Bull. 769 (1967), rehearing denied, 54 Fed. Res. Bull. 225 (1968).

[17] "Moreover, if commercial banking were rejected as the line of commerce for banks with the same or similar ratios of business as those of the appellee banks, the effect would likely be to deny customers of small banks—and thus residents of many small towns—the antitrust protection to which they are no less entitled than customers of large city banks. *Indeed, the need for that protection may be greater in the small town since, as we have already stated, commercial banks offering full service banking in one institution may be peculiarly significant to the economy of communities whose population is too small to support a large array of differentiated savings and credit businesses.*" 1970 CCH TRADE CASES ¶73,245 at pp. 88, 951–88, 952 (emphasis added).

## FLORISTS' TRANSWORLD DELIVERY ASSOCIATION GOLDEN ROSE AWARD TO SENATOR HOLLAND

Mrs. SMITH of Maine. Mr. President, in 1960 the FTD Golden Rose Award was created by Florists' Transworld Delivery Association to honor persons in public life for significant contributions to the use of flowers and plants in our daily life and to the advancement of floriculture in the United States.

I recall with great pleasure the ceremony, held here in the Capitol, when I was honored with the first Golden Rose Award. The very kind remarks of my congressional colleagues on that occasion are a cherished part of the tribute paid to me by FTD florists.

In 1968, the late Senator Everett McKinley Dirksen, of Illinois, whose love of flowers and plants is so well known, was a recipient of the FTD Golden Rose. Other notables in the public life of the Nation who have been honored, on a selective basis, include the officers of the famed Tournament of Roses.

On August 17 of this year, this award was presented to Senator SPESSARD LINDSEY HOLLAND, of Florida, at the organization's annual meeting in Toronto, Canada. Sharing this occasion with our distinguished colleague was his lovely wife, Mary, whom all of us admire so much. In announcing plans for the award to Senator HOLLAND, FTD executive vice president, John L. Bodette stated:

> The unanimous choice of the Board was based on Senator Holland's outstanding leadership in helping to provide research and information services to the floriculture industry through the U.S. Department of Agriculture, and the significant role he played in making the importance of floriculture as an agricultural industry better understood throughout the Congress and in state legislatures.

Senator HOLLAND, who is highly respected by all of us, will conclude a distinguished career at the close of this Congress. He will be missed for many reasons, especially for his humanity and deep feeling for all of those he has served. I am happy that FTD has honored him with the Golden Rose Award, and I congratulate Senator HOLLAND.

Mr. President, I believe the remarks of his lifelong friend, Mr. James Donn, chairman of the board of Gulfstream Park, Miami, and Exotic Gardens, Inc., and those of Mr. William D. Tallevast, president of FTD, at the presentation in Toronto are outstanding tributes to SPESSARD HOLLAND, I ask unanimous consent that they be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

SENATOR HOLLAND—FTD GOLDEN ROSE AWARD: PRESENTATION BY MR. JAMES DONN

Mr. President, Officers, Members, distinguished guests, ladies and gentlemen. It is my privilege to present to the Annual Member's Meeting of Florists' Transworld Delivery Association the senior United States Senator from Florida, Spessard L. Holland. It is an honor I have long sought.

Friends, Spessard is an individual who usually rises to the top. In college he was one of the highest ranking students in the University. Spessard became United States Senator after serving as Governor of Florida and before that state senator, always reaching the top. In the parlance of horse racing he is the winner of the Triple Crown.

No one ever received wages that were not their due while employed by Spessard Holland. He remains the individualist in the United States Senate—free enterprise is his dogma, none other. When it comes to taking care of his friends, I'm going to relate a little incident that transpired between him and me in the year 1941, when he was Governor. I was in Tallahassee representing horse racing when I got word that the "big man" wanted to see me. So, I proceeded over to the mansion and met Spessard. He said, "Jimmy, I am in awful trouble." I said, "What's the matter?" He said, "Well, it's that welfare program you promoted way back in 1935, and that I helped you put through the legislature.

Now, you've got to help me." I said, "Spessard, how can I help you?" "Well," he said, "I've got to raise some more money for these old folks for whom you started that program. Can horse racing stand a raise in the state's 'take'?" I said. "How much? After all you are getting 3% now." "Well," he said, "how about 8%?" So folks, I'm still his friend and that action by Spessard Holland is costing me a lot of money today. But this is typical of Spessard Holland. He never gives way—his friends must toe the line when it becomes necessary for any program that he has in mind. I say without doubt in my mind that he was the best governor the State of Florida ever had. This is my opinion and I think the opinion of many.

You know this man is the greatest "crime buster" that Florida ever had. Way back in '41 we had the emissaries from the scarface of Chicago and people in New York. They owned a racetrack. These gentlemen are difficult to stop and take rather drastic remedies to put any nuisance to them out of the way. But this didn't faze Spessard Holland a bit. The same qualities that won him the Distinguished Service Cross in France gave him the courage to stop these rascals, and Florida's racing has been clean ever since.

As you know, behind any great man there is always a noble woman. And he has a noble woman, Mary Holland. I remember visiting them in the mansion in '41 when she was the First Lady. There were flowers in every room. We went over to the Senate and the House. It looked like a flower show. Flowers were everywhere. You had to peep around the flowers to see the Senator that you were looking for. I was struck by how Mary went about arranging the flowers, and her love of flowers. When I went back home that summer, I found an orchid there that I had imported from England. It was a special collection that I brought to the U.S. for safekeeping during the battle of Britain. And so, one of the first "refugee" orchids was named "Mary Holland" after a beautiful lady in the governor's mansion. Mary, stand up and show the audience this beautiful orchid. (Applause).

Friends, I now turn to our President, William D. Tallevast of Florence, S.C., who will introduce Senator Holland.

---

INTRODUCTORY REMARKS BY WILLIAM D. TALLEVAST, PRESIDENT, FLORISTS' TRANSWORLD DELIVERY ASSOCIATION

Ladies and Gentlemen: In the comparatively brief time that I have known Senator Spessard Lindsey Holland, I have concluded that he *does* need some introduction. He needs it because he is so intent on performing a workmanlike job with quiet dignity that he is likely not to tell anyone about it!

You have heard some of the stories of his early days from our good friend and colleague, Jimmy Donn—enough to establish the fact firmly that Senator Holland has spent more than 40 years of public service caring about the problems of people as individuals and as small businessmen. He has sought to help them by supporting legislation that would truly solve their economic problems, and help them survive in the increasingly tough and competitive marketplace that businessmen like ourselves face today.

These are serious times for all of us, and Senator Holland has characteristically preferred the serious and solid approach to them. Let me briefly explain how that attitude has affected us.

About eight years ago, FTD leaders determined that a more effective effort must be made to obtain the basic research and information services needed by the little-known industry of commercial floriculture. Those in the industry enlisted to help are well known to all of you. They include Ralph Bachman, Fred Flipse, Don Rosacker, and all the FTD presidents who have held office since that time. This effort, to which John Bodette, Truman Fossum, and many others have given much of their talents and energies, was founded on the premise that we would seek of Congress only those kinds of appropriations for research and information services that we, as FTD and industry, could not provide for ourselves.

When we approached the problem by telling the "economic story" of our business, we found that all members of Congress to whom we talked were interested. When they began to understand that we are a $1.8 billion industry at retail, handling an agricultural crop with a farm value of more than $500 million, and that we represent 50,000 small business enterprises providing employment to some 200,000 persons, we found we had an attentive audience.

Much of what happened is history. Because we marshalled the facts to support our case in Congress and in the U.S. Departments of Agriculture and Commerce, our industry can point to the development of a badly needed market news service for ornamental crops; improved and expanded crop estimating and reporting services, a series of important studies strengthening the economic and marketing research available to us; major advances in transportation and packaging research for our products; and increased funding of biological research at leading USDA agricultural experiment stations. Because of these steps, we are—after these many years—on the threshold of developing a system of grade standardization and inspection for our key crops.

A kind of cooperative attitude has grown up during the decade of the sixties between our industry, the USDA, and key Congressional committees. It was fostered by FTD, on behalf of the industry, through a series of grants to USDA in which we tried to show Congress that we were willing to invest "seed money" in the basic research and information service programs so vitally needed by the industry. In short, we were ready to invest in our own future. At all times this cooperation has been based on mutual respect and a completely honest statement of the facts to our partners in progress.

One more element was needed for the success of this effort. It is the understanding of the men who make the real decisions—our Congressmen. Among members of Congress, Spessard L. Holland has been a giant and a tower of strength. It was he, more than anyone, who saw to it that the economic importance of commercial floriculture became a matter of public record, who led the drive in Congress to ensure that floriculture receives the same basic services available to all other important crops, and who, most of all, helped tell the story of you, the small businessman, to his colleagues.

Senator Holland, we know that you would be content to provide this kind of leadership and real service, and then quietly retire from Congress this year without making it known. We cannot allow that to happen. The basic research activities and information services for commercial floriculture, in which you were so instrumental, will go on serving generations of growers, shippers, wholesalers, and retailers long after you have left Congress. What is important is that a solid, permanent, working structure has been put in place that we believe will stand as one of your enduring accomplishments in public service.

It is my privilege, Senator, to be President this year and be allowed to present you this Golden Rose Award. We sincerely present it with great love and affection for your interest in the florist industry. Thank you very much.

Ladies and gentlemen, Senator Spessard Lindsey Holland of Florida.

STATEMENT BY SENATOR HOLLAND

Thank you very much, President Tellevast: Ladies and gentlemen of FTD, I don't have to tell you that Jimmy Donn is my long time friend because you heard that introduction. As you know, it's always pleasant to be introduced by somebody that's overgenerous. I appreciate that introduction. It's great to be here. I'm so glad Mary could come.

In order that you may understood just how important we feel this occasion is, I want to tell you that she doesn't like to fly. She's never come to Canada with me but one time before, and that was to Montreal to the dedication for the St. Lawrence Seaway where I represented the Congress and where she came not to see the Seaway but to see Queen Elizabeth. So I'm sure you can understand from that fact that we both consider this not only an outstanding occasion but one which is unforgettable as far as we both are concerned.

You people with your flowers bring happiness where times of joy prevail; bring solace where times of sorrow and sadness prevail; and if I might add a little note from us husbands throughout the country, you give us a special method of relief when we happen to be in the dog house—if you know what I mean.

The florist industry, with total sales at retail of about $1.8 billion and crops with a farm value of about $500 million that is made up of 50,000 independent small businessmen, is an important industry. Your organization of nearly 12,000 retail florists has given fine leadership. You've done a magnificent job.

I wouldn't want to let the very generous words of Billy Tallevast make you think that I feel any great personal credit is due to me. I happen to be chairman of the Senate Appropriations Subcommittee on Agriculture. In these last eight years, I found out to my great surprise there's small appreciation and understanding in the Congress of the size and importance of this great industry in Canada and in the U.S. and for that matter all over the world. I was glad to welcome your witnesses. You always had highly informed practical men before us and highly informed scientific men before us and amongst us all, both in the Senate and in the House. We were able to get a few things started which have been mentioned here by your President. All I can say is I don't think enough has been done yet to justify the size and importance of this industry, but I do think you've made a fine beginning and I was particularly impressed when your President spoke of "seed money". I just want to tell you, that if that was seed money, it has come out of the pockets of your own people and in my experience in the State Senate and as Governor and where I am now, I have found that people in public life are more interested in an industry that is willing to show enough confidence in itself, to lay its own money on the line, than it is when an industry simply comes asking for help but not showing any willingness to organize or any willingness to cooperate by putting up funds of its own.

So it's been a pleasure to see your programs come along a little. We've appreciated so much the kind of people that you sent to labor with us, and I see one of them over here, Fred Flipse from Florida. We've had wonderful help from others, like Truman Fossum and Gordon Smith, who've been showing us such a good time these last few days. I want to, for Mary and myself both, thank you for the fact that you've kept our apartment a bower of flowers ever since we got here. I notice that you, Mr. Bodette, have been taking care of that and I want to thank you publicly, along with Jimmy Donn, because I noticed that some of these were the products of Exotic Gardens.

I want to thank you both and all for your kindness and the way you have treated us in such wonderful fashion.

As to this marvelous award that you've bestowed upon me, I want to tell you that I appreciated it in a heartfelt way more than anything you could have possibly done for us. May I say that I'm glad to possess it here this once. I doubt if there'll be many times in the future when I shall have the opportunity to possess it.

We shall always be enormously proud of this very beautiful and lovely award which you have given us, and I just want to express a heartfelt thanks from both Mary Holland and me. I think she will let our children and grandchildren enjoy it, and I suspect on every occasion when we have some very important people present, somehow, they'll be given the opportunity of viewing this beautful FTD Golden Rose. We thank you from the bottom of our hearts.

## BEETHOVEN'S BIRTHDAY AT THE UNIVERSITY OF MARYLAND

Mr. MATHIAS. Mr. President, during this year the 200th anniversary of the birth of Ludwig van Beethoven will be observed throughout the world. As may be expected, the commemoration of his birth will be marked by new recordings, editions, and performances of interest to the scholar, the artist, and laymen alike.

I would particularly like to call the attention of the Senate to a rare series of performances to begin on Sunday, September 27, during which the piano faculty of the University of Maryland will perform all 32 of Beethoven's sonatas. This is an extraordinary opportunity to hear the sonatas, particularly as the piano division of the University of Maryland has risen to national prominence in recent years.

We are indebted to Dr. Stewart Gordon, head of the division, for assembling such an outstanding faculty at the university. I hope that he will continue his fine work and that he will provide many more such opportunities for us in the future.

The performance begins at 4 o'clock on Sunday in the Tawes Recital Hall of the university's fine arts building, located on the College Park campus. All performances are open to the public without admission charge and will be held each Sunday through December 13.

In addition to Dr. Gordon, other members of the faculty who will perform the sonatas include Dr. Roy Hamlin Johnson, Mr. Charlton Meyer, Mr. Thomas Schumacher, Miss Nelita True, and Mrs. Yvonne Beatty.

On behalf of the university I invite the Members of the Senate, the staff, and their families to attend.

Mr. President, I ask unanimous consent to have the schedule printed in the RECORD.

There being no objection, the schedule was ordered to be printed in the RECORD, as follows:

Sept. 27. Mr. Schumacher. No. 26 in E flat major (Les Adieux, op. 81a); No. 14 in c sharp minor ("Moonlight," op. 27, no. 2); No. 2 in A major (op. 2, no. 2).

Oct. 4. Dr. Gordon. No. 1 in f minor (op. 2, no. 1); No. 12 in A flat major ("Funeral March," op. 26); No. 8 in c minor (Pathetique, op. 13).

Oct. 11. Mr. Meyer. No. 7 in D major (op. 10, no. 3); No. 27 in e minor (op. 90); No. 13 in E flat major (op. 27, no. 1).

Oct. 18. Dr. Johnson. No. 5 in c minor (op. 10, no. 1); No. 9 in E major (op. 14, no. 1); No. 25 in G major (op. 79); No. 21 in C major (Waldstein, op. 53).

Oct. 25. Miss True. No. 16 in G major (op. 81, no. 1); No. 17 in d minor (op. 31, no. 2); No. 18 in E flat major (op. 31, no. 3).

Nov. 1. Mr. Schumacher. No. 22 in F major (op. 54); No. 28 in A major (op. 101); No. 15 in D major ("Pastorale," op. 28).

Nov. 8. Dr. Gordon. No. 20 in G major (op. 49, no. 2); No. 30 in E major (op. 109); No. 23 in f minor (Appassionata, op. 57).

Nov. 15. Mr. Meyer. No. 29 in B flat major (Hammerklavier, op. 106).

Nov. 22. Mrs. Beatty. No. 19 in g minor (op. 49, no. 1); No. 6 in F major (op. 10, no. 2); No. 11 in B flat major (op. 22); No. 24 in F sharp major (op. 78).

Dec. 6. Miss True. No. 10 in G major (op. 14, no. 2); No. 31 in A flat major (op. 110); No. 3 in C major (op. 2, no. 3).

Dec. 13. Dr. Johnson. No. 4 in E flat major (op. 7); No. 32 in c minor (op. 111).

## CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is concluded.

## DIRECT POPULAR ELECTION OF THE PRESIDENT AND THE VICE PRESIDENT

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the unfinished business be laid before the Senate.

The PRESIDING OFFICER. The joint resolution will be stated.

The legislative clerk read as follows: Calendar No. 1135. Senate Joint Resolution 1, proposing an amendment to the Constitution of the United States relating to the election of the President and the Vice President.

The PRESIDING OFFICER. The pending question is on agreeing to amendment No. 711.

Mr. MANSFIELD. Mr. President, I have listened with interest to the distinguished Senator from Indiana throughout most of his address to the Senate this morning. I am aware of his responsibility. I know of his deep-seated concern and personal interest in the measure now before us. I appreciate fully the fact that almost singlehandedly he nursed this measure through the Committee on the Judiciary. I am very much aware of the delay which he encountered, of the obstacles which were placed in his path, and of the repeated stallings which took place within that committee even after Senate Joint Resolution 1 was approved by the committee and was to be reported to the Senate.

I find no satisfaction in the tactics used on that occasion. I think it was a deliberate delay. I think the RECORD will show that fact without contradiction. I would not apply that statement to the full membership of the Committee on the Judiciary, but I would apply it to one or two of its members. They did employ tactics within their rights under the rules of the committee, and in a sense with the approval of the committee.

I am sorry to note that the distinguished Senator from Indiana, who takes his responsibilities keenly, has indicated that beginning tomorrow he intends to object to committee meetings. I would therefore urge committees to start meeting at 8 a.m. beginning tomorrow, and I do not think that is too much of a sacrifice to expect of them. I also wish to advise them that as far as the leadership is concerned, the majority leader, at least, is going to try to see that the morning hour extends a reasonable length of time to accommodate their deliberations, and assure that testimony may be received of witnesses, many of whom very likely have come from distant parts of the country.

I must apologize to the distinguished Senator from Indiana for not notifying him, as I intended to, about the vote on the antipornography legislation which will take place at 12:30 today. The time on that measure will begin to run at 12 o'clock. I am sure he understands, however, the situation in which the leadership found itself. He was aware, I believe, that previous to that time an agreement had been reached on the Senate floor that at the hour of 2 p.m. today, a vote would be taken on the public broadcasting conference report.

I had a discussion with the distinguished Senator from Indiana yesterday. Because of that discussion, he at least held back for 1 day in applying the stringent suggestions which he has enunciated this morning. I would hope that he would reconsider and permit us to transact Senate business and to keep the calendar clean or as clean as possible on the basis of two-shift sessions. It is my intention to file a cloture motion on Friday, and the vote on that will occur 1 hour after we meet on Tuesday next. At that time it is my intention to make a final decision as to the disposition of what is now the pending business as far as the leadership is concerned.

The Senator from Indiana has stated that he has responsibilities. I agree, and he has lived up to his responsibilities. He has shown a great deal of flexibility and understanding. But the majority leader, the Senator from Montana, has responsibilities, too. I am fully in accord with the purposes of the amendment proposed in Senate Joint Resolution 1. I shall support it to the best of my ability.

I intend, at an appropriate time, to take up the equal rights amendment. I am disappointed, on the basis of what I thought was an agreement within the Judiciary Committee, that the date of September 19 has passed without the report on a resolution dealing with the equal rights amendment. The fact is, such a resolution has not been reported by the committee. But come hell or high water, if that proposed amendment is not reported out, the Senate must be prepared to face up to the equal rights amendment this year.

Furthermore, there is other legislation that must be considered. There are six, perhaps seven appropriation bills yet to consider.

In any case, my purpose in speaking at this time is to express an appreciation and an understanding of the situation in which the distinguished Senator from

Indiana finds himself, but also to state most emphatically that as far as the majority leader, the Senator from Montana, is concerned, he intends to face up to his responsibilities, and he will.

Mr. BAYH. Mr. President, I deeply appreciate the remarks of our colleague from Montana, my faithful leader, who has worked so hard and so long trying to keep the ship of state, and the U.S. Senate, moving on a steady keel.

I am a relatively young Member of this body, with little seniority. That does not in any way lessen my love for this institution and for its rules, nor my recognition of the opportunity and the honor we have in serving here.

I am fully appreciative of the great burden which rests on the shoulders of our majority leader. There are, indeed, times when the responsibility of a leader of a body such as this are different from the responsibilities resting on him as an individual Senator. Indeed, it is entirely possible for a leader and another Senator to agree on the relative merits of a piece of legislation, and for the leader to feel that one parliamentary procedure must be followed to fulfill his responsibility as a leader, and the individual Senator, on the other hand, to feel that another parliamentary process should be followed for him to fulfill his responsibility as a Senator.

It is because of the desire to cooperate and not to add to the burden of our distinguished leader that I decided not to object to committees meeting today, and not to require the Senate to meet on the pending order of business beyond 5 o'clock.

If, indeed, the responsibilities of the Senator from Indiana, in the future, might appear to him to be different than the responsibilities of the Senator from Montana, our leader, I trust that these differences will be pursued with the traditional fellowship and camaraderie which is so symbolic of this body.

I want the RECORD to show that the Senator from Montana has been one of the earliest proponents of electoral reform, for giving the people of this country the right to vote for their President. He was for this measure before the Senator from Indiana ever had the chance to cast his first vote in this body. He has been very patient and helpful in advising the Senator from Indiana, as chairman of the subcommittee, how he could best improve the opportunity of the Senate to work its will on this issue. For the RECORD, I should like to thank him personally for his patience and tolerance.

I must say that I hope the Senator from Montana sees the day come in this body when we have the right to vote on electoral reform and equal rights amendment. As the Senator from Montana knows, the Senator from Indiana has been laboring diligently in the Subcommittee on Constitutional Amendments, of which he is chairman, on the equal rights amendment. In the last several days, we have seen appear a significant amount of opposition to the amendment. Interestingly enough, one of the most ardent opponents of that amendment is one of the most outspoken critics in the ranks of those who are presently filibustering Senate Joint Resolution 1.

When our distinguished leader says that "come hell or high water" we are going to get a vote on the equal rights amendment, I say "Amen" to that. But I suggest that to make that possible, we had better put on our asbestos underwear and our hip boots, because the tactics which have been pursued to deny an opportunity to vote on Senate Joint Resolution 1 may very well be pursued to deny a vote on equal rights.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. BAYH. I yield.

Mr. MANSFIELD. May I say that, if I recall my words, I said that it was going to be taken up and brought before the Senate. Whether or not we can get to a vote is something over which I have no control but which the Senate itself will control. Very likely the same roadblocks which have developed in the consideration of this proposed constitutional amendment may well develop in the consideration of the constitutional amendment that would give equal rights to women.

So I would like to have the RECORD clear on that, because I cannot determine whether or how the Senate will vote; but I will do my best to see that it is brought to a vote. Sometimes you win; sometimes you lose; but always the least you can do is to try.

Mr. BAYH. The Senator from Indiana recalls the statement of the Senator from Montana. He is absolutely right. That is what he said. I salute him for his effort in bringing it to the floor.

I realize that no one Senator, even if he is leader, can make the Senate work its will if it is not willing to do so.

Mr. MANSFIELD. May I say to the distinguished Senator, before I leave the floor—it should be remembered that the time begins to run at 12 o'clock on the antipornography amendment—that I think we understand each other perfectly. The responsibilities which devolve upon each of us as Senators and, in addition, on the Senator from Montana as majority leader are clear. In the latter respect, I think I can speak for the distinguished minority leader as well.

I think, also, that on the basis of our colloquy this morning, the Senate is aware of the situation which confronts it and that the Senate must be prepared to act accordingly.

Again, I make only one plea: that, if the occasion arises, the Senator from Indiana consider the possibility—on a limited basis, if need be—of considering other proposed legislation which must be taken up and disposed of before the Senate, hopefully, can adjourn sine die on October 15.

Mr. GURNEY rose.

Mr. BAYH. The Senator from Indiana has the floor.

Mr. President, I should like to make one final observation before the time expires that is available to us at this moment.

The Senator from Indiana does not intend to occupy the floor but, rather, to listen with interest to those who feel they have not had enough time to debate this matter. I am well aware that the Senate leadership, under the efforts of our distinguished leader, has been making a Herculean effort to make is possible for the Senate to recess by the middle of October, and I support that goal. What I am about to say, of course, represents only the feelings of the Senator from Indiana.

Being only human, I would like to have from the middle of October until the first week in January to be with my family, without being called to the duties of the Senate. But I would suggest that the Senate is derelict in its duty if it permits its own convenience or the convenience of any one of its Members to deny the Senate as a whole the opportunity to meet his responsibility to finish the important unfinished business which still remains in the Senate. The Senator from Indiana is prepared to stay here until Christmas, if that is necessary, to see that not just his proposal but other proposals as well are disposed of.

So, while respecting the fantastic efforts that are being made to move the Senate forward, particularly for the convenience of those in both parties who are seeking reelection, I think we have to stand up and be counted. Right now we are either going to move on electoral reform or it is not going to be done. It is the opinion of the Senator from Indiana, who has studied this matter in hearing after hearing, that the near tragedy in 1968 has provided us with a unique opportunity to pass this amendment. That near tragedy afforded the public awareness that is necessary before any constitutional amendment can be adopted. The amendment was approved in the House by a 339 to 70 vote, and I think that we in this body would be irresponsible if we did not vote on it ourselves.

I do not want to have to wake up on election morning in 1972 or 1976 or 1980 and find that this country has been confronted by a constitutional crisis because I, as one Member of this body, did not utilize the opportunity, did not recognize my responsibility, to see that this measure was put to a vote. It is that goal, that responsibility, which drives the Senator from Indiana to take, with great reluctance, the course that he has suggested this morning.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. BAYH. I yield.

Mr. MANSFIELD. Mr. President, first, may I call two things to the attention of the distinguished Senators? If he carries through with what he has suggested, I am afraid that, with the possibility of no votes facing the Senate, the majority of Senators required for a quorum will soon disappear. As a result, the Senate may well be placed in a very embarrassing position; the position of having to end its work quite abruptly. I make that statement on the basis of what has happened over the last two or three Fridays. I also make it on the basis of the request which has been made to me, that the Senate meet on Saturday. I

would be most happy to meet on Saturday, speaking personally, but, frankly, I think it would be an exercise in futility.

The PRESIDING OFFICER (Mr. McGOVERN). Will the Senator pause momentarily?

Mr. MANSFIELD. Certainly.

## DESIGNATION OF OBSCENE OR OFFENSIVE MAIL

The PRESIDING OFFICER. Under the previous order, the Chair now lays before the Senate Calendar No. 1235, S. 3220, which the clerk will state.

The legislative clerk read as follows:

S. 3220, to protect a person's right of privacy by providing for the designation of obscene or offensive mail matter by the sender and for the return of such matter at the expense of the sender.

The Senate resumed consideration of the bill.

The PRESIDING OFFICER (Mr. McGOVERN). Under the previous order, the time on this bill is limited to 30 minutes, to be divided equally between the majority and minority leaders.

## ORDER OF BUSINESS

Mr. MANSFIELD. Mr. President, I yield myself 2 minutes to complete my thoughts.

I would ask if the distinguished Senator from Indiana might relent enough time to allow us tonight to lay before the Senate the bill to amend and extend laws relating to housing and urban development and for other purposes. This item is most important. If he would agree, we could take it up tonight at an appropriate time.

Mr. BAYH. The Senator from Indiana is perfectly willing to let the Senate consider that important matter which the majority leader feels is important at 5 o'clock this evening, with the understanding that when the Senate comes in tomorrow it will proceed to the consideration of Senate Joint Resolution 1.

Mr. MANSFIELD. If the Senator from Indiana would allow us to consider this bill at 5 o'clock tomorrow afternoon, it means a great deal to all the States in the Nation, especially to the cities. It is long overdue. The committee has done a great job in reporting a significant bill. It is a difficult choice, I know, but I plead with the Senator from Indiana, in this instance, to allow us to take up this particular bill.

Mr. BAYH. Mr. President, with great reluctance, the Senator from Indiana would like to point out that it is fully within the competence of the Senate to work its will on the pending order of business. I am ready to vote. I am ready to propose a unanimous-consent request that we do vote. The Senator from Indiana believes that perhaps the request should be made of the distinguished Senator from Alabama, as to whether he is willing to let the Senate work its will.

Mr. MANSFIELD. Mr. President, as long as time is running, I withdraw my request. I do not want to beat a dead horse further. We will have to find some means to face up to this most important business of the Senate because it, too, is important, just as the constitutional amendment is, which I support fully, and just as appropriation bills are important.

Mr. BAYH. Mr. President, could I have a minute?

Mr. MANSFIELD. Out of my time? Yes.

## MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Berry, one of its reading clerks, announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H.R. 17654. An act to improve the operation of the legislative branch of the Federal Government, and for other purposes; and

H.R. 18776. An act to establish in the State of Michigan the Sleeping Bear Dunes National Lakeshore, and for other purposes.

Mr. MANSFIELD. Mr. President, is that bill to go on the calendar?

The PRESIDING OFFICER. Under the precedents and practices of the Senate, when there is a comparable bill on the calendar to a bill coming over from the House and the chairman of the committee requests that the bill be placed on the calendar, the bill is automatically placed on the calendar with reference to the like Senate bill. In this instance the Chair has already made that request so the bill will be placed on the calendar.

Mr. MANSFIELD. That is what I want to be sure of. I thank the Chair.

## PROCEDURE

Mr. BAYH. Mr. President, will the Senator yield me 1 minute——

Mr. MANSFIELD. I yield 1 minute to the Senator from Indiana.

Mr. BAYH. Just to make the record clear that the Senator from Indiana is willing to abide by the rules of the Senate. The rules of the Senate suggest that we should proceed to vote on this matter which has now been debated for a longer period——

The PRESIDING OFFICER. Who yields time?

Mr. MANSFIELD. I yielded the Senator 1 minute.

Mr. BAYH. Than any other constitutional amendment for the last 100 years. Let those who are preventing the Senate from voting on Senate Joint Resolution 1 take the responsibility for keeping this important legislation, as well as other important legislation, from being put to a vote. I fully appreciate the position of the leadership. This effort will not guarantee success for electoral reform, but I am here to suggest to the Senate that the direction in which we have been going for the past 12 days will guarantee failure.

## DESIGNATION OF OBSCENE OR OFFENSIVE MAIL

The Senate continued with the consideration of the bill (S. 3220) to protect a person's right of privacy by providing for the designation of obscene or offensive mail matter by the sender and for the return of such matter at the expense of the sender.

Mr. MANSFIELD. Mr. President, I yield myself 2 minutes.

The PRESIDING OFFICER (Mr. BIBLE). The Senator from Montana is recognized for 2 minutes.

Mr. MANSFIELD. Mr. President, on yesterday, the Senate adopted an amendment to S. 3220. That amendment used the phrase "first-class mail." Under the recent reorganization bill for the Postal Department, that phrase is now antiquated.

Even though the amendment was agreed to on yesterday, I ask unanimous consent that it be in order for me to offer an amendment to the amendment. I send the modified amendment to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

The modified amendment will be stated.

The assistant legislative clerk read as follows:

On page 5, line 19, strike out the quotation marks.

On page 5, between lines 19 and 20, insert the following:

"(3) Each piece of mail required to bear the notice required by paragraph (1) of this subsection shall be sent at the same rates of postage prescribed for that class of letter mail established under the third sentence of section 3623(d) of this title."

The PRESIDING OFFICER. The question is on agreeing to the modified amendment of the Senator from Montana.

The amendment was agreed to.

Mr. MANSFIELD. Mr. President, the intent, may I emphasize, is the same. It will get the pornographic literature which was sent through the mails out of the junk mail class and will increase the payment in addition thereto.

Mr. President, have the committee amendments been agreed to? I believe they were on yesterday, but I am not sure.

The PRESIDING OFFICER (Mr. BIBLE). The Chair would state that there is a committee amendment in the nature of a substitute.

Mr. FONG. Mr. President, has the modified amendment been accepted?

The PRESIDING OFFICER. The substitute modified amendment was agreed to.

Mr. MANSFIELD. Mr. President, I am gratified that the Senate chose to adopt this amendment. It is one which I endorse wholeheartedly. It adds a feature to this bill which will improve it greatly as a law. I am happy to give full credit for the idea to Dr. Robert E. Englert of Great Falls, Mont., one of many of my constituents who have taken a vital interest in this critical problem.

On September 16, Dr. Englert wrote me concerning his deep interest in the matter and included in that letter the suggestion which has now become the "Englert" amendment to the Mansfield pornography bill. I ask unanimous consent, Mr. President, that Dr. Englert's letter be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER (Mr.

BIBLE). Without objection, it is so ordered.

(See exhibit 1.)

Mr. MANSFIELD. Mr. President, Dr. Englert's letter exhibits the same strong interest in condemning the peddlers and pushers of obscene material that characterizes the views of so many of the people I represent. These are people who simply resent the mailer who invades the privacy of their homes with unsolicited filth and dirt. They have rights that are every bit as sacred as those safeguarded under the first amendment. This bill—S. 3220—and the added feature of requiring the mailer of obscenity to pay his own way—and then some, I hope—is a first step in recognizing those rights.

Mr. President, I urge the Senate to adopt the Mansfield bill with the Englert amendment attached.

EXHIBIT 1

GREAT FALLS, MONT.,
*September 16, 1970.*

HON. MIKE MANSFIELD,
*Senate Office Building,*
*Washington, D.C.*

DEAR SENATOR MANSFIELD: I have your letter of recent mailing and the accompanying copy of your statement regarding S 3220—on pornography in the mails.

You note that your mail has been heavy regarding this matter.

The idea of enabling persons to return such mail, having been warned by a statement on the outside of the envelope is just a start. Why not carry the fight a bit further and require any and all mail to carry a first class postage stamp? This would certainly stop a good deal of the "scrap mail" that is daily being processed through the postoffice at a loss. I think it fitting and proper that each class of mail in our postoffices should pay its way. According to my understanding, first class mail has never been a burden on funds to maintain it in the mails, whereas, all other classes such as second class, third class and fourth class mail have deluged the postoffice with mail that is costing far more than the postage received for its transmission through the mails.

First class postage on pornographic material would certainly help to slow down the many pieces of mail going out to the public on an unsolicited basis.

First class postage on the other classes would also cut down the work load and perhaps the postoffice would then not have a deficit each year. It would be appreciated by the majority of the public who, every day, receive such mail—also on an unsolicited basis.

Sincerely,

ROBERT E. ENGLERT, D.D.S.

ADDITIONAL COSPONSORS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the following Senators be added as cosponsors of S. 3220: The Senator from Oregon (Mr. HATFIELD); the Senator from Hawaii (Mr. FONG); the Senator from Alabama (Mr. ALLEN); and the Senator from West Virginia (Mr. BYRD), and any other Senators who want to get on.

The PRESIDING OFFICER (Mr. BIBLE). Without objection, it is so ordered.

The question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment, as amended, was agreed to.

Mr. MANSFIELD. Mr. President, I now yield 5 minutes to the Senator from Alabama (Mr. ALLEN).

The PRESIDING OFFICER. The Senator from Alabama is recognized for 5 minutes.

The Senate is not in order. The Senate will please come to order. If Senators must have conversations, they should be carried on in the cloakroom.

Mr. RANDOLPH. Mr. President——

The PRESIDING OFFICER. Did not the Senator from Montana (Mr. MANSFIELD) yield 5 minutes to the Senator from Alabama?

Mr. ALLEN. Mr. President, I am happy to yield to the Senator from West Virginia.

The PRESIDING OFFICER. The Senator from West Virginia is recognized.

Mr. RANDOLPH. Mr. President, I am grateful for the cooperation of my colleague from Alabama (Mr. ALLEN) so that we can work our way on this legislation.

OBSCENE MAIL CAN BE STOPPED

Mr. President, I support S. 3220, a bill to protect a person's right of privacy by providing for the designation of obscene or offensive mail matter by the sender and for the return of such matter at the expense of the sender. I am a cosponsor of this measure.

The measure as reported from the Post Office and Civil Service Committee, of course, has the stamp of approval of the membership of the committee. Sitting in the Chamber—and he will join in the remarks today—is the able Senator from Hawaii (Mr. FONG), the ranking minority member of our committee. He has been instrumental in bringing this measure through the hearing and executive session process to the Senate. Senator FONG is a diligent and thorough worker within our committee and he has labored on this bill in an effective manner. Chairman MCGEE and all members of the committee have had a genuine interest in this bill.

I am grateful for the opportunity to have been a cosponsor with the Senator from Montana and others in working for the provisions of his measure.

As a member of the Senate Post Office and Civil Service Committee from which S. 3220 has been reported to the Senate, I am privileged to salute the author and chief sponsor of this bill—Senator MANSFIELD—our distinguished and devoted majority leader. No Member of Congress has expressed more concern over the flood of pornographic materials in the mail and no Member has been more effective in seeking to remedy this situation. When he introduced this legislation, Senator MANSFIELD stated:

> This traffic in smut must cease and those who are responsible for it must be punished.

And he has been persevering advocate in the effort to achieve these objectives. He has worked constantly to secure favorable action on his bill. Were it not for the pressing and urging of the Senator from Montana, I question whether the Senate would be debating this measure today. He has performed a real public service.

Mr. President, each passing day we are made increasingly aware of this pollution of our planet. Every medium carries word that our nest is becoming steadily, and perhaps irrevocably befouled. But surprisingly, there is not enough attention paid to the moral pollution which is pervading our society. I refer to the growing permissiveness toward obscenity, the labored explanations used in excusing almost any form of crudity and nudity as an expression of art.

Understandably, because of the hazy definitions and court rulings on what really constitutes art, many feel any attempts to curb these artistic excesses is a frontal assault on the first amendment to the Constitution. But there is one form of moral pollution about which there can be little argument. And that is the massive distribution and indiscriminate delivery of what is, by any artistic standard, hard-core pornography—into the American home.

Now if any concerned parent should happen to observe some old codger displaying obscene photographs and literature to one of his children over the backyard fence, his reaction would be extreme anger. Or if the television networks would project scenes of naked orgies during a children's hour, their switchboards would be swamped with outraged calls.

Yet, daily into our American homes comes printed materials which violate good standards of morality, which contain no shred of redeeming social significance; which are, in fact, designed solely and calculatingly to appeal to the prurient interest of socially sick and the sexually immature. And the most horrifying aspect of this avalanche of obscenity, Mr. President, is the fact that it is quietly accepted or sheepishly disposed of by the majority of recipients. I suspect that one explanation for this reaction is the realization that the U.S. Government is a party to this postal pandering, even if an unwilling partner.

The PRESIDING OFFICER. The time of the Senator from West Virginia has expired.

Mr. BYRD of West Virginia. Mr. President, I yield, on behalf of the majority leader, 2 additional minutes to the senior Senator from West Virginia.

The PRESIDING OFFICER. The difficulty is that the majority leader has only 1 minute remaining.

Mr. BYRD of West Virginia. Mr. President, I yield that 1 minute to the distinguished senior Senator from West Virginia.

Mr. FONG. Mr. President, I yield 2 minutes of my time to the Senator from West Virginia.

The PRESIDING OFFICER. The Senator from West Virginia is recognized for an additional 3 minutes.

Mr. RANDOLPH. Mr. President, attempts to stem this flood of filth in the past have proven largely ineffective. Several bills have been introduced over the past year which are desired to cope with parts of the problem.

These attempts to balance the delicate issue of freedom of the press against outrageous invasion of privacy have, in my

opinion, been realistically met in Senator MANSFIELD'S measure.

First of all, it offers a defense for the unsuspecting recipient of sexually oriented advertisements by requiring the labeling of a clear warning that—

The enclosed material may be obscene or offensive to the addressee and may be returned to the sender unopened at no cost to the addressee.

This goes to the heart of the matter of invasion of privacy, very much like the postcard peddler who leers and reaches inside his overcoat pocket with the query, "filthy pictures?" It is an invitation at the same time. Now I am not so naive as to believe that this mere warning of possible obscenity will result in the end of postal pornography. But at least this requirement of a labeled warning to the addressee clearly skirts the issue of censorship while placing the victim on notice.

What I do believe is that Senator MANSFIELD'S measure, if enacted and signed into law, will inject a serious crimp in the multibillion-dollar business of postal pandering. S. 3220 provides that the addressee may return the obscene material to the sender without postage. Hopefully, this decision would be reached before the mail is opened.

In any event, the requirement that the senders of sexually oriented advertisements pay the costs of return first-class postage, in addition to a service charge of not less than 50 cents per piece of mail, would give them pause before they sent out thousands of pieces of pornography.

Additionally, this proposal provides for a penalty of $5,000 for mailers who violate or do not comply with its provisions.

It should be stressed that S. 3220, as reported, has been revised to correspond with the antiobscenity provisions sponsored by Senator GOLDWATER and others, and given overwhelming approval, in the recently enacted postal reform bill.

Mr. President, I agree with the Senator from Montana (Mr. MANSFIELD) when he said that his proposal "brings into proper balance the right of privacy on the one hand and the right of the press to use the mails on the other," and that:

If enacted, it will for the first time impose an effective check on the distribution of obscenity in our society and place the burden where it belongs—on the filth peddler.

Senator MANSFIELD has been, I repeat, an effective force in the efforts to curb the alarming flow of obscene and pornographic literature. He deserves the commendation and support of his colleagues in the Congress and the people of our Nation.

I renew the hope that the Senate and the House of Representatives will pass this measure.

The PRESIDING OFFICER. The Chair recognizes the Senator from Hawaii. How much time does he yield himself?

Mr. FONG. I yield myself 5 minutes.

The PRESIDING OFFICER. The Senator from Hawaii is recognized for 5 minutes.

Mr. FONG. Mr. President, I associate myself with the fine remarks of the distinguished Senator from West Virginia. He has made a very excellent speech. I also congratulate him for guiding this bill through the committee. He has done wonders for us.

Mr. President, the problem of unsolicited salacious and pornographic material received in the mail is becoming increasingly widespread, constituting a problem which is of grave concern to the Senate Committee on Post Office and Civil Service. The distinguished majority leader and those who joined him in introducing S. 3220 are to be congratulated upon the timeliness of this legislation and upon their efforts to protect the privacy of the American home from unwanted material which is shocking and offensive.

On September 1, 1970, the committee held hearings on this measure to augment its longer term studies of this pressing problem. The committee concluded that the right to privacy granted in common law is violated in the vast majority of instances by advertising material through which purveyors of pornography attempt to sell their wares. Accordingly, the bill, as amended, is directed specifically toward placing a burden of identification upon the sender of such material.

The committee has taken into account the guarantees to every citizen of free speech and free press under the first amendment and the guarantees of self-incrimination under the fifth amendment. Weighing the rights of protecting one's privacy in his home against the guarantee of the first and the fifth amendment the committee feels that the bill as amended does not violate these guarantees.

The bill as amended dovetails with section 3010 of title 39, United States Code, as enacted by Public Law 91–375, the Postal Reorganization Act. It thus adds to and strengthens the provisions of existing law.

Section 3010 provides that any person who mails sexually oriented advertisements shall place on the cover such mark on notice as the Postal Service may prescribe. The bill as amended alters that section to provide that the sender shall specifically mark on the cover the following notice:

The Enclosed Material Is Sexually Oriented Advertising, And May If Unrequested By The Addressee, Be Returned To The Sender Unopened At No Cost To The Addressee.

The amended bill further provides that any such unrequested sexually oriented advertisement may be returned to the sender at the sender's expense. The sender will be required to pay return postage for each piece of mail plus a service charge of not less than 50 cents.

Failure to mark the envelope or cover of the sexually oriented advertisement or refusal to pay the postage or service charge will subject the sender to a civil penalty of $5,000 for each piece of mail.

Section 3010 of title 39, into which the amended bill is interwoven, carries a definition of sexually oriented advertisement. Additionally, it carries an exception to the basic definition. It states that material shall be deemed not to constitute a sexally oriented advertisement if it constitutes only a small and insignificant part of the whole of a single catalog, book, periodical, or other work not primarily devoted to sexual matters. This exception would apply to the provisions of S. 3220. The committee carefully considered testimony taken during the hearings expressing concern over the fact that penalties for noncompliance might be assessed upon innocent mailers. The exception cited above minimizes this possibility.

With the enactment of S. 3220 the sanctity of the home will be far better protected than heretofore, the committee believes. As Senator MANSFIELD has pointed out, distribution of sexual materials will be limited to recipients who specifically request them.

Upon enactment of this measure, the individual will have recourse to the following statutory protection of his rights:

First. Any citizen may file a complaint with the Postmaster General under Public Law 90–206 to initiate action which will stop delivery to him of pandering advertisements. This is the law we passed in 1967 and that was held constitutional by the U.S. Supreme Court in 1969.

Second. Through section 3010 of title 39, as amended by this bill, the sender of sexually oriented advertisements must mark the mailings with specific language written into law.

Third. Also through section 3010 of title 39, a person who does not wish to receive sexually oriented advertisements in his own name or in the name of his minor children may so advise the Postal Service. The Postal Service shall make his name available to mailers who are prohibited from sending him such advertisements.

Fourth. As I have noted previously, sexually oriented advertisements under S. 3220 may be returned to the sender at no cost to the addressee, at the sender's expense plus a service charge.

Innocent mailers are protected by the exception to the definition of sexually oriented advertisements which is now written into law. The bill provides that a civil action to collect the $5,000 civil penalty may be brought by the United States in a district court of the United States. The court will have recourse to the definition spelled out in law which excepts certain advertising matter from the general rule.

The committee believes that S. 3220 marks a milestone in the history of legislation to stop the unsolicited receipt in homes and offices of offensive and lewd material. I congratulate the Senator from Montana (Mr. MANSFIELD) on his action in introducing this measure, and I hope that the Senate will enact it.

Mr. PEARSON. Mr. President, will the Senator yield to me for 1 minute?

Mr. FONG. I yield 1 minute to the Senator from Kansas.

Mr. PEARSON. Mr. President, the distinguished Senator from Oregon (Mr. HATFIELD) is unable to be here today for the debate on S. 3220. I ask unanimous consent that a statement by the Senator from Oregon supporting the bill

may be printed in the RECORD prior to the vote.

There being no objection, the statement of Senator HATFIELD was ordered to be printed in the RECORD, as follows:

Mr. HATFIELD. Mr. President, I offer my full support for S. 3220, the bill introduced by the distinguished Majority Leader to combat the flow of unsolicited obscene and pornographic mail advertisements.

I was pleased to join my good friend from Arizona (Mr. GOLDWATER) as a cosponsor of an amendment to the Postal Reorganization Act which will solve part of this problem.

In my opinion, S. 3220 will add needed protection to families across the country. I earlier addressed some remarks to this problem, and I repeat those words today:

Last year the Post Office Department received over 200,000 complaints regarding unsolicited obscene commercial material which had been sent through the mails. It is estimated that there are some 20 million pieces of smut mailed annually within the United States. Dealers in pornography are spurred by a desire for huge profits. These peddlers are aware that these profits increase in direct proportion to the degree of prurient interest appeals that can be injected into their material. The operation of one dealer alone has resulted in 100,000 complaints in the last 4 years. Some persons have received as many as 30 unsolicited sordid mailings. The mailers respect no bounds of discrimination when sending material—no one is exempt. At present, the only tool the Post Office has to shield addressees from unsolicited and unwanted advertisements is the willing compliance of the dealers to remove names from their mailing lists. If the companies choose to ignore the directive requesting removal of a name, this becomes an ineffective tool.

In the name of increasing social acceptance and relevance, movies, books, plays and magazines are also becoming increasingly lewd, revealing, and objectionable. It would appear that the problem of dealing with the different media should be dealt with through the exercise of Federal power; but coequally, attention must be given to the important role of State and local government.

The main problem has always been—and continues to be—regardless of one's own feelings, a definition of pornography not in conflict with constitutional freedom guarantees.

I think we also should recall the words of President Nixon, when he addressed remarks to the Congress on May 2, 1969, on pornography and obscenity. In his statement, the President summed up what I think are the sentiments of many of us. He said:

"The ultimate answer lies not with the government but with the people. What is required is a citizens' crusade against the obscene. When indecent books no longer find a market, when pornographic films can no longer draw an audience, when obscene plays open to empty houses, then the tide will turn. Government can maintain the dikes against obscenity but only people can turn back the tide."

Mr. ALLEN. Mr. President, will the Senator yield for 2 minutes?

Mr. FONG. I yield 2 minutes to the Senator from Alabama.

Mr. ALLEN. Mr. President, I support this bill. I hope it will receive the unanimous vote of the Senate.

S. 3220 as amended adds to the procedures by which the privacy of the home may be protected from sexually oriented material by placing reasonable and enforceable restrictions upon sexual advertisements. The committee believes that it is through advertisements of sexual material that privacy is most often invaded.

This bill adds to existing laws and complements them. We already have under Public Law 90–206, a procedure by which through a complaint to the Postmaster General a citizen can set in motion administration action designed to halt the delivery at his home of pandering advertisements.

Through section 3010 of title 39 of the United States Code, as enacted by Public Law 91–375, the sender of sexually oriented advertisements must, by law, state on the cover that the enclosed material is sexually oriented.

Under this bill, a person who does not wish to receive sexually oriented advertisements in his own name or in the name of his minor children may so advise the postal service, and the postal service shall make his name available to mailers who are prohibited from sending him such advertisements.

Mr. President, this is an excellent bill and it should be passed.

Mr. FONG. Mr. President, I ask unanimous consent that the names of the Senator from Kansas (Mr. PEARSON) and the Senator from Florida (Mr. GURNEY) be added as cosponsors of the measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FONG. I yield back the remainder of my time.

Mr. RANDOLPH. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The order is to vote at 12:30 p.m.

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, and was read the third time.

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## VISIT TO THE SENATE BY MRS. IMELDA ROMUALDEZ MARCOS

Mr. MANSFIELD. Mr. President, I think I should call to the attention of the Senate that we are indeed honored today to have the First Lady of the Philippines, Mrs. Imelda Romualdez Marcos, visiting us here in the Senate. We are pleased that she is visiting us. We are delighted that she is observing our proceedings and that she will lunch with us soon.

As a close and long-time friend of a most understanding, a most statesmanlike, a most beautiful lady, I would like at this time to introduce to my colleagues the First Lady of the Philippines, Imelda Romualdez Marcos. [Applause, Senators rising.]

The PRESIDING OFFICER (Mr. BIBLE). That is the most pleasant interlude the Chair has had in a long time.

## DESIGNATION OF OBSCENE OR OFFENSIVE MAIL

The Senate proceeded to consider the bill (S. 3220) to protect a person's right of privacy by providing for the designation of obscene or offensive mail matter by the sender and for the return of such matter at the expense of the sender.

Mr. SPONG. Mr. President, I fully support the pending bill to make it more difficult for smut peddlers to deposit their unwelcome materials in American homes, and it is my hope that this legislation will be followed by even more stringent measures in the future.

The volume of unsolicited and unmarked material going through our mails today is shocking and its contents disgusting and degrading. In the past year, my office has received scores of complaints from outraged Virginians whose families have been victimized by this practice, and they demand an end to it.

We have yet to find a way of stopping this traffic altogether, but we can make it more difficult for these pushers of pornography who have been allowed to make the U.S. postal service an unwilling partner in their trade. By requiring that all sexually oriented advertisements be conspicuously labeled and by requiring the sender of such material to pay return postage and a service charge, this bill takes a useful step in that direction.

Mr. DOLE. Mr. President, I strongly support S. 3220. I have received many angry letters from constituents concerning unwanted intrusions of pornographic material in their private lives. They say it is vile, disgraceful, and sickening and I most heartily concur. Unsolicited pornographic material is not a local problem peculiar to Kansas, but an issue of national concern.

The peddlers of this material ply their disgusting trade in every State and city of our country and use every means available to expand and carry on their activities. The mails have been one of the most important vehicles for them.

For the last 18 years the Congress has held numerous hearings on the problem of pornography in America. In the spring of 1969, President Nixon called for a citizens' crusade against obscenity and filth, and asked Congress to extend existing laws concerning pornography to enable citizens to protect their homes from invasions of sexually oriented advertising.

Mr. President, it is time to take action to curb unsolicited filth. S. 3220 is an effective start. By requiring purveyors of pornography by mail to place prominent warnings on their envelopes, addressees will be alerted to the contents. By requiring that pornographic literature be sent first class and providing for return of unwanted sexually oriented mail with a substantial service charge

and for a penalty of $5,000 for each piece of such matter mailed in violation of this bill, senders will be forced to curtail their activities or face sharp cost increases or heavy fine.

Clearly, S. 3220 is in the best interest of the American public and I urge its approval.

Mr. BYRD of West Virginia. Mr. President, the Post Office annually receives more than 250,000 complaints from citizens who have received unsolicited pornographic material through the mails. Obviously, there is an urgent need to supplement existing statutes on this subject, and to extend the right of privacy in the home to include protection from unsolicited pornography.

I believe that S. 3220 goes a long way toward meeting that need, and I hope that its passage will halt the flow of pornography through the mails and take the profit out of peddling unsolicited smut to unsuspecting citizens.

The bill would require that the sender of pornographic mail clearly mark the envelope, stating that "The enclosed material may be obscene or offensive to the addressee." Failure to make such a marking could result in a civil penalty of $5,000 for the sender.

As it stands now, this mail is usually sent to teenagers, and is usually mailed in plain envelopes. In the vast majority of cases, it is an outlandish insult to the sensitivities of the recipient, and an invasion of the right of privacy in the home.

S. 3220 would combat this problem by forcing the pornographic dealer to clearly mark his envelopes. The recipient may return the pornographic mail, in which case the sender must pay first-class postage and a service charge. Failure to pay for the returned mail could result in another $5,000 fine for the pornographic dealer.

Mr. President, S. 3220 represents a major expansion of the provisions of section 3010 of title 39, United States Code, as enacted by Public Law 91–375, and the Postal Reorganization Act of 1970. It retains the provision of Public Law 91–375 which allows a citizen to file a notice with the postal service that he not receive any sexually-oriented material. The Postal Service must maintain a list of all such persons, and make that list available to mailers at a cost. For their part, the mailers would be prohibited from sending any sexually oriented material to persons whose names had been on the list for 30 days.

This provision, enacted in 1967, also allows parents to place the names of their minor children still living at home on the postal service list. In the past 3 years, more than 200,000 Americans have expressed their desire not to receive obscene material through the mails; and the number will surely grow as more Americans become aware of the steps that can be taken against the smut peddlers.

Mr. President, it should be emphasized that S. 3220 is intended to protect the privacy of every citizen. It does not in any way represent censorship, inasmuch as it deals only with unsolicited material.

Understandably, the bill is not as strong as many would like it to be. But permissive decisions by the Supreme Court in recent years have seriously restricted Congress in dealing with smut peddlers. I am hopeful that Congress, in the near future, will be able to deal more firmly with the problem of pornography, and that we will be able to enact more stringent laws against those who would destroy the moral fiber of our Nation.

In the meantime, however, I urge the enactment of S. 3220 as a necessary step in the battle against pornography.

PURVEYORS OF FILTH MUST BE STOPPED

Mr. McINTYRE. Mr. President, I give my wholehearted support to S. 3220 which is directed at stemming the flow of pornographic and obscene literature in our country.

In my view, one of the most heinous happenings in our Nation today is the mushrooming distribution of pornographic literature. My constituents are continually sending me examples of the truly disgusting material they receive unsolicited through the mail.

This material comes to them in wrappings which do not reveal the contents. Therefore, this material is exposed to anyone who opens the mail, including young and impressionable children, before they realize its true nature.

Apparently the purveyors of this filth purchase the names and addresses of respectable and unsuspecting people and then send this material to them unsolicited. It is as if an unwanted, uninvited, ill-kempt, and filthy ruffian were to invade the privacy of one's home.

In 1967, Congress acted to stem the tide of pandering advertisements by providing a procedure whereby a person could take action to remove their names from mailing lists which might bring them pornographic material. I strongly supported and voted for that measure.

But the tide of this material has continued to flow and the need is now for new and more stringent steps to be taken. I think this bill, which has been brought to fruition by the majority leader, the able and distinguished Senator from Montana (Mr. MANSFIELD), does provide the penalties and the restrictions that will help stem the tide of pornography. This bill provides that any obscene material must be clearly marked on its wrappings: "The enclosed material may be obscene or offensive to the addressee." This warns the recipient against inadvertently opening this particular piece of mail.

This legislation also provides that the recipient can return it to the sender without postage by simply writing "Obscene mail matter" on the envelope and placing it in a mailbox. The purveyor of the material must then pay first-class postage for the return plus a $0.50 service charge.

I am sure that the warped minds who are guilty of spreading pornographic material will try to find new ways to infect our minds and our culture. But this bill will help close an important avenue to them and make their filthy task more difficult.

I urge the overwhelming passage of this important measure.

The PRESIDING OFFICER. Under the previous order, and the yeas and nays having been ordered, the Senate will proceed to vote on passage of S. 3220.

The assistant legislative clerk called the roll.

Mr. KENNEDY. I announce that the Senator from Tennessee (Mr. GORE), the Senator from Indiana (Mr. HARTKE), the Senator from Washington (Mr. MAGNUSON), the Senator from Wyoming (Mr. McGEE), the Senator from New Mexico (Mr. MONTOYA), the Senator from Utah (Mr. MOSS), the Senator from Maine (Mr. MUSKIE), the Senator from Rhode Island (Mr. PELL), the Senator from Alabama (Mr. SPARKMAN), the Senator from Missouri (Mr. SYMINGTON), the Senator from Maryland (Mr. TYDINGS), and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

I further announce that, if present and voting, the Senator from Washington (Mr. MAGNUSON), the Senator from Wyoming (Mr. McGEE), the Senator from Maine (Mr. MUSKIE), the Senator from Utah (Mr. MOSS), the Senator from Rhode Island (Mr. PELL), the Senator from Missouri (Mr. SYMINGTON), and the Senator from New Jersey (Mr. WILLIAMS) would each vote "yea."

Mr. GRIFFIN. I announce that the Senators from Arizona (Mr. FANNIN and Mr. GOLDWATER), the Senator from New York (Mr. GOODELL), the Senator from Oregon (Mr. HATFIELD), the Senator from California (Mr. MURPHY), and the Senator from Illinois (Mr. SMITH) are necessarily absent.

The Senator from Oklahoma (Mr. BELLMON) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from New York (Mr. JAVITS) is detained on official business.

If present and voting, the Senator from Arizona (Mr. GOLDWATER), the Senator from New York (Mr. GOODELL), the Senator from Oregon (Mr. HATFIELD), the Senator from South Dakota (Mr. MUNDT), the Senator from California (Mr. MURPHY), and the Senator from Illinois (Mr. SMITH) would each vote "yea."

The result was announced—yeas 79, nays 0, as follows:

[No. 324 Leg.]

So the bill (S. 3220) was passed, as follows:

S. 3220

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That section 3010(a) of title 39, United States Code, as enacted by section 2 of the Postal Reorganization Act (Public Law 91-375; 84 Stat. 749), is amended—

(1) by inserting "(1)" immediately after the subsection designation "(a)"; and

(2) by striking out all after the word "thereof" the first time it appears and inserting in lieu thereof the following: "the following notice in outstanding type: 'The Enclosed Material Is Sexually Oriented Advertising, And May, If Unrequested By The Addressee, Be Returned To The Sender Unopened At No Cost To the Addressee.'"

To protect a person's right of privacy by providing for the designation of sexually oriented advertisements and for the return of any such unrequested advertisements at the expense of the sender.

The title was amended so as to read: "A bill to protect a person's right of privacy by providing for the designation of sexually oriented advertisements and for the return of any such unrequested advertisements at the expense of the sender."

Mr. RANDOLPH. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. FONG. I move to lay that motion on the table.

Mr. BYRD of West Virginia. I join with the Senator from Hawaii in moving to lay that motion on the table

The motion to lay on the table was agreed to.

Mr. RANDOLPH. Mr. President, it will be recalled that yesterday important legislation was before the Senate in a realistic attempt to curb the pollution of the air which Americans breathe. That measure received the unanimous approval of the Senators present and voting. The rollcall vote was 73 to 0. This afternoon, we have just completed an attempt—within the framework of the Constitution, I believe—to curb the pollution of the mind; and the Senate has given unanimous approval again, on a rollcall vote of 79 to 0.

I think that the American public will approve of the action taken yesterday and today, as we work to improve and strengthen not only the physical but also the human resources within our Republic.

## HOUSE BILLS PLACED ON THE CALENDAR OR REFERRED

The following bills were each read twice by their titles and referred or placed on the calendar, as indicated:

H.R. 17654. An act to improve the operation of the legislative branch of the Federal Government, and for other purposes; placed on the calendar.

H.R. 18776. An act to establish in the State of Michigan the Sleeping Bear Dunes National Lakeshore, and for other purposes; to the Committee on Interior and Insular Affairs.

## DIRECT POPULAR ELECTION OF THE PRESIDENT AND THE VICE PRESIDENT

The PRESIDING OFFICER. Under the previous order, the Chair lays before the Senate the unfinished business which will be stated.

The legislative clerk read as follows:

A joint resolution (S.J. Res. 1) proposing an amendment to the Constitution to provide for the direct popular election of the President and Vice President of the United States.

The Senate proceeded to consider the joint resolution.

## POLITICAL BROADCASTING—CONFERENCE REPORT

UNANIMOUS-CONSENT AGREEMENT

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the vote today on the equal time amendment which, under the previous order, is scheduled for 2 p.m., be preceded by one-half hour of debate on the conference report, the time to be equally divided between the manager of the conference report and the able Senator from Rhode Island (Mr. PASTORE) and the minority leader or his designee.

Mr. BAYH. Mr. President, reserving the right to object—and I shall not object—I should like to ask the Chair for a clarification of the request. This in no way brings any additional business before the Senate; and the pending business, both before the acceptance of the request of the Senator from West Virginia and after, will still be Senate Joint Resolution 1?

The PRESIDING OFFICER. That is correct.

Without objection, the unanimous-consent request of the Senator from West Virginia is agreed to. There will be 30 minutes of debate on the equal time measure, starting at 1:30 p.m.

## MESSAGE FROM THE HOUSE—ENROLLED BILLS SIGNED

A message from the House of Representatives, by Mr. Berry, one of its reading clerks, announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the President pro tempore:

S. 406. An act to amend the Federal Property and Administrative Services Act of 1949 to permit the rotation of certain property whenever its remaining storage or shelf life is too short to justify its retention, and for other purposes;

S. 2565. An act to amend the act fixing the boundary of Everglades National Park, Fla., and authorizing the acquisition of land therein, in order to increase the authorization for such acquisitions;

S. 2763. An act to allow the purchase of additional systems and equipment for passenger motor vehicles over and above the statutory price limitation;

S. 3153. An act to authorize the Secretaries of Interior and the Smithsonian Institution to expend certain sums, in cooperation with the territory of Guam, the territory of American Samoa, the Trust Territory of the Pacific Islands, other United States territories in the Pacific Ocean, and the State of Hawaii, for the conservation of their protective and productive coral reefs; and

S. 3777. An act to authorize the Secretary of the Interior to enter into contracts for the protection of public lands from fires, in advance of appropriations therefor, and to twice renew such contracts.

## DIRECT POPULAR ELECTION OF THE PRESIDENT AND VICE PRESIDENT

The Senate continued with the consideration of the joint resolution (S.J. Res. 1) proposing an amendment to the Constitution of the United States relating to the election of the President and the Vice President.

Mr. BAYH. Mr. President, the Senator from Indiana earlier today said he had no intention of occupying the Senate's time, inasmuch as I think the case of the proponents for the pending order of business has been adequately made; and I would suggest that those who feel that we should have longer debate should now come forth and explain to the Senate the imperfections and the reason why they are unwilling to let the Senate do its will in this matter.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. ALLEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HOLLINGS). Without objection, it is so ordered.

Mr. THURMOND. Mr. President, during this debate on the direct election proposal we must bear in mind whether or not it is possible to put the plan into effect by the time its proponents are seeking. In my judgment, this proposal will never pass the gauntlet of the State legislatures because the States are becoming more and more aware of the threat which this proposal makes.

For example, two of the most influential newspapers in my State have come out against the direct election proposal. These newspapers are opinion leaders in South Carolina and their thinking is reflected in the South Carolina leadership.

The first of these editorials appeared in the State newspaper of Columbia, S.C., on Thursday, September 10, 1970. The headline in this editorial tells the story, "Direct Presidential Vote Will Weaken Small States." This editorial is so wisely written that I would like to read it to my colleagues at this time.

DIRECT PRESIDENTIAL VOTE WILL WEAKEN SMALL STATES

As Senators come to grips this week, and in the weeks to come, with the proposal that Presidents be elected by direct popular vote, they would do well to ponder the fact that our country, by name and by tradition, is the United *States* of America.

The point is: The Executive branch, no less than the Legislative branch, must repre-

sent the entire nation, not just the bulging centers of population.

The great 1787 compromise built into the Constitution established that principle insofar as Congress is concerned. In order to insure representation of the people and to reflect their patterns of growth and movement, the House of Representatives was based on the factor of population. But to insure that small states as well as large would have a voice in the nation's business, the Founding Fathers provided that each state should have equal voice (two members) in the Senate.

Thus, for a national policy to be determined, it would be necessary for a majority of the people (through the House) and a majority of the states (through the Senate) to agree.

The same sort of dual constituency was built into the selection of the President of the United States through the device known as the electoral college. Each state was given the same number of presidential electors as it had members of the House and Senate. Thus, a state's weight in the electoral college reflected both its population and its statehood.

Admittedly, the electoral college system has deficiencies and some measure of danger built into it. For one thing, the "winner take all" system whereby all of a state's electoral vote goes to the presidential slate receiving the greatest vote—even if the margin be minuscule—gives too much power to minority blocs which are thus enabled to tip an entire vote one way or the other with a relatively small "swing" vote.

But this and other drawbacks can be corrected without abandoning the arrangement whereby electoral votes are distributed throughout the nation. A number of remedial measures have been pending in Congress for years, but they seem now to have been shunted aside in favor of a scheme to elect the President by direct vote without regard to the distribution of those votes.

This particular scheme, being aggressively pushed by Indiana's Sen. Birch Bayh, could well relegate small states like South Carolina to even more remote fringes of national politics. Presidential candidates and party platforms would pander more than ever to the masses which have gathered in the nation's teeming metropolitan areas. The presidential constituency could change from a national basis to one made up of such populous states as California, New York, Pennsylvania, Illinois, and a few others—all to the exclusion of the smaller or less populous states.

It is fortunate that no such change can be accomplished without the concurrence of three-fourths of the states to the necessary constitutional amendment. States like South Carolina, for example, can defeat the proposal by refusing collectively to ratify an amendment proposing the change.

But it is a shame to devote so much time and energy in debate over a proposition which runs counter to the principles on which this nation was founded. We trust that South Carolina's two senators will stand firm against Senator Bayh and his effort to diminish the role of the small states.

Mr. President, the second editorial appeared a day later in the Charleston News and Courier which calls itself South Carolina's most outspoken newspaper. The News and Courier entitled its editorial "A Threat to States." I would also like to read this editorial to my colleagues at this time:

A THREAT TO STATES

Sen. Birch Bayh, D-Ind., chief sponsor in the Senate of the proposed constitutional amendment which would permit direct popular election of the President, contends he can count on the support of 55 to 60 senators. If all senators are present when the amendment is voted on, approval would require 67 votes.

Clearly, then, as Senate debate begins over abolishing the Electoral College and replacing it with the direct vote, the decision is going to be close. It would be considerably less close, perhaps, were all members of the Senate to study the conclusions and implications contained in the report on Sen. Bayh's plan filed by the minority members of the Senate Judiciary Committee. One of these members is Sen. Strom Thurmond.

On the surface the direct election of a President sounds like a better arrangement than the present system, under which a candidate with a majority of electoral votes wins the election, even if he does not have a majority of the popular vote. It sounded so much better to the House that it approved a direct election amendment a year ago 339-70.

The judiciary committee minority, however, contends that the proposed amendment would destroy the two-party system, damage federal-state relations, and would prove fatal to state political parties. The national Democratic and Republican parties are no more nor less than coalitions of state parties.

Columnist James J. Kilpatrick, an astute political observer, predicts that under a system of direct national elections, "state parties become almost irrelevant to the presidency. Presidential candidates no longer would think in terms of carrying states. Their quite different purpose would be to win at least 40 per cent of the nation." Could such a President so elected, Mr. Kilpatrick asks, govern the nation? "Without a broad geographic appeal, without a close working relationship with state parties," he asks, "what becomes of a President who is an all-out liberal, or an all-out conservative, a militant hawk, or a conciliable dove?"

The direct election scheme presents the risk of giving the nation a President with a constituency and political obligations quite different from those of past Presidents. To get elected he would campaign where he knows the most votes are, and could afford to ignore those states and regions which would be of little help to him.

"The Electoral College," said the judiciary committee's minority report, "is so intimately involved with the two party system, federalism, and separation of powers, that we do not see how these institutional arrangements can possibly survive under direct election in the long run."

If a majority of the Senate fully understands how abolition of the electoral system would tear the political fabric of the states and further impair federal-state relations—in some areas already badly damaged—Sen. Bayh's proposal cannot win.

Mr. President, another editorial from the Charleston Evening Post was published on September 18, 1970. It reads as follows:

SIMPLE BUT DANGEROUS

Simplicity, as a minority of the Senate Judiciary Committee pointed out recently, has its charms and that is one reason that proposal to do away with the Election College and replace it with "direct election" appeals to many people.

"Direct election is a simple and easily communicable idea," the minority went on to say. "That fact alone may account for its great popularity and the widespread and uncritical support it has received from the communications media."

"To the appeal of simplicity must be added two other factors, the influence of the recent one-man, one-vote rulings and the furor which has arisen from the Presidential candidacy of Gov. George Wallace.

"These have produced on the one hand a curiously abstract conception of democracy which has concealed difficult problems of representative government beneath an impenetrable mathematical screen and on the other hand an emotional catch-all argument which has enabled proponents of direct election to avoid answering hard questions about their proposals."

"Hard questions," we concede, have been coming slowly about the changes that Sen. Birch Bayh and other liberals have in mind for the Constitution. They are coming, however. The Judiciary Committee's report itself raises the most penetrating we have heard about the ways in which "direct election" may promote proliferation of splinter parties, inject volatility into the political process, undermine the federal system and encourage corruption at the ballot box.

Voters are not necessarily taken in by the oversimplifications of Mr. Bayh and his colleagues. We fret over letting Bayh and Company have the floor so long on an important issue but we recognize that eventually they will have to face up to the "hard questions."

Is change necessary? Most voters, we predict, will agree it is not.

Mr. President, David Lawrence is the dean of American newspaper columnists and widely recognized as a profound thinker on constitutional principles. In his column of Friday, September 11, 1970, which appeared in the Evening Star, Mr. Lawrence made the same point as the two distinguished editorials from South Carolina. Mr. Lawrence's column is entitled "Election Plan Would Hit 'Statehood'." That headline also tells a story. I would now like to read to my colleagues the thoughtful column which Mr. Lawrence has provided:

ELECTION PLAN WOULD HIT "STATEHOOD"

(By David Lawrence)

The Senate is struggling with a proposed amendment to the Constitution to abolish the Electoral College and conduct all presidential elections hereafter by direct vote of the people. The plan is to let the candidate who receives the largest number of votes be declared elected if this is at least 40 percent of the total votes cast. If no candidate gets that percentage, a run-off election would be held between the top two.

But the states would not hereafter cast their ballots in the Electoral College and would thus lose a power they have held since the republic was founded. It would be incredible if the three-fourths of the states of the union necessary should ratify any such amendment, because it certainly could mean a diminution of the influence of the smaller states in the election of the national administration.

Under the proposed amendment, a plurality of the votes could be obtained almost entirely from one section of the country, and the new president could cater to the demands or desires of that region. But, with the Electoral College, even the most populous states have a relatively small number of electors, and these can be offset by a combination of electors from smaller states. Some presidents, for example, have been elected by a substantial number of electoral votes by getting majorities in states of large and small population in different sections of the country. Yet their total popular vote was close to that cast for an opponent.

President Wilson was reelected in 1916 with the support of the South, which was usually Democratic, and the West, which was usually Republican. But the two areas in combination produced enough Democratic electoral votes to offset the heavy electoral vote for the Republican candidate in the Eastern states.

There have been other elections, too, in

which sectional problems have influenced the outcome of elections. The Electoral College has performed a service in such instances, because it has protected the interests of smaller as well as larger states concerned with certain questions.

In some elections, such as that in 1920, when there was a Republican landslide for Warren G. Harding, virtually all the states outside of the South went Republican. Results in elections were decided by popular vote. The Electoral College comes in as the decisive factor when elections are close and when sectional issues in different parts of the country produce wide differences of opinion and sometimes split parties.

The proponents of the suggested amendment keep emphasizing that election of a president would be by "direct popular vote," and imply that the Electoral College doesn't satisfy such a requirement. A group of senators, both Republican and Democrat, in opposing the amendment, make this comment:

"Direct election of the president, we believe, would—

"Destroy the two-party system and encourage the formation of a host of splinter parties;

"Undermine the federal system by removing the states as states from the electoral process;

"Remove an indispensable institutional support for the separation of powers;

"Radicalize public opinion and endanger the rights of all minorities by removing incentives to compromise;

"Create an irresistible temptation to electoral fraud;

"Lead to interminable electoral recounts and challenges;

"Necessitate national direction and control of every aspect of the electoral process."

But how, it will be asked, does such an amendment as is being proposed get widespread support? The answer is that the phrase "popular election" implies that the people will have a much more positive voice in choosing the president and will exercise a direct responsibility. The truth is a direct-election plan could lead to the destruction of the two-party system and could weaken both political parties in their state and local operations as well.

Members of the two major parties are divided in their support of the new amendment. Even if it does pass the Senate and is submitted to the states—since it has already passed the House—the big question is whether three-fourths of the states will ever ratify an amendment which will, in effect, impair "statehood."

---

## POLITICAL BROADCASTING—CONFERENCE REPORT

The PRESIDING OFFICER. Under the previous unanimous-consent agreement, the Senate will proceed to the consideration of the conference report on S. 3637.

The Senate proceeded to consider the conference report on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3637) to amend section 315 of the Communication Act of 1934 with respect to equal time requirements for candidates for public office, and for other purposes.

The Senator from Rhode Island.

Mr. PASTORE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Out of whose time is it to be taken?

Mr. PASTORE. On my time.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PASTORE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PASTORE. Mr. President, on Monday I put in the RECORD an explanation of the conference report. There seem to be only three or four Senators present in the Chamber at this time. I think Senators have read the explanation. I think we ought to allow any Senator who is opposed to the conference report to be heard, so I reserve my time.

Mr. BAKER. Mr. President, I understand I was designated to be in charge of the time in opposition, in the absence of the minority leader.

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. I yield myself such time as I may use. I shall not speak at length, but I shall speak in opposition to the conference report. I am sure that comes as no surprise to the manager of the bill. We had a full discussion of this matter in subcommittee and in conference.

I feel sure that all of us would agree that there must be something in the nature of appropriate limitation on the excessive expenditure of funds for television, radio, and other means in the campaign field. I feel almost sure that we would agree that the tendency and the trend of late has been in the direction of spending greater and greater sums, and that if this is left unchecked and to the devices of both parties, it can become a very serious matter.

In the view of the Senator from Tennessee, there should be a limitation on television and radio expenditures, just as there is for any other expenditures in campaigns for election. However, I feel that the bill adopted by the House and the Senate and the agreement reached in conference is not the proper approach. While it does propose to impose a limitation, it also does two things which trouble me.

The first, by indirection, it creates, in my judgment, a political subsidy for politicians, the cost of which is borne by FCC licensees who operate radio and television stations in the country. That is accomplished by the provision that each licensee—that is, every radio and television station—must grant to a political candidate the lowest applicable unit rate available to any advertiser. In a manner of speaking, this constitutes rate setting by statute, and with only slight poetic license, I can so characterize it.

If that be the case, it is the first, and I believe the only, effort we have made by statute to establish a rate. Albeit this is a maximum rate and not a specific numerical rate in so many dollars and cents, I still believe it is a step in the wrong direction, and that if we are establishing TV and radio rates in the Congress for any purpose, let alone for political purposes, we are going to alter and change the nature of broadcasting in a manner that will not be beneficial in the long run.

Mr. PASTORE. Mr. President, will the Senator yield on that point, on my time?

Mr. BAKER. Yes.

Mr. PASTORE. I think we ought to indicate in the RECORD the historical reason for the lowest unit rate applicability. The original bill, sponsored by 34 Senators, actually asked for a discount. I felt it was discriminatory to ask for a discount for only a limited number of candidates covered by the bill.

As far as the application of the lowest unit rate is concerned, it is initiated by the candidate himself. All we are saying here is that inasmuch as a candidate campaigns only for several weeks, and the stations make a concession in rates to those who use the time around the calendar, the same rate ought to apply to candidates so that the public will be able to hear the issues discussed by the candidates.

The lowest unit proposal was an alternative to the discount proposal in a bill which was cosponsored by 34 Senators.

I agree with the Senator that we ought not to get into a discriminatory procedure. I just do not agree that this is discriminatory.

Mr. BAKER. I agree with my colleague from Rhode Island that this approach is probably better. It is certainly better, in my judgment, than the original bill. However, I disagree with him that it is not discriminatory and is not rate fixing. It seems to me that when we establish a discount, in effect, of volume advertising for those who do not advertise in volume—which is what we do in this proposal—that is a discriminatory situation. We have created a public subsidy in favor of the political advertiser.

After all, if one advertises day after day, week after week, month after month, each year, and earns a discount, as a constant local or national advertiser, it is discrimination in favor of political advertisers to require that station to give them that same low rate.

All of us here are sensitive to the charge that we legislate in our own interest. I do not make that charge. I do not impute that to the Senator from Rhode Island. He has been very diligent in trying to reach this problem and find a solution. But I say I do not think we have found it here. I feel the present approach of the applicable minimum rate is discriminatory and amounts to a political subsidy, and that we are vulnerable and open to criticism because of it, and I oppose it.

On the second point, it seems to me that the question of the applicability of this statute to presidential candidates is something that has been determined a number of times, at least twice previously. We are about to do it a third time. Were that the only issue in the conference report, I would make no big thing about it, I believe; but I think, on balance, notwithstanding the valiant efforts of the Senator from Rhode Island and other members of the committee, it is time we found time to reexamine the whole situation and find a better solution.

I favor some sort of limitation on the amount of money that can be spent on television and radio advertising. I am

afraid the people are going to be virtually inundated with inanities. Even though they are of a political character, that does not improve their substance.

I am afraid that if we do not do something to limit political advertising on radio and television, not only will it be subject to abuse by politicians, but the public itself will virtually turn on and devour any candidate who tries to use it.

But be that as it may, we need to find some way to approach the problem. Unfortunately, I do not think this bill is a proper approach.

The distinguished minority leader and I were Senate conferees. We did not find ourselves in agreement with this proposition, and we did not sign the conference report. I urge our colleagues to vote against the acceptance of the conference report.

Unless there are further remarks on my time, Mr. President, I suggest the absence of a quorum.

Mr. PASTORE. Mr. President, will the Senator withhold that?

Mr. BAKER. I withdraw the suggestion.

Mr. PASTORE. Mr. President, the Senator has mentioned the chief areas of sensitivity as far as the Senator from Rhode Island was concerned. As far as I was concerned, this measure had to apply to all—State officers, school committeemen, sheriffs, and everyone who is an elective officer and runs for public office. That is the only way it could be justified. We could not do it only for the President, for Senators, or for Representatives; we had to do it for everyone.

All of this is predicated upon the fact that radio frequencies are in the public domain. The airwaves are in the public domain, and do belong to the public.

The drive here is not to give the candidate a break, but to give the public an opportunity to hear the candidate and listen to the issues. We cannot justify these things on a personal basis; they have to be done in the public interest, and the whole drive behind this legislation is, does it serve the public interest? In other words, can the public listen only to the man who is wealthy and has the funds, or should the public be entitled to some kind of program, that would enable it to hear even the poorer man, who cannot buy that amount of time, but is entitled to be heard as much as his opponent, regardless of his level of wealth?

So far as I am concerned, I am going to live within the provisions of this measure whether or not this law becomes effective for this election. And there is serious question about that.

We passed this bill in April, and included a provision that it would not take effect until 30 days after its enactment, to give the FCC an opportunity to write rules and regulations to govern the structure. It went over to the House of Representatives, and the House did not see fit to pass it until August. They passed it 3 or 4 days before they took their 3-week vacation. Right now, with the provision that it shall not become effective until 30 days after enactment, and this being September 23, and by the time the President receives it and takes his 10 days, it will not apply to this election.

This grieves me, because I was very much insistent that as far as the limitation is concerned, it should apply to the 1970 election. The House of Representatives changed that provision, and made it effective as of January 1, 1971. I was much opposed to that, and insisted on its becoming effective for this election—so much so that I shall live up to it even on a voluntary basis.

The fact remains that something needs to be done to bring this problem into proper context. This idea that someone running for an office paying $42,500 a year will spend a quarter of a million dollars to win the nomination—does that mean that this is going to become a government of the wealthy, or can it remain a government of the people, by the people, and for the people? That is the question here. That is the reason I supported this legislation. That is the reason we ironed it out and removed what I considered to be discriminatory features.

I repeat, this is not just for Congressmen. If I had thought for a minute this was to be confined to Congressmen, I would not have voted for it. The provision regarding the lowest unit rate runs from Congressman down to dogcatcher.

Mr. BAKER. Mr. President, I yield myself such time as I may require.

I think it is fortunate that this bill is not to take effect, or probably will not take effect in time for this election. That was one of the heated issues in conference, and was one of the heated issues, as a matter of fact, in committee.

It strikes me as singularly unfair that we would change the rules in the middle of the ball game and allow this to take effect in this campaign. There is every likelihood that candidates would have committed certain amounts to radio and television advertising that they suddenly would find they were unable to use. It is entirely possible that some candidates would find themselves in violation of contracts that had already been entered into and paid for. To make a long story short, it seems to me that if we are going to take this sort of action, it ought not to be taken in the middle of a political season.

There are other unique features that make it inappropriate that it should take effect now, and I hope very much it does not, even if the conference report is agreed to.

Let me take a specific local example of which I have personal knowledge. The amount of money you can spend in a campaign is limited by the number of votes cast in the last election. In Tennessee, in the last Governor's race, for example, there was no Republican nominee. The number of votes cast for Governor in 1966 in Tennessee was only about half the number of votes cast for U.S. Senator in 1966. Therefore, under the bill, the candidates for Governor in 1970, the next election—this year, this season—would be able to spend only about half of what the senatorial candidates could spend. It seems to me that is a gross, patent inequity that militates against this sort of action.

Mr. CURTIS. At this time, Mr. President, will the distinguished Senator yield for a question?

Mr. BAKER. I am happy to yield to the Senator from Nebraska.

Mr. CURTIS. What does this measure contain in the way of fixing of rates for broadcasters who make time available for candidates?

Mr. BAKER. Mr. President, this bill provides that broadcasters, radio and television, lawfully licensed outlets, must provide for political advertising at the lowest rate applicable to any other advertiser.

Mr. PASTORE. For the same slot.

Mr. BAKER. For the same time and under the same circumstances, the lowest unit rate.

The effect of that, in further response to the question of the distinguished Senator from Nebraska, in my judgment, is to provide a subsidy for political candidates. Because, in the case of advertisers who advertise regularly on radio and television, as a result of that regular advertising they earn a discount or a lower rate than occasional advertisers. Thus we are providing that we are entitled to a rate that we have not earned for political advertising.

In addition to that, some have unkindly characterized this approach as a subsidy for incumbents, because what occurs, as with any limitation of television and radio advertising, is the creation of, in this case, an unintended bias, but still a bias in favor of the better known candidate, and almost always the incumbent candidate is the better known candidate.

Very frankly, Senators must weigh, in my judgment, this difficulty against the distasteful prospect that someone will simply spend himself into office by an enormous expenditure of private or publicly raised funds. But, Mr. President, the essence of my objection to this bill is that we are creating, by statute, a rate to be charged by FCC licensees which is lower than we would have earned under the normal course of circumstances. We are providing by statute that we be entitled to the rate that national advertisers would earn who advertise regularly. To me, this amounts to a subsidy by statute in favor of political advertising.

The balancing of public equity and the necessities of the circumstance are taken into account, and may in some minds weigh in favor of this approach. But the Senate should approach this problem with its eyes wide open. We are, for the first time, albeit indirectly, establishing by statute a rate to be charged by FCC licensees.

Mr. CURTIS. Mr. President, will the distinguished Senator yield for one further question?

Mr. BAKER. I am happy to yield.

Mr. CURTIS. Can the broadcaster turn the candidate down if he has requested time?

Mr. BAKER. Mr. President, the broadcaster can turn the candidate down if he does not have the time available, and does not run afoul of other provisions of the FCC Act. He cannot turn the candidate down simply because he chooses, under private enterprise system, to ex-

clude that candidate from radio and television. But he cannot charge a greater rate, even for one spot, if that is all that candidate buys, than he charges a national advertiser for, say, 500 shots.

Mr. PASTORE. Mr. President, if the Senator will yield, in order to clarify the situation, that would come under the equal time provision, which is section 315.

As a matter of fact, any licensee could make whatever rates he wants, unless you have some kind of circumstance of this kind that would actually make it prohibitive for people to buy time. Some candidates could not afford to buy it.

The Senator from Tennessee complains, saying candidates have not earned the time, or earned the discount. After all, the candidate only runs once every 6 years. He campaigns for perhaps 8 weeks.

A Member of the House runs every 2 years, and he may campaign for 8 weeks or 12 weeks. How could he be placed on an equal basis with, let us say, some cigarette company that advertises right across the calendar?

The point is that we are not making a rate that you are going to charge. All we are saying is that once you have charged anybody on your station a certain amount of money for a certain spot, you cannot charge a candidate—whether he is running for the Senate, the Presidency, or the school committee—any more than that, in the public interest. That is all it amounts to.

The point is this: Unless we tie this down with a limitation, we will defeat the spirit of this legislation. That is the reason why I came on the floor of the Senate and proposed an amendment that would tie it down, put a ceiling on it. Otherwise, if a person is given a discount, he can buy more time if he is wealthy than can the poor man, in proportion.

Mr. CURTIS. Is there a ceiling now?

Mr. PASTORE. One cannot buy time for himself, nor can anybody in his behalf, exceed the limitation resulting from this legislation.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. BAKER. I yield.

Mr. CURTIS. What happens if a citizen who in truth and in fact is not associated with a candidate or a committee representing a candidate goes to the broadcaster and says, "I want to buy time. I do not like my Senator. I want to expose his record. I am doing this on my own as a citizen—my right to speak out on this matter"? We will suppose that the candidate involved and his committees have already reached the limit. In the hypothetical case I have given, in which the citizen is in truth and in fact not associated with either candidate, what happens under this bill?

Mr. BAKER. I am not sure what would happen.

Mr. PASTORE. I am sure what would happen.

Mr. BAKER. I think it would depend on whether the incumbent was in fact involved in a campaign. If he was involved in a campaign, then I am inclined to think that, under the provisions of the present bill, that time would be charged against the total allowable and must fall under the maximum.

Mr. PASTORE. That is right. Or it would come under the fairness doctrine, whereby the other party would be entitled to the equivalent amount of time.

Mr. CURTIS. Can one exceed the ceiling if equal time is extended to the opponent?

Mr. PASTORE. It is not supposed to be done. We are only talking about the time that is bought. Nothing prevents that network or the station or the licensee from giving time free in excess of the amount that is paid, but under section 315, they would have to give it to him, too.

We do not want one party to be in a position to have more exposure than the other party simply because he has the money. That is about the size of it. We are trying to bring about a balance. I know there can be one formula or another—and I do not care what the formula is—and there is always a little subterfuge that can be worked in.

On the other hand, the best policeman would be the opponent. Then, of course, the one who is elected has to come here and raise his hand to be sworn in, and if he has abused the privilege, I am afraid he will scandalize himself and might jeopardize his seat in the Senate.

Mr. GURNEY. Mr. President, will the Senator yield?

Mr. BAKER. I yield.

Mr. GURNEY. As I understand it, there is a date here of August 12. If agreements are made with a broadcasting company prior to the date for purchasing advertising in the campaign, it is all right to spend all you want, but if they are made after that date, one is subject to the limitations of this law. Is that correct?

The PRESIDING OFFICER. The Senator from Tennessee has 1 minute remaining, and the Senator from Rhode Island has 5 minutes remaining.

Mr. PASTORE. I will reply on my time.

Does the Senator from Pennsylvania desire some time?

Mr. SCOTT. I should like 2 minutes, if I may.

Mr. PASTORE. All right.

To answer the question of the Senator from Florida, that is moot. That question was raised by Senator SCOTT in the conference, and in order to overcome the chances that some contracts had been entered into, we made it a grandfather clause. But it has no effect now because of the date we are acting on it now. I have already explained that I doubt very much that the provisions of this bill will apply during this election.

Mr. SCOTT. Mr. President, will the Senator yield me 2 minutes?

Mr. PASTORE. I yield 2 minutes to the Senator from Pennsylvania.

Mr. SCOTT. Mr. President, with respect to the conference report accompanying the bill S. 3637 concerning political broadcasting. I believe that most Members of the Senate are familiar with its provisions. Earlier this week the distinguished chairman of the Communications Subcommittee of the Committee on Commerce (Mr. PASTORE) submitted the conference report and a brief explanation to what it does—see CONGRESSIONAL RECORD of September 21, pages 32898–32899.

Nonetheless, I believe the matter is of sufficient importance to warrant the following recapitulation:

First, the bill would amend section 315(a) of the Communication Act to exempt the use of a broadcasting station by a legally qualified candidate for President or Vice President of the United States in a general election from this so-called equal opportunities provision. The fairness doctrine would still be applicable to broadcast by such candidates. It would be effective upon enactment, but from a pragmatic standpoint, would not be operative until the 1972 presidential election.

Second, the bill would amend section 315(b) of the same act to limit charges for the use of a broadcasting station by a legally qualified candidate for any public office to the lowest unit charge of the station for the same amount of time and the same period charged any commercial time buyer. It would by effective 30 days following enactment. According to the Federal Communications Commission, such lowest unit rate would apply only to personal use by a candidate—including films—and would not apply to broadcasts on behalf of the candidate where he does not appear.

Third, the bill would add a new subsection to section 315 of the Communications Act, imposing a limitation expended by or on behalf of legally qualified candidates for major elective office. "Major elective office" includes the office of President, U.S. Senator or Representative, or Governor or Lieutenant Governor of a State. Moreover, amounts spent on behalf of any legally qualified candidate for the office of Vice President of the United States shall be attributable to the expenditures by the candidate for the office of President of the United States with whom he is running. The inclusion of Governor and Lieutenant Governor reflects the House language which was adopted by the majority of the conferees, as does the option in the several States to include State offices other than Governor or Lieutenant Governor.

The limitation on a legally qualified candidate in an election other than a primary election imposed would be 7 cents, multiplied by the total number of votes cast for all candidates for the office in the preceding general election or $20,000, whichever is greater. The limitation on a legally qualified candidate in a primary election for nomination to a major elective office, except that for President, would be 50 percent of the amount allowed in the general election, but does not take effect until January 1, 1971, with respect to such primary elections. The limitation on general elections, on the other hand, would be effective 30 days following date of enactment; and in view of the current time period, would have no effect upon the upcoming elections of November 1970. For this reason, the exemption provided for in the conference report with respect to agreements entered into on August 12, 1970, is for all intents and purposes moot.

Mr. President, I believe that the foregoing accurately describes the probable impact of this legislation. For my own part, I feel that there is merit to the exemption from the so-called equal oppor-

tunities provision of section 315 of the Communications Act. What has bothered me in the past and still does to some degree is the fact that the limitation on expenditures on the electronic media tends to give the incumbent an inherent advantage, owing to the public exposure which he receives during the term of his office. I still have reservations on this point, and that as expressed in an August 8 editorial by WMAL–TV, which I inserted in the RECORD on August 27.

In conclusion, I request unanimous consent to have printed in the RECORD at the conclusion of my remarks a letter which I received under date of September 9, 1970, from the Federal Communications Commission in response to a letter sent jointly by Representative FORD and myself.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. SCOTT. I invite the attention of my colleagues to the following conclusion stated in that letter:

The Commission wishes to stress that in this and any subsequent election, the Commission would not be able to state at any time during the election process what amounts had been expended on behalf of any candidate coming within S. 3637; such information would become available only substantially after the election had ended. Further, since we anticipate the need to process additional complaints in view of the new substantive provisions, the Commission doubts that it has the resources and facilities to implement S. 3637 on a continuing basis for future elections without appropriations for additional personnel.

EXHIBIT 1

FEDERAL COMMUNICATIONS COMMISSION,
*Washington, D.C., September 9, 1970.*

Hon. HUGH SCOTT,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR SCOTT: This is in reply to the letter sent jointly by you and Congressman Ford on August 20, 1970 requesting from the Commission (1) an analysis of the meaning and practical effect of S. 3637, the political broadcasting bill which would amend section 315 of the Communications Act, as reported by the conference committee, and (2) an assessment as to whether the Commission has the resources and manpower to enforce the provisions of this legislation during the 1970 Congressional and Gubernatorial elections. The bill would amend section 315 in three major areas. We shall discuss them in turn.

EQUAL OPPORTUNITIES

First, S. 3637 would amend section 315(a) to exempt the use of a broadcasting station by a legally qualified candidate for President or Vice President of the United States in a general election from the "equal opportunities" provisions. Of course the fairness doctrine would remain applicable to broadcasts by such candidates. The effect of this amendment should be an increased use of broadcast facilities by the major presidential candidates and their running mates. Because the amendment would free licensees from the alleged inhibitions contained at present in the "equal opportunities" clause, more free time would probably be afforded to the major candidates for President. This provision becomes effective upon enactment but has no practical effect until the 1972 presidential elections.

LOWEST UNIT RATE

Second, the bill would amend section 315 (b) to limit charges made for the use of a broadcasting station by a legally qualified candidate for any public office to the "lowest unit charge of the station for the same amount of time in the same time period."[1] This amendment would result in varied reductions of costs for buying political broadcast time, since some broadcasters already have a policy of affording political candidates the lowest unit charge (or comparable reductions) while others give candidates no reductions at all. We expect this provision to be a significant step in reducing the costs of electronic campaigning in future elections. However, since the effective date is 30 days after enactment, the reduced rates could only be in effect for a few weeks, at most, for the 1970 elections. This would produce only moderate overall reductions in costs for 1970.

Under this provision the Commission would (1) inform licensees of their obligations under the new law to provide candidates with the "lowest unit rate" for broadcast time to be used after the effective date, and (2) promulgate rules defining the method of computing the lowest unit rate for various time periods.

The Commission's staff is working on appropriate rules at the present time. We would expect to promulgate these rules in an expedited rule making proceeding with the rules to be effective concurrently with the effective date of the legislation. In view of the necessity of having the rules effective on the effective date of the legislation, the Commission would state at the time of promulgation that good cause existed for their promulgation without a notice of proposed rule making or participation by the public in the proceeding and without the lapse of 30 days before their effective date.[2]

SPENDING LIMITATION

The third change in section 315 is an amendment to impose a limitation on funds expended by or on behalf of certain political candidates for the use of broadcasting stations.[3] The limit would apply to candidates for the offices of President, United States Senator and Representative, and State Governor and Lieutenant-Governor. A State may, by law, include other state offices but, as a practical matter, it does not appear that any state could adopt legislation to this effect in time for the 1970 elections.

The amendment would impose a spending limit of 7 cents multiplied by the total number of votes cast for all candidates for the office in the preceding general election or $20,000, whichever is greater.[4] Funds spent by or on behalf of a vice presidential candidate are deemed spent on behalf of his presidential running mate.

A candidate could spend on each primary election no more than an amount equal to 50% of the above limit, with the exception of presidential elections. 1970 primaries, however, are not covered by the bill.

If S. 3637 is enacted in time for the 1970 general elections, the full spending limit would apply to the period from 30 days after enactment (the effective date) to the election. Thus a candidate who is limited to $20,000 for political broadcasts would be allowed to spend the full $20,000 after the effective date without violating the new law.

The bill provides that no station licensee may charge for the use of his station by or on behalf of a candidate covered by the section unless the candidate or his authorized representative certifies that the payment will not violate the applicable spending limit. Upon passage of the legislation the Commission will notify licensees of their obligations under this provision—that is, not to accept payment for political broadcasts without an authorized certification by the candidate that such payment does not exceed the limitation. Broadcasters who do not obtain written certifications would be subject to administrative sanctions including monetary forfeitures, cease and desist orders, and even loss of license. We are uncertain how this provision is to be enforced with respect to false certifications made by candidates.

Furthermore, the Commission will amend its questionnaires for its biennial political broadcast survey so that a licensee will report the amounts spent on his station by or on behalf of each candidate. This information will be coded and programmed into a computer so that we can furnish Congress with the total amount spent for broadcast time by each candidate.

We have already devised a new form for compilation of total spending by candidates for broadcast time during the campaign, but we would not have the resources to compute the total amount spent by each candidate for the short period of time when the law would be in effect for 1970. The results of our survey will not be available until the Spring of 1971. Furthermore, we do not have the facilities to keep a running account of the amounts spent for broadcast time by or on behalf of individual candidates during the campaign. This will be true of future elections as well as the immediate 1970 election.

In order to avoid disputes in the manner of computing the spending limit, we would advise candidates and licensees of the official sources to be used for arriving at the total number of votes cast for an office in the preceding election. The number of votes which would be necessary to exceed the $20,000 floor established in the bill is 285,715. Since the Congressional Directory records that the votes cast in any single election for United States Representative in 1968 did not exceed that number, with the exception of the 35th District of California, it appears that no candidate for Representative, except in that District, would be entitled to spend more than $20,000 for broadcast time in 1970.

We would also instruct licensees to obtain written certifications from candidates or their authorized representatives for all time to be used after the effective date of the new legislation. If contracts have already been entred into for broadcast time after the effective date, licensees will still have to obtain certifications from the candidates for those broadcasts. At the same time, licensees would afford candidates the "lowest unit rate" for such time in accordance with new section 315(b).

SPENDING LIMIT EXEMPTION

Section 3 of the bill authorizes the Commission to exempt certain elections from the spending limitation. It provides, in part:

(2) If the Federal Communications Commission determines that—

---

[1] The lowest unit rate applies only to personal use by a candidate (including films). It does not apply to broadcasts on behalf of a candidate where he does not appear.

[2] 5 U.S.C. § 553(b)(B) and (d)(3). We would of course give interested persons an opportunity to suggest revisions before the rules were applied to 1971 elections (e.g., by reconsideration, including an express invitation to do so in the Report published in the Federal Register). If the bill is inapplicable to the 1970 election, either because of the passage of time or a further amendment to that effect, we would follow the normal procedures set out in the Administrative Procedure Act (i.e., notice; effectiveness 30 days after publication in the Federal Register).

[3] The bill defines "broadcasting station" for the purposes of section 315 to include cable television (CATV) systems.

[4] Proposed section 315(c)(2)(b) provides that for Senate elections where the last election for Senator had fewer total voters than a more recent statewide election, the limit is 7 cents times the total votes cast for the statewide office.

(A) on August 12, 1970, a person is a legally qualified candidate for major elective office (or nomination thereto),

(B) there are in effect on such date one or more written agreements with station licensees for the purchase of broadcast time to be used after such thirtieth day on behalf of his candidacy for such office (or nomination thereto), and

(C) such agreements specify amounts to be paid for the purchase of such time to be used after such thirtieth day which, in the aggregate, exceed the limitation imposed by section 315(c)(2) of the Communications Act of 1934 with respect to the general election for such office,

Then such amendments shall not apply to any of the candidates for election to such office in an election held before January 1, 1971.

The spending limit applies to all candidates unless the Commission determines that a race is exempt. If one candidate in an election qualifies for the exemption, then all candidates for that office are exempted. Thus all candidates for the same office are treated equally. If a candidate shows (1) that he was a legally qualified candidate on August 12, 1970 for one of the "major elective offices" listed in new section 315(c)(1); (2) that by August 12 he had entered into written agreements with broadcasting stations (including CATV) to buy time to be used after the law becomes effective, and (3) that the amounts to be paid under such agreements for time used after the effective date would exceed the new overall spending limitation, then all candidates for that office would be exempt.

In order to implement this provision if it becomes law, the Commission would, upon the President's signing of the bill, issue a public notice and promulgate rules concerning the provisions of the legislation. For example, we would—

a. Notify candidates and licensees that some elections may be exempted from the spending limit, and advise candidates that they have 15 days in which to file with the Commission certified copies of contracts entered into prior to August 12;

b. Notify licensees that the only candidates who are exempt from the spending limit will be listed (by office sought) by the Commission in a public notice to be issued prior to the effective date;

c. Warn licensees not to predate written contracts for political broadcast time under any circumstances, in order to avoid circumvention of the August 12 date in the law; and

d. Instruct licensees to place authorized certifications by candidates in their public files in order to facilitate checks by opposing candidates and other members of the public.

We anticipate a problem may arise where a candidate has contracted to spend more than his limit for broadcast time to be used during the effective period, has requested an exemption from the limit, and wants to purchase broadcast time before the Commission issues its public notice listing the exempt election contests. In this situation, the candidate cannot certify to the licensee that he would not be in violation of the spending limitation until we declare the candidates for that office are exempt from the spending limitation. Thus we would instruct licensees not to accept payments from or on behalf of such candidate for broadcast time during the effective period until we declare the contest exempt from the limitation. We will make every effort to publish a notification of exemptions as soon as possible, and in any event, no later than the effective date of the legislation.

Another problem arises where a candidate has entered into agreements prior to August 12 for broadcast time after the effective date, the cost of which, at the contract rates, totals more than his spending limit, but where the lowest unit rates would not qualify him for the exemption. At this point, we believe that we should accept the contract rates for the purposes of ascertaining whether the candidates for election to that office should be exempt from the spending limit.

CONCLUSIONS

As for the 1970 election campaign, we are able to implement the lowest unit rate provision and do not expect to encounter special difficulties if only a short time is involved. We also have the resources to determine exemptions from the spending limits pursuant to Section 3 of the bill. However, we would not have the resources to determine for the 1970 elections what amount of a candidate's total funds was expended after the effective date.

The Commission wishes to stress that in this and any subsequent election, the Commission would not be able to state at any time during the election process what amounts had been expended on behalf of any candidate coming within S. 3637; such information would become available only substantially after the election had ended. Further, since we anticipate the need to process additional complaints in view of the new substantive provisions, the Commission doubts that it has the resources and facilities to implement S. 3637 on a continuing basis for future elections without appropriations for additional personnel.

As a practical matter, if Congress does not pass this legislation by September 23, and if the President should not sign the bill until the tenth day of the ten-day period allowed, the provisions of the bill will not become effective before the November 3, elections.

This letter was adopted by the Commission on September 9, 1970.

DEAN BURCH, *Chairman*.
(By direction of the Commission*).

Mr. PASTORE. Mr. President, questions have been raised: Why do this to the licensees in broadcasting? Why are you not doing it to the newspapers? Why are you not doing it to billboards? Frankly, I think the time has come for a very firm, strict Corruptions Act if we are going to protect the public interest. The only reason why this measure deals alone with the electronic media is that that is as far as the jurisdiction of my committee went.

I would sincerely hope that, if and when this measure becomes the law, the appropriate committees of Congress would get busy and give us an overall law; because some small broadcasters, especially in the mountain States, claim they are going to feel the pinch on this. I hope they will be patient and understanding. I realize that this does not apply to the newspapers. I realize that this does not apply to the billboards and all the other gimmicks in the campaign process. The fact still remains that this is confined to radio and television because that is the jurisdiction of my committee.

I would hope that all the other committees, particularly the Committee on the Judiciary, would get busy and give us a law that would make it fair for the poor man as well as the rich man, and would give equal opportunity to the poor man as well as the rich man, to run for high public office in this country.

The idea of the magic of television and radio and newspapers and all the other paraphernalia that money can buy in an election, I am afraid, is going to destroy the very roots of the democratic process.

*Commissioner Johnson concurred in the result; Commissioner H. Rex Lee was absent.

Mr. BAKER. Mr. President, I would support a reasonable limitation on the amount that might be spent for radio and television advertising, or all advertising for political purposes, for that matter; but I believe that this bill, in its present form, amounts to legislative subsidy in favor of politicians, and I am opposed to it.

Mr. PEARSON. Mr. President, today we are about to take a momentous step toward breathing new life in this sorely tried political system of ours. We all were raised in the belief that any boy in America could eventually become President. Today, we know that belief, which used to be nearly true, is now a myth unless the boy in question is extremely wealthy or has the support of well-heeled interest groups. Unfortunately, it has also become necessary to have or obtain the support of considerable wealth to successfully seek most important public offices ranging from county commissioner to U.S. Senate. This offends not only our sense of ethics but also threatens the basic premise upon which our representative democracy is founded; namely, equality of competition. In theory, the leaders we elect to guide our destiny are the best we have available at the time. Every competing idea or philosophy is supposedly to be given an equal opportunity to make its appeal for public support. The citizens, in their collective wisdom, then render their verdict on which path they choose to follow.

This model has never operated perfectly, of course. In certain times and places one candidate has often had far more potent resources to apply than his opponent. But by and large over the years the competition from the lowest level to the highest has been vigorous and virtually anyone with the desire to offer his services could hope to nearly match the campaign efforts of his opponents.

Mr. President, we have come a long way since Abraham Lincoln spent 75 cents on his first congressional campaign and many of the changes wrought in the election process since then are perhaps inevitable, but in need of constant adjustment lest they so dominate the system that it looses all meaning. As our population has expanded it has become increasingly difficult for an elected official to maintain close contact with the constituency he has been elected to represent. Heavy use of the mails is expensive and a rather impersonal method of contact. A face to face meeting with constituents is the most effective way to communicate, of course. But, as everyone in this chamber realizes, it is impossible to ever personally meet with a large enough percentage of our constituents to do the job they expect us to do of keeping them informed of our activities. Even in the course of a long and vigorous campaign only a small portion of the electorate are ever personally contacted by the candidate. Yet, the votes we cast for our elected officials are among the most important decisions we make during our lives. They determine who will bear the heavy responsibility of shaping the future of our communities and our Nation. Whenever talented men and women are barred from successfully offering their

services simply because they lack great wealth or whenever the voter makes his crucial decisions on the basis of misleading images artfully contrived and marketed by public relations specialists, the interests of the entire community suffers.

How then to effectively communicate with a continually expanding electorate while preserving the equality of access that is so essential for keeping the political process open to all points of view? The answer, of course, is television. Television has become the most vital ingredient in every major campaign today. It has also become the most expensive. The result has been to price many worthwhile candidates out of the election market simply because they lack the means to buy enough television time to compete effectively.

Mr. President, the legislation this body is about to enact is designed to resolve this problem in a forthright and fair manner. When the distinguished Senator from Michigan (Mr. Hart) and I first introduced the measure which led to the conference report under consideration today, I said that I hoped it would receive the speedy consideration it deserved. I am delighted that the Congress has reacted so swiftly to reform the field of political broadcasting in order to reduce the many inequities and thus maintain public confidence in our political system. I wish also to commend the distinguished Senator from Rhode Island (Mr. PASTORE) for his vigorous leadership in drafting this legislation and carrying it forward to final passage.

We are taking this step none too soon, Mr. President, for the costs of campaigns are escalating at such a rate they are approaching a national scandal. Many campaigns are costing hundreds of thousands of dollars while a good many others are costing millions. The vast bulk of these sums are spent on television. These rising expenses represent a greater use of the medium as well as higher operating costs, of course. But they also reflect the fact that television rates climbed by an average of 30 to 40 percent between 1961 and 1967. And even all the money spent for air time is only a part of the total related to political broadcasting for another 25 percent on the average is spent on production costs to get the films and radio tapes ready for airing.

Mr. President, these spiraling costs are gravely distorting the election process and simply must be curbed. The bill we consider today may not offer the perfect formula, but it at least represents a positive start and because of the overwhelming need for reform it demands our support. It would first repeal the equal time clause of the Communications Act of 1934 as it applies to presidential and vice presidential candidates. This will permit the networks to donate free time in the public interest to major candidates without being plagued by a host of fringe contenders. The availability of this time will not only help to reduce soaring campaign costs, but also will serve to encourage the type of debates that the public found so informative in 1960.

The basic thrust of the bill, however, is centered on the use of paid time and it is here that it will have its greatest impact. This legislation, by requiring that radio and television stations sell their time to candidates at no more than the lowest unit charge for the comparable use of their facilities, will at least insure that those seeking positions of great public trust and who use the one medium of communication licensed and regulated to operate in the public interest are treated the same as used car salesmen and the purveyors of toothpaste and deodorant.

Mr. President, many stations, much to their credit, have resisted the temptation to charge political candidates all that the traffic will bear and have even offered discounted time in some instances. They are to be commended for their farsightedness. But we cannot as a matter of principle allow this issue to be resolved solely by voluntary rate reductions for two reasons.

First, the rates would vary widely from area to area, even within the same State. This would not only be unfair to the candidates, but also to the stations who had been the most public spirited since they would be disproportionately besieged with political advertisers seeking to exploit their special rates. Second, as long as the rate reduction remains an individual issue and is not set at a uniform level as a matter of principle, the candidate might soon find himself bargaining for favors with the very licensees he might soon be called upon to regulate. Clearly, this unhealthy relationship needs to be avoided in the public interest.

In addition, to setting the lowest unit rate charge as a basis floor for political broadcast costs, the bill also establishes a ceiling on the amount that can be spent for such purposes. This too is necessary if the rights of the licensee as well as the public are to be protected. Without a limit, there would be no reduction in campaign costs for the candidates with money would only buy more time. Moreover, without a spending limit, the stations could be unfairly exploited.

Thus, Mr. President, by allowing the use of free time in presidential contests, setting a uniform and reasonable rate for political broadcasts, and simultaneously placing a limit on the amount that can be spent the historic legislation we adopt today marks a bold step forward in the field of campaign financing reform. Much more still must be done, of course. Last year, for example, I introduced the Campaign Finance Act (S. 1692) to improve the method of reporting campaign spending and to provide for a dual system of tax credits and tax deductions for political contributions. In this way we could tighten up on the manner in which the money is spent while also broadening the contributions base to lessen the danger of excessive dependence on a few special interest groups for campaign finances. I suggest that this or some similar legislation is needed as a companion to the reforms we are considering today.

But the fact that there is more to do or that the legislation before us may not meet our individual approval in every detail should not slow its passage or its swift implementation. I consider the legislation we are about to adopt to be the most significant action taken in the field of campaign finance since the Corrupt Practices Act was passed 45 years ago. Our democratic political system will be much better for it. This legislation represents a start toward the complete overhaul of our system of campaign finance to make it possible for everyone interested in serving the public to have as nearly an equal opportunity as possible of doing so. I trust it will receive the broad support it merits.

Mr. TOWER. Mr. President, I am strongly opposed to S. 3637. In my opinion this legislation would impose a campaign spending limitation which is unrealistic, even if the Congress decides it should impose a limitation, and I am still not convinced that a dollar limitation should be imposed at all.

It may be that this bill will actually subvert its own intent. The actual result of legislation designed to limit political broadcasts and reduce campaign costs may be only to inhibit the use of a most economical method of explaining to the voters the positions of the candidate on significant issues.

This legislation favors incumbents, discriminates against broadcasters, and contains what I believe to be serious legal deficiencies which may only throw candidates and broadcasters into a quandary and subject them to the judgment of the courts.

As chairman of the Republican Senatorial Campaign Committee, I feel that I am in a position to judge the effect this legislation would have, particularly on Senate races, even though the legislation would not go into effect until the 1972 election.

Let me explain first the actual cost limitations this bill would impose. The bill limits the amount of money a candidate may spend in the purchase of broadcast advertising to 7 cents per vote cast in the previous election for that office, or $20,000, whichever is greater. The bill applies to all candidates for President and Vice President, the U.S. Senate, the House of Representatives, and State Governors and Lieutenant Governors. In the case of a candidate for U.S. Senate, the limitation may be figured on the basis of the total vote cast in a statewide election conducted since the last Senate election.

Mr. President, I know that this legislation will probably have little effect upon this year's elections. But for the purposes of demonstration, I hope the Senate will let me assume that it would. In this way I will be able to figure the limitation which would have been imposed this year and explore whether that figure is realistic. Of course the actual spending limitation which would be set for the 1972 elections would be based upon the voter turnout this November in most cases.

In my home State of Texas, a Senate candidate operating under the legislation this year would have been limited to the expenditure of $204,294.51 for the purchase of broadcast advertising. With this sum, the candidate would have had to consider how best to spend this amount of money to most effectively reach more than 4 million registered voters spread over 254 counties. He would have to decide exactly how he would use the broadcast advertising opportunities offered by

some 66 television stations and more than 500 radio stations.

I am not going to suggest any best method for making these determinations, for each candidate can best make those determinations for himself. The purchase price of the broadcast advertising could vary extensively, even though the bill provides that the broadcaster make available his lowest rates. But the spending limitation could easily mean that a candidate would be limited to four 20-second spots on each television station and have no funds left over for radio use.

In the State of California, a Senate candidate this year would have been limited to an expenditure of $497,172.55 for political broadcast advertising. Yet candidates in the senatorial election in California have reported spending more than $600,000 on broadcast advertising.

In New York, a limitation of $462,311.09 would have been imposed. Yet, the New York Times has reported that some $830,000 was spent in behalf of Representative RICHARD OTTINGER in his bid to become the Senate nominee of the Democratic party in its primary contest earlier this year.

Let me also note an example of a small State with much of its population situated close to metropolitan areas in neighboring States. Such a situation poses an entirely different problem for the candidate.

The $20,000 limitation would have been imposed this year in Delaware had this legislation been in effect. Yet, a candidate would have had to consider whether he wished time purchase on Philadelphia stations which beam a strong signal into the most populous portion of Delaware. The Philadelphia area constitutes an expensive television market and many of those who would hear a Delaware candidate's commercial would be unable to vote for him. A candidate might spend his entire limitation in purchasing only fifteen 20-second spots in the Philadelphia market.

Now it can be argued that the intent of this legislation is to discourage candidates in the future from spending as much money as candidates have in the past. I would not argue with that philosophy. But I would encourage every Senator to consider exactly what limitation would be imposed upon him in his home State and compare that figure with his own personal estimate of what would constitute adequate funding for campaign broadcasts.

I would also like to point out that broadcast advertising can be used effectively to communicate to the voters the positions of the candidates upon the issues. I believe everyone will agree that the literal survival of our democracy depends upon an enlightened electorate. Responsible leaders are continually seeking new ways of educating the electorate in the belief that an educated voter, who knows where the candidates stand on the issues, will be more capable of selecting the best qualified public officials.

The general sales manager of a television station in my home State provides his potential customers with information indicating that television advertising on his station, in his market, given his station's viewership, costs about $3 per thousand viewers reached.

I know that it may be argued that that figure is too low. But I know this general sales manager to be a reputable man who is making an honest effort to provide his customers with realistic information.

If his market is anything comparable to the national average, it seems to me that the pending legislation will significantly limit a candidate in the use of a medium which is an extremely economical one in terms of dollars spent for voters reached.

Mr. President, the American Research Bureau estimates that as of January 1st of this year, some 94 percent of all households in Texas had at least one television receiver. Certainly there are few voters in my State without access to television. If a candidate traveled across the State of Texas continuously for a year, he would not have the opportunity of reaching 94 per cent of the voters.

Of course he would not reach everyone who owns a television set simply by purchasing one television commercial; but I am convinced that television and radio together may constitute one of the most economical means for communication from the candidate to the voter.

If we limit the candidate's ability to use the broadcast media, we may be forcing him to spend his money elsewhere and we may be forcing him to spend more of it. If this is the case, this legislation will be undermining its own intent.

Mr. President, I have argued before that this legislation favors incumbents, and I am not going to take the Senate's time with a lengthy elaboration of a point which I believe is well understood by everyone in this Chamber.

Suffice it to say that on this point, I believe we, as incumbent Senators, should consider not our own personal advantage, but the political health of our Nation. Far better for us to provide responsible legislation which will provide the voters with the full opportunity to elect the best candidate, who most closely represents the overall views of the voters, than simply the man who has been holding the job.

Mr. President, the legislation before us, in my opinion, is extremely vague on several points. I believe passage of this legislation will open the way for extensive court suits and cause significant problems for the Federal Communications Commission.

For one thing, the legislation, as far as I can tell, does not even consider the possibility of a committee which might be formed in opposition to a candidate. The bill indicates that a candidate must, in figuring his expenditures for broadcast advertising, add in commercials which might be purchased by organizations other than his own campaign organization who wish to express support for his candidacy. This will cause candidates significant difficulty in itself. A candidate may find himself asking an organization which is friendly to him to please refrain from purchasing broadcast advertising in his behalf. But what about a committee in opposition to a candidate? Would purchases made by such a committee be credited against the limitation of alternative candidates? If it does not, will this not open a loophole for the expenditure of funds in mere opposition to an opponent? It seems to me that the pending legislation is unclear on this significant matter.

On another point, the bill requires broadcasters to change their lowest commercial rate for the same time period, or be subject to fine up to $10,000 or imprisonment for up to 1 year, or both.

Yet, it seems to me that the bill's definition for lowest commercial rate is extremely vague when the real world of television advertising is taken into consideration.

Most television stations vary commercial advertising rates according to not only the general time period, but sometimes the specific programing broadcast in conjunction with the advertising, and according to the purchaser's willingness to be preempted if another advertiser comes along who is willing to pay a higher price for the same commercial time.

Surely we do not expect that a candidate should be able to purchase time at a rate as low as others who are willing to run the risk of preemption, without running the same risk ourselves.

Television stations offer lower commercial rates to advertisers willing to run that risk, than to advertisers who are not. The lowest available rate for the same time period would be the preemptible rate. Yet a candidate might feel that he must insure that his material is broadcast at a specific time. If he does, he should be willing to pay the higher rate.

Also, in many television markets across our Nation, the published rate on a station's rate card does not represent its lowest available rate, but only a rate at which it is willing to start bargaining with a potential customer. Broadcast time passes as fast as any other time. The broadcaster wants to insure the sale of his time and is willing to sell it at a lower rate rather than fail to sell it at all. But at the same time, he wants to be able to obtain a higher rate during times of significant demand.

The economics of the broadcast industry demand that television advertising fluctuate with the demand, just as supply and demand determine the price in any free market economy.

I do not think the legislation before us is clear as to what specifies the lowest available rate for the same time period, and I believe this vagueness would open the way for lengthy civil suits and possibly subject broadcasters unfairly to criminal charges.

The legislation also discriminates against broadcasters in what I believe is an obvious manner. If we are going to limit campaign expenditures for the purchase of broadcast advertising, should not we provide an equitable limit for the purchase of other forms of advertising? If we do not, are we not unfairly limiting the broadcaster?

Mr. President, I have tried to outline responsible and basic reasons for careful consideration of what we are about to do.

I have purposefully avoided any arguments of a partisan nature for our action on this legislation should not be taken on the basis of partisan politics.

Any action that we take should be taken in the interests of good government, consistent with our democratic principles and in the basic interest of the electorate.

Mr. GOODELL. Mr. President, the Political Broadcasting Act of 1970 should really be called the Public Protection Act of 1970.

When enacted, it will limit the amount of money a political candidate can spend on radio and television advertising to 7 cents a vote. It will protect the public against candidates who attempt to buy their way to elective office, simply by taking over the airwaves with catchy 30-second commercials. By putting an end to the campaign "TV blitz," it will encourage candidates to participate in substantive debates on the issues—rather than run away from them.

Unlimited broadcast advertising in political campaigns does a gross injustice to the television media's potential for educating the public on a candidate's qualifications. Television is the single-most important element of a political campaign, and the people expect a great deal from this medium. The people expect, through television, that they will earn the views, qualifications, and positions of opposing candidates on the crucial issues.

This is not possible when nearly all that is seen of a candidate is a facade—a slick packaging of his image and a vague presentation of his views on his choice of the issues. A candidate with limited qualifications but an unlimited budget can easily circumvent "communicating with the public" and choose instead an alternative of "mesmerizing the public."

Place a limitation on TV spending will encourage better qualified people to run for office. Too often today, qualified individuals cannot enter a race because they do not have personal or family fortunes to finance prohibitively expensive campaigns.

In addition, to place this limit on broadcast spending, the bill contains a number of other important provisions. It equitably requires that station charges for a political candidate be no more than the lowest unit charge for the same time period given to other advertisers. The bill also repeals the equal-time requirements for presidential and vice-presidential debates—a step I have long favored. By providing for detailed reporting requirements, the bill assures the necessary enforcement of the spending limits imposed.

Mr. President, for those of us who have been actively working for an end to excessive TV advertising in election campaigns, the final passage of this bill is very gratifying indeed. Since September 10, 1969, when I joined with Senators HART and PEARSON as a cosponsor of the Campaign Broadcast Reform Act, we have been attempting to get reform legislation of this kind passed in this session of Congress. Through hearings and discussions in the Commerce Committee, we have tried to put through a fair and effective campaign expenditure reform measure.

This bill is really a first step in meeting the need for a complete overhaul of our laws on campaign spending.

For a number of years in the House and Senate, I have introduced meaningful reform bills to strengthen our existing laws on campaign financing in Federal elections. My bill, the Federal Clean Elections Act, has been considered a model for such reform. Provisions of my bill are included in the Election Reform Act of 1970 now pending on the Senate Calendar. Several weeks ago, I introduced two amendments to this bill; first, to create an independent bipartisan Federal Elections Commission to monitor campaign spending laws; and second to limit to $25,000 the amount of money a congressional candidate could spend on his own funds. I hope that the Senate will consider this legislation before the end of this session.

Mr. President, our democratic society rests on the trust which the people place in their elected officials. The people must be able to choose the most qualified representatives through an open and fair process. By limiting the use of massive TV spending sprees in political campaigns, we have strengthened the foundation on which our Government stands. I urge my colleagues to pass this conference report.

Mr. PASTORE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PASTORE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PASTORE. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. BAKER. Mr. President, if I have any time remaining, I yield it back.

Mr. PASTORE. I yield back the remainder of my time.

The PRESIDING OFFICER. All remaining time has been yielded back.

The question is on the adoption of the conference report. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SCOTT (when his name was called). On this vote I have a pair with the Senator from Maine (Mr. MUSKIE). If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." I withhold my vote.

The rollcall was concluded.

Mr. KENNEDY. I announce that the Senator from Tennessee (Mr. GORE), the Senator from Indiana (Mr. HARTKE), the Senator from Washington (Mr. MAGNUSON), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Wyoming (Mr. MCGEE), the Senator from New Mexico (Mr. MONTOYA), the Senator from Utah (Mr. MOSS), the Senator from Maine (Mr. MUSKIE), the Senator from Rhode Island (Mr. PELL), the Senator from Alabama (Mr. SPARKMAN), the Senator from Missouri (Mr. SYMINGTON), the Senator from Maryland (Mr. TYDINGS), and the Senator from New Jersey (Mr. WILLIAMS), are necessarily absent.

I further announce that, if present and voting, the Senator from Washington (Mr. MAGNUSON), the Senator from Maine (Mr. MUSKIE), the Senator from Missouri (Mr. SYMINGTON), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from Rhode Island (Mr. PELL), would each vote "yea."

Mr. GRIFFIN. I announce that the Senators from Arizona (Mr. FANNIN and Mr. GOLDWATER), the Senator from Oregon (Mr. HATFIELD), the Senator from California (Mr. MURPHY), and the Senator from Illinois (Mr. SMITH), are necessarily absent.

The Senator from Oklahoma (Mr. BELLMON) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

On this vote, the Senator from Illinois (Mr. SMITH) is paired with the Senator from South Dakota (Mr. MUNDT). If present and voting, the Senator from Illinois would vote "yea" and the Senator from South Dakota would vote "nay."

The result was announced—yeas 60, nays 19, as follows:

[No. 325 Leg.]

YEAS—60

So the conference report on S. 3637 was agreed to.

Mr. PASTORE. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. BYRD of West Virginia. Mr. President, I move to lay that motion on the table.

The PRESIDING OFFICER. The motion to lay on the table was agreed to.

## S. 4388—INTRODUCTION OF INDIAN EDUCATION ACT

Mr. KENNEDY. Mr. President, despite some folklore to the contrary, the American Indian is not a vanishing American. Estimates of the Indian population in the United States range from 600,000 to over a million, and American Indians are the fastest growing ethnic group in the country. Over 200,000 of these are children of school age whose education is the responsibility of the Government of the United States.

Since 1794 provisions have been inserted in treaties with Indian nations occupying this land, obligating the Federal Government to educate Indian children. From the beginning Federal policy toward the Indian was based on the desire to dispossess him of his land, and thus our Indian education policy was in essence a function of our land policy. Expression of this early attitude can be found in the following congressional language:

> In the present state of our country one of two things seems to be necessary. Either than those sons of the forrest should be mortalized or exterminated. . . . Put into the hands of their children the primer and the hoe, and they will naturally, in time, take hold of the plow.

Although this education policy—representing the more humane approach to cultural genocide—has not worked, neither has it been abandoned. For even one of the most recent studies of Indian educational institutions begins by observing that "we may define Indian education as the imposition of white American educational institutions upon American Indian communities."

The quality of Indian education has, in a sense, been a test of our Government's understanding of democracy and commitment to allowing coexistence of diverse cultures. Yet judged by any reasonable set of criteria, the Government has failed this test. Indian education has become a national tragedy. It has not provided Indian children with a minimum competence necessary to prepare them for a productive role in society at large; neither has it been responsible for perpetuation of the values and culture unique to the Indian people. Three successive Presidents have recognized this, and have called for new directions in programs and policies. Yet no new general major changes in educational structure or programing has occurred in this area for years. Today I am introducing a comprehensive Indian Education Act which I hope will be adopted as a formal congressional commitment to excellence and self-determination in Indian education.

Three years ago Congress, recognizing the educational problems and needs of Indian children and the failure of our Government to meet those needs, established a Special Subcommittee on Indian Education. The subcommittee, originally under the chairmanship of Senator Robert Kennedy, was given the mandate to "examine, investigate, and make a complete study of any and all matters pertaining to the education of Indian children."

Senator Robert Kennedy traveled America extensively as chairman of the subcommittee. He exposed the severity and degradation of Indian poverty and the failure of this Nation to help the Indian people. Most importantly, he listened to what they had to say, to their advice, to their complaints. At the first hearing of the subcommittee in December 1967, he outlined a few statistics on Indian education that remain basically unchanged and were echoed in the final report of the subcommittee:

> Dropout rates are twice the national average;
>
> The level of formal education is half the national average;
>
> Achievement levels are far below those of their white counterparts. . . .
>
> The Indian child falls progressively further behind the longer he stays in school . . .
>
> One-fourth of elementary and secondary school teachers—by their own admission—would prefer not to teach Indian children . . .
>
> Indian children, more than any other group, believe themselves to be "below average" intelligence.

These and similar statistics have been repeated time and again through the years. I hope that we are not so used to hearing them that we fail to comprehend the human tragedy underlying the numbers.

The full details of the failure of Federal programs and policies were documented throughout seven volumes of subcommittee hearings and five volumes of committee prints. The subcommittee traveled to all parts of the country, visited schools, examined studies and reports, and heard testimony from Indians, Government officials, and others, with relevant expertise. I assumed the chairmanship of the subcommittee early in 1969, and in November 1969 the subcommittee issued its final report entitled "Indian Education: A National Tragedy—A National Challenge."

From the start I believed it necessary that both Congress and the executive branch take substantial steps to provide Indian children with a quality education. At the first Indian Education Subcommittee hearing that I chaired, I observed in my opening remarks:

> The hearings should point up the need for new policies, and new administrative and organizational approaches for implementing these new policies. Most importantly, the hearings should point up the need for amending old legislation and enacting bold new legislation so that in a matter of a few years hence, we can proudly say that educational programs for American Indians are not only successful but exemplary, and a matter of national pride, not shame.

The final report of the subcommittee recommended a number of legislative measures needed to raise Indian education to an exemplary level and to transfer control of Indian education to the Indian people. One of the more general recommendations—No. 6—urged:

> That there be presented to the Congress a comprehensive Indian education act to meet the special education needs of Indians both in the Federal schools and in the public schools.

I had hoped that the drafting of this comprehensive act could be preceded by a White House Conference of American Indians, and last year I introduced legislation—Senate Joint Resolution 168—to provide for such a conference to be conducted by the Indian and Alaska Native people. This resolution has not been considered in committee yet, and thus a White House conference does not appear to be in the near offing. With the advice and assistance of a number of interested people, including Indian groups and individuals, I have prepared a comprehensive bill based on the work of the subcommittee and on the extensive suggestions by those who appeared before it.

Documentation, beyond the subcommittee publications, of the problems underlying the need for this legislation can be found in the report "Who Should Control Indian Education?" produced last winter by the Far West Laboratory for Educational Research and Development, in the ABT Associates study of Indian Education prepared for the Bureau of Indian Affairs last year, and in numerous other studies and writings on education of the American Indian. It would only be repetative to go over again here the day-to-day failures of the present system of Indian education, or even the scandals, the horrors, the physical and psychological brutality involved in that system. It is time we focused on a cure, rather than on the disease or its symptoms. To this end, I am introducing today the Indian Education Act.

The Indian Education Act would establish three new programs: the first would assist local educational agencies in meeting the special needs of Indian students; the second would provide funds for special programs and projects to improve Indian educational opportunities; and the third would support the improvement of adult Indian education. The act also establishes a National Board of Indian Education, and a Bureau of Indian Education in the Office of Education. Other provisions would include Indian schools and students in the Education Professions Development Act, and would provide support for community colleges on or near Indian reservations.

### TITLE I.—REVISION OF IMPACTED AREAS PROGRAM AS IT RELATES TO INDIAN CHILDREN

The Special Subcommittee on Indian Education found that:

> While Indian education is receiving some financial assistance through Public Law 81-874, it is hardly enough to provide students with an equal education opportunity.

Many school districts use these funds as part of their operating budgets, and thus the direct benefit to Indian students is minimal. Indian districts are often in greater need of assistance than other eligible districts because of the special remedial problems of Indian children, yet Public Law 874 makes no distinction in their favor. Furthermore, while Public Law 874 has served as an inducement to public schools to accept Indian children, insufficient funding has left many districts with Indian children but no funds to educate them. Title I of the Indian Education Act is designed to correct these problems.

Title I would amend Public Law 874 by adding a new title to be known as

the Indian Elementary and Secondary School Assistance Act. Under this title, the Commissioner of Education is authorized to make grants to local educational agencies based on the number of Indian children in average daily attendance. The amount of the grant is determined by multiplying the agency's average per pupil expenditure by the number of Indian children in attendance. The number of Indian students enrolled in the school, not the number of children on or near the reservation, is the key figure. Grants may be used for both planning and pilot projects, and for the establishment and operation of programs. They are authorized during a 5-year period, from fiscal 1972 through 1977.

Grant applications must set forth a program for meeting the special educational needs of Indian children, provide for effective annual evaluation procedures, and insure that Federal funds will supplement and not supplant other available funds. In addition, parents of the children to be served, tribal organizations, and the State educational agencies, must have an opportunity to review and comment on the application. Even where the number of Indian children in the public school is small, it is important that the Indian people involved be afforded the opportunity to participate in the educational process affecting their children.

TITLE II—SPECIAL PROGRAMS AND PROJECTS TO IMPROVE EDUCATIONAL OPPORTUNITIES FOR INDIAN CHILDREN

The investigations of the Special Subcommittee on Indian Education revealed that Indian students in Federal schools are more than 2 years below national norms on achievement tests. Forty percent of the students drop out before graduation. Public schools enrolling Indians rarely include coursework which recognizes Indian history, culture, or language, and in fact often use materials and approaches which are derogatory toward Indians. Clearly the educational opportunities for Indian children are in desperate need of improvement.

Title II of the Indian Education Act will add a new section to title VIII of the Elementary and Secondary Education Act which will authorize the Commissioner of Education to make grants to:

State and local educational agencies and other public and private organizations—including federally supported Indian schools—for planning, pilot, and demonstration projects to improve educational opportunities for Indian children;

State and local educational agencies and the National Board of Indian Education for programs to provide educational services not available in sufficient quantity or quality for Indian children, and to establish exemplary programs and centers to enrich Indian education;

Institutions of higher education, and to State and local educational agencies in combination with such institutions, for the training or retraining of educational personnel serving Indian children;

Public and private nonprofit organizations for the dissemination of information on Indian education and the evaluation of federally assisted programs.

Grant applications must provide for the coordination of all available resources to insure a comprehensive program, the training of participating personnel, evaluation, and parent and tribal community participation in all facets of the program. For these grants, $25,000,000 is authorized in fiscal 1972 and $35,000,000 for each of the four succeeding fiscal years.

This title is basically an expanded version of S. 4059 which I introduced earlier this year. It is intended to provide the first steps toward fulfilling the recommendations of the Indian Education Subcommittee, that Indian education be exemplary, with outstanding innovative programs taking into consideration the emotional, social, and identity problems—as well as the educational problems—of Indian youth.

After June 1972, funds for library resources, supplementary educational centers and services, and education of the handicapped—title II, III, and VI of the Elementary and Secondary Education Act—which were formerly allotted to the Department of the Interior will be discontinued, as funds for these purposes will then be available under this section of title VIII. Schools serving Indian children will remain eligible to participate in bilingual programs under title VII.

TITLE III—SPECIAL PROGRAMS RELATING TO ADULT EDUCATION FOR AMERICAN INDIANS

About 75,000 Indian adults have not completed a fifth grade education. Less than one-fifth of the adult Indian population has completed high school. Functional illiteracy is one of the major causes of Indian poverty and unemployment, and almost nothing is being done about it. The Indian Education Subcommittee observed:

A major commitment should be made to the adult education programs for American Indians. The national need for such a commitment is all to evident in the low economic status, rise in alcoholism, lack of employment capabilities, the inability of too many Indian adults to read and write, and the general lack of fulfillment of Indian adults on reservations.

Title III of the Indian Education Act would add a new section to the Adult Education Act. It would authorize the Commissioner of Education to make grants to support planning, pilot and demonstration projects, the dissemination of information, and the evaluation of adult Indian education programs. In addition, the Commissioner is authorized to assist in the establishment and operation of Indian adult basic education programs, to support a major research and demonstration effort in this field, and to determine accurately the extent of illiteracy and lack of high school completion of Indian adults.

Applications must provide for evaluation and the participation by tribal communities and the persons to be served in all aspects of the program. Five million dollars is authorized for fiscal 1972 and $8,000,000 for each of the four succeeding fiscal years.

TITLE IV—NATIONAL BOARD OF EDUCATION; BUREAU OF INDIAN EDUCATION; MISCELLANEOUS

In order to mount effective, exemplary programs to improve Indian education, a reorganization of existing efforts is mandatory. The present lack of quality, quantity, and coordination in the provision of Indian educational opportunity is so severe that only a fresh and concerted approach, one which actively encourages Indian participation and control, can turn the tide.

The establishment of a National Board of Indian Education has been a key recommendation of every study of Federal Indian schools, including the final report of the Indian Education Subcommittee. The subcommittee suggested that the National Board "have oversight over the operations of the schools and have authority to set standards and criteria and determine policy within the framework of the law." The National Board could then be instrumental in the establishment of local school boards, giving substance to the objective of self-determination in Indian education.

The minority members of the subcommittee, who contributed significantly to its efforts, viewed as the most important recommendation the provision of the means to achieve "guidance by Indians themselves of the education of their own children through national and local Indian boards of education." And just this past July the President recognized that Indian control of Indian education should be a primary objective of our national policy.

Title IV of the Indian Education Act would establish a 15-member National Board of Indian Education, appointed by the President from nominees furnished by Indian tribes and organizations. Members will serve staggered terms of 3 years. The staff of the National Board will include an Executive Director and a Superintendent of Indian Education.

The National Board will be responsible for all functions relating to Indian education which were formerly carried out by other executive agencies—except for those of the Office of Education and the Office of Economic Opportunity. The Board may establish local school districts and authorize school boards, selected at the local level, for Federal Indian schools, and will advise the Commissioner of Education on the administration of titles I, II, and III of this act. It is also directed to investigate off-reservation boarding schools to determine which should be converted to therapeutic treatment centers, to examine Federal boarding schools with a view to change, and report their findings to the Congress by July 1, 1972.

The bill I am introducing leaves unresolved the relationship of the National Board of Indian Education to the Bureau of Indian Affairs insofar as the Bureau provides support services related to but not considered educational services. This area must be more fully explored in hearings on this bill, but what is assumed from the start, and what is etched in its history, is the incapacity of the BIA to provide satisfactory and relevant education for Indian children.

Thus the National Board will take over this function from the Bureau.

To administer the major provisions of the Indian Education Act, under the jurisdiction of HEW, a Bureau of Indian Education would be established in the Office of Education, headed by a Deputy Commissioner of Education to be appointed by the President from nominees submitted by the National Board.

TITLE V—MISCELLANEOUS PROVISIONS

Various provisions of the Education Professions Development Act—title V of the Higher Education Act—would be amended to reflect the educational personnel needs of Indian children and schools. Title III of the Higher Education Act, designed to strengthen developing institutions of higher education, would be amended so as to include recently created institutions on or near Indian reservations, in order to increase the availability of higher education for Indians.

The amendments to titles III and V of the Higher Education Act were recommended by the Indian Education Subcommittee and were proposed last year in two bills introduced by Senator DOMINICK. I have incorporated those bills into this title for convenience, but I would like to acknowledge the interest, involvement, and initiative of the Senator from Colorado in this area as reflected in his contributions to the work of the subcommittee and in his introduction of these bills.

The National Board of Indian Education is directed, in the final provisions of the title, to raise the Institute of American Indian Arts at Santa Fe, N. Mex., to the level of a 4-year college, to provide support for community colleges on or near Indian reservations, to study the feasibility of Indian community colleges and work toward their establishment, and to report to Congress on these matters by July 1, 1972.

The Special Subcommittee on Indian Education concluded, after extensive investigation, that—

> Our national policies for educating American Indians are a failure of major proportions . . . Past generations of lawmakers and administrators have failed the American Indian. Our own generation thus faces a challenge—we can continue the unacceptable policies and programs of the past or we can recognize our failures, renew or commitments, and reinvest our efforts with new energy.

The bill I have introduced today would provide us with the means to respond to that challenge. It would constitute a new and vital commitment to quality educational opportunity for the American Indian—a commitment which is essential to the restoration of this Nation's legal and moral integrity.

Mr. President, I ask unanimous consent that the Indian Education Act in its entirety and a section-by-section analysis of that bill be printed in the RECORD at the end of my statement.

The PRESIDING OFFICER (Mr. HANSEN). The bill will be received and appropriately referred; and, without objection, the bill and section-by-section analys's will be printed in the RECORD.

The bill (S. 4388) to amend the Act of September 30, 1950—(Public Law 874, 81st Congress)—and the Elementary and Secondary Education Act of 1965, so as to improve the quality of education of Indian children in elementary and secondary schools, and for other purposes, introduced by Mr. KENNEDY (for himself and Mr. MONDALE), was received, read twice by its title, referred to the Committee on Labor and Public Welfare, and ordered to be printed in the RECORD, as follows:

S. 4388

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Indian Education Act".

TITLE I—REVISION OF IMPACTED AREAS PROGRAM AS IT RELATES TO INDIAN CHILDREN

SEC. 101. (a) The Act of September 30, 1950 (Public Law 874, Eighty-first Congress), is amended by redesignating title III, as title IV, by redesignating sections 301 through 303 and references thereto as sections 401 through 403, respectively, and by adding after title II the following new title:

"TITLE III—FINANCIAL ASSISTANCE TO LOCAL EDUCATIONAL AGENCIES FOR THE EDUCATION OF INDIAN CHILDREN

"SHORT TITLE

"SEC. 301. This title may be cited as the 'Indian Elementary and Secondary School Assistance Act'.

"DECLARATION OF POLICY

"SEC. 302. (a) In recognition of the special educational needs of Indian students in the United States, Congress hereby declares it to be the policy of the United States to provide financial assistance to local educational agencies to develop and carry out elementary and secondary school programs designed to meet these special educational needs.

"(b) During the period beginning July 1, 1972, and ending June 30, 1977, the Commissioner shall, in order to effectuate the policy set forth in subsection (a), carry out a program of making grants to local educational agencies which are entitled to payments under this title and which have submitted, and had approved, applications therefor, in accordance with the provisions of this title.

"GRANTS TO LOCAL EDUCATIONAL AGENCIES

"SEC. 303. (a) For the purpose of computing the amount to which a local educational agency is entitled under this title for any fiscal year in the period during which grants are to be made, as specified in section 302(b), the Commisisoner shall determine the number of Indian children who were in average daily attendance at the schools of a local educational agency, and for whom such agency provided free public education, during such fiscal year.

"(b)(1) The amount of the grant to which a local educational agency is entitled under this title for any fiscal year shall be an amount equal to (A) the average per pupil expenditure for such agency (as determined under paragraph (3)) multiplied by (B) the sum of the number of children determined under subsection (a).

"(2) A local educational agency shall not be entitled to receive a grant under this title for any fiscal year, unless the number of children under subsection (a), with respect to such agency, is at least ten.

"(3) For the purposes of this subsection, the average per pupil expenditure for a local educational agency shall be the aggregate current expenditures, during the second fiscal year preceding the fiscal year for which the computation is made, of all of the local educational agencies in the State in which such agency is located, plus any direct current expenditures by such State for the operation of such agencies (without regard to the sources of funds from which either of such expenditures are made), divided by the aggregate number of children who were in average daily attendance for whom such agencies provided free public education during such preceding fiscal year.

"USES OF FEDERAL FUNDS

"SEC. 304. Grants under this title may be used, in accordance with applications approved under section 305, for—

"(a) planning for and taking other steps leading to the development of programs designed to meet the special educational needs of Indian children, including pilot projects designed to test the effectiveness of plans so developed; and

"(b) the establishment, maintenance, and operation of programs, including, in accordance with special regulations of the Commissioner, minor remodeling of classroom or other space used for such programs and acquisition of necessary equipment, designed to meet the special educational needs of Indian children.

"APPLICATION FOR GRANTS; CONDITIONS FOR APPROVAL

"SEC. 305. (a) A grant under this title may be made only to a local educational agency or agencies, but only upon application to the Commissioner at such time or times, in such manner, and containing or accompanied by such information as the Commissioner deems necessary. Such application shall—

"(1) provide that the activities and services for which assistance under this title is sought will be administered by or under the supervision of the applicant;

"(2) set forth a program for carrying out the purposes of section 304, and provide for such methods of administration as are necessary for the proper and efficient operation of the program;

"(3) in the case of an application for payments for planning, provide that (A) the planning was or will be directly related to programs or projects to be carried out under this title and has resulted, or is reasonably likely to result, in a program or project which will be carried out under this title, and (B) the planning funds are needed because of the innovative nature of the program or project or because the local educational agency lacks the resources necessary to plan adequately for programs and projects to be carried out under this title;

"(4) provide that effective procedures, including provisions for appropriate objective measurement of educational achievement, will be adopted for evaluating at least annually the effectiveness of the programs and projects in meeting the special educational needs of Indian students;

"(5) set forth policies and procedures which assure that Federal funds made available under this title for any fiscal year will be so used as to supplement and, to the extent practical, increase the level of funds that would, in the absence of such Federal funds, be made available by the applicant for the education of Indian children and in no case supplant such funds;

"(6) provide for such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement of, and accounting for, Federal funds paid to the applicant under this title; and

"(7) provide for making an annual report and such other reports, in such form and containing such information, as the Commissioner may reasonably require to carry out his functions under this title and to determine the extent to which funds provided under this title have been effective in improving the educational opportunities of Indian students in the area served, and for keeping such records and for affording such access thereto as the Commissioner may

find necessary to assure the correctness and verification of such reports.

"(b) An application by a local educational agency or agencies for a grant under this title may be approved only if it is consistent with the applicable provisions of this title and—

"(1) meets the requirements set forth in subsection (a);

"(2) provides that the program or project for which application is made—

"(A) will utilize the best available talents and resources and will substantially increase the educational opportunities of Indian students in the area to be served by the applicant; and

"(B) has been made available for review and comment by the parents of the children to be served and by tribal organizations; and

"(3) the State educational agency has been notified of the application and been given the opportunity to offer recommendations.

"(c) Amendments of applications shall, except as the Commissioner may otherwise provide by or pursuant to regulations, be subject to approval in the same manner as original applications.

"PAYMENTS

"SEC. 306. (a) The Commissioner shall, subject to the provisions of section 307, from time to time pay to each local educational agency which has had an application approved under section 305, an amount equal to the amount expended by such agency in carrying out activities under such application.

"(b) (1) No payments shall be made under this title for any fiscal year to any local educational agency in a State which has taken into consideration payments under this title in determining the eligibility of such local educational agency in that State for State aid, or the amount of that aid, with respect to the free public education of children during that year or the preceding fiscal year.

"(2) No payments shall be made under this title to any local educational agency for any fiscal year unless the State educational agency finds that the combined fiscal effort (as determined in accordance with regulations of the Commissioner) of that agency and the State with respect to the provision of free public education by that agency for the preceding fiscal year was not less than such combined fiscal effort for that purpose for the second preceding fiscal year.

"ADJUSTMENTS WHERE NECESSITATED BY APPROPRIATIONS

"SEC. 307. (a) If the sums appropriated for any fiscal year for making payments under this title are not sufficient to pay in full the total amounts which all local educational agencies are eligible to receive under this title for that fiscal year, the maximum amounts which all such agencies are eligible to receive under this title for such fiscal year shall be ratably reduced. In case additional funds become available for making such payments for any fiscal year during which the first sentence of this subsection is applicable, such reduced amounts shall be increased on the same basis as they were reduced.

"(b) In the case of any fiscal year in which the maximum amounts for which local educational agencies are eligible have been reduced under the first sentence of subsection (a), and in which additional funds have not been made available to pay in full the total of such maximum amounts under the second sentence of such subsection, the Commissioner shall fix dates prior to which each local educational agency shall report to him on the amount of funds available to it, under the terms of section 306(a) and subsection (a) of this section, which it estimates, in accordance with regulations of the Commissioner, that it will expend under approved applications. The amounts so available to any local educational agency, or any amount which would be available to any other local education agency if it were to submit an approvable application therefor, which the Commissioner determines will not be used for the period of its availability, shall be available for allocation to these local educational agencies, in the manner provided in the second sentence of subsection (a), which the Commissioner determines will need additional funds to carry out approved applications, except that no local educational agency shall receive an amount under this sentence which, when added to the amount available to it under subsection (a), exceeds its entitlement under section 303.

"DEFINITION

"SEC. 308. As used in this title, the term 'Indian' means any individual who is an enrolled member of a tribe, band, or other organized group of Indians, or who is a descendant of any such enrolled member.".

(b) (1) Paragraph (1) of section 103(a) of title I of the Elementary and Secondary Education Act of 1965 is amended—

(A) by striking out subparagraph (B), and by striking out "(A)" where it appears after "SEC. 103. (a) (1)";

(B) in the fourth sentence thereof, by striking out "and the terms upon which payment shall be made to the Department of Interior"; and

(C) by striking out the third sentence thereof.

(2) Paragraph (1) of section 303 of the Act of September 30, 1950 is amended—

(A) in the second sentence, by striking out "(A) except for the purposes of section 6, real property held in trust by the United States for individual Indians or Indian tribes, and real property held by individual Indians or Indian tribes which is subject to restrictions on alienation imposed by the United States," and by redesignating clauses (B), (C), and (D) therein, and all references thereto, as clauses (A), (B), and (C), respectively; and

(B) in the fourth sentence, (i) by inserting before the period at the end thereof the following: ", or (C) Indian reservations, or other property held (i) in trust by the United States for individual Indians or Indian tribes or (ii) held by individual Indians or Indian tribes which is subject to restrictions on alienation imposed by the United States", and (ii) by striking out "and (B)" and inserting in lieu thereof ", or (B)".

TITLE II—SPECIAL PROGRAMS AND PROJECTS TO IMPROVE EDUCATIONAL OPPORTUNITIES FOR INDIAN CHILDREN

AMENDMENT TO TITLE VIII OF THE ELEMENTARY AND SECONDARY EDUCATION ACT OF 1965

SEC. 201. (a) Title VIII of the Elementary and Secondary Education Act of 1965 is amended by adding to the end thereof the following new section:

"IMPROVEMENT OF EDUCATIONAL OPPORTUNITIES FOR AMERICAN INDIAN CHILDREN

"SEC. 810. (a) The Commissioner shall carry out a program of making grants for the improvement of educational opportunities for American Indian children—

"(1) to support planning, pilot, and demonstration projects, in accordance with subsection (b), which are designed to test and demonstrate the effectiveness of programs for improving educational opportunities for American Indian children;

"(2) to assist in the establishment and operation of programs, in accordance with subsection (c), which are designed to stimulate (A) the provision of educational services not available to American Indian children in sufficient quantity or quality, and (B) the development and establishment of exemplary educational programs to serve as models for regular school programs in which American Indian children are educated;

"(3) to assist in the establishment and operation of preservice and inservice training programs, in accordance with subsection (d), for persons serving Indian children as educational personnel; and

"(4) to encourage the dissemination of information and materials relating to, and the evaluation of the effectiveness of, education programs which may offer educational opportunities to American Indian children.

"(b) The Commissioner is authorized to make grants to State and local educational agencies and other appropriate public and private educational and research agencies, organizations, and institutions (including federally supported elementary and secondary schools for Indian children) to support planning, pilot, and demonstration projects which are designed to plan for, and test and demonstrate the effectiveness of, programs for improving educational opportunities for American Indian children, including—

"(1) innovative programs related to the educational needs of educationally deprived children;

"(2) bilingual and bicultural education programs and projects;

"(3) special health and nutrition services, and other related activities, which meet the special health, social, and psychological problems of Indian children; and

"(4) coordinating the operation of other federally assisted programs which may be used to assist in meeting the needs of such children.

"(c) The Commissioner is also authorized to make grants to State and local educational agencies and to the National Board of Indian Education to assist and stimulate them in developing and establishing educational services and programs specifically designed to improve educational opportunities for American Indian children. Grants may be used—

"(1) to provide educational services not available to such children in sufficient quantity or quality, including—

"(A) remedial and compensatory instruction, school health, physical education, psychological, and other services designed to assist and encourage Indian children to enter, remain in, or reenter elementary or secondary school;

"(B) comprehensive academic and vocational instruction;

"(C) instructional materials (such as library books, textbooks, and other printed or published or audiovisual materials) and equipment;

"(D) comprehensive guidance, counseling, and testing services;

"(E) special education programs for handicapped and preschool children;

"(F) bilingual and bicultural education programs; and

"(G) other services which meet the purposes of this subsection; and

"(2) for the establishment and operation of exemplary and innovative educational programs and centers, involving new educational approaches, methods, and techniques designed to enrich programs of elementary and secondary education for Indian children.

"(d) The Commissioner is also authorized to make grants to institutions of higher education and to State and local educational agencies, in combination with institutions of higher education, for carrying out programs and projects—

"(1) to prepare persons to serve Indian children as teachers, teacher aides, and ancillary educational personnel; and

"(2) to improve the qualifications of such persons who are serving Indian children in such capacities.

Grants for the purposes of this subsection may be used for the establishment of fellowship programs leading to an advanced degree, for institutes and, as part of a continuing program, for seminars, symposia, workshops, and conferences.

"(e) The Commissioner is also authorized to make grants to, and contracts with, public and private agencies, organizations, and institutions (except that no grant may be made to an agency, organization, or institution other than one which is nonprofit) for—

"(1) the dissemination of information concerning educational programs, services, and resources available to Indian children, including evaluations thereof; and

"(2) the evaluation of the effectiveness of federally assisted programs in which Indian children may participate in achieving the purposes of such programs with respect to such children.

"(f) Applications for a grant under this section shall be submitted at such time, in such manner, and contain such information, and shall be consistent with such criteria, as may be established as requirements in regulations promulgated by the Commissioner. Such applications shall—

"(1) set forth a statement describing the activities for which assistance is sought;

"(2) in the case of an application for the purposes of subsection (c), subject to such criteria as the Commissioner shall prescribe, provide for the use of funds available under this section, and for the coordination of other resources available to the applicant, in order to insure that, within the scope of the purpose of the project, there will be a comprehensive program to achieve the purposes of this section; and

"(3) in the case of an application for the purposes of subsection (c), make adequate provision for the training of the personnel participating in the project; and

"(4) provide for an evaluation of the effectiveness of the project in achieving its purposes and those of this section.

The Commissioner shall not approve an application for a grant under subsection (b) or (c) unless he is satisfied that there has been participation by tribal communities and parents of the children to be served in the planning and development of the project, and that there will be such a participation in the operation and evaluation of the project.

"(g) For the purpose of making grants under this section there are hereby authorized to be appropriated $25,000,000 for the fiscal year ending June 30, 1972, and $35,000,000 for each of the four succeeding fiscal years."

(b)(1) Effective after June 30, 1972, the Elementary and Secondary Education Act of 1965 is amended—

(A) in section 202(a)(1), by striking out "(A) the Secretary of the Interior the amount necessary for such assistance for children and teachers in elementary and secondary schools operated for Indian children by the Department of the Interior, and (B)" and by striking out "Secretary of the Interior and the".

(B) in section 302(a)(1), by striking out "(A) the Secretary of the Interior the amount necessary to provide programs and projects for the purpose of this title for individuals on reservations serviced by elementary and secondary schools operated for Indian children by the Department of the Interior, and (B)" and by striking out "Secretary of the Interior and the".

(2) Effective after June 30, 1972, the second sentence of paragraph (1) of section 612(a) of the Education of the Handicapped Act is amended to read as follows: "The Commissioner shall allot the amount appropriated pursuant to this paragraph among Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Island, according to their respective needs.".

## TITLE III—SPECIAL PROGRAMS RELATING TO ADULT EDUCATION FOR AMERICAN INDIANS

### AMENDMENT TO TITLE III OF THE ELEMENTARY AND SECONDARY EDUCATION ACT OF 1965

SEC. 301. Title III of the Elementary and Secondary Education Amendments of 1966 (the Adult Education Act) is amended by redesignating sections 314 and 315, and all references thereto as sections 315, and 316, respectively, and by adding after section 313 the following new section:

"IMPROVEMENT OF EDUCATIONAL OPPORTUNITIES FOR ADULT AMERICAN INDIANS

"SEC. 314. (a) The Commissioner shall carry out a program of making grants to State and local educational agencies and other appropriate public and private educational and research agencies, organizations, and institutions to support planning, pilot, and demonstration projects which are designed to plan for, and test and demonstrate the effectiveness of programs for providing adult education for American Indians—

"(1) to support planning, pilot, and demonstration projects which are designed to test and demonstrate the effectiveness of programs for improving employment and educational opportunities for adult American Indians;

"(2) to assist in the establishment and operation of programs which are designed to stimulate (A) the provision of basic literacy opportunities to all nonliterate Indian adults, and (B) the provision of opportunities to all Indian adults to qualify for a high school equivalency certificate in the shortest period of time feasible.

"(3) to support a major research and development program to develop more innovative and effective techniques for achieving the literacy and high school equivalency goals;

"(4) to provide for basic surveys and evaluations thereof to define accurately the extent of the problems of illiteracy and lack of high school completion on Indian reservations;

"(5) to encourage the dissemination of information and materials relating to, and the evaluation of the effectiveness of, education programs which may offer educational opportunities to Indian adults.

"(b) The Commissioner is also authorized to make grants to, and contracts with, public and private agencies, organizations, or institutions (except that no grant may be made to an agency, organization, or institution other than one which is nonprofit) for—

"(1) the dissemination of information concerning educational programs, services, and resources available to Indian adults, including evaluations thereof; and

"(2) the evaluation of the effectiveness of federally assisted programs in which Indian adults may participate in achieving the purposes of such programs with respect to such adults.

"(c) Applications for a grant under this section shall be submitted at such time, in such manner, and contain such information, and shall be consistent with such criteria, as may be established as requirements in regulations promulgated by the Commissioner. Such applications shall—

"(1) set forth a statement describing the activities for which assistance is sought;

"(2) provide for an evaluation of the effectiveness of the project in achieving its purposes and those of this section.

The Commissioner shall not approve an application for a grant under subsection (a) unless he is satisfied that there has been participation by tribal communities and individuals to be served in the planning and development of the project, and that there will be such a participation in the operation and evaluation of the project.

"(d) For the purpose of making grants under this section there are hereby authorized to be appropriated $5,000,000 for the fiscal year ending June 30, 1972, and $8,000,000 for each of the four succeeding fiscal years."

## TITLE IV—NATIONAL BOARD OF INDIAN EDUCATION; BUREAU OF INDIAN EDUCATION; MISCELLANEOUS

### NATIONAL BOARD OF INDIAN EDUCATION

SEC. 401. (a) There is hereby established the National Board of Indian Education (referred to in this title as the "National Board"), which shall consist of fifteen members appointed by the President of the United States, with the advice and consent of the Senate. Such appointments shall be made by the President from lists of nominees furnished from time to time, by Indian tribes and organizations.

(b) Members of the National Board shall be appointed for terms of three years; except that the terms of office of the members first taking office shall expire, as designated by the President at the time of appointment, five at the end of one year, five at the end of two years, and five at the end of three

years. No member shall serve for more than two consecutive terms. Any person appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of that term. The President shall designate one of the members to serve as Chairman and one to serve as Vice Chairman. The Vice Chairman, during the absence or disability of the Chairman, shall act for, and exercise the powers of, the Chairman. The Vice Chairman shall perform such duties as the Chairman may prescribe from time to time.

(c) Members of the National Board shall be compensated at the rate prescribed for grade GS–18 of the General Schedule under section 5332 of title 5, United States Code.

STAFF OF NATIONAL BOARD

SEC. 402. Subject to such rules and regulations as may be adopted by the National Board, the Chairman shall be authorized to—

(1) appoint and fix the compensation of an Executive Director, and such additional staff personnel as the Chairman deems necessary, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classifications and General Schedule pay rates, but at rates not in excess of the maximum rate for grade GS–18 of the General Schedule under section 5332 of such title;

(2) appoint and affix the compensation of a Superintendent of Indian Education, without regard to the provisions of title 5, United States Code, governing appointments in competitive service, who shall be compensated at the rate prescribed for grade GS–18 of the General Schedule under section 5332 of such title, and who shall have such duties as the National Board shall prescribe; and

(3) procure temporary and intermittent services to the same extent as is authorized by section 3109 of title 5, United States Code, but at rates not to exceed $100 a day for individuals.

POWERS AND DUTIES OF NATIONAL BOARD

SEC. 403. The National Board is vested with the following powers and duties:

(1) to carry out the functions transferred to the National Board pursuant to section 304 of this title;

(2) to establish, in its discretion, local school districts comprising Federal Indian schools over which it has jurisdiction and control;

(3) to establish, in its discretion, local school boards, who shall be selected at the local level in accordance with regulations promulgated by the National Board, having administrative control and direction over Federal Indian schools located within districts established pursuant to clause (2) of this section; and

(4) to advise the Commissioner of Education with respect to the administration of title III of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress), as added by this Act, and section 810 title VIII of the Elementary and Secondary Education Act of 1965, as added by this Act.

FUNCTIONS OF NATIONAL BOARD

SEC. 404. (a)(1) There are hereby vested in the National Board all functions which were carried out immediately before the effective date of this Act by the head of any agency in the executive branch of the Government relating to the education of Indians in any elementary, secondary, or vocational school, or any institution of higher education, including all such functions being administered through any agency, service, bureau, office, or other entity of any such agency.

(2) All functions of any agency of the United States, except the Office of Education and the Office of Economic Opportunity, relating to the education of Indians in any elementary, secondary, or vocational school, or any institution of higher learning, are hereby transferred to, and vested in, the National Board.

(3) All orders, determinations, rules, regulations, permits, contracts, grants, certificates, licenses, and privileges—

(A) which have been issued, made, granted, or allowed to become effective in the exercise of functions transferred by this section; and

(B) which are in effect at the time this section takes effect,

shall continue in effect according to their terms until modified, terminated, superseded, set aside, or repealed by the National Board, by any court of competent jurisdiction, or by operation of law.

(4) All personnel, assets, liabilities, contracts, property, and records as are determined by the Director of the Office of Management and Budget to be employed, held, or used primarily in connection with the functions transferred under this section are transferred to the National Board. Personnel engaged in functions transferred under this section shall be transferred in accordance with applicable laws and regulations relating to transfer of functions.

(5) As used in this section, the term "functions" includes powers and duties.

(b) The National Board is directed—

(1) to conduct, in concert with a team of professional consultants competent in areas of personality development and mental health, a detailed investigation of the off-reservation boarding schools to determine which ones should be converted into therapeutic treatment centers, and to cooperate with the Public Health Service to the extent necessary to bring about such conversion;

(2) to examine the present distribution and location of Federal boarding schools and the pattern of student placement, with the view to developing and implementing a new rationale and plan with regard to such schools; and

(3) to submit to the Congress on or before July 1, 1972, a report on its activities under this subsection.

BUREAU OF INDIAN EDUCATION

SEC. 405. (a) There is hereby established, in the Office of Education, a bureau to be known as the "Bureau of Indian Education" which, under the direction of the Commissioner, shall have the responsibility for administering the provisions of title III of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress), as added by this Act, section 810 title VIII of the Elementary and Secondary Education Act of 1965, as added by this Act, and section 314 title III of the Elementary and Secondary Education Amendments of 1966, as added by this Act. The Bureau shall be headed by a Deputy Commissioner of Indian Education, who shall be appointed by the President of the United States from a list of nominees submitted to him by the National Board of Indian Education.

(b) Section 5316 of title 5, United States Code, is amended by adding at the end thereof the following new clause: "(130) Deputy Commissioner of Indian Education, Department of Health, Education, and Welfare."

TITLE V—MISCELLANEOUS PROVISIONS

AMENDMENT TO TITLE V OF HIGHER EDUCATION ACT OF 1965

SEC. 501. (a) Section 503(a) of the Higher Education Act of 1965 is amended (1) by inserting after "and higher education," the following: "including the need to provide such programs and education to Indians," and (2) by inserting after "the Department of Labor," the following: "the Department of the Interior,".

(b) Section 504(a)(1) of such Act is amended by inserting after "secondary schools" the following: "(including such schools operated by the Department of the Interior for Indians or by an agency of an Indian tribe.)".

(c) Section 505 of such Act is amended by inserting after "shall consult with" the following: "the Secretary of the Interior,".

(d) Subsections (a) and (d) of section 552 of such Act of 1965 are each amended by inserting after "in all the States" a comma and the following: "including such needs in schools operated by the Department of the Interior for Indians, or by an agency of an Indian tribe.".

(e) Section 553(a) of such Act is amended by inserting at the end thereof the following: "The Commissioner may also enter into arrangements with the Secretary of the Interior, or with an agency of an Indian tribe, and use funds appropriated for the purpose of this section with respect to schools operated by the Department of the Interior for Indians, or by an agency of an Indian tribe.".

AMENDMENT TO TITLE III OF HIGHER EDUCATION ACT OF 1965

SEC. 502. Section 302(d) of the Higher Education Act of 1965 is amended by inserting before the semicolon at the end thereof a comma and the following: "except that the Commissioner may waive the five-year requirement of this clause with respect to an institution located on or near an Indian reservation in any case in which he determines that such action will increase the availability of higher education to Indians".

INSTITUTE OF AMERICAN INDIAN ARTS

SEC. 503. The National Board of Indian Education is directed and authorized to raise the Institute of American Indian Arts at Santa Fe, New Mexico, to the level of a 4-year college.

COMMUNITY COLLEGES

SEC. 504. (a) The National Board of Indian Education is directed and authorized to provide continuing support for the community colleges on or near Indian reservations.

(b) The National Board is directed to conduct a study exploring the feasibility of Indian community colleges, to work toward the establishment of such Indian-controlled institutions, and to submit a report respecting such study to the Congress on or before July 1, 1972.

The section-by-section analysis, presented by Mr. KENNEDY, is as follows:

THE INDIAN EDUCATION ACT—SECTION-BY-SECTION ANALYSIS

TITLE I—REVISION OF IMPACTED AREAS PROGRAM AS IT RELATES TO INDIAN CHILDREN

*Sec. 101*—Amends P.L. 874 by redesignating Title III as Title IV and adding the following new Title III:

TITLE III—FINANCIAL ASSISTANCE TO LOCAL EDUCATIONAL AGENCIES FOR THE EDUCATION OF INDIAN CHILDREN

*Sec. 301*—This title may be cited as the "Indian Elementary and Secondary School Assistance Act."

*Sec. 302*—Declares it to be the policy of the United States to provide financial assistance to local educational agencies to develop and carry out elementary and secondary school programs to meet the special educational needs of Indian students in the United States.

Directs the Commissioner of Education to carry out this policy through a program of grants to eligible, local educational agency applicants beginning July 1, 1972 and ending June 30, 1977.

GRANTS TO LOCAL EDUCATIONAL AGENCIES

*Sec. 303*—To compute a local educational agency's yearly entitlement, the Commissioner is to determine the number of Indian children in average daily attendance for whom free public education is provided in the agency's schools in that fiscal year. An agency is not entitled to a grant unless there are at least ten such children.

The amount of the entitlement shall be equal to the agency's average per pupil expenditure multiplied by the number of Indian children in attendance.

The agency's average per pupil expenditure for any fiscal year is computed as follows: the total current expenditures of all agencies in the State two fiscal years ago, plus any direct current State expenditures for agency operations, divided by the total number of children in average daily attendance who received free public education from such agencies two fiscal years ago.

USES OF FEDERAL FUNDS

*Sec. 304*—Grant may be used for: planning, including pilot projects to test the effectiveness of plans developed; and the establishment, maintenance and operation of programs, including minor remodeling and acquisition of equipment to meet the special educational needs of Indian children.

APPLICATION FOR GRANTS; CONDITIONS FOR APPROVAL

*Sec. 305*—Grants may be made only to applying local educational agencies. Applications shall:

Provide that the activities for which assistance is sought will be administered or supervised by the applicant.

Act forth a program for meeting the special educational needs of Indian children, including proper and efficient methods of program administration;

In the case of planning applications, provide that planning is directly related to and will likely result in programs or projects to be carried out under this title, and that such funds are needed either because of the innovative nature of the program or because the agency lacks the necessary resources for adequate program planning;

Provide that effective annual evaluation procedures, including objective measurement of educational achievement will be adopted;

Assure that Federal funds will supplement, and in no case supplant, the funds that the applicant would make available for the education of Indian children in the absence of Federal funds;

Provide for the necessary fiscal control and accounting procedures; for making an annual report and other reports required by the Commissioner to determine the effectiveness of these funds in improving Indian educational opportunities; and for keeping accessible records verifying these reports.

Applicants which meet the above requirements must also:

Provide for the utilization of the best available talents and resources and substantially increase Indian educational opportunity;

Have been made available for the review and comment of tribal organizations and the parents of children to be served, and brought to the attention of the State educational agency for its recommendations.

Amendments of applications shall also be subject to these provisions, except as otherwise provided by the Commissioner.

PAYMENTS

*Sec. 306*—Directs the Commissioner to pay to each approved applicant an amount equal to its expenditures for activities under this title, but no payments shall be made if the State has taken these payments into consideration in determining the agency's eligibility for State aid. Nor shall payments be made if the combined State and local educational agencies' fiscal effort is less than that of two fiscal years ago.

ADJUSTMENTS WHERE NECESSITATED BY APPROPRIATIONS

*Sec. 307*—If insufficient funds are appropriated to pay the local educational agencies' full entitlement, the entitlements of all such agencies shall be ratably reduced. If additional amounts become available, entitlements shall be increased in the same manner.

If entitlements have been reduced and additional funds are not available, local educational agencies shall report their estimated expenditures to the Commissioner by certain dates. Any unused funds shall then be available for reallocation to agencies which need additional funds, but no agency shall receive an amount which exceeds its entitlement.

*Sec. 308*—In this title 'Indian' means any enrolled member of a tribe, band, or other organized group of Indians, or his descendant.

Sec. 103(a)(1) of the Elementary and Secondary Education Act is amended by deleting references to Indian children and allotments to the Department of the Interior in subparagraph (A) and striking out subparagraph (B), referring to Department of Interior payments to local educational agencies with out-of-State Indian children.

Sec. 303(1) of P.L. 874 is amended by removing Indian property from the definition of Federal property.

TITLE II—SPECIAL PROGRAMS AND PROJECTS TO IMPROVE EDUCATIONAL OPPORTUNITIES FOR INDIAN CHILDREN

*Sec. 201*—Amends Title VIII of the Elementary and Secondary Education Act of 1965 by adding the following new section:

IMPROVEMENT OF EDUCATIONAL OPPORTUNITIES FOR AMERICAN INDIAN CHILDREN

*Sec. 810*—Directs the Commissioner to carry out a program to improve Indian education by:

Making grants to State and local educational agencies and other public and private organizations (including federally supported elementary and secondary Indian schools) for planning, pilot, and demonstration projects including (1) innovative programs for the educationally deprived, (2) bilingual and bicultural education, (3) activities to meet the special health, nutrition, social and psychological problems of Indian children, and (4) coordination with other related Federal programs:

Making grants to State and local educational agencies and the National Board of Indian Education to assist and stimulate programs to provide educational services not available in sufficient quality or quantity for Indian children (including compensatory instruction and other services to encourage them to enter, remain in, or reenter school; comprehensive academic and vocational instruction; instructional materials and equipment; guidance, counseling and testing; programs for handicapped and preschool children; bilingual and bicultural education and other services), and to establish and operate exemplary and innovative programs and centers to enrich Indian education;

Making grants to institutions of higher education, and to State and local educational agencies in combination with such institutions, to prepare or improve the qualifications of educational personnel serving Indian children. Grants may be used for fellowships, institutes, and for other purposes which are part of a continuing program;

Making grants to and contracts with other public and private nonprofit organizations for disseminating information on Indian education and evaluating the effectiveness of federally assisted programs.

Grant applications shall describe the activities planned. Program grant applications will provide for: the use of available funds and the coordination of other resources to insure a comprehensive program; the training of participating personnel; and evaluation.

Parent and tribal community participation in project planning, development, and evaluation is required for approval.

For grants under this section, $25,000,000 is authorized for fiscal 1972 and $35,000,000 for each of the four succeeding fiscal years.

Effective June 30, 1972, amends Titles II and III of the Elementary and Secondary Education Act (relating to school library resources and supplementary educational centers and services) and the Education of the Handicapped Act to eliminate allotments to the Department of the Interior for Indian children in the Department's schools.

TITLE III—SPECIAL PROGRAMS RELATING TO ADULT EDUCATION FOR AMERICAN INDIANS

*Sec. 301*—Amends Title III (the Adult Education Act) of the Elementary and Secondary Education Amendments of 1966 by redesignating sections 314 and 315 as sections 315 and 316 and adding the following new section:

IMPROVEMENT OF EDUCATIONAL OPPORTUNITIES FOR ADULT AMERICAN INDIANS

*Sec. 314*—Authorizes the Commissioner of Education to

Make grants to State and local educational agencies and other public and private organizations to support planning, pilot, and demonstration projects to test the effectiveness of programs to improve employment and educational opportunities for American Indian adults, including bilingual and bicultural programs, and programs to coordinate the operation of related federally assisted programs;

Assist in the establishment and operation of programs to stimulate opportunities for adult Indians to acquire basic literacy skills and quality for a high school equivalency certificate; support a major research and development effort to find better ways of meeting these goals; and determine the extent of illiteracy and lack of high school completion on Indian reservations;

Make grants to and contracts with public and nonprofit private organizations to disseminate information on Indian adult educational programs and to evaluate the effectiveness of such federally assisted programs.

Grant applications shall describe the activities to be funded, provide for program evaluation, and shall not be approved unless the Commissioner is satisfied that there has been and will be participation by tribal communities and the individuals to be served in the planning, operation and evaluation of the project.

$5,000,000 is authorized for fiscal 1972 and $8,000,000 for each of the four succeeding fiscal years.

TITLE IV—NATIONAL BOARD OF INDIAN EDUCATION; BUREAU OF INDIAN EDUCATION; MISCELLANEOUS

NATIONAL BOARD OF INDIAN EDUCATION

*Sec. 401*—Establishes a fifteen-member National Board of Indian education, appointed by the President, with the advice and consent of the Senate, from nominees furnished by Indian tribes and organizations.

Members shall be appointed for three years, but the terms of the first appointees shall expire as follows: five at the end of one year, five at the end of two years, and five at the end of three years. No member shall serve more than two consecutive terms. Vacancies filled prior to the expiration of a term shall be filled for the term's remainder. The President shall designate one member as Chairman and another as Vice Chairman. Mem-

bers shall be compensated at the rate prescribed for grade GS–18.

STAFF OF NATIONAL BOARD

*Sec. 402*—Authorizes the National Board Chairman to appoint and fix the compensation of an Executive Director, a Superintendent of Indian Education, and additional staff without regard to provisions of the United States Code governing appointments in the competitive service, classifications and General Schedule pay rates, but rates must not exceed the maximum rate for a GS–18. The Chairman may also procure temporary and intermittent services at rates not to exceed $100 a day per person.

POWERS AND DUTIES OF NATIONAL BOARD

*Sec. 403*—Vests the National Board with these powers and duties: carrying out the former functions of all other executive agencies (except the Office of Education and the Office of Economic Opportunity) relating to Indian education; establishing local school districts of Federal Indian schools; establishing, at its discretion, local school boards selected at the local level in accord with National Board regulations, having administrative control over Federal Indian schools in such districts; and advising the Commissioner on the administration of Title III of P.L. 874 and Title VIII of the Elementary and Secondary Education Act, as added by this Act.

FUNCTIONS OF NATIONAL BOARD

*Sec. 404*—Vests in the National Board all functions which were formerly carried out by other executive agencies relating to Indian education at all levels.

Transfers all these functions, except for those of the Office of Education, and the Office of Economic Opportunity, to the National Board.

All outstanding orders, rules, contracts and the like shall continue until changed by the National Board, the courts, or the operation of the law.

All personnel, property, records and the like which are primarily concerned with the functions transferred shall also be transferred to the National Board.

Directs the National Board to: investigate off-reservation boarding schools to determine which should be converted to therapeutic treatment centers and to cooperate with the Public Health Service in their conversion; examine distribution, location, and student placement in Federal boarding schools with a view to change; and report to the Congress on these studies by July 1, 1972.

BUREAU OF INDIAN EDUCATION

*Sec. 405*—Establishes a Bureau of Indian Education in the Office of Education, with responsibility for administering the provisions added by this Act to P.L. 874 and the Elementary and Secondary Education Act. The Bureau shall be headed by a Deputy Commissioner of Education to be appointed by the President from nominees submitted by the National Board.

TITLE V—MISCELLANEOUS PROVISIONS

*Sec. 501*—Amends the following sections of Title V (the Education Professions Development Act) of the Higher Education Act of 1965:

Sec. 503, relating to the appraisal of education personnel needs, is amended to include a consideration of the educational needs of Indians;

Sec. 504, designed to attract qualified persons to the field of education, is amended to include Indian children in Department of Interior and other Indian schools in efforts to identify and encourage capable youth in secondary schools who may wish to pursue a career in education;

Sec. 505, which provides for consultation by the Commissioner of Education with other agencies to promote coordinated planning of educational personnel training programs, is amended to include the Secretary of the Interior.

Sec. 552, relating to leadership development awards for vocational educational personnel, is amended to include a consideration of the needs of Indian children in Department of Interior and other Indian schools, for qualified vocational education personnel.

Sec. 553 is amended to authorize the participation of Department of Interior and other Indian schools in exchange programs, institutes and inservice education for vocational education personnel.

*Sec. 502*—Amends Title III of the Higher Education Act—Strengthening Developing Institutions—to authorize the Commissioner of Education to waive certain requirements (relating to admissions policy, educational programs, and accreditation during the five years preceding the year for which assistance is sought) in institutions on or near Indian reservations if this action will increase the availability of higher education for Indians.

NATIONAL BOARD OF INDIAN EDUCATION

*Sec. 503*—Directs the National Board to raise the Institute of American Indian Arts at Santa Fe, New Mexico, to the level of a 4-year college.

*Sec. 504*—Directs the National Board to provide support for community colleges on or near Indian reservations, to conduct a feasibility study of Indian community colleges and work toward their establishment, and to report to the Congress on these matters on or before July 1, 1972.

Mr. MONDALE. Mr. President, it is with a great deal of pride that I join the distinguished senior Senator from Massachusetts today in introducing what I believe will become recognized as a landmark act in the field of Indian education.

For almost 2½ years the Senate Indian Education Subcommittee, first under the dedicated leadership of the late Senator Robert Kennedy and later under the equally dedicated chairmanship of Senator EDWARD KENNEDY, investigated the education received by Indian Americans. The subcommittee, which I was privileged to serve as a member, issued a shocking report. The report's title aptly described the subcommittee's findings: "Indian Education: A National Tragedy—A National Challenge."

We have witnessed the tragedy portion of that title. Indian people have been experiencing it for 400 years. Now it is time to take up the challenge portion. That is what we are doing today.

This bill represents the hope of thousands of Indians, many of whose opinions were heard by the Subcommittee in hearings and field investigations, for a quality education for their children. I only hope that this legislation will receive the expedient action which it deserves.

I was privileged to serve on that subcommittee, and in doing so, I became educated in the problems faced by our Nation's first Americans in seeking a first-rate education. Since the publication of the subcommittee's final report last November, thousands of Americans have read that report, and their eyes, like mine, have been opened to the horrors of Indian education:

Fifty percent dropout rates: 12,000 children not in school—and most of them severely physically or mentally handicapped; an average educational level of 5 school years for all Indians under Federal supervision.

The statistics are appalling. But one can become immune to statistics. One cannot become immune, though, to the stories of Indian schoolchildren being disciplined with handcuffs, of school counselors "counseling" students with jail referral slips, of teachers punishing Indian students for speaking their native languages, of teenagers committing suicide in order to escape the life they dread.

The Indian Education Subcommittee looked at these incidents. We studied the statistics. And we determined that the education afforded Indian Americans was "a national tragedy."

The subcommittee's final report listed 60 recommendations which would radically improve Indian education. A number of these recommendations have been implemented. For example, bilingual education efforts have been expanded considerably. The National Council on Indian Opportunity has been funded again. The Department of Health, Education, and Welfare and the Department of the Interior have begun devising a plan to better coordinate their Indian education activities. Public Law 81–815 has been amended so that public schools educating Indians will have higher priority in funding than they have in the past. And bills have been introduced to legislate a number of other proposals, including recommendations to hold a White House Conference on Indian Affairs, and to raise the BIA Commissioner to Assistant Secretary of the Interior status.

There were a number of other recommendations which can never be legislated. The impoverishment of Indian education will never change, for example, without a true commitment to excellence by all concerned with the education of Indian children, or without a recognition of the basic right of the Indian not only to equal educational opportunity, but to dignity and respect for his culture and heritage.

But there were many fundamental recommendations the Congress can act upon, and which we have incorporated into the bill that has been introduced today.

This bill is unique in two respects. First, it is an expression of the wishes of many Indian people. During its 2½ years, the Indian Education Subcommittee traveled to all parts of the country to listen to the Indian people. We held public hearings in Washington, D.C., California, Oklahoma, Arizona, South Dakota, Oregon, and Alaska, and conducted field investigations in Minnesota, Idaho, Maine, New York, and several other locations. We compiled over 4,000 pages of hearing testimony during that period. We heard from Indians throughout the country. We have taken their suggestions and put them together into this bill we are introducing today.

This bill is also unique among Federal education legislation. It is not an attempt, for example, simply to provide some funds and set up some new administrative machinery to do more of what has been done in the past. It is an attempt rather to change the very nature of what has historically passed for Indian education.

For too long, the education of Indian Americans has been the imposition of white American educational institutions upon American Indian communities. Indians were expected to attend the schools controlled by non-Indians. There they learned that Indians were savages and the white men who killed them were heroes. They learned that every time the cavalry won it was an heroic feat, but every time the Indians won it was a massacre. They were told their traditions were meaningless, archaic, and silly.

But now the Indian does not want that kind of Indian education. He wants an education that will tell him the truth about his tribe, his heritage, his traditions, his place in the world—an education over which he will have some control. That is what this bill is going to enable him to do.

I am not going into a lengthy explanation of the different titles of this legislation. Basically, title I provides for payments to schools educating Indian children. It includes funds for urban as well as reservation Indians, and the money is to be used for programs designed to meet the special educational needs of Indian children. Title II is a grant program for planning, pilot, and demonstration programs in a number of areas: bilingual, bicultural, health nutrition services, instructional materials, guidance and counseling services, and other such programs. Of special significance is the fact that grants can also be made for developing programs to prepare persons to teach Indian children, and to improve the qualifications of persons currently working with Indians in schools. One of the major findings of the Indian Education Subcommittee was that teachers of Indians were not attuned to the traditions and culture of the Indian child. They were not, in effect, culturally sensitive. This title approaches this problem through specialized preservice and in-service programs for teachers of Indian children. The bill authorizes $25 million for grants under this title in fiscal 1972, and $35 million for each of the succeeding years.

Title III provides special programs for educating American Indian adults. This title also provides programs for planning, pilot, and demonstration projects designed to improve employment and educational opportunities for Indian adults. The bill authorizes $5 million for this effort for fiscal 1972, and $8 million for each of the four succeeding years.

Title IV establishes a National Board of Indian Education and a Bureau of Indian Education within the Office of Education. It will be the function of the OE Bureau of Indian Education to administer the provisions of this legislation. That Bureau will be headed by a Deputy Commissioner of Education appointed by the President from nominees submitted by the National Board. I will discuss this National Board in more detail later.

Finally, title V makes funds available for the expansion and development of community colleges educating American Indians, and amends the Higher Education Act so as to encourage the development of Indian teachers.

There are two elements of this bill which I believe are of special significance and, for that reason, deserve elaboration. One is that funds in both the formula entitlement and grant programs will go toward the education of Indians in urban as well as Federal reservation schools. The other is that all programs and projects must be planned, operated, and evaluated by tribal communities and parents of the Indian children affected.

For years, the Bureau of Indian Affairs has refused to recognize the growing population of Indians in urban areas. It has maintained that it must concern itself almost exclusively with Indians living on or near reservations. As a result, Indian children living in urban areas have attended public schools which received no assistance from the BIA in providing for the special needs of educating Indian children.

Today there are almost as many Indians in the cities as on the reservations. In Minneapolis alone there are about 15,000 Indians. Many of the urban Indian students need special materials and special help if the 50-percent-plus Indian dropout rates so common in these cities is to be improved. We would provide per student payments to these school districts for programs aimed at meeting these special needs—as they are defined by the parents of the Indian children. The bill would also make available to these districts grants for funding special projects and programs to better meet the unique needs of Indians in our cities.

The second major feature of this comprehensive bill is that it puts Indian education into the hands of not Indian experts, but expert Indians. Local control has been the foundation of public education in this counrty from its inception, yet we continue to permit a Washington-based bureaucracy to control the education of thousands of Indian children. Every project authorized by this legislation is conditioned upon the approval of the parents of the Indian children affected. In the language of the bill:

> The Commissioner shall not approve an application for a grant . . . unless he is satisfied that there has been participation by tribal communities and parents of the children to be served in the planning and development of the project, and that there will be such participation in the operation and evaluation of the project.

Besides giving Indians basic control over special programs and projects, the bill creates a National Board of Indian Education which is authorized to establish local school districts and locally selected school boards for Federal Indian schools. Since 1968 when President Johnson told the Bureau of Indian Affairs to establish Indian school boards, we have been waiting for the BIA to respond to the President's order. Since that date, only three Federal schools have been turned over to the local communities. At that rate, it will be the year 2044 before the Bureau's 223 schools are locally controlled.

In the meantime, Indian people must be content with advisory boards, which have to sit idly by and watch their children being taught by civil service appointees, many of whom are totally ignorant of Indian language, customs, or traditions.

The National Board established by this bill is a 15-man board selected by the President from a list of nominees furnished him by Indian tribes and organizations. This Board would take over the education functions presently handled by the Bureau of Indian Affairs. It would appoint a superintendent for the Federal Indian schools. Among its responsibilities would be to investigate the reservation boarding schools and determine which should be converted to therapeutic treatment centers and how the placement of students in boarding schools can be improved. This was a subcommittee recommendation. But most importantly, the Board would be charged with the responsibility of establishing local school boards—a responsibility which the BIA has failed to meet but which a board of Indian parents is sure to accept more seriously.

I was delighted some weeks ago to see the President responding to some of the points raised by our subcommittee, and urging greater control of Federal programs by the Indians, themselves. I think the features of the legislation we are introducing today follow logically upon this concern, and I would hope that we could receive broad bipartisan support.

I believe enactment of this bill will go a long way toward improving the status of Indian education in this country. We have had enough speeches, studies, and surveys; it is time now for action.

Mr. President, I cannot express how deeply I feel the need to be for the adoption of this measure. The human tragedy visited upon the Indians of this country, and all of us as a result of the failure of our educational system in this area, is a national disgrace.

I am very hopeful that this legislation will be adopted. We have had enough speeches, studies, and surveys; it is time for action.

Mr. HARRIS. Mr. President, will the Senator yield?

Mr. MONDALE. I yield.

Mr. HARRIS. Mr. President, I am very pleased to commend the distinguished Senator from Massachusetts (Mr. KENNEDY) and the distinguished Senator from Minnesota (Mr. MONDALE) for the excellent product of that work, which is in the form of the Indian Education Act. One of the single most important events so far as progress of American Indians in recent years was the establishment of the Special Subcommittee on Indian Education, first headed by the distinguished Senator from New York, the late Senator Robert F. Kennedy, and followed by the continuing efforts of Senator EDWARD KENNEDY and Senator MONDALE.

The new thrust, the new efforts that are involved in the work of that subcommittee, that are embodied in this legislation, can do much to right the wrongs of centuries.

Again, I commend the Senators for their work in this matter.

Several Senators addressed the chair.

Mr. MONDALE. Mr. President, I yield to the Senator from Texas.

Mr. YARBOROUGH. Mr. President, I commend the Senator from Massachusetts (Mr. KENNEDY) and the Senator from Minnesota (Mr. MONDALE) for their coauthorship of this bill. As a member of the Committee on Labor and Public Welfare, and as chairman of that committee for the past 2 years, I was a member of this Indian Subcommittee from the time it was first formed.

I participated in hearings in Washington when Robert Kennedy was chairman. I held hearings on the west coast, and I sat in on hearings concerning the Indian tribes in the Northwest, in the States of Oregon and Washington. Then it was my privilege to appoint the distinguished senior Senator from Massachusetts as chairman of the Indian Education Subcommittee later, when the chairmanship was changed.

Having been interested in the problem from the very beginning, having attended a number of hearings, having worked as diligently as possible to continue the Indian Subcommittee, although we had some jurisdictional problems with other committees, I congratulate the Senator on the progress in this field.

We in the Southwestern States have been much interested in this problem. There are not so many Indians in my State, but we live next door to New Mexico, which has a large population of Indians. In the 3½ years that I was in the practice of law in El Paso, Tex., I was in New Mexico many times and learned the need in this field. A survey was made by a professor of the University of New Mexico to show that in New Mexico only one-third as many dollars were spent on the average Indian in the pueblos on education as was spent in the Anglo counties of New Mexico. They were called the forgotten children.

That was as far back as 1940. I happen to have a copy of that report, which was autographed by Chief Justice Stone. He had sent a note to the author of that work commending him for it. So, as far back as 1940, we find discrimination, failure, and lack of programs to educate Indian children. This is a failure that has gone on for generations.

I am very proud of the fact that the committee on which I serve, the Committee on Labor and Public Welfare, which held hearings all through the West and in Alaska, has pinpointed the great need.

The Senator from Minnesota was speaking of the Chippawas in his State. He was a spokesman for the protection of the Chippewas when he was attorney general of Minnesota, when the Chippewas were being kicked around. As attorney general, he gave them protection they had never had. So he has been interested in this problem for a long time.

I commend all the Senators who have been concerned in this problem for their interest, leadership, imagination, and real study of the problem. I think this bill will do something in that direction.

Mr. MONDALE. Mr. President, I thank the Senator from Texas. No one has given more support and extended more support to the work of our committee and its objectives than has the Senator from Texas.

## PUBLIC WORKS APPROPRIATION BILL, 1971—CONFERENCE REPORT

Mr. ELLENDER. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 18127) making appropriations for public works for water, pollution control, and power development, including the Corps of Engineers—Civil, the Panama Canal, the Federal Water Quality Administration, the Bureau of Reclamation, power agencies of the Department of the Interior, the Tennessee Valley Authority, the Atomic Energy Commission, and related independent agencies and commissions for the fiscal year ending June 30, 1971, and for other purposes. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

Mr. BAYH. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the report——

Mr. BAYH. Mr. President, reserving the right to object, the Senator from Indiana would like to address an inquiry to the Chair. Does the Senator from Indiana correctly interpret the rules of the Senate that such a conference report is privileged business before the Senate?

The PRESIDING OFFICER. All conference reports are privileged business.

There being no objection, the Senate proceeded to consider the report.

(For conference report, see House proceedings of Sept. 17, 1970, pp. H8925, CONGRESSIONAL RECORD.)

Mr. ELLENDER. Mr. President, I regret the Senate conferees were unable to sustain all of the programs we proposed, but I think that all in all we came out very well.

The House committee placed in the bill 10 new planning starts, and 19 new construction starts. The Senate provided 21 new planning starts and 21 new construction starts. In conference we ironed out the differences so that it is my belief the Senate came out of the encounter as well as did the House.

The conference agreement provides $5,239,324,000, which is $19,371,000 below the amount approved by the Senate; $2,516,000 above the House; $24,109,000 below the budget; and $470,556,500 above the appropriation for fiscal year 1970. Two hundred million dollars of this increase over fiscal year 1970 is for construction grants for waste treatment facilities.

Mr. President, there is a growing awareness of the need to protect and improve our environment. A major thrust of this effort is being directed toward the elimination of air and water pollution. One of the most important programs to improve our environment is the Construction Grants for Waste Treatment Works. This year, the authorization is $1¼ billion; the administration recommended new legislation including contract authority of $4 billion over a period of 4 years. Since that legislation has not been enacted, the Congress is providing in this bill new obligational authority—appropriations—of $1 billion.

Mr. President, I ask unanimous consent to have printed in the RECORD a summary table explaining the action of the conferees on the various items in the bill.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

PUBLIC WORKS APPROPRIATIONS FOR FISCAL YEAR 1971—SUMMARY TABLE

| Agency and item | New budget (obligational) authority, fiscal year 1970 [1] | Budget estimate of new (obligational) authority, fiscal year 1971 | New budget (obligational) authority in House bill | New budget (obligational) authority in Senate bill | New budget (obligational) authority in conference bill |
|---|---|---|---|---|---|
| (1) | (2) | (3) | (4) | (5) | (6) |
| TITLE I—ATOMIC ENERGY COMMISSION | | | | | |
| Operating expenses | [2] $1,867,269,000 | $2,010,900,000 | $1,965,500,000 | $1,919,070,000 | $1,929,160,000 |
| Plant and capital equipment | 355,500,000 | 352,100,000 | 360,100,000 | 352,200,000 | 353,600,000 |
| Total, title I, new budget (obligational) authority, Atomic Energy Commission | 2,222,769,000 | 2,363,000,000 | 2,325,600,000 | 2,271,270,000 | 2,282,760,000 |
| TITLE II—DEPARTMENT OF DEFENSE—CIVIL | | | | | |
| Department of the Army | | | | | |
| Corps of Engineers—Civil | | | | | |
| General investigations | 41,191,000 | 39,597,000 | 38,559,000 | 41,616,000 | 39,597,000 |
| Construction, general | 711,992,000 | 821,398,000 | 825,689,000 | 871,808,000 | 851,256,000 |
| Flood control, Mississippi River and tributaries | 80,820,000 | 79,578,000 | 79,578,000 | 91,004,000 | 84,000,000 |
| Operation and maintenance, general | [3] 259,905,000 | 292,600,000 | 290,000,000 | 292,600,000 | 292,600,000 |
| Flood control and coastal emergencies | 32,000,000 | 7,000,000 | 3,000,000 | 3,000,000 | 3,000,000 |
| General expenses | [4] 24,680,000 | 25,800,000 | 25,350,000 | 25,800,000 | 25,480,000 |
| Total, Corps of Engineers—Civil | 1,150,588,000 | 1,265,973,000 | 1,262,176,000 | 1,325,828,000 | 1,295,933,000 |
| Cemeterial expenses | | | | | |
| Salaries and expenses | 15,125,000 | 17,434,000 | 18,184,000 | 18,184,000 | 18,184,000 |

Footnotes at end of table.

PUBLIC WORKS APPROPRIATIONS FOR FISCAL YEAR 1971—SUMMARY TABLE—Continued

| Agency and item | New budget (obligational) authority, fiscal year 1970 [1] | Budget estimate of new (obligational) authority, fiscal year 1971 | New budget (obligational) authority in House bill | New budget (obligational) authority in Senate bill | New budget (obligational) authority in conference bill |

[15] Reflects decrease of $1,250,000 contained in H. Doc. 91-305.
[16] Includes $155,000 appropriated in Second Supplemental Appropriation Bill, 1970.

TITLE I, ATOMIC ENERGY COMMISSION

Mr. ELLENDER. Mr. President, in addition to the consideration of appropriations for pollution control, the committee considered all of the appropriations for the Atomic Energy Commission.

The conferees agreed on $1,929,160,000 for operating expenses of the Atomic Energy Commission. This is $36 million below the House allowance, and $29 million above the amount allowed by the Senate. Of this increase over the Senate amount, $9,700,000 is for the weapons program and associated selected resources. This increase is necessary as a result of wage increases and other increases required to compensate for delays in production resulting from strikes early this year. The remaining increase of $390,000 is for research on the isotopic-powered artificial heart. The increase over the Senate bill figure also reflects an adjustment of $18,770,000 to correct an error in the Senate bill total.

For plant and capital equipment, the conferees agreed on $353,600,000. This is $6.5 million below the House and $17.5 million above the Senate. The increase provides $500,000 for planning an addition to the physics building at Argonne National Laboratory, Ill.; $600,000 for the National Nuclear Science Information Center at Oak Ridge, Tenn.; and $300,000 for a radiotherapy linear accelerator at the Puerto Rico Nuclear Center. The increase also reflects an adjustment of $16,100,000 to correct an error in the Senate bill table.

TITLE II, DEPARTMENT OF DEFENSE—CIVIL

Mr. President, in title II, for general investigations, Corps of Engineers, the bill provides $39,597,000 which is $2,019,000 below the amount approved by the Senate, and $1,038,000 above the amount allowed by the House. The conference allowance is the same amount as the budget estimate.

I ask unanimous consent to have printed at this point in the RECORD a tabulation showing the details of the amount allowed for this item.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

GENERAL INVESTIGATIONS, FISCAL YEAR 1971

| Item | Reserve | Approved budget estimate for fiscal year 1971 (including reserve) | House allowance (including reserve) | Senate allowance (including reserve) | Conference allowance (including reserve) |
|---|---|---|---|---|---|
| (1) | (2) | (3) | (4) | (5) | (6) |
| 1. Surveys: | | | | | |
| (a) Navigation studies | $513,000 | $4,875,000 | $4,670,000 | $5,270,000 | $5,069,000 |
| (b) Flood control studies | 365,000 | 11,173,000 | 11,293,000 | 11,693,000 | 11,573,000 |

| Total, general investigations | 931,000 | 39,597,000 | 38,559,000 | 41,616,000 | 39,597,000 |

Mr. ELLENDER. Mr. President, for construction, general, Corps of Engineers, the conference agreement provides $852,063,000 which is $19,745,000 below the amount approved by the Senate; $26,374,000 above the House; $30,665,000 above the budget estimate; and $140,071,000 above the 1970 appropriation.

The construction items approved by the House included 10 unbudgeted planning items, 19 unbudgeted construction starts, and two new land acquisition items; all of which were approved by the Senate. In conference, the House conferees agreed to 10 of the 21 new planning starts added by the Senate. The House conferees also agreed to 10 of the 21 new construction starts added by the Senate; and, in addition, to land acquisition on three reservoir projects for which the Senate had approved a construction start.

For increases in construction, the Senate approved an additional $27,503,000, and the House conferees agreed to $17,758,000 of these increases.

Mr. President, the Senate restored the budget estimate of $807,000 for continuation of planning on the Dickey-Lincoln School Dam and reservoirs project in Maine. When the bill was up for consideration in the House, an amendment to provide the planning funds for this project was defeated on a teller vote—60 yeas and 90 nays. The conference agreement included the Senate allowance for this project. The House conferees, however, felt that they had to take the amendment including these funds back to the House for a separate vote. I regret that the House again refused to agree to the Senate restoration of these funds.

I might say, Mr. President, that this is the third consecutive time that this worthy project has been turned down by the House of Representatives. I am very hopeful that next year we can put it back into the bill, and that it will be approved by Congress.

After the conference report is agreed to, we will have for consideration the House amendment to the Senate amendment No. 4. Their amendment provides $851,256,000 for construction, general, of the Corps of Engineers, and provides the amounts shown in the printed conference report except for the $807,000 set out therein for the Dickey-Lincoln project.

Mr. President, for Mississippi River and tributaries, the conference bill provides $84 million, which is $4,422,000 above the House allowance and the budget estimate, and $7,040,000 below the amount allowed by the Senate.

This is an extremely important project, affording protection to parts of seven States. Because of budget restrictions of last year, there was a total of $13,848,458 of carryover and reserve funds. Actual obligations last year were only $72,967,839, and with the funds provided in the conference bill, together with the carryover funds, there will be about $98 million available for obligation in fiscal year 1971.

Mr. President, I ask unanimous consent to insert at this point in the RECORD the tabulation showing the details of the amount allowed for the Mississippi River and tributaries program.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

FLOOD CONTROL, MISSISSIPPI RIVER AND TRIBUTARIES, FISCAL YEAR 1971

| Project | Reserve | Approved budget estimate for fiscal year 1971 (including reserve) | | House allowance (including reserve) | | Senate allowance (including reserve) | | Conference allowance (including reserve) | |

| Grand total | 6,372,000 | (79,578,000) | | (79,578,000) | | (91,004,000) | | (84,000,000) | |

[1] Total includes funds placed in budgetary reserve during fiscal year 1970 which will be released for use in fiscal year 1971.
[2] Reflects availability of carryover funds held in budgetary reserve in fiscal year 1970 and an unbudgeted addition approved by the House committee.
[3] Increase in budget.
[4] Unbudgeted.
[5] Financed from fiscal year 1970 congressional add on held in budgetary reserve.

TITLE III, DEPARTMENT OF THE INTERIOR

Mr. ELLENDER. Mr. President, for title III, the conference bill provides $1,532,603,000, which is $1,023,000 below the amount approved by the Senate; $7,863,000 above the House allowance; $18,788,000 above the budget; and $252,677,500 above the appropriation for 1970.

With respect to the Federal Water Quality Administration, for construction grants for waste treatment works, the bill provides $1 billion, which is $200 million above the amount approved for fiscal year 1970.

Mr. President, for the Bureau of Reclamation, the conferees agreed on an increase of $65,000 for general investigations. The conferees agreed to $4,983,000 of the $6,121,000 increase recommended by the Senate for construction and rehabilitation; and allowed $1,115,000 of the $1,915,000 Senate increase for the Upper Colorado River storage project.

I ask unanimous consent that tabulations showing the details of the conference agreement for construction and rehabilitation, and for the Upper Colorado River storage project, be printed in the RECORD at this point.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

BUREAU OF RECLAMATION, FISCAL YEAR 1971
CONSTRUCTION AND REHABILITATION

| Construction, general, State and project | Budgetary reserve | Approved budget estimate for fiscal year 1971, as amended | | House allowance [1] | | Senate allowance [2] | | Conference allowance [1] | |

[6] Construction revenues included in Glen Canyon program.

Mr. ELLENDER. For the Colorado River Basin, the Senate agreed to the House allowance of $1,950,000 instead of $750,000 approved by the Senate.

TITLE IV, INDEPENDENT OFFICES

Mr. President, for title IV, the conference bill provides $63,408,000 which is $2,600,000 above the amount allowed by the House, and $400,000 below the Senate-approved bill: $6,595,000 above the budget; and $6,711,000 above the appropriations for fiscal year 1970.

The increase allowed by the conferees for the Tennessee Valley Authority provides $2,000,000 for the Mills River Reservoir in North Carolina, of which $600,000 is for planning and $1,400,000 for land acquisition. I am very glad that we were able to agree on retaining funds for the Mills River Reservoir in North Carolina.

For the Water Resources Council, the conferees agreed on $5,150,000 which is $600,000 above the amount allowed by the House, and $400,000 below the amount approved by the Senate; $495,000 above the budget estimate; and $1,225,000 above the appropriation for fiscal year 1970.

The increase of $600,000 is for planning grants to States under title III, providing a total of $3,600,000, an increase of $1,225,000 over the amount available for this purpose in fiscal year 1970.

Mr. President, I move that the conference report be agreed to.

Mr. JAVITS. Mr. President, before we act on that motion, I would like to ask the Senator from Louisiana a question. Does the Senator mind? Of course, I will agree to approving the report, but I think this is a good time to comment, if the Senator had come to a stopping point.

In the first place, let me say that I think the committee and the Senator from Louisiana have done magnificently by New York, and we have no complaints about the way in which New York's public works projects have been handled.

We did have one project, which the Senator was very gracious to speak with me about, concerning a preconstruction survey, for the proposed dredging of Port Jefferson Harbor.

Mr. ELLENDER. That is on Long Island.

Mr. JAVITS. Yes, on Long Island. May I explain to the Senator its importance, and why I asked the question? I will be very brief.

Long Island is, as the Senator knows a very vital, growing community, with approximately 2½ million people.

The question is whether this particular harbor, which is a port on Long Island Sound, should or should not have some commercial utility.

Leaving aside for the moment the argument as to whether, if the harbor were commercially useful, it could also be useful for recreation, it does not necessarily follow that it has to be some foul-smelling port. I have leaned, myself, to the idea that a growing community immediately contiguous to New York City needs material such as oil supplies, which is one of the major products received in Port Jefferson Harbor.

That is why I urged the committee, and the Senator from Louisiana was most gracious in including it for me in the Senate bill, to act affirmatively on approving $50,000 of the authorized Port Jefferson Harbor dredging program for a preconstruction survey.

We understand that the local Representative from that area takes quite a contrary position, but I think it would be very helpful, to know why the House conferees felt they could not concur with the Senate conferees.

Mr. ELLENDER. There were no reasons given by the House conferees. The House conferees simply respected an objection made by Representative Pike.

Mr. JAVITS. And that was it?

Mr. ELLENDER. And that was it. We insisted, but to no avail.

Mr. JAVITS. I thank the Senator very much.

Mr. ELLENDER. I am very hopeful that it will be reconsidered next year, and I can promise the Senator that if I am still in the Senate, as I hope to be—

Mr. JAVITS. I hope so, too.

Mr. ELLENDER. We will try again to secure planning funds for this project.

Mr. JAVITS. May I say to the Senator from Louisiana that I really have an objective feeling about this proposed project. I think that this information from the Senator from Louisiana, which is very public spirited and constructive, can be useful to the local people. They can persuade their Representative. If they agree with what he says, I will not be troubling the Senator any more. If they do not, we will hear about it.

Mr. ELLENDER. As the Senator recalls, while the conference was going on, I advised him of the objection of the Representative.

Mr. JAVITS That was most generous.

Mr. ELLENDER. At that time I suggested that you prod him a little.

Mr. JAVITS. Which I did.

Mr. ELLENDER. I am sorry, though, that even the Senator's admonitions did not do much good.

I am very grateful to the Senator. He has been very helpful.

Mr. ELLENDER. Mr. President, I renew the motion.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Louisiana.

The motion was agreed to.

The PRESIDING OFFICER. The clerk will report the amendment in disagreement.

The assistant legislative clerk read the amendment, as follows:

*Resolved*, That the House recede from its disagreement to the amendment of the Senate numbered 4 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed, insert: *$851-256,000*

Mr. ELLENDER. Mr. President, the House amendment to Senate amendment No. 4 for construction, general, Corps of Engineers, is $807,000 less than the conference agreement, which is the amount deleted for the Dickey-Lincoln project. That amendment provides $851,256,000 which is $20,552,000 below the amount

approved by the Senate; $25,567,000 above the House; $29,858,000 above the budget estimate; and $139,264,000 above the 1970 appropriation.

Mr. President, I move that the Senate agree to the House amendment to Senate amendment No. 4.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Louisiana to concur in the House amendment to the Senate amendment.

The motion was agreed to.

Mr. ELLENDER. Mr. President, I ask unanimous consent to have printed at this point in the RECORD the tabulation showing the details of the amount allowed under "Construction, general."

There being no objection, the tabulation was ordered to be printed in the RECORD, as follows:

CONSTRUCTION, GENERAL, FISCAL YEAR 1971

| | Construction, general, State and project | Reserve | Approved budget estimate for fiscal year 1971 (including reserve) | | House allowance (including reserve) | | Senate allowance (including reserve) | | Conference allowance (including reserve) | |

[1] Restudy funds only.
[2] Total includes congressional add-on in 1970 placed in budgetary reserve which will be released for use in fiscal year 1971.
[3] Financed from fiscal year 1970 budgetary reserve.

Note.—Profects shown in parentheses are new projects or modification of projects on which construction has not started and projects in brackets are those projects to be completed with the amount in the approved budget.

Mr. ELLENDER. Mr. President, in view of the action just taken by the Senate in agreeing to the House amendment to the Senate amendment No. 4, the conference bill as finally agreed to provides $5,238,517,000, which is $20,178,000 below the amount approved by the Senate; $1,709,000 above the House; $24,916,000 below the budget; and $469,749,500 above the appropriation for fiscal year 1970.

Mr. YOUNG of North Dakota. Mr. President, will the Senator yield?

Mr. ELLENDER. I yield.

Mr. YOUNG of North Dakota. Mr. President, I should like to take a moment to commend the distinguished Senator from Louisiana and his committee for the very careful consideration they have given to this bill and the very fair treatment accorded all proposed projects around the United States.

Also, I commend Representative JOE EVINS, the chairman of the House Committee, and his committee for the very careful consideration they gave this matter.

The bill wound up approximately $25 million below the budget, which I think is very commendable. I have only the highest praise for all concerned in this matter.

Mr. ELLENDER. Mr. President, I yield the floor.

## ORDER FOR ADJOURNMENT FROM FRIDAY TO 11 A.M. ON MONDAY, SEPTEMBER 28, 1970

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that when the Senate completes its business on Friday it stand in adjournment until 11 o'clock on Monday morning next.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDER FOR ADJOURNMENT FROM MONDAY TO 11 A.M. ON TUESDAY, SEPTEMBER 29, 1970

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that when the Senate completes its business on Monday next, it stand in adjournment until 11 a.m. on Tuesday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDER FOR ADJOURNMENT FROM TUESDAY TO 10 A.M. ON WEDNESDAY, SEPTEMBER 30, 1970

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that when the Senate completes its business on Tuesday next it stand in adjournment until 10 o'clock on Wednesday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

## COMMITTEE ON BANKING AND CURRENCY DISCHARGED FROM CONSIDERATION OF H.R. 16710

Mr. BYRD of West Virginia. Mr. President, H.R. 16710, to amend chapter 37 of title 38, United States Code, to remove the time limitations on the use of entitlement to loan benefits, to authorize guaranteed and direct loans for the purchase of mobile homes, to authorize direct loans for certain disabled veterans, and for other purposes, was received from the House yesterday and was referred to committee. The companion bill to H.R. 16710 will be reported later today. So I have been requested to ask unanimous consent that the Committee on Banking and Currency be discharged from its consideration of H.R. 16710 and that it be placed on the calendar.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

## DIRECT POPULAR ELECTION OF THE PRESIDENT AND THE VICE PRESIDENT

The Senate continued with the consideration of the joint resolution (S.J. Res. 1) proposing an amendment to the Constitution of the United States relating to the election of the President and the Vice President.

Mr. TALMADGE. Mr. President, most of us are in agreement on the need to reform the electoral college system of electing the President and the Vice President of the United States. It has several major deficiencies that should be corrected.

For example, the "winner-take-all" practice of allotting electoral votes is grossly unfair. I personally see no justice in giving a candidate a State's total electoral vote simply because he happens to carry that State by a plurality of one. Moreover, under the present system, a President can be elected with less than a majority of the popular vote.

However, I feel the proposed amendment calling for a direct popular vote overshoots the mark. It is far too drastic, and it would invite complete destruction of the American political system and our republican form of government as we know it today.

In my judgment, we can bring about needed reform of the electoral college and embrace the "one-man one-vote" principle without undermining the entire system. The allotment of electoral votes on a proportionate basis seems to me to be the soundest and the most practical approach. Of all the proposals put forth, the proportionate system comes the closest to electing the President by popular vote, while at the same time preserving the integrity of the Constitution and Federal-State relations.

Mr. President, there appeared in Monday's edition of the Washington Evening Star a very fine editorial column by Richard Wilson that points to the dangers inherent in the direct popular vote approach. Mr. Wilson does a splendid job of summarizing the concern about the direct vote that is felt by many of us in this body, and I bring it to the attention of the Senate and ask unanimous consent that it be printed in the RECORD at the conclusion of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DIRECT ELECTION: A CLEAR AND PRESENT DANGER

(By Richard Wilson)

Some people have formed the conclusion that the Senate's refusal to approve an amendment for the direct election of presidents is a stubborn, illiberal act of an old establishment trying to protect itself.

And that, save for illiberality, is quite true. The reason the Senate's action is good is that it affords an opportunity for people who have blindly accepted direct election as an expression of pure democracy to study the matter further and find out what the American system of government is all about.

It is not a pure democracy, never was intended to be and probably never will be. If people wish to change the form of government to go in that direction they at least should know what they are doing. It is a fair guess that not one person out of ten has the slightest conception of what the amendment would finally mean.

There is a far greater chance that the American system would end up—literally end—in riotous confusion if this amendment is ever adopted than that the time-honored electoral system would foist on the country a president who had not won election by popular vote.

This amendment is far worse than the women's rights amendment so cavalierly adopted by the House in the sense that its effect would be more damaging than the condition it is intended to correct.

Women will lose rights under the women's rights amendment and the American electoral system will lose its representative character if the direct election amendment ever goes into the Constitution.

Instead of polarizing (that's a good word) opposing views of political leadership into a reasonably clear choice between two candidates, the direct election amendment would fragment the process of election of a president, inflict a runoff, ultimately destroy the present method of composing the U.S. Senate, and doom a two-party system which is the political wonder of the world.

A multiplicity of presidential candidates and parties and the sure necessity of a runoff between the top two is enough in itself, without all the other complications, to show that direct election is a poor way to select a leader for four or eight years.

The leadership selection process has, in fact, worked remarkably well under the electoral system and this was never better illustrated than in 1968. The two major political parties, after great travail, picked the two men best fitted by training and experience—Humphrey and Nixon—and despite the third party candidate, Wallace, made a clear choice between Humphrey and Nixon.

Make no mistake about Wallace's bid for the presidency. If an election is ever to be thrown into the House of Representatives, in modern times it would certainly be under the conditions of Wallace's candidacy.

And, for that matter, what is so bad about picking a president through the House of Representatives? All of its members are subject to direct election; they sit in the House in proportion to the population of the country. There would be deals. But who says there wouldn't be deals among a dozen parties offering candidates for president in a direct election, much as there are deals now in New York State, which has four parties so fragmenting the vote that this year there is grave doubt a majority candidate can be elected?

The worst that could happen under the electoral system would be the House of Representatives choice of a president. But the worst that could happen under direct election would be the choice of a president who really did not represent anybody or anything, without political discipline and coherent con-

viction, but the creature solely of his ability to use and pay for exposure in the mass media.

Why do you suppose it is that we are lately getting so many United States senators who have little natural aptitude for their jobs?

This is not a case of opposing change for the usual conservative reason that change itself is to be shunned. This is a case of clear and present dangers of "the most deeply radical amendment which has ever entered the Constitution of the United States."

Merely as an afterthought, there would be no reason in constitutional logic for a Senate made up of two members per state if the direct election amendment is ever adopted. Under that theory the biggest state, California, ought to have 15 or 20 senators, or whatever figure represented its proportion of the nation's population.

Mr. HARRIS. Mr. President, there are strong and compelling reasons for abolishing the electoral college and choosing our President through a direct popular vote of the people.

The electoral college system is outdated, full of inequities, and it endangers our political stability. On three occasions the runner-up in the popular vote has been elected President of this democratic Nation. In 1968, we narrowly averted what could have been a grave constitutional crisis, had the selection of the President been thrown into the House of Representatives, a possibility which for a time seemed likely.

In my opinion, the present system violates our democratic principles, since American citizens still do not have the right to elect their own President and Vice President. The voters now elect electors, who in turn name the President and who, in most States, are not even required to vote in accordance with the majority will. If no candidate receives a majority of the electoral colleges votes, the selection of the President is turned over to the U.S. House of Representatives.

It takes approximately 400,000 citizens in California to equal the voting power of 75,000 in Alaska. In 1968 Vice President Humphrey won the eight electoral votes of Connecticut on the strength of 616,000 popular votes. Mr. Nixon received the same number of electoral votes in South Carolina, although his popular vote there totaled only 261,000.

While a number of different plans for choosing the President have been proposed and there is some merit to all of them, I believe the only one which meets all of the requisite tests is direct election.

Some have argued that votes in rural States would be diluted by direct elections, while others have argued that the influence of urban States would be lessened. These conflicting arguments, it seems to me, do not carry much weight. Under direct popular election, each person's vote would count the same, and communities of the same size would have the same influence, whether in a large State or a small one. There should not be a privileged class of voters in this country.

Ours is a system of government in which the Government derives its powers from the consent of the governed. Unfortunately, we have not adhered to this principle as closely as we should have. We are long overdue in changing the rules to make our Nation more truly democratic.

There is great urgency, I believe, in the need to act now to make the Presidency subject to the direct and equal control of all the people.

The PRESIDING OFFICER. The Senator from Florida is recognized.

Mr. GURNEY. Mr. President, in an article entitled "Direct Elections: An Invitation to National Chaos," published in Life magazine on January 30, 1970, the distinguished journalist and political analyst, Mr. Theodore H. White, wrote:

Last September, in a triumph of noble purpose over common sense, the House passed and sent to the Senate a proposal to abolish the Federal system.

Mr. White is not alone in his concern for our institutions and the well-being of the Nation. Our Judiciary Committee heard testimony from various constitutional scholars and experts full of equally dire and gloomy prophecies.

Professor Black, of Yale Law School said:

I think a case can be made for the proposition that this amendment, if it passes, will be the most deeply radical amendment that has ever entered the Constitution of the United States.

I repeat, for the benefit of the Senate, what the distinguished professor of Yale Law School said:

I think a case can be made for the proposition that this amendment, if it passes, will be the most deeply radical amendment that has ever entered the Constitution of the United States.

This is the reason why a great many Senators are concerned about the proposal, Senate Joint Resolution 1.

I listened to a colloquy this morning when the Senator from Indiana was discussing Senate Joint Resolution 1. Particularly did I listen to part of his statement concerning the opponents of Senate Joint Resolution 1. In fact, I thought the Senator from Indiana hit the opponents of Senate Joint Resolution 1 pretty hard. He did direct much of his comments, of course, to those who are perhaps managing the opposition to the resolution, particularly those who engaged in the Judiciary Committee work so far as the resolution is concerned. However, he did indicate that other Members of the Senate were engaged in obstructing and frustrating the resolution, and I do want to comment to that, at least so far as the Senator from Florida is concerned, and I think many other Senators, also.

We are deeply concerned about this direct election amendment. We do have deep reservations about it. Many of us are not engaged in the leadership of the opposition.

We know that they have some plan in opposition to the amendment, but many of us are not concerned with that at all. We are simply concerned with the fact that we do not think a direct election is the way to go about the election of a President.

I know, for example, that many Senators on this side of the aisle—and I expect on the other side of the aisle, also—do want to talk to this proposition. For example, I have been in the Chamber at least four times that I can recall, ready, willing, and able to speak to the amendment, but no opportunity came. As a matter of fact, most of the time that I was in the Chamber the Senator from Indiana was doing the talking. So I simply mean to point out that there are other Senators who do want to be heard on this subject and that the Senator from Indiana perhaps is unduly criticizing a great many Senators who are genuinely opposed to the amendment and have grave reasons for questioning its practicability.

Let me go on with other quotations from other distinguished Americans who have studied this subject.

Similar quotations from Prof. Alexander Bickel of the Harvard Law School and Prof. Ernest Brown of the University of Pennsylvania, are already in the record, thanks to our distinguished colleague from North Carolina (Mr. ERVIN). I must candidly state that the arguments advanced by the minority of the Judiciary Committee have confirmed my own doubts and reservations about the wisdom of Senate Joint Resolution 1. It seems to me that the minority has carefully and systematically documented a case against direct election.

One of the most telling arguments from my point of view is that the advocates of direct election should necessarily have the burden of demonstrating the need for change. Why, in the words of Congressman CLAY quoted in the minority report, should "the burden of proof in this debate (be) assigned to those of us who defend the electoral system which has served us well" rather than to the advocates "of direct election, which is untried and necessarily unproven."

One of the strongest criticisms that can be leveled against Senate Joint Resolution 1 and, in my judgment, constitutes a fatal flaw, is the runoff provision. The presence of a runoff provision would make it almost notable that third party and splinter groups would spring up. Our present system discourages this phenomenon.

Irving Kristol and Paul Weaver in their New York Times magazine piece for November 23, 1969, saw this danger, analyzed and examined it:

As Professor Alexander Bickel of the Yale Law School has eloquently argued, direct election of the President and the establishment of a runoff system (to replace the current procedure of sending an inconclusive election to the House of Representatives) will destroy many of the incentives supporting a two-party system, in which, precisely because of the gulf between the parties is not too vast, the transfer of power can be accomplished without social convulsion or civil strife. The runoff provision, for example, gives every extremist leader the hope which the electoral college's winner-take-all system denied him: that of being able, by bargaining prior to the runoff, to exert some leverage in the final choice of the President. Presidential elections are quite close, more often than not; and there would have been many occasions in the past century when, under direct election, a runoff would have been probable and

bargaining with minority candidates inevitable. In contrast, under the present system, no election has been thrown into the House during all that time.

And the direct-election system will have its own direct effects on the parties. It could happen that protest candidates who are animated by the demands of conscience, and who fail to win their party's nomination, might in the name of conscience nevertheless present themselves to the electorate in the November election.

The current system makes such a strategy extremely difficult technically and, usually, suicidal politically. The direct-election method would remove the technical necessity of meeting the different requirements of each State for getting on the ballot, and it would also render the option of running in the general election, despite failing of nomination, far more appealing.

In short, Mr. President, the runoff provisions, if enacted, would easily destroy the American two-party system as we know it today.

Mr. President, I ask unanimous consent to have printed in the RECORD at the conclusion of my remarks an article written by Arlen J. Large entitled "Party Decline Clouds Election Reform," published in the Wall Street Journal for September 17, 1970.

The PRESIDING OFFICER (Mr. SCHWEIKER). Without objection, it is so ordered.

(See exhibit 1.)

Mr. GURNEY. Mr. President, let me stress that the runoff provision is the real villain here. I can understand why the runoff provision has been included and the understandable reluctance to turn the reins of Government over to a candidate who in the general election has commanded less than 40 percent of the popular vote.

It has been suggested by advocates of Senate Joint Resolution 1 formula that the runoff would be a rarity and they cite the fact that in our history only Abraham Lincoln reached the Presidency while commanding less than 40 percent of the popular vote. This reasoning, I think, is incorrect because the present electoral system discourages splinter parties unless those factions have a substantial regional base.

In 1948, Henry Wallace commanded 2.4 percent of the popular vote but received no electoral votes.

Mr. President, STROM THURMOND, our distinguished senior colleague from South Carolina, who had a regional base, commanded about the same percentage of the popular vote in his effort at the Presidency. He garnered 39 electoral votes because he had a regional base.

Henry Wallace lacked that regional base and knew he could not win. He was merely a spoiler hoping to detract from the popular vote which would normally have gone to the Democratic candidate in that election year of 1948.

The present system made such a candidacy as Henry Wallace an absurdity because people who voted for him realized from the inception of the campaign that they were throwing away their votes.

This entire set of facts would be reversed if direct election with its runoff provisions were enacted into law. Splinter groups would be encouraged to field candidates, the more the merrier, in the hope that by so doing they could drain off votes from the front runners of either the Republican or the Democratic Party. By depriving either of the leaders of a 40-percent tally, the factionalists could force a runoff and thereby immeasurably increase their bargaining power and their leverage and their influence.

Of course, under the electoral college system as we see it now, there is absolutely no incentive to do this because, lacking a regional base, their votes are concentrated as they were in the case of the Strom Thurmond election. In the case of the Henry Wallace effort in 1948, there is an incentive, because there no electoral votes may be garnered, but in a direct election method, of course, where there are no electoral votes, all sorts of people would be influenced to run for public office, in the event they garnered enough votes to spoil the 40-percent margin and force some kind of runoff. I venture to predict that if this amendment were enacted, runoffs would become the rule and not the exception.

I think we can draw a very good analogy or argument in support of that factor when we consider what is going on now in the State of New York where already we have splinter parties besides the two major parties. In every election of any major consequence in New York, there are at least four contending parties. And probably there will be more in the future. That same state of affairs would happen on the national scene if we went to a direct election method of choosing our President.

Direct election has other serious drawbacks which were duly noted and cogently stated by our Judiciary Committee colleagues in their minority report. They have suggested, and I agree, that its enactment would seriously undermine or even destroy the federal concept of government. We recognize that Federal standards would necessarily have to be developed to determine the qualifications of all voters. Indeed the amendment language clearly calls for this:

> Congress may adopt uniform residence and age requirements for voting in such elections.

That may be a very simple statement in a very few words. But that means a whole drastic change for all of the election systems in the 50 States of the United States. It is again a destruction of the whole concept of the 50 States joining together in a Federal Republic and again concentrating more power in the Federal Government, and downgrading and abolishing the sovereignty of the States.

Let me quote again from the Kristol and Weaver article on this subject:

> At the heart of this mythical history lies the belief, repeated again and again by men who ought to know better, that the electoral college has intended to be an explicitly elitist and antidemocratic institution, an assembly of wise establishmentarians who, with cool deliberation, would make a choice too important and too difficult to be left to the common man. Just how mythical this image is can be judged from two simple facts. First, under the Constitution, the electoral college never assembles to deliberate as a body—the electors go to their respective State capitols, and no farther. Secondly, the Constitution leaves it to the States to decide how the electors are to be chosen—they can be appointed by the Governor, elected by the State legislature, or elected by the people as a whole, either as a slate, or individually, or by proportional representation, or in any other way.
>
> Indeed, the one thing that practically all the delegates to the Constitutional Convention were clear on was that they were establishing a "popular government", or a system of representative democracy. It is true that they believed mankind to be weak and easily corrupted. But their solution to this problem was not peremptorily to exclude any part of the population from participation in political life. In fact, the Founding Fathers' distinctive contribution to the theory of constitutional democracy was the idea that the best way to correct for the weaknesses of human judgment was to open up the political process to every group, large and small, and that the more groups there are with access to governmental institutions, and the more various the modes of access, the wiser and more just a popular government would be.
>
> But the founders were further intent on assuring that this system of popular government would also be a system of liberal government—one in which the individual would enjoy massive protection against unjust infringement by government of his rights and liberties. The "popular" character of the new government insured that no minority could easily use public power to such an end. But what of tyrannical actions taken by a temporary majority? The Convention's answer to this possibility was to divide sovereign power among various institutions so that not one but several majorities, each differently constituted, would have to concur before a law could be enacted. That is why the House, the Senate and the Presidency are all elected in different ways. And that is the general idea—not any dark, antidemocratic intention—behind the original constitutional procedures for electing the Presidents, and is still the effective import of those procedures, as adapted through almost two centuries' evolution, today.

Perhaps one of the most telling criticisms of the direct election amendment is that it involves the constant threat of disputed elections. Under our existing system such challenges are rare even when the popular vote tallies are extremely close. The direct election proposal invites such challenges, delaying results for weeks or even months. This failing is compounded by the threat of disputes in any runoff election, as well as the first general election. Here is what Theodore White has to say:

> Still, anyone who trusts the precise count in Gary, Ind.; Cook County, Ill.; Duval County, Texas; Suffolk County, Mass.; or in half a dozen border and southern states is out of touch with political reality. Under the present electoral system, however, crooks in such areas are limited to toying with the electoral vote of one state only; and then only when margins are exceptionally tight. Even then, when the dial riggers, ballot stuffers, late counters and recounters are stimulated to play election-night poker with the results, their art is balanced by crooks of the other party playing the same game.

As a matter of fact, I think that if we look back at the 1968 election, we realize that there were instances in which that game was being played in at least

one State that I know of. Mr. White has a good point. But his point is that under that system chicanery is limited in one area or one State. Under the general election, we would have this problem nationwide in order to dispute the election and reach the 40-percent magic total. The election could be contested and the whole election thrown into a state of confusion so that small minority parties could then make their weight felt in any bargaining in a runoff in such a close election.

Arguments have been made that direct election would destroy the advantage now enjoyed by the small, less populous States—I can see the validity of such arguments; because certainly under the electoral system the weight of a State with a small population like Nevada or Vermont, with three electoral votes, is considerably greater percentagewise than a large State like New York, California, or my own State of Florida.

At the same time it has been pointed out that direct election would dilute the power and influence of the larger States—by mingling those votes in the same pot. Though it might at first seem a contradiction, there may be validity in this argument also.

Arguments are made that small States would be hurt by the direct election and that large States would also. However, it seems to me the very fact that both large and small States make this claim ardently and honestly and that one must be right and one must be in error leads to the confusion surrounding this direct election proposal and points up the uncertainty of the proposal and buttresses the argument that we need to proceed cautiously in this most fundamental of constitutional changes on the method of electing our President, and in a different direction.

Taken as a whole, the amendment stands to offend and dilute the votes in all States, large and small. It is, as Mr. White has suggested, "the triumph of noble purpose over commonsense."

Maybe he has a good point there.

Finally, I think I should touch briefly on one of the most potentially dangerous phenomenon which the enactment of direct election might trigger: that is, turning of our electoral processes over to image-makers and Madison Avenue types.

Perhaps it is noteworthy to comment on this today since just a short time ago we passed a law which would limit the amount of money we could spend on television in political campaigns. I think that buttresses the argument that there has been too much imagemaking on television in political campaigns.

We already hear talk about the image-makers—the huckster-advisers who promise to elect anyone—regardless of credentials, merit, or ability on the basis of packaged advertising campaigns. They tell their clients not to open their mouths. The constituency is scientifically canvassed, the issues isolated and positions on those issues are formulated, not on the basis of a mature judgment as to the merits, not on the basis of the equities, not the basis of philosophy, principle, or moral standard but on the basis of selling appeal. If these hucksters can package candidates like soapsuds with jingles and slogans and cute ad copy—and they say they can do it successfully—we are liable to find ourselves one day with a man in the White House with little ability or aptitude for the Presidency, perhaps a man even devoid of convictions or principle—devoid even of opinion—whose position on public issues is dictated by a computer printout of the latest public opinion polls. That is a bleak picture, but it may not be overstated.

I contend it might not be overstated at all because we have actually seen that process in action in candidacies affecting Congress in this very election year. I can think of candidates in at least two States whose nominations to their respective political party's banner this year has been attributed solely to the campaign packaging of their political campaigns over the television media.

The prize of the White House in a direct election system could very well go to a glamorous but shallow individual who has mounted the best advertising campaign and hired the best media men.

We are all concerned, and rightfully so, about the staggering costs of election campaigns today. If the present costs are astronomical, they stand to go through the roof if direct election were enacted. Here is what Messrs. Christol and Weaver have to say about costs:

> Consider first the presidential campaign itself. Under the current electoral system, candidates concentrate their time, money and personal effort in the big states. But with direct election, all this will change. A vote in California or New York will be no more valuable than a vote in Alaska or Nevada. One result will be that the cost of a presidential campaign—it is already extremely high, around $20- or $30-million—will rise to astronomical proportions. Big money—whether the President's own or someone else's—will become even more influential in presidential elections than it now is.
>
> Certainly another result will be to accelerate the trend toward campaigning through television, with all that implies about the substitution of the artfulness of Madison Avenue for the more traditional arts of political persuasion. Personal appearances by candidates' knowledge of or care for special local conditions and problems. One can almost imagine that we will witness a revival of the old front-porch presidential campaign, except that instead of staying at home, candidates will ensconce themselves in a television studio in New York from which they will have more equal "access" to the candidate and the campaign—which is to say that everyone will have equally little access to a campaign of minimal political substance. Things will be "fairer," but will they really be better?"

I think we know the answer: Things would be for worse.

The opposition which I have expressed for Senate Joint Resolution 1 is not to say or imply that the present electoral system is perfect or flawless. It is not. We need to and should correct the flaws. As I see it, the major drawback which our present system has is the winner-take-all feature of the existing system, which, with the possibility of throwing the election into the House of Representatives where the unit rule applies, seems to me to be unwise and in need of reform. I would prefer to have the electoral votes divided proportionally and allotted to candidates within the party.

Suppose a State had 10 electoral votes and one candidate received 60 percent of the vote and another candidate received 40 percent of the vote. The electoral votes in that case would be divided six to one candidate and four to the other candidate. I think this proposal has a great deal of merit.

In a way it involves the popular election concept in that it would do away with the winner-take-all and divide the electoral votes in proportion to the popular votes received in any one State. This would not only preserve the system the Founding Fathers started out with but still, of course, it would give added weight to the electoral system of a small State in order to protect them, if we can put it that way, from being overwhelmed by the larger States in the election for the Presidency.

That is what the Founding Fathers had in mind in one respect when they invented the electoral college system. If that system made sense 200 years ago it makes more sense now when there is a much greater and much wider division of population between the small States and the large States.

Mr. President, such a proportional division of electoral votes would make the likelihood of the election of one failing to receive a majority of the votes remote. It would retain what we have seen in the electoral college method, and that is the two-party system, with very little splinter parties all during those 200 years and almost always with one man coming up with the majority of the vote. There was always the possibility one candidate would not receive the majority of the electoral college vote.

That is what many of us were concerned with in the last presidential election we had in 1968. That still could occur under a proportional breakdown in the electoral college votes to the respective candidates. However, in that event we can come up with some method to determine the winner.

Already it has been proposed—I know of favorable reception by many States—that in the event there is not a majority, Congress would decide who should win the contest, and not by the unit rule in the house, but with each of the Senators and Representatives meeting in concert and having one vote each.

That certainly would be a method by which we could resolve an election where there was not a majority in the proportional electoral college proposal but still resolve the presidential election.

Again, if we look back into the history of our country, the likelihood of one candidate not receiving a majority is very slim indeed.

I digress a moment to comment on this point. I wish the distinguished Senator from Indiana were on the floor now. At one point during his discussion of Senate Joint Resolution 1 earlier in the day, he made the point that he did not see why the Senate could not vote on this matter since no other proposals had been made by any Senator. I am not sure that is exactly true. I think other proposals have

been made. I know I personally have sat down and talked with other Senators and with the distinguished Senator from Indiana and proposed to him why he did not talk around and see if the proportional breakdown of electoral votes might be a compromise that the Senate might be interested in. In fact, I suggested that to him because one of the Senators who is ardently backing Senate Joint Resolution 1 suggested I do it in the hope that we might be able to resolve the deadlock.

I must say I found no enthusiasm for my idea, but I do make the comment that at least that idea was offered by this Senator from Florida, hoping that the votes of some Senators from some of the smaller States could be picked up, in an effort to break the deadlock. So others of us have had ideas which might work if they were pursued.

If we retain, however, the existing system, it seems to me the minimum reform we should require is the elimination of the faithless elector. In 1968, we will all recall, Dr. Lloyd Bailey, elected to vote for Richard Nixon, broke his pledge and voted instead for George Wallace. We had no recourse but to tally that electoral vote for Wallace. Happily, these occurrences are rare: Out of the approximately 15,000 electoral votes cast between 1824 and 1964 only about 12 faithless electors have broken their word. And, happily again, in no case did the dishonorable elector's vote affect the outcome of a presidential election.

The electoral college, while not perfect, has served our Republic well. It has given our country a gift that precious few other countries can boast: an orderly system for the peaceful and coherent transfer of power. It has been successful. We have had threats of constitutional crisis—but they were threats only. Twice since 1824 it has misfired, in 1876 and 1888, by giving us a President who had fewer popular votes than his rival; but, as Professor Bickel points out, circumstances outside of the electoral made the Tilden-Hayes election in 1876 unique.

Though not infallible, it is successful, it has proven its worth and its utility. It has the virtue of being a known quantity, a mechanism that functions. It should not be lightly or cavalierly dismissed or abolished.

This debate on this very vital subject has not been wasted. It has caused us all to think, to examine our positions, our feelings and prejudices, to marshal arguments to justify our positions. The arguments very ably advanced by the proponents of Senate Joint Resolution 1 cannot be dismissed with a sweep of the hand. They have been argued well and cogently. At the same time, our colleagues who opposed this amendent have come forward with very serious and substantial objections.

As I have indicated, the objections to the amendment far outweigh the advantages.

I think one thing of interest, during the time the Senate has debated Senate Joint Resolution 1, is to read what columnists and other feature writers, especially on politics, writing in the news media are commenting, as well as on radio and television. I cannot say I have seen or heard all the comments on Senate Joint Resolution 1. I have read a considerable number in the Washington Post, whatever appears there daily, because I read it every day. I usually read the Wall Street Journal every day. I read several of the newspapers from back home. I must say, to my recollection, I have not read a single article or a single editorial that has had much favorable to say about Senate Joint Resolution 1. The amazing thing is that there has been so much opposition again and again and again by many of the people——

Mr. BAYH. Mr. President, will the Senator yield?

Mr. GURNEY. If the Senator will wait until I complete my sentence, I shall be glad to yield.

And most of the comment has questioned the value of a direct election and posed the many dangers that are involved in it.

Now I yield to the Senator from Indiana.

Mr. BAYH. I have just one question. The Senator mentioned that he read the Washington Post. Did he read the Washington Post this morning?

Mr. GURNEY. As a matter of fact, I read only the front page. I cannot say I read the rest of it.

Mr. BAYH. Would the Senator from Florida have any objection if the Senator from Indiana asked unanimous consent that an editorial from the Washington Post be printed in the RECORD at this particular place?

Mr. GURNEY. I would not have any objection. I must say it is not going to influence many Members in this Chamber, but the Senator is welcome to put it in.

Mr. BAYH. Mr. President, I ask uanimous consent that the editorial be printed in the RECORD. I thank the Senator. I rose only because he referred to the Washington Post. I thought he and others who might read the RECORD and read his speech would be interested in hearing what the Washington Post had to say.

Mr. GURNEY. Is the Senator placing the editorial in the RECORD at the end of my speech or remarks?

Mr. BAYH. Wherever the Senator prefers. I only interrupted because the Senator mentioned the Washington Post, and I thought it would be interesting to see what the Washington Post had to say about it.

Would the Senator prefer that the editorial appear at the end of his remarks, rather than appear contiguously with the debate here?

Mr. GURNEY. Yes.

Mr. BAYH. Mr. President, I make that request.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

Mr. BAYH. I appreciate the Senator's courtesy.

Mr. GURNEY. I thank the Senator from Indiana, who has managed the joint resolution so well.

Before we leave mention of the Washington Post, however, I would like to remark about something that appeared today, because it might explain some tendencies on the part of the Washington Post and matters it considers major or minor. I was very interested to see where it placed the story about the joint meeting of Congress yesterday.

One thing, certainly, that the Senate has been extremely interested in, and so has the House of Representatives, and the Nixon administration as well, is the treatment of American prisoners of war. We have been trying to emphasize over and over again, this year and last, the inhumane treatment of American prisoners of war, and focus world opinion on it.

Yesterday we had a joint session of Congress, and the President's personal ambassador in charge of the prisoner of war effort to educate nations around the world appeared before the House of Representatives and the Senate.

I was amazed to have to look and find that particular story way back on page 11. It seems to me it should have been headlined on page 1, not only in the Washington Post but in all the other newspapers of the United States, to point out this extremely important matter as far as American servicemen who are prisoners of war are concerned.

Now to get back to this discussion on direct election. As I say, I do not think the debate on this very vital subject has been wasted. It has caused us all to think, to examine our positions, our feelings and prejudices, to marshal arguments to justify our positions. The arguments very ably advanced by the proponents of Senate Joint Resolution 1 cannot be dismissed with a sweep of the hand: They have been argued well and cogently. At the same time, our colleagues who opposed this amendment have come forward with very serious and substantial objections. As I have indicated, I think the drawbacks to the amendment far outweigh its advantages.

If Senate Joint Resolution 1 fails passage in this Congress, I think we can safely predict that there will nevertheless be meaningful reform revision of the electoral system in the future.

If history is any guide, we can say with certainty that there are additional proposals for reform; since 1824, when Senator Thomas Hart Benton first sought its abolition, there have been more than 500 amendments introduced into Congress to alter or abolish it. And this is good. But let us deliberate and not act precipitously. As Hamlet said: "It is better to bear the ills we have, than fly to others we know not of."

In this same vein, let me conclude with a quotation from Time magazine. I am not in the habit of quoting Time, but I think this is appropriate:

> The sad truth seems to be that no solution can satisfy all the objections and reconcile all conflicts. The sadder truth, however, is that the whole question has been given nothing like the serious consideration it deserves, either by Congress or the public. Changing the method of electing a President will not merely change how votes are counted. It will help determine what kind of man will be elected and a major factor in determining whether he is liberal or conservative, and how he views his constituency. Beyond that, there is a possibility, not yet fully appreciated, that the entire political makeup of the country might be affected in ways yet unanticipated and unexplored. That alone should be consideration enough to

send Congress back to the drawing board in pursuit of the best plan possible.

That was a quotation from an article published earlier this year. I do not recite that quotation as one of any great profound remark, but I say that it does raise the question that has been raised by so many people of late who have thought about this matter of direct election.

As I pointed out earlier in the colloquy with the distinguished Senator from Indiana, all kinds of people have all kinds of questions about the wisdom of the direct vote in selecting a President of the United States. I would say if any one thing has been precipitated by the debate we have carried on here, now, for several days on the Senate floor—and I suppose earlier in the deliberations of the Committee on the Judiciary on this matter—one valuable thing that I think has come out of it is the almost unanimous questioning by so many people as to whether this direct electoral method is wise, or to put it another way, the questions all seem to imply that it is unwise; and, as Time magazine pointed out, instead of plunging into this political thicket or these deep unexplored and unknown waters, perhaps the best thing Congress could do is exactly what it is doing now—taking considerable time to examine this whole thing, break it apart, and find out just how sound or unsound it is.

Anything that has worked reasonably well for 200 years, I do not see any great, precipitous reason to throw out. I think we had better make sure that whatever other method we are going to come up with in preference to what we now have is indeed sound and workable, before we enact it into law.

Mr. President, one of the interesting things, I think, about this matter is the debate that has occurred in previous years on this very subject. I have often thought that one could learn a great deal from history if one is willing to read it and be apprised of the lessons involved in the past. I think Santayana or someone once said, many years ago, that one who refuses to learn from the mistakes in history is doomed to repeat them. I think there is a good deal in that.

I had occasion recently to read the debates which took place on the floor of the Senate in March of 1956 concerning the subject of electoral reform. It is true that the suggested reform then up for discussion was the proposal to leave to the States the choice of selecting either the district or the proportional method for designating electoral votes. Nonetheless, the debates contain much relevant material. Indeed, much of the discussion bears on the major proposal before us today—direct election—and is therefore worthy of comment.

I was struck in reading those debates, first, by the great significance that the speakers attached to the matter of electoral reform. It was assumed without question that the revision of our presidential election system would have a profound effect on our constitutional and political system as a whole. Hardly a man on the floor who spoke to the issue, whether in support of, or in opposition to, the pending proposals, felt that the presidential election system could be changed without deep and far-reaching effects. The issue, in short, was placed in a larger perspective, and the debate took place within the understanding that our political structure was an integral whole of mutually and delicately balanced parts. It is unimportant for the moment whether various partisans of one position or another thought the constitutional system would be fundamentally changed for better or for worse. What is important is that they thought it would be fundamentally changed in some way. What is important is the full and comprehensive nature of the perspective in which the matter was discussed. And, I might add in passing that the man chiefly responsible for articulating that larger perspective was Senator John F. Kennedy. I doubt whether the electoral college ever had a more eloquent defender. No one dared to suggest—and with good reason—that mathematical equality at the ballot box was the final word on the conduct of representative government. On the contrary, it was implicity understood that there is more to politics than mathematics and that presidential elections are much, much more than a simple process of adding and subtracting votes.

I was impressed also by the fact that direct election had such little support. The matter came up for a vote twice, once on a proposal by Senator Langer, which, in addition to establishing direct election, would have set up a nationwide presidential preference primary. Among those present and voting, this measure was soundly defeated, 69 to 13—March 27, 1956, volume 102, part 4, page 5637. Yet again, on an amendment by the Senator from New York, Mr. Lehman, direct election of the President was defeated overwhelmingly by a vote of 66 to 17—page 5657. The overwhelming size of these votes against direct election can be attributed, I think, to the widespread awareness of what direct election would entail. I thought it particularly interesting that one of those who voted for Senator Lehman's plan for direct election, Senator Hennings of Missouri, remarked that direct election appears to be the most democratic and therefore the fairest and best method of all. But he went on to say the following, and this is significant:

> But in coming to this conclusion *I am very conscious of the drastic and radical nature of this proposal.* It is, indeed, a long step toward pure democracy, and a long step away from those ideas of a republican form of government of limited powers, organized through a Federal union of States, which were held by those men who framed our Constitution. (pp. 5664–5665)

I submit that that is a remarkable statement, coming as it did from one of those who voted for direct election at that time. He was in favor of direct election. He thought that was the way to go. But at least he was honest enough to say—I am not sure that many of the advocates of direct election we have heard in the debate here in the last few days have been honest to admit, as Senator Hennings did—that he was "very conscious of the drastic and radical nature of this proposal" and that it is "a long step toward pure democracy, and a long step away from those ideas of a republican form of government of limited powers" with which we started out.

I might also point out at this time that these are the same reservations that many of the learned students of government in the United States have with respect to direct election today. We read them again and again—their comments, in articles, in the newspapers, almost daily.

Here we have a full and frank avowal of the very charges that were made so well, I thought, by the minority views of the Judiciary Committee in this session. Here we have, for all the world to see, a bold-face statement of what is fully and finally involved in the proposal for direct election. The merits of the proposal are not immediately in issue; Senator Hennings was certainly entitled to his opinion. As it happens, I happen to believe that he was ill advised to embrace such a scheme. But I congratulate him for his forthrightness, and for making abundantly clear that direct election is a "drastic and radical" proposal, "a long step away from * * * a republican form of government of limited powers * * *." Senator Hennings, apparently, was prepared to make such a step. But this Senator from Florida is not prepared to take such a step, and many other Senators have the same reservations. But if such a step is to be made, I would like the RECORD to demonstrate very clearly what is involved. I do not want direct election to be voted for on the ground that it is a mere housekeeping detail, or on the ground that its full implications were not brought out in debate.

Senator Hennings was not alone in seeing direct election for what it was. Senator Payne of Maine, although he did not support direct election, was equally clear sighted in his appraisal of the impact of direct election. His statement, I think, is worth quoting at length. He said:

> [The] direct election of the President and Vice President would symbolize a basic change in our theory of constitutional government. Just as the States as units were to have equal representation in one House of the legislative branch of the Federal Government, so it was intended that they should have a distinct voice in the election of the President and Vice President. Geographic and minority interests have always played an important and legitimate role in the formation of our national policy, and they do today. The President of the United States is the representative of the American people both as individual citizens and as citizens of their respective States. This dualism of the citizen's role as a member of a State community and of a national community was carefully established in the Constitution. To prevent the interest of the individual citizen as a member of the State community from being completely overridden by the majority interest of the citizens acting as individual members of the national community, the Founding Fathers provided for the Senate in the legislative branch, giving the citizens of the smaller States representation in the Federal legislature beyond their numerical importance. This has meant that the citizens of a small State such as Maine can still be heard and their interests taken into account in the councils of the Federal Government.

He goes on to say, and I invite particular attention to this:

> The intention to preserve the role of the small and thinly populated States in the executive branch . . . was embodied in the formation of the electoral college.

At this point, Mr. President, I should like to point out that if we adopt this amendment of direct election, we may well be putting ourselves in jeopardy as a legislative body, at least in the present makeup that we enjoy. I remind Senators of the very profound, important, earth-shaking decision of the U.S. Supreme Court a few years ago, the so-called one-man, one-vote rule. We know what that did within the States. What that did was to put many States, so far as their senate was concerned, in the same classification and category as their house of representatives. Many of the States were made up, so far as the senate is concerned, in a fashion a good deal like the U.S. Senate. Some Senators represented small constituencies and some represented larger constituencies. But under the one-man, one-vote rule, of course, the senate within the State legislatures was treated exactly the same as was the house of representatives in those State legislatures.

I am not contending here whether that was right or wrong, or whether the Supreme Court, in my view, rendered an opinion that was sound or unsound.

I simply say that the decision they rendered completely changed the makeup of State legislatures throughout the 50 States of this country and downgraded the senates of those State legislatures to pretty much the same status of the house of representatives. That was undoubtedly one of the most drastic and radical and fundamental decisions affecting politics and government in the United States.

Having rendered that decision and having changed the complexion of State legislatures, suppose we go to this direct election method and abolish the electoral college system in the United States. It seems to me that what we have done is to take another step forward in buttressing the one-man, one-vote decision. We have destroyed the idea of the U.S. Senate and its influence so far as national elections are concerned. We have taken away from the small States, such as Nevada, Vermont, and the other States that have only one or two Representatives, the full impact of their two Senators so far as their vote within the electoral college system is concerned in electing the President of the United States.

Having established the one-man, one-vote rule, then going to the direct election system and abolishing the status of the Senators within that system, why should not the next logical step to be made in the politics and government of the United States be to say that the Senate should also be proportioned much like the House of Representatives? What is wrong with people who want this one-man, one-vote rule carried to its extreme saying, for example, that the less-populous States, such as Nevada and Vermont, shall have one Senator and that every other State in the United States shall have Senators in proportion to the population that exists within those smaller States, and in effect here have a body pretty much like the House of Representatives. I do not think that idea is at all impossible of thinking if we go ahead with this direct election method. I might warn the Senate that if we persist in this sort of constitutional amendment, we may find ourselves putting ourselves out of business, at least as we know the Senate of today.

The electoral vote system, Mr. President, is here rightly recognized as being part and parcel of the federal system. The maintenance of the federal system, in short, requires not only the retention of State equality in the Senate, but also the retention of the State role in the presidential election process. As Senator Payne and others well knew, to defend federalism in the Senate, but to deny it in presidential elections, simply does not make sense. The principle by which federalism is defended in the Senate, is the same principle by which it is defended in the electoral college. To approve it in the one case is necessarily to approve it in the other; to deny it in the one case is necessarily to deny it in the other. Senator HRUSKA was quite to the point the other day when he said that if the federal principle were denied in the electoral college, and if direct election were to pass, the Senate might well be next to go.

We already have the principle of one man, one vote, as decided by the Supreme Court.

For better or worse, that decision precipitated profound political change in this Nation.

If this direct popular election amendment passes it will fortify and broaden, the one-man, one-vote rule. It will further weaken, the federal principle. The logical next step would be to do away with the two Senators for each State, pending a change of one Senator for the small States with proportional greater numbers to the large and populous States. The Senate would be well warned to bear this possibility in mind as they approach a vote on this pending amendment.

The case against direct election was further underscored on March 27, 1956, by the now senior Senator from Colorado, Mr. ALLOTT. His remarks are also worth quoting in full. He said:

> The principle of a national popular plebiscite, which seems to have almost no support among my colleagues, appears to be the only method of accomplishing the desirable effect of making each person's vote count on an equal basis with another's. Aside from the fact that one of the reasons this approach is unsaleable is because it would tend to decrease the importance of certain geographic areas, there is another reason why the American people have not yet indicated any significant approval of this extreme approach. This is also the reason why the junior Senator from Colorado did not support it; namely, that it would completely reject the great compromise which has served this Nation so well for these 167 years. How else could this country, with all its numerous economic, geographic, racial, social, and religious groups, have withstood the strains of the years. No one has clearly shown that a completely nationalized popular election would be an improvement over the present method which recognizes both the individual citizen and the individual State as important in a national election not only of the Congress but of the President and Vice President.
>
> . . . The ideal of making every person's vote count on an equal basis is commendable. But is it so precious as to necessitate revolutionizing our entire form of Government? Is the present method that bad?

Senator ALLOTT in 1956, I believe, put his finger on the dilemma; namely, that direct election is one of those ideas that sounds good in theory, but would be disastrous in practice. Senator ALLOTT's question is worth repeating: is the achievement of mathematically equal voting power so precious that, in order to achieve it, we must revolutionize our entire form of Government?

The 1956 debate, Mr. President, is a veritable gold mine of insight and information. It repays well the time spent reading it, and not in the least because the debate was animated by a broad constitutional perspective, by a perspective in which the presidential election system was seen as only part of a complex and intertwined constitutional and political system. It is sad to have to record, however, that in the short space of only 14 years, this larger perspective has been seriously undermined. As the minority views of the Judiciary Committee point out, the present passion for direct election is something of a new phenomenon, in that it is the product of what can only be called a fetish for the mathematical abstractions of the one-man, one-vote dogma. The 1956 debate shows no such obsession with mathematics. Representative government and democratic elections were understood to be profoundly more important than a numbers-game analysis will ever reveal. The 1956 debate makes clear that there are many other considerations at stake than the superficial attachment to mathematical equality. The maintenance of the two-party system, for example, was given primary attention, and it was understood that direct election would seriously undermine it. The now senior Senator from New Jersey (Mr. CASE) was quite explicit in stating that direct election would not be so good as the present system in maintaining the two-party structure. Nor did he reveal any superficial attachment to the simplicities of the one-man, one-vote rationale. Speaking of the necessity for consensus as overriding the narrow concern for mathematics, Senator CASE stated:

> I do not regard the fact that a candidate does not receive the largest number of votes on a single day as being the test as to the best way to elect the President of the United States.
>
> In the United States we have accomplished this consensus, not only in the case of the election of candidates, but in the case of the solution of great problems, by a system which is very difficult to explain logically, but which I think is understood by those who have to operate under it. I think the existence of a few difficulties and a few logical inconsistencies, if you will, in a system which in practice has worked so well, does not constitute sufficient ground for changing that system lightly. It seems to me that to change the system under those circumstances would be the height of folly. (March 20, 1956, p. 5152)

Senator CASE was equally level-headed in rejecting some of the more specious

claims put forward by the advocates of direct election. In response to the old chestnut that voters are effectively disfranchised by the unit rule of the electoral college, Senator CASE had this to say:

Really, Mr. President, this argument amounts to no more than saying that because a choice has to be made between two candidates, when the candidate who received one more than half of the votes is declared elected, those who voted for the losing candidate are disenfranchised. Such an argument does not make sense.

My people in New Jersey gave me a majority of only approximately 3,500. In other words, almost a majority of the voters in New Jersey did not vote for me. Yet I do not regard them as disenfranchised, and I do not think they regard themselves as disenfranchised. The same is true in this case. (P. 5153)

Mr. President, I think that is also true as far as the President is concerned. I do not think that the majority of the people who did not vote for a presidential candidate regard themselves as being disenfranchised by the winning candidate.

I think there are probably a few in the country, because their man lost, who regard the election as a great catastrophe and that all sorts of dire results will follow. I think a great many of the people accept the results of the electorate and are willing to have the winning candidate get on with the business of the country. I think that the point made by the Senator from New Jersey (Mr. CASE) in 1956 has a good deal of merit and, indeed, represents a very sensible conclusion.

But it is not only the quality of particular arguments that interests me about the 1956 debates. I am disturbed, in reading those debates, and comparing them to the arguments now being put forward on behalf of direct election, by the tremendous loss of what, for the want of a better term, I can only call commonsense. Many of the proponents of direct election back in 1956—as the statement of Senator Hennings makes clear—were quite fully aware of the radical implications of their proposal.

This stands in sharp contrast to the present day, when we are told that direct election involves no fundamental change at all. One would think that the slightest reflection would confirm the commonsense insight of Senator Hennings, to it, that a major part of the Constitution cannot be changed without having its effects felt elsewhere throughout the system. One would think that the proponents of direct election today would see that, and acknowledge it, instead of beating around the bush. Why do they not come right out with it and say it, so that the Senate will be fully apprised of what is at stake?

This point—that there is more to direct election than meets the eye—was rather dramatically brought home the other day, I thought, in an exchange between the Senator from Michigan and the Senator from Mississippi. Senator GRIFFIN had this to say:

Although the distinguished Chairman and I do not reach the same conclusions concerning the merits of the pending resolution, I must say that I share his view that it will be necessary and logical if we are to elect the President by direct popular vote, for Congress to establish uniform voter qualifications and procedures for conducting such elections. Indeed, I believe Congress would be derelict in its duty if it did not establish such uniform standards in connection with, or directly following, adoption of a constitutional amendment to elect the President by popular vote. (CONGRESSIONAL RECORD, p. 31149.)

He goes on to say what the Senator from Indiana is at great pains to deny:

Furthermore, I can agree that *the people of the several States should realize, as we consider this popular vote amendment, that uniform voter qualifications and election procedures will be a necessary and logical result. No one should be fooled on that point.* (CONGRESSIONAL RECORD, p. 31149.)

I congratulate the Senator from Michigan for his forthright declaration of the problem. I am happy to see that one of the most articulate proponents of direct election is prepared to discuss its full impact. It will be necessary, as he says, to establish uniform national standards governing everything from voter qualifications to the conduct of the balloting at the precinct level. This will include, among other things, regulations governing standards of eligibility for listing on the ballot, and the whole matter of minor party activity. But as to the nature of these new uniform national standards, we hear nary a word. All of these matters are now governed by State law, and the regulations imposed by the several States vary widely from place to place. No one, as far as I am aware, has made any concerted effort to compare the wide variance among State regulations in these matters. Senator GRIFFIN is satisfied that the differences are not so great as to prevent the establishment of a single national rule that would be equitable for all concerned. But I, for one, am not so cheerful about that prospect—not, at least, until a full and comprehensive study of State electoral regulations has been undertaken.

I agree with the Senator from Michigan that Congress would be derelict in its duty if it failed to enact such a uniform national standard if it were to enact direct popular election. But I do not see that we are at all prepared for that eventuality. I think it worthy of note that the rules and regulations governing only the matter of selecting delegates to the national conventions fill out the major part of a 261-page volume prepared by the Legislative Reference Service. Moreover, the extant regulations affecting the place of minor parties on the ballot are the subject of an extensive monograph covering nearly 100 pages. This problem has not been studied in any depth by the Senate and will not be, I fear, before a vote is taken on direct election. These are complex and knotty problems. They deeply affect the delicate balance of power between the States and the National Government. And representative of the several States ought properly to have their day before Congress takes it upon itself to legislate for the entire Nation.

So, just as a matter of side interest, in the colloquy we have had thus far in the debate these matters that have been raised about ballots and the fact that we are not at all prepared as a Nation to go ahead with this direct election at the moment until we extensively revise the ballot procedures of the several States.

Now, if ever I saw a situation where the cart has been put before the horse, this is it in Senate Joint Resolution 1.

The proponents of this measure have become so persistently motivated by this idea that we must have a direct popular election that they have completely blinded themselves to all of the side effects that this constitutional amendment would entail.

I suggest that the very complex matter of just the ballots in the various 50 States, the problem of getting those into some sort of uniformity, only serves as an illustration of the many pitfalls that this direct popular election has in store for us if the Senate of the United States acts upon this matter at this time.

I would say that even if we are going ahead with this direct election—and I am not one who favors it; I would rather stick to some modification of the plan the Founding Fathers had—these are problems, the ballots, minor parties, and all of these things would have to be explored prior to that time. And these matters should have been resolved long before we had this issue before the Senate.

If for no other reason, we are not prepared as a Senate to go ahead at this time. Neither are we prepared as a Congress to enact this constitutional amendment, to send it to the President, and then in turn to send it to the 50 States for ratification.

We need to do a whole lot more homework on Senate Joint Resolution 1 and the proposition that it entails before we go ahead at this time.

Mr. President, I yield the floor.

EXHIBIT 1

[From the Wall Street Journal, Sept. 17, 1970]

PARTY DECLINE CLOUDS ELECTION REFORM

(By Arlen J. Large)

WASHINGTON.—The proposed Constitutional amendment to scrap the Electoral College and elect Presidents by direct popular vote would shake up the nation's traditional two-party system, both supporters and opponents agree.

But as Senate debate on the amendment nears completion, there's very little agreement on whether the effect would be to strengthen that system or weaken it. On balance, however, the Senators who predict the latter result seem to have the more convincing argument.

For the debate comes at a time of increasing doubt about the future of the political party as a meaningful institution. Quite aside from the impact of the proposed amendment, the trend today already is pretty clearly away from parties as an all-important force in politics—toward the emergence of candidates who run on their personalities, not their party labels. And this trend can only complicate the task of governing, however the Constitution is changed.

AN AMENDMENT ARGUMENT

Examples of the decline in party influence are all around.

More and more voters now call themselves independents. Two sitting Democratic Senators—Harry Byrd of Virginia and Thomas Dodd of Connecticut—are running as independents this fall, hoping that personal loyalties of constituents will carry them through. Increasingly, young politicos no longer need established party organizations as a stepladder to office—not if they can afford enough television time. And in the Deep South, the race issue has so splintered state

Democratic parties as to make them almost unrecognizable to "national" party leaders in Washington.

The real questions, then, are how far this trend will go and what effect the proposed amendment would have upon the trend. In trying to answer them, the Senators are well aware that historically Constitution-writers have a poor record on predictions about national political parties.

It was the 18th Century Founding Fathers, after all, who forecast there would be no national parties. "The influence of factious leaders may kindle a flame within their particular states, but will be unable to spread a general conflagration through the other states," predicted James Madison before the new Constitution took effect. Presidential electors would, like today's suburban housewife, vote for "the best man." But after only four Presidential elections the Constitution had to be changed to accommodate what Mr. Madison called "the mischiefs of factions;" the electors were voting according to party label.

"From the very moment of their inception the major parties as we know them had as their central organizing purpose the capturing of the Presidency," assert six anti-amendment Senators—three Democrats, three Republicans—in a Judiciary Committee minority report. That only two major parties ever developed isn't just chance: "Public opinion in this great and diversified land has no inherent tendency to divide itself into two, and only two, major political groupings. The ultimate causes of two-party politics are to be found in the requirements of the Presidential election system under which parties have operated for nearly a century and a half."

To a big extent, these Senators say, this is due to the extra-Constitutional custom of awarding all of a state's electoral votes to its popular vote winner. Formerly damned by many, the custom now is seen to have an important virtue.

Says the minority report: "Because of winner-take-all, a party is under a strong inducement to extend its platform as widely as possible within each state; it must expand its base of support to carry a popular plurality." Third parties historically haven't been able to make such a broad appeal, nationwide, over a long period of time. Their single-issue causes eventually evaporate or are absorbed by the established parties.

In short, the minority report's argument runs, if you put Presidential races through the electoral vote system, you get just two parties—both tending to be centrist and ideologically mixed. Remove the electoral-vote filter and the parties weaken and proliferate, giving way to individual single-issue spokesmen who get on the ballot without big-party nominations.

Even inside the existing system, party proliferation appears to be increasing, spurred by today's super-publicized quarrels that make almost everybody an extremist on something. George Wallace threatens another run in 1972; Eugene McCarthy seems to be toying with the idea of a fourth party.

If the Judiciary Committee minority is right, however, such splintering can be expected to become just another victim of the electoral vote system's moderating dynamics. Whether with a "Southern strategy" or some other appeal, the Republican Administration may absorb Mr. Wallace's movement by stealing his voters. The Democrats—both at the state and Congressional levels—are fast moving toward the foreign policy views upheld by Sen. McCarthy in 1968, leaving behind the World War II orientation of Lyndon Johnson and his immediate predecessors. Retain the concept of state-by-state electoral votes, the Judiciary Committee minority predicts, and the absorbing process will work every time.

AN INCREASE IN INDEPENDENTS

Amendment advocates argue, however, that a popular-vote Presidential election would actually strengthen the two-party system. The winner take-all custom, they contend, is the real villain responsible for one-party rule in states; it's hard for the minority party to grow when its votes are never reflected in Presidential contests. Sen. Howard Baker of Tennessee, for example, complains his state's Republicans were ignored for years because they couldn't crack the electoral vote barrier. Democratic Sen. Birch Bayh of Indiana insists a popular-vote election would boost party morale: "It is the only plan that would guarantee to the Democratic or Republican precinct workers that they should get out and hustle the votes because the votes will count."

But these arguments just aren't very convincing. Even under the status quo, Tennessee has emerged from one-party rule and is a real battleground in contests for President on down. City political machines, the home of precinct workers that Sen. Bayh wants to cheer up, have practically disappeared. Increasingly the canvassing and get-out-the vote tasks are performed by zealous volunteers who get fired up by an issue or a personality, but have little interest in the fate of party organizations. Parties simply are less important than they used to be, and a wide-open field of candidates running for President with or without major-party nominations would almost surely hasten this trend.

The core of the dispute, then, is whether this trend as reinforced by the popular vote amendment could lead to political conditions more chaotic than a potential breakdown of the existing electoral vote system, a prospect that helped produce the pro-amendment drive in the first place.

Democratic Sen. Sam Ervin of North Carolina and others of the Judiciary Committee minority think weakening the incentive of two parties to establish broad bases of support would "radicalize" American public opinion. Hoping to capture electoral votes from as many states as they can, the two parties now try at state and national conventions to work out compromises that partially satisfy many interest groups. The amendment would require a national runoff if nobody in the field of candidates get 40% of the total popular vote the first time around. Amendment opponents believe all the laborious compromising and deal-making that now come before the election would be compressed frantically between the amendment's first election and the runoff.

"The compromises," says the minority report, "would be both hastily contrived and inherently unstable. The winning coalition, however numerous, would have difficulty governing."

A FRIGHTENING PROSPECT

One proposed alternative to a popular runoff would leave the last-ditch choice of a President to a joint session of Congress, with each of the 535 members having one vote. But if it's frightening to leave human electors as potential pawns in a deal-making contest between candidates (a possible result of the present system), it's no less frightening to give the same job to human Congressmen. As under the present system, the Presidency could go to a candidate who failed to get the most popular votes in the initial election.

This has happened only three times in the past, but the potential is still there: "If the man who wins the popular vote is denied the Presidency," Mr. Nixon said in 1968, "the man who gets the Presidency would have very great difficulty in governing."

Of course, it is also impossible to predict what turmoil the existing system could cause some day in light of declining two-party influence. A maverick Wallace-type candidate plus a maverick McCarthy-type entrant could well emerge from an enflamed nation in some future year, denying anyone—major party candidates included—the majority of the electoral vote required under existing rules. The possible dangers of such a situation are far from theoretical; George Wallace really was planning ways to wring concessions on race policy from Richard Nixon if the Electoral College hadn't produced a Republican majority in 1968.

But this is not a reason to ignore the worry of Sen. Ervin and the other opponents of the popular vote amendment that the amendment's likely erosion of two-party dominance would make governing more difficult. The larger point is that political parties are fading anyway, whether the Constitution is changed or not. As voters get more independent-minded, just about everybody predicts, governing is going to become more difficult no matter how the President is picked.

---

EXHIBIT 2

[From the Washington Post, Sept. 23, 1970]

A WELCOME SHOWDOWN IN THE SENATE

A threat to tie up the Senate is rarely viewed sympathetically in this space especially at a time when that body has an immense backlog of unfinished business and is rushing to adjourn before election day. But in the case of Senator Bayh, who is seeking a vote on his constitutional amendment for direct election of the President, there is no realistic alternative. He is merely saying that if there is to be a filibuster, let it be an honest one, in which the Senate, and the country, is obliged to accept the full consequences; only that way can the issue be put to a fair test.

What the Senator from Indiana is arguing is that if the Senate is unwilling to vote on electoral reform, which is the official business before it, he will object to the transaction of other business and to committee meetings under the unanimous consent rule. That is only poetic justice. Until now the opponents of electoral reform have been using filibuster tactics to kill it without really carrying the burden of a filibuster (around the clock speeches on the floor) and without sacrificing other legislation in which they are interested.

On Monday Senator Bayh pleaded in vain for agreement on a time to vote on amendments to his resolution. Senator Ervin even objected to voting on amendments offered by himself. Under the archaic rules of the Senate, such obstruction can be fought only by further obstruction. If the net result is complete chaos, that is the price the country has to pay for allowing the Senate to operate as if it were still in the nineteenth century.

Nothing is to be gained by temporizing with this kind of fiasco in our legislative system. The blunt fact is that a minority in the Senate is using a crude device to sabotage a reform that has been approved by the House and is favored by a majority in the Senate and an immense majority in the country. It would be a disgrace to the Senate to allow this undemocratic gesture to succeed. Sponsors of the amendment now feel that they have an excellent chance of passing the Bayh resolution by the required two-thirds vote if the Senate is willing to face the issue. So the question is whether democracy or obstructionism is to prevail.

It is important to note that Senator Bayh and his supporters do not intend to filibuster. Rather, they are demanding that the opposition stick to the issue officially before the Senate until a vote on its merits has been taken. That is the essence of reasonableness and of sound procedure. If the opponents wish further debate, they will have the opportunity, at least until next Tuesday when Majority Leader Mansfield plans to seek a vote on another cloture petition. But the Senate cannot permit them to defeat this vital reform by mere obstruction without shaking the foundations of our system.

The PRESIDING OFFICER. The Senator from Wyoming is recognized.

Mr. HANSEN. Mr. President, I wish to bring to the attention of Senators an

editorial from the Wyoming State Tribune in Cheyenne, Wyo. Editor James Flichum, whose views on electoral reform I happen to share, has done an excellent job of pointing out to his readers just what will be lost and what harm will result if proponents of the amendment requiring direct popular election of the President and Vice President are able to achieve approval by Congress and by the required number of State legislatures.

Wyoming shares with other sparsely populated States a particularly critical concern with the outcome of this debate. The State stands to lose its traditional role as a State in the national election process, and the Nation stands to lose the merits and the benefits of a time-honored and effective electoral system deficiencies.

Mr. President, for the benefit of Senators I wish to read the editorial entitled "Shall the States Commit Suicide?" written by Mr. Flichum.

SHALL THE STATES COMMIT SUICIDE?

The Senate now is debating one of the most momentous issues of our times, a proposed constitutional amendment that would provide for direct, popular election of the President and Vice President, instead of through the present electoral college system in which each state casts a prescribed number of votes based on the outcome of an election within its precincts.

The proposed article, as presently drawn in Senate Joint Resolution No. 1, reads as follows:

"Section 1. The people of the several states and the district constituting the seat of government of the United States shall elect the President and Vice President. Each elector shall cast a single vote for two persons who shall have consented to the joining of their names as candidates for the offices of President and Vice President. No candidate shall consent to the jointer of his name with that of more than one other person.

"Section 2. The electors of President and Vice President in each state shall have the qualifications requisite for electors of the most numerous branch of the state legislature, except that for electors of President and Vice President, the legislature of any state may prescribe less restrictive residence qualifications and for electors of President and Vice President may establish uniform residence qualifications.

"Section 3. The pair of persons having the greatest number of votes for President and Vice President shall be elected, if such number be at least 40 per centum of the whole number of votes cast for such offices. If no pair of persons has such number, a runoff election shall be held in which the choice of President and Vice President shall be made from the two pairs of persons who received the highest number of votes.

"Section 4. The times, places, and manner of holding such elections and entitlement to inclusion on the ballot shall be prescribed in each state by the legislature thereof; but the Congress may at any time by law make or alter such regulations. The days for such elections shall be determined by Congress and shall be uniform throughout the United States. The Congress shall prescribe by law the time, place and manner in which the results of such elections shall be ascertained and declared.

"Section 5. The Congress may by law provide for the case of the death, inability, or withdrawal of any candidate for President or Vice President before a President or Vice President have been elected, and for the case of the death of both President-elect and Vice President-elect.

"Section 6. The Congress shall have power to enforce this article by appropriate legislation.

"Section 7. This article shall take effect one year after the 15th day of April following ratification."

The problems and perils this proposal poses for the federal system in this country are far-reaching and filled with grave implications. In the foreword to their report, the minority members of the judiciary committee, Sens. James Eastland, D., Miss.; John McClellan, D., Ark.; Sam J. Ervin Jr., D., N.C.; Roman Hruska, R., Neb.; Hiram Fong, R., Hawaii; and Strom Thurmond, R., S.C.; quote Charles Black, professor of jurisprudence at the Yale Law School: "I think a case can be made for the proposition that direct election, if it passes, will be the most deeply radical amendment which has ever entered the Constitution of the United States."

In their own introduction to their report, the minority senators on the judiciary committee speak as follows:

"No more important business has come before the Senate in recent years than the consideration of our system of presidential election . . . We believe that the judiciary committee, in recommending the destruction of the electoral-vote system in favor of direct election, has embraced a scheme that will adversely affect the entire constitutional and political structure of the United States.

"We realize that the present systems has its defects. We believe, however, that remedies are available short of its wholesale destruction . . .

"Direct election of the President, we believe, would—

"Destroy the two-party system and encourage the formation of a host of splinter parties;

"Undermine the federal system by removing the states as states from the electoral process;

"Remove an indispensable institutional support for the separation of powers;

"Radicalize public opinion and endanger the rights of all minorities by removing incentives to compromise;

"Create an irresistible temptation to electoral fraud;

"Lead to interminable recounts and challenges;

"Necessitate national direction and control of every aspect of the electoral process."

The proposed constitutional amendment offers a peril to the time-honored place of the states in the federal system of government, as the senators point out in their objections cited above; it is a peril that is especially acute for small states such as Wyoming, and even those that are of medium size. It places an undue emphasis on population alone which is a false premise in relationship to the federal system, as we have consistently pointed out in the one-man one-vote theory enunciated by the Supreme Court.

The falsity of this premise can best be illustrated by the fact that under the Constitution, the adoption of this proposed amendment must be carried out by the state legislatures themselves.

Three-fourths of the states must ratify the amendment for it to become a part of the Constitution.

Mr. President, there is obviously a misprint in the editorial at this point. What is printed as "two-thirds" should be "three-fourths."

I will continue to read the editorial:

Will this process of amending the Constitution also be the next phase of our federal system to be dropped in the drive to negate the political voice of the individual states in favor or total national direct election? It would seem so, in order to be consistent.

As the minority senators point out, the present electoral college has its faults; but this is no reason to rush to adopt a means of election that may undermine the bastions of the federal government of the United States which still means a federal system even though the common connotation is centralized government.

Hopefully this amendment shall not pass the Senate; but if it does, then more hopefully it shall fail of ratification by the states. For these latter to approve such a proposal would be to seal the doom of federal government in this nation through a balanced interplay of states with the central government in Washington.

Mr. President, since this debate began several weeks ago, I have been deeply interested in the events which have taken place in this Chamber. I have followed the debate on Senate Joint Resolution 1, which provides for the direct election of the President and Vice President of the United States, very closely. I can think of no subject which has come to the floor of the Senate since I have been a Member of this body which I consider more important or which could have greater impact on our Nation, our tradition, our institutions, and our way of life.

It is impossible for me to express the high regard I have for my colleagues who have engaged in this debate. I have great respect for the Senators who have argued both for and against the constitutional amendment which is before us today. And I have tried to learn from the colloquys which have taken place over the last week. Indeed, this subject has been of prime interest to most of us over the past 2 years, throughout the 91st Congress. The outstanding work done by the Judiciary Committee is most appreciated and has been of tremendous help to those of us who have sought a greater knowledge of this complicated subject.

The thorough preparation of the junior Senator from Indiana and both of the Senators from Nebraska who have led this debate has given all of us a firm statement of the case on which to analyze the amendment before us.

Mr. President, revamping of the process for electing the President of the United States has long been a subject of debate, and many proposals have been made over the years. However, this subject became of widespread interest during and after the election of 1968. The serious consideration which is now being given to revamping the system which has served us so long must result from the strong third-party bid which occurred in 1968. For this appears to be the event which sets the 1968 election apart from other elections of recent years.

Not since 1912 had there been such a strong third-party bid for the Presidency. The third-party bid in that year—1912—received over twice as much support as the third-party bid in 1968 and more support than did one of the major parties of 1912. Since that time, we have experienced closer elections than 1968; we have experienced many elections in which the winner has received a plurality rather than an absolute majority; we have experienced many third-party candidates.

However, it must be pointed out, in all fairness, that the present electoral system has worked. It has always picked a President to govern these United States. It has always picked a President who had enough broad public support that he was able to govern efficiently throughout his term. It has always picked a President whose support was broad enough to govern a Nation widely dispersed geographically and of varying regional interests. It has provided stability in the face of charges of fraud. The one President that this system did pick who did not have the broad public support to govern the entire Nation effectively for 4 years was Abraham Lincoln; and the Civil War resulted. But Abraham Lincoln did receive a plurality of the popular vote. That plurality, however, was only 39.79 percent of the popular vote. Therefore, although the present electoral system made Lincoln President of the United States, the system proposed by Senate Joint Resolution 1 would have called for a runoff between Lincoln and Douglas. Perhaps Douglas would have been elected in the runoff and the Civil War might have been avoided. It is interesting to ponder whether this Nation might have been benefited or perhaps been rendered injury by such an occurrence. It is interesting to wonder where we would be today if such a thing had happened. I admit that all of this is conjecture. But I find it as relevant to discuss what might have been under the proposed system in 1860 as it is to discuss what might happen under the present electoral college system in the future. In fact, it is probably more relevant to discuss the past because we do have an approximate idea of the direct popular vote in past elections and the events surrounding those elections. Applications of the present or proposed electoral systems on the future of our country are total guesswork, of course.

I have been impressed with the statistics and other information which the distinguished junior Senator from Indiana has provided to support his arguments for changing the electoral system. It shows that he has done his homework. I know that the Senator can tell me how many votes, if changed, would have changed the results of past elections and what a small percentage that number of votes is to the total number of votes cast in the election. I know that he can tell me the minimum number of states a man must win in order to be elected President of the United States under the present system. These events did not happen in the past; but I assume the Senator finds them relevant because he fears they will happen in the future.

I share the Senator's concern about the system in the future. I want to eliminate as much risk as possible that future elections under the present system might go wrong. The "faithless elector" is a great example of the need for change. But that problem which I believe almost all agree should be corrected, can be corrected, simply without revamping the entire electoral system. In revamping the entire system we create the opportunity of a more probable breakdown of the system. We must be careful not to create greater risk in an attempt to eliminate all risk.

While the Senator from Indiana has given us some very interesting statistics on what might have happened in the past, and has challenged us to meet the problems which would be created if they occurred in the future, I must note that the Senator's statistics are most precise. To change the outcome of the 1968 election by changing fewer than 42,000 votes, one would have to change all of the votes in just the right States. While this is easy to do on paper, it is hard to apply in reality. While we can point to a few States which, if won, could make a man President even though he lost all of the other States, I know of no politician with the confidence to attempt such a strategy. In reality, interests in the States are varied enough that the interest of a great many more States and more people are actually reflected.

While it is a challenge to consider what might happen if a very precise set of facts did occur, it is also of great concern to consider what might happen if the proposed revamping of the present system of electing the President of the United States is adopted.

I was very interested in the discussion on the floor the other day about the runoff election which is provided in Senate Joint Resolution 1. The question was raised about the difficulties which would be created by the runoff. Concern was expressed over the length of time which would be required to determine the runoff candidates and prepare for and hold the runoff election. It may have appeared that a runoff was not traditional in American politics. I commend the distinguished Senator from Indiana for his response to these questions. He challenged us to have the courage to face change. He has provided a list of 12 States which hold runoff elections, at least in primary elections. We think of France as a major power which chooses its political leader by means of a runoff election, if necessary.

Some States have chosen to use runoff elections. But a State is only one of 50 governmental units which make up the United States. The much larger scale also make the procedures more complicated. A State runs its own elections and certifies its own votes. The United States runs elections through the States and the States certify the results to the Congress. The Senator from Nebraska raised some practical questions about holding a runoff. What procedure would be used? What length of time would be needed between the first election and the runoff? I challenge the Senate to face up to these questions now. If we must change the entire system rather than one or two glaring problems, let us decide now how we will change the system. Let us not postpone the hard decisions. Do we intend to have the Federal Government supervise elections? Will the votes be tabulated by Federal employees and sent to Washington to be added together? Will all certification of elections be in Washington? Is that what must be in order to compile the results of an election quick enough to provide for a runoff within a reasonable period of time?

Would a third-party candidate like George Wallace have to collect signatures in every State to get on the ballot throughout the Nation, or could he collect 500,000 signatures in Alabama, bring them to Washington, and be placed on the ballot throughout the United States?

The fact that I do not have answers to these questions is what disturbs me about adopting Senate Joint Resolution 1. It may be that someone has an answer. But we should have the answer before we are asked to make a judgment on changing the entire electoral system which has been used for almost 200 years. I do know what happens with the present electoral system. I do know that the system has some difficulties and problems could be created under certain precise sets of circumstances. But the questions regarding procedure which concern me have been answered by the present system. I can look at the system, weigh the probabilities that a problem will arise, and take action accordingly. Until the proponents of the proposed electoral system answer these questions, it is impossible to weigh the probability of a crisis resulting from an election. Until it is possible to make this judgment, I cannot consider supporting legislation which might well revamp the entire Federal system, as well as the procedure for choosing the President of the United States.

We can look to France as a world power which provides for a runoff election in choosing its political leader. But I can think of no other major power using the runoff system. France has used its system for 12 years. The system there has worked up to this time. But 12 years is hardly sufficient time to make a determination that the system does not have built-in problems of its own. While the United States has used the present system for choosing a man to govern a much larger country than France, France has experienced five Republics and numerous monarchies. For the United States to scrap its method of choosing a political leader and say the new system will work because it has worked in France for 12 years might be equated with Great Britain adopting our present system in 1800 after it had worked well for the United States for 12 years. This is hardly the course for a great power to follow. Indeed, to this day, Great Britain has not found it necessary to adopt the system used in the United States or France.

In this day and age, there is nothing that is more important than a great world power being able to accomplish an orderly transition of power within itself. This ability is essential to the peace and stability of the entire world as well as the peace and stability of the Nation itself. It is important not to have gaps of power. We need to know who the leader is. We need to have a system of election which insures that the man chosen as President is recognized by the people and the Government as the legitimate holder of the powers of the Chief Executive.

The electoral college we use today has been criticized because of the possibility that the election may be thrown into the

House of Representatives and delay, and doubt could be created in choosing a President. We must recognize that this could happen. We must also recognize that it has not happened since 1824. We must remember that there are many alternatives to sending an election to the House of Representatives. And then, we must turn to the matter at hand and look into results which would or might occur if we adopt the alternative provided by Senate Joint Resolution 1.

While the electoral college system we now have might occasionally throw an election into the House of Representatives, although that is even doubtful because such a thing has not occurred since 1824, the alternative we consider today raises the prospect of most elections being bogged down in charges of fraud and demands for recounts. Of the two sets of circumstances, it appears to me that the present system by far will be most able to guarantee the orderly transition of power between Presidents.

Let us look at what might have happened in 1960 when President Kennedy received .16 percent more of the popular vote than did presidential candidate Nixon if the procedures of Senate Joint Resolution 1 applied at that time. There was talk of vote fraud in Illinois. But the possibility of fraud in that State was not permitted to contaminate the entire election because of the electoral college system. Fraud in one State does not affect the vote in another State. However, under the proposed system, such fraud would contaminate the entire country and affect the vote in every State. Because the election in 1960 was so close, and for that matter so was the election in 1968, the orderly transition of power may have been severely hampered or indefinitely postponed because of charges of fraud, if we had operated under the direct election proposal. Or, possibly a special electoral commission would have been appointed—as was done in 1876 in the Hayes-Tilden election when there were charges of fraud. But some might charge that the commission was "packed" just as they did in 1876 and 100 years from now someone might try to revamp the direct election procedure pointing to the election in which fraud played a major role just as the Senator from Indiana points to the election of 1876 as a reason for revamping the electoral college system.

Because I believe that the question of the opportunity for fraud is so important when considering the adoption of the direct election plan, I wish to read to my colleagues on this subject from the minority views which are part of the Senate report on Senate Joint Resolution 1:

DIRECT ELECTION WOULD BE AN INVITATION TO FRAUD

One of the most calamitous and probable consequences of direct popular election will be the increased incidence of election fraud. At present, whenever and wherever fraud occurs, its impact is limited to determining the winner of a State's electoral vote. The incentive to steal votes is now restricted to close contests in States which have a sufficiently large electoral vote to alter the final result. Thus, fraud can be profitable only in a few States, and is seldom capable of affecting the national outcome.

In his testimony during the Judiciary Committee hearings, Mr. Theodore White described this limitation on the impact of fraud. He said:

"Right now what you have in the country is a system of self-sealing containers. Again, I speak the language of the press. If the crooks in Illinois, if the crooks in Cook County are going to steal votes, each State has built up some sort of antibody system, so that it seals the theft, the stealing, the rigging of elections. There are certain States like Minnesota, or Connecticut, California, Oregon, where I think the votes are counted with scrupulous honesty. But if the margin is going to be as thin as they were in 1960 and 1968, I can see the majority of honest States crumbling just like that."

Under direct election, a premium would be placed on stealing every vote in every precinct in every State. There would be no mechanism to prevent voting fraud from having a direct impact on the choice of the President. As votes are tabulated and reported in the Eastern States, for example, great pressure will develop in Western States to get every possible vote—even for a candidate who has no chance of winning—in order to offset early election returns from the East.

Mr. White cautioned:

"There is an almost unprecedented chaos that comes in the system where the change of one or two votes per precinct can switch the national election of the United States.

"Now we have 180,000 voting boxes in the precincts in the United States, and if by 10 or 11 o'clock it is going to be as close as 1960 and 1968, I hesitate to think of what is going to happen in the Western precinct boxes and some of the Southern precinct boxes."

In the case of a close popular election, such as in 1960 and in 1968, the determination of the presidential candidates and their ardent supporters to win will place great temptations before every election official in the country. Those who control the polling places, whether they are State or Federal officials, may succumb to the pressure to obtain the largest popular vote margin for their favorite candidate.

Recalling the partisan nature of the deliberations of the National Election Commission established to resolve the Hayes-Tilden controversy of 1876, Professor Bickel told the Judiciary Committee:

"* * * it seems to me inevitable if you go to the popular election system to set up, not only on an ad hoc basis, but on a permanent basis, national vote-counting, and I for one . . . am not at all that happy about central vote-counting. Honest men, when centrally in charge of a computer in Washington may be even more tempted than honest men in this or that county in the western part of the country or in the eastern part of the country."

Mr. White dramatically described what might occur on election night under direct elections:

"I wonder whether you can imagine what the scenario of election night might be with the entire Nation hanging awake for the returns if we had another election as close as 1960 or 1968 with no one knowing what was happening.

"You all remember how in 1960 when the Connecticut vote was coming in strong for John F. Kennedy. Eisenhower took to the air to plead with the people of California to get out there and vote. Connecticut closes 3 hours earlier than California; I think about 8 hours earlier than Hawaii. Once those eastern votes start piling up from the big cities one way or another, the pressure, the urge to—and if it is a close election—you can't steal a real election, a real majority, but if it is a close election, that election night would be an invitation to have militia out guarding the ballot boxes the next morning."

The likelihood of an increase in minor party presidential candidacies and the probability, therefore, that a runoff will become a common occurrence under direct election, make even more likely the prospect of election fraud. The encouragement which direct popular election would give to fraud could very well turn American presidential elections into nightmares of charges and countercharges, of chaos and crisis. During the days following a presidential election, the determination of a winner could become the regular and expected focus of political turmoil.

When we abandon the system we now have and adopt a direct election system, we expose the electoral process to demands for nationwide recounts for the first time. Under our present system for electing a President, even when that election is very close, there is an incentive to ask for a recount only in the particular State where a very narrow margin separates the candidates. But, by destroying the "system of self-sealing containers," as Theodore White so vividly described the States under the electoral college system, a direct election would encourage the recount of every single vote cast in the election. This no doubt would provide even greater opportunity for voter fraud.

The minority views of the Senate report on Senate Joint Resolution 1 are particularly descriptive of what we might expect under the direct election system, and I would like to again read from those views:

DIRECT ELECTION WOULD ENCOURAGE CHALLENGES AND RECOUNTS

One of the most serious threats to our national stability under direct election would be the probability of contested elections. A contested election under any system is certainly dangerous. But as Ernest Brown, Langdell Professor of Law at Harvard, testified, under direct election "the mere fact of contest is a disaster."

Under the present system, the popular vote in most States most of the time is insulated against challenge and recount. Only extremely close and bitter contests in certain strategic States would ever tempt one of the major parties to call for a recount. Under direct election, however, the popular vote in every State would be open to the perpetual threat of challenge. Whether a candidate wins or loses a State by a large or small margin of votes, recounted votes in that State under direct election could still affect the national result. As Professor Brown explained:

"Close elections lead to contest. And with direct election, the contest would be nationwide. Every ballot box, every voting machine, would be subject to contest."

He went on to illustrate how nationally contested elections would develop under direct election:

"If one candidate contests a certain area, his opponent, to protect himself, warns of a contest where he thinks something might have been adverse to him. And in a little while the whole electorate is involved."

The uncertainties surrounding a recount to determine the outcome of a close presidential election could paralyze our Nation. Even the mechanical aspects of a sizable recount would be dangerous enough, but if legal questions concerning voter qualifica-

tions and other matters were to be raised, as they surely would be, the period of the recount would be nothing short of chaotic.

To Theodore H. White, the spectre of the recount under direct election is a "nightmare." He put it this way:

"I do not think direct election would have worked. It would have failed us twice in the last election. In the 1960 election—I have never been able to get the full story—Mr. Nixon spent several hours wondering whether he should challenge or not, and they began to examine the laws of the various States. You could not have a recount in Missouri until some time in early spring. The laws as to recounts were different everywhere. It is a nightmare to me that we should live through 1960 and 1968 under the proposed amendment."

Prof. Charles Black explained to the committee how he felt the professional politicians would call for recounts under direct election in close contests:

"It would become the duty of the manager of anybody's campaign that might be advantaged by a recount to search very carefully in good faith for fraud, irregularity, and the sort of technical objections to voting that you refer to, so that even without those willful obstruction elements, I should think that in a close election, it would be almost inevitable that the vote everywhere would be scrutinized and contested, and every possible irregularity sought after, whereas, under the present system, it usually does not matter and people just do not bother with it."

Mr. Richard Goodwin outlined to the committee his thoughts on the recount problem under direct election:

"Eliminating the electoral college can, as many have pointed out, transform the frequent and inevitable charges of election irregularity and fraud into demands for a nationwide recount. Since voting is now by State those charges are made with passion and they are allowed to lapse because even a change in a particular State would rarely affect the national electorate result. However, if only the popular vote counted, then a recount in a few States could change the result. After all, two of our last three Presidents had popular vote margins smaller than 5 percent of the vote in the State of Illinois alone. In such a situation there would be incentive to pursue reasonable charges of irregularity and fraud. Counter charges would be inevitable. And if there was any substance to the allegations a nationwide recount would not be merely likely but inevitable. Such a protest could continue for months, in election commissions and in the courts, while the country waited to find out who had been elected."

There can be no doubt that the present system protects the Nation from the paralysis of recounts. Professor Brown characterized the protection this way:

"* * * the present system insulates the States. When the vote is counted by the States, those lines insulate the area of contest and keep it local, and they insulate the significance of the contest."

Professor Black also testified at length on the protections which the present system offers against the possibility of recounts and contests. He said:

"We have now a compartmentalization of the recount problem, like the compartmentalization of a ship. If it springs a leak in one part, that part is sealed off from the others. The recount problem is an infrequent incident, because very often the State in which fraud is charged or error is charged will be one which, on inspection of the electoral totals, does not matter anyway."

It is clear that recounts will be a disastrous problem for the United States should direct election of the President become law. Too many thoughtful experts have mentioned the recount problem for it to be only the idle speculation of those who would oppose direct election for political reasons. We believe the political stability of this Nation is the issue at stake; the Senate, before voting on the direct election proposal, should try to imagine this Nation, gripped by controversy, having to undergo a national recount every time there is a close election.

Mr. President, we must ask ourselves if we wish to exchange a system which has served us well for almost 200 years but which could, under very extreme circumstances, fail us in the future for a direct election system, which raises the specter of elections for President constantly plagued with charges of fraud resulting in the selection of one man over another or the demands for recounts of the entire Nation.

## MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Leonard, one of his secretaries.

## MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Berry, one of its reading clerks, announced that the House had passed, without amendment, the following joint resolutions of the Senate:

S.J. Res. 218. Joint resolution providing for the designation of a "Day of Bread" and "Harvest Festival Week"; and

S.J. Res. 228. Joint resolution to authorize the President to designate the period beginning October 5, 1970, and ending Otcober 9, 1970, as "National PTA Week."

The message also announced that the House had agreed to the amendments of the Senate to the joint resolution (H.J. Res. 1178) authorizing the President to proclaim the month of May 1970 as "Project Concern Month."

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## SOME ADVICE TO YOUTH

Mr. MANSFIELD. Mr. President, I have read with interest a letter to the editor of the New York Times from K. Ross Toole, a professor of history at the University of Montana, on the faculty of which, incidentally, I still happen to be a member.

While I may not agree with all the points in the letter, I do think a couple are worth pondering. One is that continued violence from the left in the country could spawn a repressive wave from the center and right. The other deals with the enormous energy potential of American youth working within the existing political system.

I ask unanimous consent to have the letter printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

LETTER TO A STUDENT

(By K. Ross Toole)

MISSOULA, MONT.

DEAR WAITING STUDENT: If you haven't discovered it yet, now is the time. Upon what meat does the violent, rockthrowing, building-burning campus militant feed? On yours, Sir, your very own flesh. You, the standers-by; the doubters concerning the question of whether the American system can work.

It is very late and there are some things you should know—and you should know them whether you like them or not.

You are standing by basically because you say you are frustrated; the channels are plugged; you cannot make your voices heard. You are idealistic and you love your country, but maybe the violent ones are right. Maybe you will join because the only course left to you, you say, may be violence.

It so happens that you are wrong, dead wrong.

Across America there is a growing wrath about college violence. Not anger; wrath. Call it middle America, call it "those people out there," call it the "silent majority"—call it what you will, but every act of violence by the left on any campus in America feeds the fires on the right. And the power's there on the right; the power will *force* legislatures and Boards or Regents to devise iron-clad rules of conduct for students and faculty; a suppression which will put the 1920's to shame. It will destroy academic freedom and it will destroy your own opportunity to get an education.

I am sick to death of your drumbeat, overblown rhetoric, the monotonous litany, "We cannot make our voices heard. No one will listen to us." The violent left is heard. But you are correct in thinking that very few people listen. That is because the violent ones have nothing to say.

So the channels are plugged? You have no way to go? The wires are cut? You are powerless? Here again, the bull horn rhetoric.

The channels to change in America are not plugged. You simply do not know how to use them. I, for one, am sick of the fact that you haven't done your homework or tried very hard.

Just as a simple example: There are 31,000,000 voters in America under thirty. As former Chief Justice Warren put it, "Youth can lead a crusade anytime it wants to." If the 18-year-old vote stands the test of constitutionality, 11,000,000 more youths will be added to the rolls. That is 41,000,000 out of 120,000,000 registered voters.

Consider Eugene McCarthy and his supporting youth: It was largely the power of youth that forced an incumbent President, in effect, to resign. And what then? Did you go on working? Did you apply yourselves to the hard pragmatism of political power? Indeed not. You slunk off because you had been defeated.

You have no power? Tell me, how many of you went to Woodstock? Nearly 460,000. What did you do there? What you really did was indulge yourselves, *en masse*. What if, instead of an orgy of self-indulgence, you had appeared 400,000 strong in a slum with scrub brushes, and each with a bottle of one-a-day vitamins?

What if you had joined one fawn-eyed man named Cesar Chavez, picked the grapes and given the proceeds to his union? What if you gathered to help the migrant workers in Florida?

And if the giant citrus companies had refused to let you work, could they stand there naked in the light of your effort and in the bright eye of television? I think not. Why Woodstock and not Watts?

How about facing up to the fact that what stands athwart man's chances for a better life is not technology, machines and the military-industrial complex—it is man himself who stands there. It is you.

Get the facts and forgo the rhetoric. Stop confusing bloviation with the truth. And, remember, the building you burn will be your own.

## TREATY OF COOPERATION BETWEEN THE UNITED STATES AND THE UNITED MEXICAN STATES, AND CONVENTION WITH NICARAGUA—REMOVAL OF INJUNCTION OF SECRECY

Mr. MANSFIELD. Mr. President, as in executive session, I ask unanimous consent that the injunction of secrecy be removed from Executive K, 91st Congress, second session, the Treaty of Cooperation Between the United States of America and the United Mexican States Providing for the Recovery and Return of Stolen Archeological, Historical, and Cultural Properties; and Executive L, 91st Congress, second session, a Convention of July 14, 1970, with Nicaragua terminating the Bryan-Chamorro Treaty of 1914; transmitted to the Senate today by the President of the United States, and that the treaty and convention, together with the President's messages, be referred to the Committee on Foreign Relations and ordered to be printed, and that the President's messages be printed in the RECORD.

The PRESIDING OFFICER (Mr. SCHWEIKER). Without objection, it is so ordered.

The messages from the President are as follows:

*To the Senate of the United States:*

I am pleased to transmit to the Senate, for your advice and consent to ratification, the Treaty of Cooperation between the United States and Mexico providing for the recovery and return of stolen archaeological, historical and cultural properties, signed at Mexico City on July 17, 1970.

In recent years the despoilation of archaeological sites in Mexico and thefts of art objects from churches and collections has reached serious proportions. The illicit export of national art treasures to art markets here and in Europe has become a matter of serious concern to the Government of Mexico. In 1967, when President Diaz Ordaz of Mexico visited the United States, it was agreed to explore possible methods of controlling the authorized movement between the United States and Mexico of articles of archaeological significance and historical value.

The Treaty which has now been signed would provide for cooperation in law enforcement measures aimed at halting the depredation of historic sites and facilitating the recovery of stolen cultural properties. It would commit the United States and Mexico to employ the legal means at their disposal to recover and return to the country of ownership historical, cultural and archaeological properties of outstanding importance to their national patrimony which have been stolen and removed from one country to the other. In addition, the two governments would establish a framework to strengthen communications between scientists and scholars in the two countries and to encourage archaeological research by scholars of both countries. The Treaty further contemplates the circulation and exhibit in each country of archaeological and historical properties from the other and a legitimate commerce in art objects.

The Treaty with Mexico should provide a strong deterrent to the illegal export of stolen cultural properties as well as promote mutual understanding and appreciation of the artistic and cultural heritage of our two countries.

I recommend that the Senate give early and favorable consideration to this law enforcement treaty.

RICHARD NIXON.

THE WHITE HOUSE, *September 23, 1970.*

*To the Senate of the United States:*

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith the convention signed at Managua on July 14, 1970, between the United States of America and the Republic of Nicaragua for the termination of the convention respecting a Nicaraguan canal route signed at Washington on August 5, 1914.

For the information of the Senate, I transmit also the report of the Secretary of State with respect to the recently signed convention.

Agreement to terminate the 1914 convention, popularly known as the Bryan-Chamorro Treaty, which entered into force on June 22, 1916, was reached after the two Governments had decided, following extensive consultations, that in light of changed circumstances and present-day needs it was time to reexamine the 54-year-old convention. The Government of Nicaragua wanted to proceed with plans for developing the San Juan River Basin, the prospective site for an interoceanic canal through Nicaragua. For its part, the United States Government, which had not exercised any of its rights under the 1914 convention, had concluded it was unlikely to do so in the future, particularly in view of the relatively high cost of constructing a canal on the Nicaragua route.

Termination of the 1914 convention is a positive, effective, and essential step in continunig the excellent relations that have existed between the two countries.

It is provided in the new convention that, upon its entry into force, the 1914 convention shall terminate, with the consequence that all the rights and options accorded by the 1914 convention to the United States Government shall cease to have effect. Such rights and options include "the exclusive proprietary rights" in regard to the construction, operation and maintenance of a canal across Nicaraguan territory; leases to Great Corn Island and Little Corn Island; and the option to establish and maintain a United States naval base on Nicaraguan territory on the shores of the Gulf of Fonseca. The United States has, as previously noted, never exercised any of the rights or options granted by the 1914 convention.

I recommend that the Senate give early and favorably consideration to the convention terminating the Bryan-Chamorro Treaty.

RICHARD NIXON.

THE WHITE HOUSE, *September 23, 1970.*

## ORDER OF BUSINESS

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## HOUSING AND URBAN DEVELOPMENT ACT OF 1970

Mr. MANSFIELD. Mr. President, I am quite sure I make this statement with the approval of the distinguished Senator from Indiana (Mr. BAYH) in view of his earlier remarks relative to business today.

I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 1234, S. 4368.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows: A bill (S. 4368) to extend and amend laws relating to housing and urban development, and for other purposes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana?

Mr. GRAVEL. Mr. President, reserving the right to object—I feel I can make this point on behalf of the leaders and other Senators—if a Senator wants to continue the debate on Senate Joint Resolution 1, could that Senator step forward now and continue to discuss the issue?

Mr. MANSFIELD. If he wants to. But this procedure has been cleared, as I recall, with the Senator from Indiana, and we have been leaning over backward to work it out.

Mr. BYRD of West Virginia. Mr. President, reserving the right to object—and the majority leader knows that I am not about to object—does he mean that Senate Joint Resolution 1 will be put aside and remain in that temporary status until tomorrow?

Mr. MANSFIELD. The Senator is correct.

Mr. JAVITS. Mr. President, will the Senator yield? I do not reserve the right to object. I agree with the Senator. Can the Senator give us some idea what would happen if we were not to finish this measure tonight?

Mr. MANSFIELD. We will make every effort to finish it tonight, if it is not an all-night session.

Mr. JAVITS. And with Senators being present so that we can have a quorum to vote?

Mr. MANSFIELD. Yes, indeed; always.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana? The Chair hears none, and it is so ordered.

The Senate proceeded to consider the bill.

Mr. CURTIS. Mr. President, are we operating under limited time?

The PRESIDING OFFICER. There is no controlled time.

### PRIVILEGE OF THE FLOOR

Mr. SPARKMAN. Mr. President, I ask unanimous consent that additional staff members of the Committee on Banking and Currency be accorded the privilege of the floor during the consideration of the pending bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPARKMAN. Mr. President, the committee bill, S. 4368, is essentially a bill to extend and fund existing Federal housing programs authorized by previous acts of Congress. The committee is recommending a 3-year extension of programs which would otherwise expire this fiscal year. However, only a 1-year provision was agreed to on funding authorizations. The principal programs covered are the Federal Housing Administration programs, urban renewal, model cities, and public housing.

In addition to extending the programs,

the committee is recommending a number of amendments to existing programs to make them more workable and more effective in carrying out the intent of Congress.

Although no new programs are being recommended by the committee, significant changes are being proposed in four existing programs—public housing, urban property insurance, new community, and mass transit programs.

In title II of the bill several significant changes are being recommended into the public housing program which authorizes Federal assistance to local housing authorities to house low-income families. Most important of these is new statutory language authorizing HUD to supersede or amend annual contributions contracts to make provisions for additional grants to local housing authorities to meet existing deficits and to achieve adequate operating and maintenance services. The basic statutory change to permit Federal payments in excess of the amount needed for debt service was made in the Housing and Urban Development Act of 1969 but it was unclear as to how it was used. The action taken this year by the committee is intended to clarify HUD's authority to make payments for deficits in operations, maintenance, and reserves caused by a failure of rental income to meet operating expenses.

Another significant change in the public housing program is the deletion of existing room cost ceilings and the substitution of a new prototype formula which will provide considerable flexibility for the Secretary to develop construction ceilings for public housing based on local cost factors rather than on national standards.

The crime insurance provisions in title VI of the bill would amend existing urban property insurance provisions to authorize a direct Federal crime insurance program in any State where a critical need exists and no effective solution is provided under State law by August 1, 1971, or one full State legislative session, whichever is later.

The urban growth and new community title in the bill, title VII, has as its prime and most essential goal the establishment of a national urban growth policy and the means for implementing such a policy. Part of carrying out such a policy is the development of new communities which would be encouraged by the liberal financing devices and authorizations in the bill. States, as well as the Federal Government, would be involved in developing and carrying out urban growth plans and new community programs. Federal assistance would be provided to the States for this purpose. Additional Federal assistance is also provided to help the cities in an expanded urban revitalization program.

Under title VIII of the bill mass transit subsidies are being recommended for operating losses and to meet existing deficits incurred by the prior issuance of obligations to finance the cost of capital improvements. Existing legislation limits such subsidies to finance the cost of proposed capital improvements.

A significant part of the bill is the dollar authorizations being recommended for 12 existing programs for 1 year. The committee is recommending funding levels for housing assistance programs adequate to meet the national housing goal of 6 million assisted housing units to be constructed or rehabilitated in 10 years. Levels for urban renewal, model cities, and several other programs were made to continue existing program levels plus the amounts needed to meet part of the backlog of applications pending before HUD. The committee is very much aware of the need for economy in Government and is recommending program funding at the lowest possible level needed to meet the most urgent demands and to make further progress toward meeting the national housing goal of a decent home and suitable living environment for every American family.

The committee bill has 10 titles covering a wide variety of Federal programs. Several of these titles contain language identical with sections of S. 3639, the far-ranging consolidation bill developed by the administration to standardize and simplify existing laws. The committee accepted several parts of the administration's proposal, but generally felt compelled to defer action on the more complex and involved subjects until the next Congress when an early start can be had on the major revamping program asked for by the administration.

The short time remaining in this legislative session did not allow, for example, sufficient time to consider in necessary depth title I and title II of S. 3639, involving the FHA and public housing programs. Those programs have been on the law books since the 1930's and have built long years of experience involving State legislation and program precedent. While the committee agrees that the simplification and consolidation of the programs is both desirable and necessary, a hurried effort to solve a complicated problem would not insure a desirable result. The committee looks forward to timely action next year.

This bill would also provide additional funding of $25 million for this fiscal year and $250 million for fiscal year 1972 for the FHA 235 homeownership program. This program, which was conceived in the Senate Banking and Currency Committee during the summer and fall of 1967 and enacted by the Congress as a major part of the Housing and Urban Development Act of 1968, has now been fully operational for almost 2 years.

The 235 homeownership program has proven to be a very popular and a very successful program for housing those thousands of our citizens who cannot afford to purchase a decent home on their own. The latest reports from the Department of Housing and Urban Development indicate that in excess of 70,000 lower income families are now occupying homes that they have bought with assistance under this program. Mr. President, for a new program to have had such a major impact on the housing problems of this country in such a short period of time is an outstanding accomplishment.

The 235 program has helped families in all parts of the nation to purchase both new and existing homes. Although the program is directed primarily at encouraging the construction of new homes for lower income families, it is interesting to note that almost 50 percent of the homes now occupied with assistance under this program were not newly constructed. This is as it should have been. It takes time to build new homes, and we want this program to have as fast an impact on America's housing problems as possible.

It also should be pointed out that in some places in this country where there is a housing surplus it would be foolish to insist that only new homes be made available under this program. Therefore, a reasonable portion of the contract authority under this program should be available for existing, standard housing. In keeping with this concept your committee has recommended continuing the existing provision in the law permitting up to 30 percent of the funds under this program to be used to help in the purchase of existing homes. Naturally, we have made this discretionary in order to permit the administrators of the program to adjust the actual amount used to reflect changing circumstances.

As with any program, Mr. President, which is new and which involves many people, your committee has received some complaints on the homeownership program. These complaints have generally dealt with the price level at which homes are made available to lower income families under this program. In some cases these complaints are justified. The maximum permissible mortgage amounts under this program have to be relatively high in order to reflect the rather substantial disparity in cost levels around the country. But the maximum amounts must be set somewhat lower in those areas where costs are lower. The committee expects that HUD will continue its present policy of requiring that the maximum mortgage amount in a community properly reflects the cost of producing a home in that community.

Some complaints have also been received that the families receiving assistance under this program have incomes higher than seem proper. Mr. President, unfortunately the runaway inflation we have been experiencing in the last couple of years, along with astronomical mortgage interest rates, have served to drive up the cost of housing to levels unthought of just a few short years ago. This has made it difficult for larger and larger numbers of American families to afford decent housing. Your committee is aware of this problem and has recommended much legislation in the last year aimed at both controlling inflation and making mortgage money more freely available at more reasonable interest rates. Implementation of this legislation, which the Congress has approved, will help to reduce the cost of housing and thereby remove the necessity for subsidizing many families now in need of subsidy.

Mr. President, I would also like to

point out that we have received many, many letters praising the homeownership program and pointing out how beneficial it is to those who most need it. These letters demonstrate how successful the program has been in making available housing to families who otherwise would not have been capable of achieving that desire of most Americans—homeownership. On balance, Mr. President, I believe that the support for this program far outweighs any distress because of a few irregularities or mistakes that might have occurred. This program represents the best means yet devised of housing quickly and adequately thousands of American families who otherwise would have never been able to obtain decent housing.

Mr. President, to illustrate the strong support for this program from the lower income beneficiaries. I ask unanimous consent to have printed in the RECORD several letters that have been sent to me on this matter.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

BUILDERS HOMES, INC.,
*Dothan, Ala., September 17, 1970.*

Mr. CARL COAN, Sr.,
*Senate Office Building,*
*Washington, D.C.*

DEAR MR. COAN: Enclosed are some letters from our customers who are able to own a home because of the 235 program.

One woman sent us a poem. Another man sent the names of friends he had told about the program.

We wanted you to see some of the positive things about the program. These are the people that come in our door every day.

Sincerely,
BUILDERS HOMES, INC.,
DAVE HANNAH,
*Government Housing Programs.*

---

DOTHAN, ALA.,
SEPTEMBER 11, 1970.

*To Whom It May Concern:*

We tried for several years to buy us a home and the down payment was too high, and the monthly payments was too high for us to meet.

Until we went to Builder's Home to see about buying one under the 235 program. And we didn't have any trouble getting one. Our down dayment and our monthly payments are reasonably if it hadn't been for them we would not have a home of ours today.

We are truly satisfied with our home and it wasn't any trouble for us to get a loan.

We would recommend Builder's Homes to anyone wanting to buy them a home under the 235 program.

They have done everything and more than they said they'd do. They sure have been nice to us. You couldn't ask for better people to deal with.

Yours very truly,
Mr. and Mrs. W. M. WOODHAM.

---

*September 10, 1970.*

BUILDERS HOMES,
*Dothan Ala.*

DEAR SIRS: Just a line to tell you how much my family enjoys our new home. We never had a bathroom inside before. My wife loves the hot water right at her hand every morning.

I been working a long time, but we never knew we could have something like this.

Thank you so much.

JOHN HENRY JONES.

Mr. ETHRIDGE: Here is the name and addresses of three family of people who are interested in a house of their own, and would like for Builders Home to build them. The names below would like for you to come over and talk house to them.

(Names not printed in RECORD.)

I guess you remember me.

LESTER NEAL.

---

MY FRIENDS

Let me tell you of some friends of mine,
They are a group of guys, with one thing in mind
They work hard to do their "thing"
Building new homes that make you sing
There is George and Jack and Danny too
And Cecil and Terry and maybe a "Sue"
And Bill and Joe and maybe more
All you need do, is knock on the door
They will build you a home to make you proud
You will feel as though you live on a cloud
Your home is beautiful and the payments are low
So you can see, you don't need much "doe"
I know all about this which I do speak
I have the home, the one I did seek
And it was made possible by these new friends
Now aren't you proud this junk is at an end?

Mr. CURTIS. Mr. President, will the Senator from Alabama yield for a question or two?

Mr. SPARKMAN. Mr. President, I yield to the distinguished Senator from Nebraska.

Mr. CURTIS. Mr. President, I should like the RECORD to show how public housing is financed. Is it not true that in the past when public housing has been built, the initial cost of construction, the initial debt obligation, has been paid totally by Federal subsidy?

Mr. SPARKMAN. Does the Senator mean the whole public housing program?

Mr. CURTIS. No. I mean the money with which to finance the debt obligation.

Mr. SPARKMAN. Let me see if I can state the method.

Mr. CURTIS. State it the way it is.

Mr. SPARKMAN. First of all, the primary debtor is a local political subdivision entity operating through a housing authority duly authorized by State and local laws. That authority issues bonds.

Those bonds are sold on the open market. The Federal Government guarantees that the bonds and debt service thereon will be paid. The primary means of paying for these bonds and the interest thereon is through the collection of rents from tenants who occupy units in the projects built with the proceeds of the bond sale. When rents are insufficient to meet debt service, the Federal Government makes up the deficit.

Mr. CURTIS. How much appropriated money is annually given to a housing authority? Is it not the amount needed to meet the debt obligation payments?

Mr. SPARKMAN. It is the amount needed to fulfill the guarantee that the Government makes, as I indicated.

Mr. CURTIS. So the Government does not just guarantee to pay the deficiency; the Government annually makes the payment to retire the bonds; is that right; the bonds that fall due that year or the payments on them?

Mr. SPARKMAN. As to the details of the operation I cannot say, but I do not understand that to be correct. Certainly, it is not the way the guarantee runs.

Mr. CURTIS. I think the Senate should know. Is it true that the cost of carrying the debt loan, principal and interest, is borne entirely by the Federal Government?

Mr. SPARKMAN. The Federal Government pays whatever is needed over and above what the rent incomes provide to make the program a successful financial operation.

Mr. CURTIS. What public housing projects does the Senator know of where the Federal Government does not pay the full debt loan?

Mr. SPARKMAN. I do not think the Government ever pays the full debt loan. I know some housing authorities where the Government did not pay anything. That is not the usual case.

Mr. CURTIS. Can the Senator cite any housing authorities where they have not used that which is available for them in Federal subsidies to pay the entire costs of their bond programs?

Mr. SPARKMAN. I just think the Senator is wrong when he says that the Federal Government pays the entire bond indebtedness. It does not. The rental incomes from the project are used to pay the debt service of the bonds and if there is a deficit between that and the amount required for debt service, then the Federal Government guarantee that.

Mr. CURTIS. I will leave that point, and perhaps before the bill is completed we can ascertain from the books who is right and who is wrong.

Up until a year ago it was the responsibility of the local housing authority to collect enough money to pay for their maintenance. Is that correct?

Mr. SPARKMAN. They certainly were expected to, yes.

Mr. CURTIS. There was no Federal subsidy provided for them; is that right?

Mr. SPARKMAN. There was not for certain that services were added last year.

Mr. CURTIS. Have those been implemented—the action of last year?

Mr. SPARKMAN. They have. As I mentioned here, we had amendments last year offered by the distinguished Senator from Massachusetts (Mr. BROOKE), known as the Brooke amendment. Those amendments did seek to take care of some of the operating expenses. It was in the implementation of those amendments that this question that I referred to in my statement was raised.

Mr. CURTIS. The Senator is talking about limiting the rent to 25 percent of the income.

Mr. SPARKMAN. That was one feature of it, yes.

Mr. CURTIS. Is it not true that up until 1 year ago the Federal subsidy commitment was limited to carrying the dept; and the local people, the local housing authority, was responsible for their maintenance and operating costs without a Federal subsidy? Is that right?

Mr. SPARKMAN. That is correct, yes.

Mr. CURTIS. Is it not true that partly by the changes made a year ago and now reaffirmed in this bill, because 1 year ago I understand the language was

somewhat unclear and has not been utilized very much—

Mr. SPARKMAN. Yes.

Mr. CURTIS. That now in this bill before us we clearly do what was started last year of obligating the Federal Government for the operation and maintenance of housing facilities that the Federal Government has paid for and has given, for all practical purposes, to the local housing authority, and that is a new departure?

I realize it started partly last year but it is clearcut in this bill that that is what we are in for. Is that correct?

Mr. SPARKMAN. The Federal Government is responsible—it does promise to assist the local authority in making public housing operations adequate.

I wish to call to the Senator's attention the language in the bill on page 18. Perhaps I should yield to the Senator from Masachusetts who was the author of this amendment and who assisted last year in straightening it out in order that this unclear language, as someone has said, might be cleared up. If the Senator from Massachusetts would care to comment, I would be glad to yield.

If the Senator from Nebraska would read the language on page 18, lines 19 through 26, that is a very clear statement. It allows the contribution on the part of the Federal Govrenment such as may be required to assure the low rent character of the projects involved. That is so the low-income people might actually use the project and to achieve and maintain adequate operating and maintenance services and reserve funds including payment of outstanding debts.

Mr. CURTIS. Yes. That is what I asked about.

Mr. BROOKE. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. BROOKE. That is quite correct. That is the purpose. The Senator is correct that last year it was started. There was a question as to the intent of the language and the language this year is clear and the purpose of the language which was read by the distinguished Chairman was for clarification.

Mr. CURTIS. I thank the distinguished Senator from Massachusetts. That was what I wanted the record to show. I believe it is a correct statement, as I understand it.

I would like to ask the distinguished Senator one further question. Was that particular section implemented last year; was it put into effect?

Mr. BROOKE. Yes. The section was put in last year, but there was some question about it and some confusion among housing authorities across the country as to what it did mean and how far they could go, and that was the necessity for the clarification.

Mr. CURTIS. I know the law was in effect, but were they using it?

Mr. BROOKE. Yes.

Mr. CURTIS. On any wide scale?

Mr. BROOKE. I would say yes. The rent reduction went completely into effect.

Mr. CURTIS. The 25 percent?

Mr. BROOKE. Yes.

Mr. CURTIS. But these were two different propositions, were they not?

Mr. BROOKE. Yes.

Mr. President, I rise today in support of the Housing and Urban Development Act of 1970. This piece of legislation represents another milestone along the road toward producing a decent home and a suitable living environment for every American family. I commend the distinguished chairman of our committee, Senator SPARKMAN, and the distinguished ranking member, Senator BENNETT, for their untiring leadership in this field. In the short time since Congress adopted the monumental Housing and Urban Development Act of 1968, they have guided two equally significant pieces of legislation through the Senate and deserve the support and admiration of this august body for their efforts.

One cannot question the commitment of your Banking and Currency Committee to the goal of a decent home for every American family. I am hopeful that the Senate will endorse the committee proposals and that House action will further ratify the farsighted proposals contained therein. Most of these proposals were drafted by the committee and represent the product of intensive hearings relating to all aspects of housing production and management.

I cannot fail to praise the assistance which Secretary Romney and his colleagues have provided regarding these measures. Many of the programs were authored by HUD or received its careful scrutiny prior to adoption. While the committee did not see fit to adopt the consolidation proposals presented by HUD, it deferred action on these suggestions without prejudice until next year when interested parties will have had sufficient time to consider their impact. The committee did not differ with Secretary Romney's goal of streamlining and consolidating existing departmental programs; however, it was hesitant to embark on a complete restructuring of federally assisted housing programs at a time when the new HUD area offices are being established and 1968 housing programs are being fully accepted.

Highlights of the 1970 bill include:

Clarification of an amendment to the 1969 Act to insure that adequate funds are provided to improve public housing; added flexibility for construction cost ceilings in public housing; a national crime insurance program which complements State action; and urban growth and new community program which offers the hope of reordering our national urban priorities involving housing and land use; operating subsidies for mass transit to prevent the reduction of essential transportation services; and an experimental housing allowance program which may foretell the shape of future housing a significant contribution toward solving our urban needs and addressing inequities which have been allowed to exist far too long in our society.

While each of these programs is extremely important and should be addressed in depth, I will confine my remarks to low-income housing programs which are so vitally needed throughout the country. In doing so, I cannot ignore pressing needs in all segments of our society for decent housing at reasonable costs. The Emergency Home Financing Act of 1970 which was recently adopted by the Congress and signed into law should stimulate the production of much-needed housing on a broad scale. This piece of legislation adds further impetus to the drive toward meeting our housing goals both in terms of production and in terms of the quality of housing being provided.

On July 15 of this year, I introduced several proposals dealing with housing for low-income families. I am pleased to note that many of these proposals have been accepted by your Banking and Currency Committee and are included in the legislation which is before us today.

Last year, Chairman SPARKMAN and I introduced legislation designed to alleviate intolerable conditions which have been allowed to exist far too long in public housing. The Sparkman amendment made it clear that Federal assistance to local public housing authorities was not limited to debt service requirements, but could be extended to cover operating needs as well. At the same time, I introduced legislation which authorized HUD to contract with local housing authorities to make payments for three purposes: First, to eliminate operating deficits which existed in public housing authorities when the Housing and Urban Development Act of 1969 was signed into law; second, to assure that local housing authorities have sufficient funds to maintain adequate operating and maintenance services and reserve funds; and third, to make up the loss in rental revenues caused by reducing tenants' rents to 25 percent of their incomes. At the same time, the 1969 act placed a ceiling equal to 25 percent of their incomes on the rent which public housing tenants pay.

Seventy-five million dollars in contract authority was authorized for these three purposes; however, congressional intent was clear as to HUD's ability to provide funding in excess of this amount—up to the annual statutory maximum as specified in the Housing Act of 1937, as amended—if the newly authorized funds were insufficient to meet the urgent needs which existed. It was also clear that Congress committed itself indefinitely to fund the three activities specified and did not place time constraints on the assistance program embodied therein.

Thus, sufficient funds were provided to make public housing authorities "whole" by eliminating part operating deficits; to insure that public housing tenants were not forced to pay disproportionate shares of their incomes for rent at a time when inflationary pressures were driving the operating costs of public housing projects higher each month; and to insure that, in the future, public housing authorities would have sufficient funds to provide essential services, repairs, and training programs.

These two pieces of legislation held the promise for reversing serious trends in public housing; however, the Brooke

amendment was later subjected to a narrow administrative interpretation which limited its effectiveness. Accordingly, I introduced legislation this year which was designed to remove any uncertainties as to congressional intent regarding this program.

Specifically, the Secretary of Housing and Urban Development is required to amend annual contributions contracts to provide payments for the three purposes previously enumerated, pursuant to section 204 of the Senate bill. Thus, sufficient funds will be available to insure that public housing tenants are not forced to pay a disproportionate share of their incomes for rent; to insure that public housing authorities will have sufficient funds to achieve and maintain adequate operating and maintenance services; and to make public housing authorities "whole" by eliminating past operating deficits.

As pointed out in the committee report, Federal subsidies will be available for the following operating and maintenance services: tenant counseling on family budgets and on care and upkeep of property; guard and other costs relating to the physical security of project residents; tenant access to available community services relating to employment, health, welfare, education, and personal counseling; effective management-tenant liaison on all aspects of housing administration, management, and maintenance; recreational equipment and facilities; and adequate and timely repairs to structures, including the removal of any code violations.

Thus, adequate funds should be available to restore public housing projects to adequate levels of operating and maintenance services and to insure that a sound physical and social environment is maintained. Clearly, neither tenants nor housing authorities can be expected to provide sufficient revenues to attain these goals—given the present state of decay in public housing and inflationary pressures in our economy. Therefore, Federal subsidies are vital if we are to achieve and maintain a suitable living environment for low-income families.

In this respect, section 201 of the bill increases annual contributions contract authority by $150 million upon enactment and by $275 million on July 1, 1971. Half of the first figure is specifically earmarked for the Brooke amendment and thus brings the total of annual contributions contract money set aside for this requirement to $150 million per annum.

The increase in funds for this program has been prompted by revised HUD estimates of need. Specifically, unofficial HUD staff estimates indicate that approximately $200 million per year will be required for rent reductions, improved operating and maintenance services and adequate reserve funds. Inasmuch as the staff estimates were only preliminary, the committee increased the authorization to $150 million; however, if HUD experience in this area justifies additional funding next year the committee will be receptive to its proposals.

It should be emphasized that the committee is not giving a blank check to local housing authorities which will enable them to spend extravagantly or irresponsibly. On the contrary, the committee has been more than receptive to the urgent and legitimate needs of public housing authorities and the tenants that reside therein. These groups must act in a responsible manner and must insure that the additional funding is used to upgrade the quality of living in public housing and to improve legitimate services which contribute to a sound living environment.

Last year's Housing Act withheld rent reduction benefits under the Brooke amendment if such would result in reductions in welfare—or public assistance—payments. This provision was designed to insure that the payment of HUD subsidies did not enable local welfare agencies to cut back on their commitments. At the same time, the Secretaries of HUD and HEW were charged with the responsibility of establishing policies within their respective Departments which would aid in the implementation of this provision. To date, confusion reigns at the local level with respect to the ability of welfare tenants to benefit from the provisions of the 1969 act.

I therefore introduced a provision earlier this year which was designed to prevent local welfare agencies from reducing public assistance payments as the payment of Brooke subsidy funds. Section 202 of the instant bill contains such a provision which should serve as a guideline for local welfare agencies. I further urge the Secretaries of HUD and HEW to report to the Senate Banking and Currency Committee concerning actions taken by their Departments to agree on common policies regarding public housing rents paid by welfare recipients and to effectuate congressional intent regarding the Brooke amendment as set forth in last year's Housing Act and the pending legislation.

In considering clarifying amendments relating to last year's Brooke amendment, the committee adopted an income definition which is to be used by local housing authorities in computing the rent ceiling pursuant to the Brooke amendment. This income definition will be tested during the ensuing months and may serve as the basis for a standard income definition which would apply to public housing eligibility and to the proposed rent-to-income ratio.

The committee considered several proposals concerning a national rent-to-income ratio which would govern the minimum rent contributions provided by public housing tenants. It deferred action on this matter, however, because adequate information was not available to justify the enactment of a rent-to-income ratio which would be equitable to public housing tenants. The committee concluded that imprudent action on this matter could produce tragic results in public housing. Thus, the committee has requested the Secretary of HUD to make recommendations concerning a national rent-to-income ratio by April 1st of next year. I am hopeful that interested housing organizations and tenant groups will cooperate in this effort and will provide the committee with responsible recommendations on this subject. It was the committee's feeling that action should be taken next year on this subject and I concur with that decision. Local flexibility can be maintained by utilizing a reasonable income definition that will enable local housing authorities to meet individual needs and circumstances. In that respect, I urge local housing authorities to consider the applicability of the income definition contained in section 202.

I should point out that the income definition discussed above was devised with the cooperation of local authorities and, I have been informed, provides the flexibility desired. Thus, my concerns regarding adequate deductions for such things as extraordinary expenses have been met.

The provision authorizing payments to assure the low-rent character of the projects involved does not mean that public housing tenants should be required to pay 25 percent of their incomes for rent. It does mean, however, that payments in excess of 25 percent represent a disproportionate share of tenants' incomes which cannot be tolerated and which are prohibited since the enactment of the Housing and Urban Development Act of 1969.

It should also be noted that the payment of subsidy funds is not conditioned on satisfactory standards of management and tenant responsibility nor any other vague or unenforceable standard. While I certainly agree with the need for management and tenants to act responsibly, I do not believe the payment of funds for improving the quality of tenants' living accommodations can or should be made dependent on the performance of absentee managers or that vague and possibly unconstitutional standards should be allowed to govern or possibly intimidate legitimate actions on the part of tenants.

I introduced a provision earlier this year involving flexible construction cost limits for public housing; however, the Committee accepted a modified version of the HUD proposal utilizing the prototype concept. I have been assured that the prototype concept provides sufficient flexibility on a regional basis so that public housing construction will not be curtailed and so that local requirements can be responded to more efficiently than under present statutory guidelines. I accept Secretary Romney's decision concerning this matter; however, I urge his Department to err on the side of flexibility in the development of initial prototypes so that public housing construction will not be delayed while the concept is being perfected.

The committee also adopted my proposal to remove any uncertainty concerning HUD's ability to extend the section 23 leasing program to newly constructed housing as well as existing units. In addition, the committee concurred with my recommendation that the term

of section 23 leases be extended to 10 years with an option to renew for an additional 10 years. I have received very favorable reports concerning this program and believe it deserves broad congressional support. The extension of the lease term should facilitate the construction of new buildings in which units can be leased for occupancy by public housing tenants. This development should provide additional flexibility to the public housing program in many localities.

The committee also adopted my recommendation concerning the removal of any uncertainty as to the right of tenants to serve as commissioners of local housing authorities. Certainly those residing in public housing are in the best position to understand the needs and concerns of local residents and respond accordingly. Any inhibition on such practices merely prevents participation on the part of those persons whose well-being is being decided.

While the committee has not yet taken action on my proposal to deal with the problem of abandoned buildings, I am confident that the demonstration program which Senator GOODELL and I will be introducing later today adequately addresses this vital issue. The committee received considerable testimony concerning this matter and recognizes the gravity of the situation. The committee was, however, justifiably reluctant to spend large sums of money until the root causes of abandonment in our core cities are given greater study.

Tools are presently available—such as urban renewal—which address some of my concerns; however, it would be imprudent to enact a comprehensive program at this time until information is available from the demonstration program. I am hopeful that the committee will have sufficient information at its disposal when it considers next year's housing legislation to act intelligently on this subject.

I am extremely pleased that your Banking and Currency Committee has adopted the experimental housing allowance program which I proposed earlier this year. Thus, the Secretary of HUD will be authorized to provide low-income families with housing allowances to assist them in obtaining existing standard rental housing of their choice. The housing allowance would not exceed the difference between 25 percent of a tenant's monthly income and the maximum fair market rental for standard housing in the community involved. The benefits provided for public housing tenants last year under the Brooke amendment would thereby be extended to those persons who qualify for public housing but are unable to obtain it for a myriad of reasons.

This concept must, however, be distinguished from the rent supplement program under which assistance payments are tied to specific dwellings. Under this proposal, housing allowance payments would be tied to specific families. Thus, purchasing power would be provided directly to poor families, thereby enhancing their personal dignity and reducing their economic dependence on slum housing. The housing allowance program would reach areas where new construction is simply not forthcoming, rural poverty areas where housing authorities do not exist, as well as those communities where public housing is not available either because the community refuses to build it or existing projects are filled to capacity.

The experimental program would be limited to those tenants who qualify for public housing and to those communities where the Secretary of HUD determines that an adequate supply of standard housing exists. The requirement for an adequate supply of standard housing prevents the payment of housing allowance funds in communities where few vacancies exist and where the only effect of such a program would be to force up rents and line the pockets of slum landlords. Where an adequate supply of housing exists—as determined by the Secretary of HUD—tenants will be able to shop around for decent housing.

While public housing as we know it today will change immeasurably over the next few years in response to urban and rural requirements and to the infusion of funds under the Sparkman and Brooke amendments, we must also begin thinking of alternative programs to address the needs of the poor. The housing allowance program which is contained in section 504 of this legislation may represent the pattern for future housing programs. There is much to be gained from experimental programs of this nature as we seek to answer our housing needs. The Kaiser Committee and the Douglas Commission provided us with valuable insights regarding the housing allowance program and I am hopeful that this experiment will bear out their optimism.

The committee has provided $15 million in contract authority for each of the fiscal years 1972, 1973, and 1974. While this authorization falls short of my original proposal, I have been assured that a housing allowance experiment can be conducted utilizing 15,000 families at a cost of approximately $1,000 per family each year for 3 years. Section 504 embodies such a "bare bones" proposal and I am hopeful that Secretary Romney will seek additional assistance from Congress if such is necessary.

In conclusion, the Housing and Urban Development Act of 1970 which is pending before you today constitutes another monumental piece of legislation designed to make further progress toward meeting the national housing goal of a decent home and a suitable living environment for every American family. Your Committee on Banking and Currency has worked hard to produce a reasonable and responsible piece of legislation and I urge my colleagues in the Senate to lend their support to Chairman SPARKMAN in this matter.

Mr. TOWER. Mr. President, the proposal now pending before us covers a subject area that seems to be expanding in scope more every year—housing and urban affairs.

Under this jurisdictional heading, we are dealing with just about everything that makes our communities and cities function. The subject must be said to be very complex, and diverse in its effect upon all of our citizens. Over the years as law has been added to law, and program after program has been created we have approached the point where it is difficult even for the administrators to follow every detail of every program. Those that are involved in the day-to-day use of these programs are sometimes frustrated by the magnitude of that which they have chosen to deal with and labor under. Thus, there is a strong need for program simplification and consolidation.

To answer this need, the administration devoted much time and effort toward sorting through all the existing laws and programs administered by the Department of Housing and Urban Development to come up with simpler and more understandable means to deal with the complicated problems of our cities. This called for consolidation of programs where appropriate, and revamping where necessary.

The extensive administration proposal was taken up by our housing subcommittee, but with the press of this legislative session being as it is, we felt compelled to go ahead and report out a basic bill containing some of the more essential and pressing matters before us. Of course, I want to emphasize that it is essential that the administration's proposal be taken up for further consideration early during the next Congress.

Mr. BENNETT. Mr. President, I wonder if the Senator from Alabama, the manager of the bill, would let me ask him a question.

On page 104 of the bill, lines 1 through 4, is a definition of the term "lead-based paint." Those of us who are interested in this problem are very anxious to make sure the definition we use is identical with the definition used by the House in its bill, H.R. 19172.

In order to bring this language into conformity with the language in the House bill, the word "or" on line 3, after the word "acetate," should be changed to the word "and."

On line 4, the phrase in our bill "1 per centum" appears in the House bill as "1 per cent," without the "um" on the end. And the word "form", which is the last word on line 4, does not appear in the House language.

I wonder if the chairman would agree that these technical language changes might be made in our bill so that there would be no necessity for a conference on these language variations with the House when we get to conference.

Mr. SPARKMAN. Yes. As I see the Senator's amendment, it does not change the substance of the provision at all.

Mr. BENNETT. It does not change the substance.

Mr. SPARKMAN. I am certainly willing to agree to the Senator's amendment and I am sure the Senator from Texas (Mr. TOWER), who is the ranking minority member of the subcommittee, would agree to it.

Mr. TOWER. Mr. President, I would not think of disagreeing.

Mr. SPARKMAN. It is a technical amendment and I agree that the change be made.

Mr. BENNETT. Therefore, Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. Will the Senator send his amendment to the desk so it can be read by the clerk?

The amendment will be read.

The legislative clerk read the amendment, as follows:

On page 104, line 3, strike the word "or" and insert the word "and."

On page 104, line 4, strike the words "per centum," and insert "per cent."

On page 104, line 4, strike the word "form."

The PRESIDING OFFICER. The question is on agreeing to the amendments.

The amendments were agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. CURTIS. Mr. President, I send an amendment to the desk and ask that it be read.

The PRESIDING OFFICER. The amendment will be read.

The legislative clerk read the amendment, as follows:

On page 16, beginning with line 18, strike out all through the comma in line 21, and insert the following:

"(1) by striking out the period at the end of the second paragraph and inserting in lieu thereof the following: ':*Provided*, That the public housing agency may, in its discretion, fix rents for any low-rent housing project which is solely for elderly families and has not more than 200 dwelling units without regard to the one-fourth of family income limitation set forth above. In defining income for purposes of applying that limitation,'."

Mr. CURTIS. Mr. President, before I discuss my amendment in detail, I would like to resume my colloquy with the distinguished and able Senator from Massachusetts (Mr. BROOKE). I would like to ask the Senator to explain the situation as to what additional subsidies were actually provided—by that, I mean reached the housing authorities—last year that were new in nature.

Mr. BROOKE. The provision which provided for a ceiling of 25 percent of tenant income for rent was put into effect on March 24th of this year. The provision which provided funds for improved operating and maintenance services was not put into effect, and no money was spent for that by the authorities.

Mr. CURTIS. I thank the distinguished Senator for clearing that matter up.

Mr. President, as I understand it, over the years since 1937 the Federal Government has been subsidizing public housing by carrying the debt charge. The housing is built, bonds are sold, the Government appropriates money to pay those bonds as they come along.

Last year we added an additional subsidy to pay part of the rent to some of the people, and attempted a third subsidy to help them pay their operating and maintenance costs. There was some question about the measure, so no payment was actually made as incorporated in the bill.

So, for all practical purposes, that is a new subsidy, to start out now. But I am not going to discuss that further, because my amendment here deals with something else. I felt that it was necessary that we establish in the RECORD the manner in which public housing is financed, and the extent to which it is subsidized, in order to understand all of these amendments.

The amendment I have sent to the desk is very limited in nature. It would bring about a modification of the Brooke amendment of last year. The Brooke amendment said, in substance, that a housing authority could not charge tenants a rent that exceeded one-fourth of their income. I would modify that, and not make it mandatory, for a very small group—a narrow modification, if you please. I am referring to those small rural communities where the situation is much different than it is in a high-cost city.

Mr. TOWER. Mr. President, will the Senator yield for a question?

Mr. CURTIS. I yield.

Mr. TOWER. It seems to me that what the Senator is suggesting here is reasonable. This makes it discretionary on the part of the Secretary, and not mandatory, as I understand.

Mr. CURTIS. I think not. It was my intention that discretion be with the local housing authority.

Mr. TOWER. That is what I say; it is discretionary rather than mandatory.

Mr. CURTIS. But not with the Secretary.

Mr. TOWER. Yes, with the local housing authority.

Mr. CURTIS. With the local housing authority.

Mr. TOWER. This is based on the Senator's experience, as I understand, with some public housing in his State, where, in many instances, the tenants are happy to pay in excess of that proportion of their income, and the solvency of the whole operation is maintained through that means.

Mr. CURTIS. That is correct. If the committee decides to take my amendment, I do not want to make a speech here and talk them out of it, but I do wish to take a moment to call to the attention of the distinguished Senator from Massachusetts, who has such an excellent knowledge of this whole program, and has contributed so much, that I am confining this to only small rural areas, because the discretion does not proceed where they have more than 200 units. I am also confining it to rent for projects for the elderly, and there is quite a difference.

In general public housing projects, there are families. There are children to feed and clothe. Some of those families will stay in public housing all their days. With the housing for the elderly, it is housing for a few years. They have passed that period of supporting children, of buying life insurance. Their expenditures for clothing are not as great, and probably they have children to assist them.

So what I am asking for here is the right of people who want to, to collect enough rent to pay their obligations, and not have to ask for an additional subsidy.

Did the Senator from Massachusetts wish me to yield?

Mr. BROOKE. Yes.

I can understand that what the distinguished Senator from Nebraska has said is a result of some of the cases which have come to his attention from his State of Nebraska. But the purpose of the so-called Brooke amendment was to place a ceiling of one-quarter of a tenant's income for public housing.

This was universally applauded by tenants who are living in public housing projects, across the country. It was particularly of benefit to the elderly, because the elderly are living on fixed incomes in most instances, and have been, in many instances, paying more than 25 percent of their income for rent.

The distinguished Senator's amendment, even though it is narrow in scope and would apply solely to the elderly, and only in cases where there are 200 dwelling units or less, would affect approximately 500 housing projects across the country, not only in the State of Nebraska, but in the States of New York, Arkansas, Maryland, and Massachusetts as well.

I can certainly appreciate and applaud that some few of the elderly may think that, because their children are contributing to their support, therefore they do not need and do not want help from the Federal Government. That is commendable.

But, in the main, that is not the case. Many of these elderly persons are living in public housing projects, paying out 30 to 35 percent and more of their income for rent, which leaves them only a pittance for food, for any sort of recreation, or anything else that they might have to spend their money for.

So I would have to oppose the amendment of the distinguished Senator from Nebraska. I, for example, have received numerous letters from across the country from persons who have been benefiting by this amendment. I shall read just one or two, and ask to put some others in the RECORD. One comes from a dear lady who says:

I want to thank you, and appreciate for reducing the rent in the Federal Housing for the Senior Citizens.

Now I will be able to buy things, for which I was unable to do on my low income.

I have so much to be thankful for what you are doing for me and all the Senior Citizens.

Thank you.

This letter is signed by Mrs. Gertrude Marcus, who is from my State: Suffolk Manor, Malden, Mass.

But another lady—and I think this is an important letter—says:

DEAR SENATOR: My name is Mrs. Edith Bethel, and I just had to write, to say very humbly, Thank you.

I have just received my official notice of a reduction in my monthly rent from the Brickenwood Housing Authority where I live. My husband, 78 years old, passed away last February, which of course left me with a reduced income. I will be 81 years old come Sept. and I have never asked for charity in my life. We had no children to help out, and after a married life of 47 years I was alone, left with small amount of savings having used up some 4–500 dollars during his illness and a little bewildered. Thanks to your foresight, I can manage now; at last something has been done for people who have honestly

tried to help themselves all their lives, without being parasites on the cities and towns where they live. My name means the House of God, may you dwell in it forever.

Sincerely,

EDITH BETHEL.

There were a large number of letters from people who were similarly benefited by this amendment.

The 25-percent limit is a standard which we have used across the country in saying that a person should not pay a disproportionate share of his income for rent. This amendment has been, as I say, very beneficial to people across the country, in Nebraska as well as in Massachusetts. I ask the distinguished Senator from Nebraska if he has any documenation that anyone has been harmed by my amendment. If he has, I would like to know about it.

I ask unanimous consent that two similar letters be printed in full in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

PORTLAND, OREG., *July 14, 1970.*

DEAR SENATOR BROOKE: I would like to thank you for your efforts in getting the rent lowered for people living in public housing.

I'm blind and live alone with my two boys. We had lived on my blind pension and aid of dependent children. I know we get a little more money than some people on welfare. Even so, this is not great fortune by any means.

Having our rent lowered will mean we will have a little more money to spend for other things.

I've talked to several people and asked them to write and thank you for your effort in behalf of low income people. . . . I know it makes everyone feel good to get a thank you for their work once in a while.

Sincerely,

Mrs. ELAINE SMITH.

---

JUNE 27, 1970.

Hon. EDWARD W. BROOKE.

DEAR SIR: Thank you so much for your assistance in having the rents lowered for housing units. It is very much appreciated by we seniors. I am a widow and a tenant in the Foley Apts. in South Boston at Columbia Road and H st. It is for seniors only.

Thank you again, and my prayers for you.

Sincerely,

Mrs. JOHN F. DOHERTY.

---

JUNE 26, 1970.

Senator BROOKE.

DEAR SENATOR BROOKE: Thank you so much for your interest in us older persons, in your passage of the Brooke amendment.

It will be a little easier for me in the near future. At the present I am 76 years of age.

Thank you again.

Very truly,

CARRIE FIELD.

Mr. CURTIS. Very well. I shall develop this as I go along. I say to the distinguished Senator from Massachusetts that he has stated the facts most fairly, and he has well stated his position, and I respect him for it.

I invite his attention to this. The adoption of my amendment will not compel the raising of anybody's rent in the State of Massachusetts.

Mr. BROOKE. I understand that.

Mr. CURTIS. Because all we are saying here is that in these small communities, small projects, we are going to have the local housing authority make a decision, rather than a legislative decision which is binding.

Mr. BROOKE. Mr. President, will the Senator yield?

Mr. CURTIS. I yield.

Mr. BROOKE. If a local housing authority determined that the 25-percent rent ceiling would not be in effect, would that then not serve to increase the rent of tenants who are now paying no more than the 25 percent?

Mr. CURTIS. It would, but the local authority does not have to do that. The local authority is not compelled to raise rents.

Mr. BROOKE. But in their discretion they can raise rents.

Mr. CURTIS. Yes. What I am saying is that somebody on the local scene can do better than Congress can by one rigid rule for across the country. When we undertake to fix a minimum rent, a percentage rent, it applies equally all over the country. The situation is not equal all over the country, and the problems are different.

But, Mr. President, I shall go on and make the justification for this amendment.

I have the privilege of living in a small county-seat town with a population of around 2,400 or 2,500 people. The people are industrious. They are honest. They have pride. They not only love our country, they are concerned about its financial solvency and they resent unwanted, unneeded, and unasked-for subsidies from their government, particularly when that government is operating at a huge deficit.

Some months ago I was home for a weekend. A meeting was held with some individuals greatly concerned about the operation of this provision of the law which limits the amount that can be charged to 25 percent of the person's income. This particular project for the elderly in my home town has 30 apartments. The lowest rent charged is $30 per month, and I believe the highest rent is $45 per month. All utilities are paid. There are no transportation expenses or other expenses of any kind. In a great city, transportation expenses amount to a great deal. There is none in this town, because we do not have a transportation system. The local chamber of commerce provides a bus two or three times a week that runs free of charge. That cannot be done in a great city.

One particular case was called to my attention. This lady was most happy to be permitted to occupy one of these new, well-kept apartments for $30 a month. Actually, her total annual income is only $720. She, however, felt fortunate in having this apartment for $30 a month, with everything paid. Her children preferred to make a sacrifice and assist their mother in paying the rent because they wanted to. It added the feeling of well-being for both them and their mother.

Under the terms of the Brooke amendment, this rent would be greatly reduced. As a matter of fact, the application of this amendment to the entire 30 units would amount to an annual shortage for the local housing authority of $4,500. The housing authority is expected to reduce the rents even though the tenants are willing to pay, and then the housing authority must make application for a Federal subsidy for $4,500 from the U. S. Government. This they did not want to do.

Mr. President, here is a local unit of government that does not want to ask for $4,500 from the Federal Government, but we are operating under a hard and fast coast-to-coast rule.

Mr. BROOKE. Mr. President, will the Senator yield?

Mr. CURTIS. I yield.

Mr. BROOKE. I understand what the Senator is trying to do by his amendment. I think I understand it thoroughly, and I am in sympathy with what the Senator is trying to do.

Might I suggest to the Senator some language which might take care of the situation he is trying to correct, and at the same time not deny the elderly across the country, who are living in some of these projects where there are 200 or less dwelling units, the benefits of the so-called Brooke amendment. The language I would propose would read as follows:

*Provided,* That any tenant resident in public housing shall have the option of refusing a reduction in rent resulting from the imposition of national requirements, if he has been duly informed of the pertinent facts concerning such reduction and if he certifies that he has made his decision with knowledge of the consequences thereof in writing to the local agency.

In other words, if one of these tenants does not wish to avail himself of the benefit of this amendment and does not want a Government subsidy—again, I commend and applaud them for the spirit, and I am very grateful that some of them are in the condition that they can do this—he would then have the right to waive it and not take it. But it would not be denied to the thousands and thousands of elderly across the country who do not have that wonderful economic condition and to whom this 25-percent ceiling on their rent is something that is essential.

Would that be a position which the Senator could accept?

Mr. CURTIS. Mr. President, over the months I have given thought to a number of possible remedies. I do not think that would work, to put that responsibility upon an individual tenant. He or she would get advice from many sources.

All I am asking here is that a local government unit in these small communities should make the decision and not Congress. And the only way they can make that decision is for the benefit of the United States. That is the only possible way. I realize that to most people having their community apply for a $4,500 subsidy is just peanuts. Well, it is.

Mr. BYRD of West Virginia. Mr. President, would the Chair ask staff members to take seats in the rear of the Chamber and remain seated?

The PRESIDING OFFICER. The Senator is correct.

Mr. BYRD of West Virginia. There is a great deal of running from one side of the Chamber to the other. Some of it may be necessary, but I am constrained to believe that not all of it is necessary.

The PRESIDING OFFICER. The Senator is correct.

Mr. CURTIS. How can one go home and justify voting to stand with the President on the veto of an appropriation bill and then say, "Here is a subsidy you did not ask for; you do not want it; you do not need it; you are embarrassed about it; but you have to take it—no discretion"?

There is a compelling reason for this. I not only read the daily Treasury reports, I do not even file them in my office, but I keep them on my desk. Here is what the national debt is, the last published statement, which is September 15—the national debt is $383 billion.

What was it a year ago on that date? Three hundred and sixty-five billion dollars—an $18 billion increase in the national debt in 1 year. Yet we have people begging to pay their own way.

Now, further to answer the distinguished Senator from Massachusetts. At one time I gave serious consideration to the idea of letting it be an individual decision with the tenant. I think that would lead to many problems, crosscurrents, advice to the elderly to do this or not to do this, that so-and-so is taking it so why should not I. This complaint does not come just from one community.

I am happy now to yield to the Senator from Illinois.

Mr. PERCY. I thank the distinguished Senator from Nebraska for yielding to me.

Mr. President, I know what the Senator is trying to get at. I am delighted that there are rugged individualists who want to pay their own way. I am sure that there are. I feel that the suggested modification by the distinguished Senator from Massachusetts would take care of that situation. But I know, speaking on behalf of some of the communities in my State, there are small communities, where the income for the elderly, when they pay more than 25 percent of income for rent, is inadequate. For the elderly, health costs alone are far higher than the average family. The transportation costs in a small community without mass transportation, if they want to go anywhere, it is expensive for them to move about. For them to be put in the position where Congress discriminates against people living in small towns, many economically depressed, and discriminates against the elderly, that would, I think, be a very difficult thing for the committee to accept.

Mr. CURTIS. Now, just a minute. If the Senator will read my amendment, he will see that it does not compel them to raise rents. It merely provides that the local housing authority shall make the decision and if the circumstances are such that they want to go on continuing to avail themselves of the 25-percent limit, they can, under this method. The amendment does not compel any local housing authority to raise or collect rents beyond the Brooke amendment. It does permit them to make the decision.

Mr. President, I should like now to call attention to the situation in a number of other communities.

I hold in my hand a letter from the chairman of the Board of Commissioners of the State Housing Authority in Auburn, Nebr., which was written to a Mr. Goodrich, in the Housing Urban Development office in Chicago.

It reads:

DEAR SIR: As chairman of the Board of Commissioners of the Housing Authority of the City of Auburn I must report the feeling of the board in regard to the Brooke Amendment.

The Board of Commissioners wish to go on record as declining to approve the Implementation of Sec. 212 and Sec. 213 of the Brooke Amendment to the Housing and Urban Renewal Act of 1969.

This, the Commissioners feel abridges the authority of said local board: Wherein the local board knows the local situation far better than either Washington or Chicago. Whereas we feel that our rental structure is far below any possible amortization of Project NEB-65-1, also since the value of the dollar is decreasing we should be increasing our rent rather than decreasing it.

Very truly yours,

ALICE ROTHERT,
*Chairman.*

Mr. BROOKE. Mr. President, may I ask the distinguished Senator from Nebraska, what would be the harm to the local authority by the so-called Brooke amendment?

Mr. CURTIS. It would be unable to collect the rents that it is now collecting. It would have to reduce rents and then make appplication to the Federal Government for a rent subsidy.

Mr. BROOKE. Which subsidy has been funded and has been approved by Congress, and which subsidy they are entitled to and can get, so it certainly would not in any way adversely affect their budget or their operation. The housing authority would get the money. They have been getting the money. It has worked well in community after community. If we were to check, I am sure that we would find for every one housing authority that even questioned it, there would be hundreds and hundreds of other housing authorities all across the country who are grateful for it. It certainly does not hurt them at all but helps the housing project tenant and does not hurt the housing authority at all.

As I have said, and as the Senator from Illinois (Mr. PERCY) has said, it is commendable that some individuals do not want to accept a Government subsidy, but we are talking about a small amount of money in most instances. Most of these people have incomes of $100 a month, some less, some $125 a month. They pay a rent of $25 a month which leaves them $75 a month for transportation, for medicine, for clothing, and whatever recreation they can get. It is merely a pittance. The housing authority is not injured at all. It still has local authority to do whatever it wants to do. It says in this amendment that we cannot charge more than 25 percent of the tenant's income for rent and we will make up the difference, whatever that difference happens to be.

Mr. CURTIS. My answer to that is that we do not have any money to make up the difference. I just cited the figures a minute ago where the national debt had increased $18 billion last year. We are borrowing the money. We are increasing inflation. We are holding up interest rates by huge Government borrowing. We are forcing them to go into an unsound proposition.

The question is raised, how are they hurt? I submit there are things more important than a few dollars to an individual. I submit that if because of the subsidy that goes into the construction, because of the fact that we have a local housing authority that serves without pay, because of the fact that community services are given by volunteers, including transportation, that if someone is paying $30 a month and because their children are helping them and they are forced to have their rent reduced, say, to $14, knowing that a bill would have to be presented to a debt-ridden Federal Government in Washington for the difference, that they would lose a sense of well-being that is worthwhile.

Mr. TOWER. Mr. President, will the Senator from Nebraska yield, without losing his right to the floor, so that we may put the Senate on notice that there will be another vote tonight.

Mr. President, I ask for the yeas and nays on final passage.

The yeas and nays were ordered.

Mr. TOWER. I thank my distinguished friend from Nebraska.

Mr. CURTIS. Mr. President, I want to clarify the record. The distinguished Senator from Texas just stated that there would be another vote this evening.

That is the understatement of the year.

Mr. TOWER. I just wanted to get it nailed down.

Mr. CURTIS. Mr. President, I yield now to the Senator from California.

## FIXING OF TIME FOR FILING REPORTS ON CERTAIN BILLS

Mr. CRANSTON. Mr. President, I am grateful to the Senator from Nebraska for yielding to me.

Mr. President, I ask unanimous consent that the Committee on Labor and Public Welfare may have until midnight to file reports on the following four veterans bills: S. 3656; S. 3657; S. 3785; and H.R. 370.

The PRESIDING OFFICER (Mr. GRAVEL). Without objection, it is so ordered.

## VITIATION OF PREVIOUS UNANIMOUS-CONSENT AGREEMENT RELATING TO THE REPORTING OF S. 3656

Mr. CRANSTON. Mr. President, I am today reporting from the Committee on Labor and Public Welfare a number of bills, including S. 3656, which I introduced on March 31, 1970.

When I introduced this bill, based upon a prior agreement with the Committee on Banking and Currency which has jurisdiction over the V.A. Direct Home Loan program, I asked for and received unanimous consent that when S. 3656 was reported from the Committee

on Labor and Public Welfare it be then referred to the Committee on Banking and Currency for its consideration.

However, as a result of staff coordination between our two committees, the chairman of the Committee on Banking and Currency, the Senator from Alabama (Mr. SPARKMAN), has graciously agreed that referral to his committee is no longer necessary in view of the provisions included in the reported bill dealing with the jurisdiction of his committee.

Thus, Mr. President, I now ask unanimous consent that the prior unanimous-consent agreement be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRANSTON. Mr. President, I also ask unanimous consent that a September 14, 1970, letter from Senator SPARKMAN to the chairman of the Committee on Labor and Public Welfare, the Senator from Texas (Mr. YARBOROUGH), which explains the Banking and Currency Committee's positions on certain portions of S. 3656 as reported from the Committee on Labor and Public Welfare, be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON BANKING AND CURRENCY,
*Washington, D.C., September 14, 1970.*

Hon. RALPH YARBOROUGH,
*Chairman, Labor and Public Welfare Committee, New Senate Office Building, Washington, D.C.*

DEAR RALPH: This letter is in reference to the legislation pending before your Committee to amend the veterans housing laws. I understand that you are considering two bills, S. 3656 and S. 3683, which are being combined into one bill to be reported soon. I have a copy of the Committee print for S. 3656 which contains the proposed legislation. I understand that the Committee print will be submitted to the Veterans Subcommittee this week and it is proposed that it be reported by the full Committee before the end of the week.

As you know, our Committee has had legislative jurisdiction over the Veterans Direct Loan Program since it was enacted. A number of times the Committee has amended the direct loan legislation and only this year has reported to the Senate and the Senate has passed a bill involving direct loan assistance to paraplegic veterans.

When S. 3656 was introduced into the Senate and referred to your Committee, there was a unanimous consent agreement that the bill would be referred to our Committee before it was taken up in the Senate. I believe if we can work out several amendments to your Committee print that it will not be necessary to follow the procedure of having the bill referred to this Committee. I am, therefore, suggesting that your Committee consider the following changes:

Under subsection (i) of section 4 of the Committee print—this contains language with reference to paraplegic veterans. I should like to remind you that the language in your Committee print is not the language finally passed by the Senate in S. 3775. I understand from your Committee staff that this was probably an oversight and that you would have no objection to incorporating the language of S. 3775 as passed.

Item 6 of subsection 4 would strike out subsection (i)(1) and (i)(2) of paragraph 1811 of existing law. Each of these subsections refers to builder commitments in connection with direct loans for veterans in credit shortage areas. I understand that the reason given for striking these subsections is that the Veterans Administration has not used these provisions in several years. The Housing Subcommittee feels that even though these provisions have not been used in recent years, they are potentially productive provisions and could be very helpful if once the Veterans Administration obtains adequate direct loans funds so that the Direct Loan Program can once more become effective as it was originally intended when it was first passed. The Committee objects to these subsections being omitted.

I note that the Committee print does not provide for a termination date of the Direct Loan Program. Our Committee approves this with the thought that the Direct Loan Program has considerable merit and should be continued along with the Guarantee Program until such time as credit is equally available in all parts of the United States.

With reference to the new section 1819 which would provide for financing of mobile homes both under the Direct Loan Program and the Guarantee Loan Program, you may want to know that our Committee has approved legislation for financing mobile homes last year and is considering additional legislation this year. In general we agree with the Federal Government involving itself in the financing of mobile homes, but we have a very strong concern that such financing does not unduly emphasize the mobile home housing for low-income people. We feel that the Federal agencies should be very careful to fully advise the applicants on the merits of permanent housing versus mobile housing.

The Committee is also concerned about the planning and environment factors in connection with mobile homes and wants the Government agencies to insist that the mobile home sites be in environments that are consistent with local plans and that every effort be made to make these homes attractive and a boom to the neighborhood rather than a blight—as some people are fearful may happen.

If the Committee has any objections to my Committee's recommendations, I wish you would let me know.

With best wishes and kind personal regards, I am

Sincerely,

JOHN SPARKMAN.

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. CRANSTON. I yield.

Mr. SPARKMAN. Mr. President, in the letter to which the Senator refers which I wrote as chairman of the Banking and Currency Committee, I made certain recommendations as to amendments that should be written in the bill, S. 3656.

Mr. CRANSTON. The Senator is correct.

Mr. SPARKMAN. Are those amendments included in the bill?

Mr. CRANSTON. I believe the substance of what the Senator requested is now incorporated in the bill.

Mr. SPARKMAN. Mr. President, I think the amendments were necessary or, at least, certainly highly desirable. I do trust that the amendments will be carried out.

Mr. CRANSTON. The Senator is correct. We did incorporate them.

---

## HOUSING AND URBAN DEVELOPMENT ACT OF 1970

The Senate continued with the consideration of the bill (S.4368) to extend and amend laws relating to housing and urban development, and for other purposes.

Mr. CURTIS. Mr. President, the distinguished Senator from Massachusetts raised a question—these are not his words—concerning what these people have to lose by the operation of the Brooke amendment.

Mr. BROOKE. Mr. President, will the Senator yield?

Mr. CURTIS. I yield.

Mr. BROOKE. I said the housing authority.

Mr. CURTIS. Mr. President, they have this to lose. They have no assurance that these appropriations for rent supplements will be made year after year. I cite a case to support that statement in which there are—I cannot recall whether there are 37 or 17—Hill-Burton projects scattered all over various parts of the country—there are three in Nebraska—who rely on the Federal Government to make the appropriation for their grant. They have carried out their local commitment, and to this day the Congress has not appropriated money.

With a national debt that is $18 billion greater than it was a year ago, I am not too sure that the delivery on Government money for various programs will come as easy as it is to talk about it or to vote for it here. So there is no assurance that at a later time Congress and the country both might not have to make some choices, some priorities in payments.

I was surprised that my Government failed to make good on a commitment with reference to hospitals. But they have. I think it could happen to housing.

Mr. BROOKE. Mr. President, will the Senator yield?

Mr. CURTIS. I yield.

Mr. BROOKE. Mr. President, I think there is that same danger for any Government program. None of us knows what the economic picture will be, how much money we will have to spend, where the money will have to be spent, where the priorities will be. But the money for this program has already been appropriated.

Mr. CURTIS. Not for more than a year at a time. It may be authorized.

Mr. BROOKE. Mr. President, I do not want to mislead the distinguished Senator from Nebraska. Contract authority has been set for more than a year's time.

Mr. CURTIS. But the appropriations of money, those obligations, I think, are made on a year-to-year basis.

Mr. BROOKE. Mr. President, that is not subject to appropriations. But if we have problems with our economy, Congress can always change that. I agree with the Senator. We do have some serious problems. But do we want to take this away from the elderly and the poor people who are living in public housing projects and paying 30, 40, and 50 percent of their income for rent? That is the question.

Mr. CURTIS. Mr. President, here is what I wish the committee, as well as the Senate generally, would stop and think about. Public housing was subsidized in the first instance by paying the

cost of bringing it into being. It seems to be admitted that the Federal Government pays the full cost of paying the debt load, which are the bonds that built the public housing. It was given.

It went along that way for several years. Within the last 12 months, there was added not only the subsidy to give them the public housing, but also a rent subsidy. Then, in the pending bill, there are the clarifications so that they can finally initiate subsidies for the operation of the local housing projects.

Mr. BROOKE. Mr. President, will the Senator yield?

Mr. CURTIS. Mr. President, I will be happy to yield in a moment.

Think what that can mean to the housing authority in a great city where they are paying larger salaries and own some cars and drive them around. They determine the expenses. We have no control over that.

I think the pending bill gives them a blank check. We will pay the deficit.

Oh, sure, we owe something to the old and poor people. But we owe something to the old people who are not living in public housing. We owe something to the elderly people who are living on less money than some of the people who have the benefit of public housing.

I say that the matter of repealing the subsidy for housing should cause us to pause and consider it.

All I am asking for is that in a little rural community, Congress not make the rule as to what could be the maximum rent, but that the unit of local government do it.

What on earth is wrong with local government? What on earth is wrong with having some decisions made by public-spirited citizens who serve without pay and who know every intimate detail of their local area?

Mr. BROOKE. Mr. President, will the Senator yield?

Mr. CURTIS. Mr. President, I yield to the Senator from Massachusetts.

Mr. BROOKE. Mr. President, first let me say that I do not believe that persons living in rural public housing projects should be discriminated against and should have any less benefit than those who are living in urban public housing projects.

I have had an opportunity to visit some of the public housing projects across this country. Perhaps the Senator from Nebraska has as well.

Anyone visiting such public housing projects would see the deplorable conditions existing in public housing projects in the country today. They are run down and are deteriorating. The Federal Government is being called the worst slum landlord in the country. They do not even measure up to the conditions and regulations that have been established by local governments.

I do not want to get into the whole question of public housing and why it was originated. That would take far too long. The fact remains that this Government has committed itself to public housing. We are not building enough low or moderate housing projects in the country today. There are literally thousands of people who are on the rolls and still waiting to get in public housing projects—the elderly as well as the poor.

This amendment the Senator has been talking about is an amendment which was just designed to limit the amount of rent that a person living in a public housing project would pay. That was based upon long investigation to determine what was fair and what was equitable, and we came up with the standard that a person living in a public housing project should not pay more than 25 percent of his income for rent. The second purpose of it was to improve the quality of living in public housing projects by granting a subsidy for improved operating and maintenance costs.

Some of these elderly people are living in public projects today and they are living in fear of their lives. There are no security guards or arrangements for them at all. There are broken windows, and deteriorating housing, and the Federal Government is associated with it.

The Senator from Nebraska raises the question whether we have the money to do it. All I say to him is that Congress has done this.

The purpose of the language in the bill now is merely to clarify the intent at the time this was passed by Congress in 1969, and I think that this is important legislation, needed legislation, and legislation which has benefited thousands of elderly people and thousands of poor people in rural and urban areas. Why, at this time, discriminate against those who are living in rural public housing projects? I submit that there is no justification for it.

I would agree that if there are persons in his State, as the Senator pointed out, and I do not think he has called to the attention of the Senate any area outside of his State, but there may be, where they do not wish to have the benefits of this amendment, where they want to pay more than 25 percent of their income for rent, they can waive it.

I have suggested to the Senator that this would be the proper manner in which we might take care of his objection to this legislation and at the same time not injure those who are living in public housing projects, both in rural and urban centers. If they want to waive their rights, provided they know what their rights are, that they should not pay more than 25 percent of their incomes for rent, that is left up to them, but why put the discretion in a public housing authority that might arbitrarily raise the rents 30 percent, or 35 percent of the tenant's income. Why should we have that disparity? There should be a national standard. We are talking about Federal money. It should go across the country. That is what the clarifying language would do.

I submit to the Senator that if he has individual cases let them waive and turn the money back to the Federal Government or not accept it in the first instance.

Mr. CURTIS. Much could be said in argument against the entire idea embodied in the amendment of a year ago that rents could not exceed 25 percent, but I know how ardently the distinguished Senator from Massachusetts believes in that measure. I do not question his judgment at all that that is good for Massachusetts. I do not question that there are many cities that have a different problem. But the junior Senator from Nebraska is not here asking repeal of the Brooke amendment.

I am asking, with respect to the Brooke amendment, that in the smaller communities the decision whether to avail themselves of it or part of it be left to the local governing body. I do not think for 1 minute that the housing authority in any city or town in Massachusets or any city or town in Nebraska has any less compassion for the poor than Congress. We have voted for billions of dollars so long we are imbued with the idea that we are the only Santa Claus.

I think that these local agencies will do justice. I do not subscribe to the doctrine at all that if you let a decision be made outside of Washington it will not reflect the public good and that it will not reflect the opinion in the local area involved.

I received a very strong letter from Mr. Charles H. Beatty, counsel for the housing authority in Kearney, Nebr. The letter is addressed to me and it states:

DEAR SENATOR CURTIS: At a recent meeting the Kearney Housing Authority discussed problems relating to the Brooke Amendment and requested that I communicate these problems to you.

Almost without exception the elderly occupants at Kearney Housing Authority greatly resent the imposition of mandatory rent supplements. They are independent, able to pay the existing rental charges without hardship, and prefer to do so rather than become the object of enforced governmental subsidy.

Mr. President, why does a Senator have to stand here and beg for the right of his people to reject the subsidy? I cannot understand it. The letter continues:

The Authority is hopeful that some legislation might be enacted whereby the 25 percent of income limitation on rents paid could be avoided where the Housing Authority made a finding that there would be no resulting hardship.

Mr. President, in order that the Senator may have a full picture of this problem, I would like to present some additional letters.

This letter is from the same housing authority. It is from Mr. Arnold H. Ender, chairman of the housing authority. It is addressed to the junior Senator from Nebraska, and it reads as follows:

HON. CARL T. CURTIS,
*U.S. Senate,*
*Washington, D.C.*

DEAR CARL: Among my other civic projects, I have been working on the Kearney Housing Authority since its inception over ten years ago and am the current Chairman of this group.

We have just completed the work necessary to implement the so-called Brooke Amendment on rent subsidy for low rent housing.

We can see some definite problems in this implementation because we cannot follow our own definition of income. People with assets somewhat higher than normal in our low rent housing project for the elderly may get subsidy, where people with no assets at all may not. I am sure this is going to lead to some hard feelings and problems in the administration here at the Kearney Manor, which is the low rent housing project for elderly people in Kearney. We can correct

some of the deficiencies by changing our admission policies, but this does not solve the problem of the current tenants of our one-hundred and thirty apartments.

We really prefer a method by where the City or County Welfare Department would supplement the income of the low income elderly to bring their income up to a point where they could pay the very minimal rents we currently charge. The feeling of the Board of Directors of the Kearney Housing Authority is that in this type of a project, where tenants do have assets of greater than a certain amount, say $3,000.00, they should invest these at a higher return in an annuity or some other type of investment to bring their income up to the rate where they could pay twenty-five percent. Without doing this, what they are doing is building an estate and this, of course, is not why we are in business. Where such investment practices are not used, it is possible under our own policy to encourage rather forcefully people who are going to benefit from the estate to make up the difference in income so that the people can take care of themselves. This is the place where I believe if we set up our own income policies such as we have had in the past, we would be able to avoid some management problems which we are sure are going to occur by following the Brooke Amendment to the letter.

If you want more of our ideas and opinions on this particular matter, feel free to contact us and we will be very happy to give you more detail.

* * * * *

Sincerely yours,
KEARNEY HOUSING AUTHORITY,
ARNOLD L. ENDER, *Chairman.*

Mr. BROOKE. Mr. President, will the Senator yield?

Mr. CURTIS. I yield.

Mr. BROOKE. Will the Senator give the date of that letter?

Mr. CURTIS. That letter was dated June 20, 1970.

Mr. BROOKE. I asked that question because I admit there was some confusion as to the language of the amendment. The purpose of the present bill is to clarify the language. HUD has worked on this from the 24th of March 1969.

With respect to confusion, they had little or no difficulty with the 25-percent rent ceiling subsidy. I am sure that the the fears of the writer of this letter would have been allayed since that time.

If the Senator has any recent communication from the chairman of that housing authority, I think it might be important to read it to the Senate.

Mr. CURTIS. I have a communication from another housing authority within 20 miles of there. Just a few weeks ago the Chicago HUD office told them that they did not know how they should report on the Brooke amendment.

Mr. BROOKE. Mr. President, will the Senator yield?

Mr. CURTIS. I yield.

Mr. BROOKE. Were they referring to the operating and maintenance provision or the 25-percent income provision?

Mr. CURTIS. The 25 percent.

Mr. BROOKE. It is clearly stated that no tenant living in a housing project shall pay more than 25 percent of his income for rent. I do not know where there is ambiguity in the language. There never was an ambiguity in that part of the language. That provision has benefited many people across the country, for which they have been very grateful.

I had an opportunity to speak to the convention of housing authority representatives in Chicago recently. They were strong in their support of this amendment and the benefits that had been derived by the tenants living in public housing projects. I just cannot see where there really is any opposition from any housing authority at all to this amendment, which does not affect them adversely.

Mr. CURTIS. Mr. President, I thank the distinguished Senator for his comment.

I have a very high regard for the distinguished Committee on Banking and Currency, but I am afraid that decisions arrived at in that committee are brought to the floor, members of the committee get up and say a bill is good, and we pass it, as this bill would have been passed an hour ago if I had not given notice that I wanted to say something about it and had some amendments to propose.

The question of whether or not we should have a 25-percent limitation on rents was never debated on the floor of the Senate. It was never pointed out that here was a new departure. So far as I know, I never heard of any local housing authority notified about it or asked to comment on it.

Again, I repeat, Mr. President, what has come to pass that we have to plead for a change in the law for local people to have a right not to avail themselves of a subsidy?

I am not suggesting that any housing authority has to charge a certain amount for rent. I am asking that, with reference to this one rule, the local housing authority can make the decision.

I want to read from a letter from the Housing Authority of the City of Neligh, Nebr. Before I read the letter I want to call attention to a practice that is followed and has to be followed. There are people who come to these housing projects who have some capital but perhaps not very much income. It is my understanding that in cases like that they use some sort of rule to decide how the capital can be converted into income, how many years it will last, and what the life expectancy is, and so arrive at some arbitrary decision as to what the income amounts to. This letter is addressed to the Senator now speaking:

We wish to take this opportunity to thank you for your concern and help on behalf of the Housing Authority of the City of Neligh.

Since the implementation of the Brooke's Amendment we have lost most of our enthusiasm for more units as it has upset the tenants to the point some are looking elsewhere for housing. It is most embarrassing for tenants with the maximum of $15,000.00—

I am sure she means assets—

to have their rents subsidized. Most of the elderly take pride in knowing they have been able to meet their own needs without Public Assistance and now finding when they do not need or want it, it is being forced upon them.

In my opinion it is a very poorly written law. There should have been some provision made for asset limits written into the law. We have an 87 year old lady that was eligible because some of her asset was prorated into income. According to the Brooke Amendment—

And I am not passing on it; I am just reading the letter—

this can no longer be done. She only receives $64.00 income per month; therefore, she is eligible for subsidy where a couple living beside her has an asset of $500.00, but income enough to pay regular rent.

We just returned from a 3 day Nebraska Housing Association Meeting in Kearney and it appeared the problem is not a Local one, but is State wide.

That is signed by Mrs. Myrtle Rethmeier, executive director, Housing Authority of the City of Neligh.

I would like to call attention to a letter from Mr. Morris C. Snyder, of Pawnee City, Nebr., dated April 24, 1970:

Enclosed is a copy of a Resolution considered by the Executive Directors of Chapter No. 1. We realize that the inequalities mentioned are much easier to recognize than anticipate and while we sympathize with the intent of the Brooke Amendment we do feel that we will be criticized for some individual cases.

For instance: We have admitted into this project a couple whose assets, consisting mostly of unproductive land and some cash, totaled $3,000.00 over the admission limits. However the total family income was below $700.00 annually and there was considerable foreseeable medical expense. We pro-rated their assets, in accordance with our published policies, so as to provide an income of about $1800.00 per year.

Since then the husband has died and the widow has converted some of the assets to more profitable investments but her income from investments and Social Security still total less than $100.00 per month. Her assets are still close to $10,000.00. (Apt. 109)

The next door neighbor has a slightly larger income from Social Security but no assets. In fact, her pride is all that keeps her from accepting Old Age Assistance. (Apt. 110)

Both of these ladies agree with me that it would not be fair for the first lady mentioned to pay less and be able to preserve her estate for her children while the second lady must deprive herself to live.

Mr. President, that is what happens when we try to make a decision in Washington determining income. Here is an individual whose regular monthly cash income is small, but she has some assets. They prorate them to make up the difference. I say that the place to conduct justice on a decision like this is a local unit of government.

The letter continues:

On the other hand we do not favor lowering the asset limit because, even, $10,000.00 does not go far these days, particularly if the client should be forced into a nursing home. The facilities, services and neighborliness we offer enable many of our clients to live here and retain their pride and dignity far longer than they could under any other circumstances.

In closing I urge you to consider the proposal set forth in our Resolution and to take such action as you find possible.

Their resolution would like to see this whole 25-percent limitation go out. I am not asking for that. I do wish that the committee would take the amendment to conference.

I am not unaware that it is late. It is a quarter to 7; Senators are engaged in activities elsewhere. They have no op-

portunity to hear what the opponents have to say about my amendment, or what I have to say.

Here is all it amounts to: We have enacted into law a provision that no one can be charged more than 25 percent of his income for rent in public housing. The situation is different in the small projects in rural cities, and I am asking that, in situations where a housing project is of less than 200 units, the decision as to whether or not to implement this limitation be left to the local housing authority.

What is wrong with having a local unit of government have something to say about this, when there is no possible way that they could make a decision adverse to the Government of the United States?

We are in a rather ridiculous light. We are saying to community after community, "You must take this subsidy," at a time when we are also saying, "Hold the line; support the President on a veto." At the present time, as I pointed out a bit ago, the national debt is $18 billion higher than it was a year ago.

Mr. President, if the committee will not accept the amendment, I shall ask for a rollcall. I feel so strongly about the injustices of this bill that I am convinced that there are millions of people in various categories all over this land who are living on less income than the occupants of public housing, and those people have a stake in the inflationary trends, while we go glibly by, voting billions and billions of dollars for additional subsidies every week.

That is what we have been doing. We raise the debt limit. We raise the competition for money. We raise the interest rates. We keep the fires of inflation going.

We owe something to the poor of this country who do not enjoy public housing, and never will.

Mr. President, I ask for the yeas and nays on my amendment.

The yeas and nays were ordered.

The PRESIDING OFFICER (Mr. GRAVEL). The question is on agreeing to the amendment of the Senator from Nebraska (Mr. CURTIS). On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. BYRD of West Virginia. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Indiana (Mr. BAYH), the Senator from Virginia (Mr. BYRD), the Senator from Mississippi (Mr. EASTLAND), the Senator from North Carolina (Mr. ERVIN), the Senator from Tennessee (Mr. GORE), the Senator from Indiana (Mr. HARTKE), the Senator from Iowa (Mr. HUGHES), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Louisiana (Mr. LONG), the Senator from Washington (Mr. MAGNUSON), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Wyoming (Mr. MCGEE), the Senator from New Mexico (Mr. MONTOYA), the Senator from Utah (Mr. Moss), the Senator from Maine (Mr. MUSKIE), the Senator from Rhode Island (Mr. PELL), the Senator from Georgia (Mr. RUSSELL), the Senator from Missouri (Mr. SYMINGTON), the Senator from Maryland (Mr. TYDINGS), and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

I further announce that, if present and voting, the Senator from Iowa (Mr. HUGHES), the Senator from Washington (Mr. MAGNUSON), the Senator from Maine (Mr. MUSKIE), the Senator from Missouri (Mr. SYMINGTON), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from North Carolina (Mr. ERVIN) would each vote "nay."

Mr. GRIFFIN. I announce that the Senators from Arizona (Mr. FANNIN and Mr. GOLDWATER), the Senator from California (Mr. MURPHY), the Senator from Oregon (Mr. PACKWOOD), the Senator from Illinois (Mr. SMITH), and the Senator from Pennsylvania (Mr. SCHWEIKER) are necessarily absent.

The Senator from Vermont (Mr. AIKEN) and the Senator from Oklahoma (Mr. BELLMON) are absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Kentucky (Mr. COOPER) and the Senator from Kansas (Mr. DOLE) are detained on official business.

If present and voting, the Senator from South Dakota (Mr. MUNDT) would vote "yea."

On this vote, the Senator from Kansas (Mr. DOLE) is paired with the Senator from California (Mr. MURPHY). If present and voting, the Senator from Kansas would vote "yea" and the Senator from California would vote "nay."

The result was announced—yeas 9, nays 59, as follows:

[No. 326 Leg.]

YEAS—9

So Mr. CURTIS' amendment was rejected.

Mr. EAGLETON. Mr. President, I want to commend the Banking and Currency Committee for including in the bill before us provision for additional Federal assistance to local mass transportation systems.

I had the privilege of appearing before the committee last spring during its hearings on the bills introduced by the Senator from New Jersey (Mr. WILLIAMS) and the Senator from Illinois (Mr. PERCY). At that time I outlined the problems facing public transportation in the two largest cities in my State—St. Louis and Kansas City. Both of these cities, as are so many others, are caught up in the operating deficit cycle where an increase in fares is followed by a decline in patronage, further deficits, and the necessity for an even higher fare.

Neither the State of Missouri nor local units of government now provide operating subsidies for public transportation in St. Louis and Kansas City. Therefore, these cities will not be immediately assisted by the provisions contained in this bill which require one-third matching from local sources.

I am hopeful, however, that the availability of this kind of assistance by the Federal Government will provide an incentive for local governments to make available matching funds.

By enacting the provisions contained in this bill, we recognize the financial plight of our urban public transportation systems and the desirability of providing Federal assistance on an emergency and interim basis to assure that these systems do not collapse.

Again, I commend the Senator from Alabama (Mr. SPARKMAN), the Senator from New Jersey, the Senator from Illinois, and the other members of the committee for their leadership in this effort to maintain essential urban transportation services.

Mr. CRANSTON. Mr. President, the Congress has committed itself unequivocally to the goal of decent homes for every American. While that goal is a dream for some, it has turned into a nightmare for others. It is a dream for those of us who believe that this country in the years ahead will funnel enough of its resources to meet the housing needs of its citizens. But the unfulfilled goal is a nightmare for those of our fellow Americans who must spend their days and nights in slums or in rural shacks.

Federal money now being spent on the Nation's housing needs is totally inadequate. If the housing goals set by the Congress in 1968 are to be met, the Congress must insist that spending levels for federally assisted housing programs are commensurate with the housing needs of the country. In short, more money is clearly needed for such programs as 235, 236 and for urban renewal.

Unfortunately, the administration has not exerted the necessary muscle to shake loose these funds. Quite to the contrary, the President's veto of the housing appropriations bill has had the effect of freezing funds for these vital programs.

Now we consider S. 4368, the Housing and Urban Development Act of 1970.

Potential homeowners are being squeezed by inadequate spending in the public sector and to make matters worse,

the state of the economy and the shortage of mortgage money, have made it almost impossible for urban and rural poor to find a decent place in which to live.

Not only the poor are suffering. It has become increasingly difficult for the medium income family to buy a suitable home. Even if a man and wife are both working and together can earn $10,000 per year, they are unable to afford a home in most areas of the country. Even families near the top of the economic ladder are finding it tough to purchase a home; those in the middle and those near the bottom, are finding it impossible.

It is totally unacceptable for the richest nation in the world to deny to a large segment of its citizenry the right to live in safe, decent housing.

I sponsored two amendments which are now a part of S. 4368 presently before the Senate. Both amendments will make it easier for low- and moderate-income families to get decent homes.

The first amendment deals with the popular and successful 235 homeownership program. Under that program, the Government pays all but 1 percent of the interest on the home mortgage of a qualified purchaser. Homes may be purchased with no more than $200 down, and the Government interest subsidy keeps monthly payments low.

Several weeks ago, Congressman WRIGHT PATMAN revealed that certain speculators were selling substandard homes at tremendous profits under this program. Many of the homes had unreliable electrical systems, no running water, and leaky roofs. A Government program designed to help people was being used instead to saddle them with old dilapidated houses.

I have proposed that HUD may compensate a buyer of a 235 home for the correction of any latent or structural defect that a competent appraiser should have detected, and which affects the use or livability of his home. I believe this amendment will cut to a minimum the number of homes in poor repair being sold under section 235.

The other amendment will assist families who do not qualify for Government subsidies to get decent homes. These families include many young couples with good salaries who also find it impossible to purchase a home in today's housing market.

A big obstacle facing these couples is their inability to come up with the necessary cash for a downpayment. Since the price of the average house has increased drastically in the last couple of years, the required downpayment also has increased.

Last year I introduced legislation which was signed into law which lowered the downpayment required on an FHA-approved mortgage. It was expected that with lower downpayments, an increased number of young couples would be able to purchase homes.

But since last year, home prices have been on a steady increase, due to inflation.

The administration recognized this problem in submitting its housing package to the Congress. Under the administration proposal, no downpayment would be required on a $20,000 mortgage; 10 percent on any amount between $20,000 and $25,000, and 20 percent on all over $25,000.

I favor the administration's proposal to drastically reduce downpayments, and I am disappointed that the administration did not push it more vigorously. Without stronger administration efforts, the proposal had little or no chance of being reported out of the Banking and Currency Committee. Thus, I decided to introduce my own proposal. Though my amendment is more modest than the administration's plan, it will nonetheless provide significant relief to the middle-income home buyer.

Under the amendment, adopted by the committee, the buyer would be required to pay 2 percent down on the first $15,000 of an approved mortgage or $300; 10 percent on the next $15,000, and 20 percent on all over $30,000. Under the present law, a person buying a $30,000 home would need a downpayment of $2,450. Under the amendment, he could buy the same home with $1,800 cash.

I believe that these two provisions along with the other provisions contained in S. 4368 deserve your support. Hopefully, the Congress will pass this much needed legislation and in the very near future send it to the President for his signature.

UNANIMOUS-CONSENT AGREEMENT

Mr. BYRD of West Virginia. Mr. President, at the request of the able majority leader, I propound the following unanimous-consent request:

Mr. President, I ask unanimous consent that during further consideration of the bill, debate on any amendment, motion, or appeal, with the exception of a motion to lay on the table, be limited to 30 minutes, the time to be equally divided between the mover of the amendment and the manager of the bill, with two exceptions; one exception being the amendment which will be offered by the Senator from New York (Mr. JAVITS) on the United Nations Development Corporation, to be limited to 1 hour, to be equally divided between the Senator from New York (Mr. JAVITS) and the manager of the bill, and the other exception being the remaining amendments to be offered by the Senator from Nebraska (Mr. CURTIS); and that time on the bill be limited to 1 hour, to be equally divided between the manager of the bill and the ranking minority member, the Senator from Texas (Mr. TOWER).

Mr. JAVITS Mr. President, will the Senator from West Virginia yield?

Mr. BYRD of West Virginia. I yield.

Mr. JAVITS. Two things. One, I think we should provide for amendments to amendments.

Mr. BYRD of West Virginia. That has been done.

Mr. JAVITS. The Senator did not say that.

Mr. BYRD of West Virginia. Yes, when I said "any amendment, motion, or appeal."

Mr. JAVITS. All right. Are we to understand, then, that there is no limitation on the Curtis amendments?

Mr. BYRD of West Virginia. That is correct.

Mr. JAVITS. No time limitation on those amendments?

Mr. BYRD of West Virginia. That is correct.

Mr. JAVITS. We would like it, if the Senator would be kind enough to indulge us all, because we are all loaded down with work, if he could give us a little idea as to whether we can or cannot finish the bill tonight. The Senator is more than within his rights, but it would be nice if we could all know.

Mr. BYRD of West Virginia. In response to the Senator from New York, the able and distinguished majority leader has just indicated that we are going to try to finish the bill tonight. The Senator from Nebraska (Mr. CURTIS), maybe a little later, would agree to the time limitation on his amendments but, at the moment, this is the best we can do.

The PRESIDING OFFICER (Mr. GRAVEL). Is there objection to the request of the Senator from West Virginia? The Chair hears none, and it is so ordered.

Mr. PERCY. Mr. President, will the Senator from Alabama yield me 5 minutes on the bill?

Mr. SPARKMAN. I yield 5 minutes on the bill to the Senator from Illinois.

The PRESIDING OFFICER. The Senator from Illinois is recognized for 5 minutes.

Mr. HANSEN. Mr. President, will the Senator from Illinois yield to me?

Mr. PERCY. I am happy to yield to the Senator from Wyoming.

---

## DEATH OF JUDGE J. J. "JOE" HICKEY, FORMER MEMBER OF THE SENATE FROM WYOMING

Mr. HANSEN. Mr. President, it saddens me to take the floor of the Senate today to express the sorrow of the people of the State of Wyoming and, indeed, of the entire Nation on the death of Judge J. J. "Joe" Hickey, a former Member of the Senate.

Judge Hickey was one of Wyoming's outstanding sons, and I know that my grief is shared by the Members of this body who served in the Senate at the same time as Joe Hickey.

Joe Hickey was a native son of Wyoming, born in Rawlins 59 years ago. Following his graduation from the University of Wyoming College of Law, he began the practice of law in his hometown where he also began his public service as city treasurer and as county prosecuting attorney.

Joe Hickey then moved to Cheyenne, the State capital, and served as U.S. attorney for the State of Wyoming and conducted a very successful law practice.

In 1959, Joe Hickey assumed the office of Governor of the State of Wyoming. During this time, I had the opportunity to work very closely with Joe Hickey. He was Governor of the State, and I was president of the Board of Trustees of the University of Wyoming. The leadership which he gave to the

State and his devotion to and interest in the university benefited all the people of our State. The knowledge I gained from this association with Joe Hickey was later to be of great help to me when I assumed the office of Governor of Wyoming in 1963 and continues to aid me in my duties as a Senator.

In 1962, Joe Hickey resigned the governorship and was appointed to represent Wyoming in the U.S. Senate. He served in this body with distinction. The people of Wyoming benefited from his hard work and his attention to their problems.

Joe Hickey's public service did not end when he left the Senate in 1962. After a short period of time in the private practice of law, his country called again on Joe Hickey and the President appointed him a judge on the U.S. 10th Circuit Court of Appeals.

It is a great tribute to the outstanding qualities and superlative ability of this man that he served efficiently and effectively in the highest offices of all three branches of government: the legislative, the executive, and the judiciary.

The death of J. J. Hickey in Cheyenne on Tuesday, September 22, casts a shadow across the State of Wyoming. He was held in high esteem by all who knew him. He was an outstanding man and a faithful public servant. All of us who had the privilege of knowing and working with him gained from that relationship.

I know all of my colleagues join my wife, Martha, and me in extending our condolences to his wife, Winifred, and their sons, John and Paul.

Mr. MANSFIELD. Mr. President, I join my distinguished colleague from Wyoming in expressing my deep regret and sadness at the passing of "Joe" Hickey, who served here with such distinction and integrity, and who served before that as Governor of Wyoming, as did the Senator from Wyoming (Mr. HANSEN).

I know that I can speak for all Democrats who knew "Joe" Hickey, and for all of us in the Rocky Mountain region, in expressing our sorrow at his passing.

May I, on behalf of my family, send my sympathy to Mrs. Hickey and the family, and express the hope that his soul will rest in peace.

Mr. HANSEN. I thank the distinguished majority leader.

Mr. YARBOROUGH. Mr. President, will the Senator from Illinois yield to me for a unanimous-consent request?

Mr. PERCY. I am happy to yield to the Senator from Texas for that purpose.

---

## REREFERRAL OF AMERICAN FOLK LIFE FOUNDATION BILL

Mr. YARBOROUGH. Mr. President, I ask unanimous consent that on the reporting of S. 1591, the American Folk Life Foundation bill, from the Committee on Labor and Public Welfare, it be immediately rereferred to the Committee on Rules and Administration.

The PRESIDING OFFICER (Mr. GRAVEL). Without objection, the bill will be rereferred to the Committee on Rules and Administration.

## HOUSING AND URBAN DEVELOPMENT ACT OF 1970

The Senate continued with the consideration of the bill (S. 4368) to extend and amend laws relating to housing and urban development, and for other purposes.

Mr. PERCY. Mr. President, I wish, first, to commend the distinguished chairman of the Committee on Banking and Currency, the Senator from Alabama (Mr. SPARKMAN), and the ranking minority member, the distinguished Senator from Utah (Mr. BENNETT), for once again leading the committee in putting together an outstanding housing bill.

The ranking minority member on the Housing and Urban Affairs Subcommittee, the Senator from Texas (Mr. TOWER), has once again been in the forefront of this issue. Although he is looked upon as a conservative, and he is a conservative, he has always demonstrated his deep and full understanding of the needs of the people and his responsiveness to those needs as is exemplified in this bill.

The pending bill was looked upon as being virtually noncontroversial. The committee did not intend that a great many controversial issues be raised this year. However, it contains some interesting and beneficial provisions with respect to mass transportation, with respect to mortgage credit, public housing, urban renewal, model cities, and for the first time, we provide crime insurance for small businessmen.

Mr. President, I have had the privilege of working closely with the Senator from New Jersey (Mr. WILLIAMS) on the mass transit end of the bill. He is a distinguished colleague of ours who understands and knows the needs of the people in the urban areas and their need for safe, efficient, low cost transportation.

Because of his absence today on business, and his inability now to be in the Chamber to make his statement, I ask unanimous consent that it be printed in the RECORD at this point.

There being no objection, the statement of Senator WILLIAMS of New Jersey was ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR WILLIAMS OF NEW JERSEY

Mr. President, Title 8 of the Housing and Urban Development Act of 1970 would provide operating subsidies on an interim basis to state and local governments to assure adequate mass transportation in urban areas. It would also provide for emergency grants to state and local bodies for the purpose of helping mass transit systems pay interest charges and other annual obligations which have been incurred in order to provide essential services.

Over the past decade our mass transit systems have incurred ever increasing operating deficits which have required fare increases for which the harried rider has received no benefits either in improved services or better equipment.

S. 3154, the Urban Mass Transportation Assistance Act, which passed the Senate in February by an 82 to 4 vote provides long range answers to our nation's urban transit crisis.

It is a program intended to provide long range benefits.

It will build carefully planned programs of capital improvements for our nation's transit systems over the next 10 years. However, such programs will take time as they properly should. A modern transit system such as the one in San Francisco or the one planned for Washington, D.C. takes at least 10 years from the initial exploratory steps to final completion. And, while the first steps are being taken toward building these transit systems of the future, today's commuters are faced with today's problems.

But one fact is crystal clear—adequate mass transportation facilities are an immediate, absolute necessity for America's millions of commuters. Existing commuter services must be kept in operation until the large sums of money contemplated in S. 3154 begin to flow to state and local mass transportation agencies.

Commuter railroads such as the Jersey Central, the Long Island Railroad and the Pennsylvania Railroad go further and further into debt each year. The result is bankruptcy and a curtailment of existing services. Deteriorating equipment is not replaced.

At the present time the burden of maintaining these essential commuter services fall entirely upon the taxpayers of the States. These taxpayers cannot afford to carry the burden alone.

Over the last 10 years, New Jersey has paid out $31 million to the Jersey Central in operating subsidies. During the years 1967 to 1969, Massachusetts has paid operating subsidies in the amount of $12 million to commuter railroads. Connecticut between 1965–1969 provided the New Haven Railroad with $3 million per year and in 1970 gave the Pennsylvania Railroad a $7 million exemption from State taxation. In 1970, New York provided an operating subsidy of $16.3 million for the Long Island Railroad and Pennsylvania has paid out almost $6 million a year for the past 4 years to the Reading and Penn-Central Railroads.

Obviously the situation has become critical. The Penn-Central and the Jersey-Central are bankrupt. The State of New York owns the Long Island Railroad and Massachusetts has taken over the operation of the commuter lines formally serviced by the Boston and Maine. Recently there even was a question as to whether or not the Jersey-Central could meet its payroll. The legislation before us today would prevent these crises from occurring. Under Title 8 funds for operating subsidies would be made available on a 5 year emergency basis to all forms of mass transportation. They would be channelled to state and other public bodies.

Before approving the grant which would be made on a 2/3rds Federal 1/3rd local matching formula, the Secretary of Transportation would have to determine that the service was essential to the community. In addition, the state or public body applying for the grant along with the transit company involved must submit a plan to the Secretary setting forth a program for capital improvements which would be undertaken for the purpose of providing more efficient and economic commuter service and for placing the commuter operations of the system on a sound financial basis. These safeguards would guard against windfall profits by private promoters and provide adequate insurance that the operating subsidy will not pay for existing inefficiency and poor service.

While operating subsidies do not build new facilities or buy desperately needed new equipment in these instances a blood transfusion is called upon before curative surgery can be performed.

Given the current state of our nation's mass transit systems such a temporary transfusion as contained in this legislation is necessary.

Transportation systems are too vital a part of the continued healthy growth of urban

centers for their future operations to be governed solely by balance sheet considerations. Profitability and return on investment cannot and must not outweigh the social dividends which all of our citizens receive from good public transportation. Therefore, I strongly urge your support not only of the operating subsidy provisions contained in this title, but of the emergency grant provisions to pay interest charges and other annual obligations which have been incurred by transit systems in order to provide essential services.

Such grants would be made only when the debt burden threatens the curtailment of needed commuter services or would increase fares to such a degree that low income groups who use the service are unfairly penalized.

An increase in transit fares or a curtailment of transit service works undue hardships on citizens earning less than $4,000 a year. As industry and business move to the suburbs, the tragic isolation of the inner city ghetto increases. Here is the most pressing need for low cost, efficient mass transit systems to take people to the jobs they so desperately demand. An increase in transit fares or a curtailment of service works undue hardships on these citizens.

The debt service provisions of this legislation would allow transit lines to continue to provide their essential services without the fare increases which all too frequently penalize the inner city dweller.

If existing commuter lines are allowed to collapse from financial weakness, severe hardships will result. The thousands of commuters who depend on these services to get them to and from work will be left stranded. And, in addition, these commuter lines will be far more costly to rebuild in the future than to preserve today.

Mr. President, Title 8 of the Housing and Urban Development Act is an absolute necessity if we are to provide short term Federal assistance to our nation's struggling transit systems. Action is imperative if we are to preserve these systems while we are at the same time fulfilling tomorrow's transit needs.

Another major provision in the 1970 Housing bill is my proposal to provide food services for elderly persons in public housing.

Today many aged individuals are forced to leave their homes and move into nursing homes—not because they are ill but simply because they are unable to move around well enough to shop for food or to cook for themselves.

Many potential applicants for public housing fail to qualify for this very reason.

Yet, most older persons would prefer to live in their own housing if at all possible.

This potentially far-reaching measure will make it easier for low-income individuals to live in a home, rather than a nursing home.

It will do this by broadening public housing coverage to include central dining facilities for the elderly poor.

With these facilities, it will now be possible for public housing officials to serve low-cost, hot meals to older Americans.

For these needy persons, this can also provide a new alternative to unnecessary institutionalization.

Moreover, with this innovative approach we can be more confident that more urgently needed housing for the elderly will be built—not merely to store them—but to restore them to an active life in their community.

Mr. President, in conclusion the Housing and Urban Development Act of 1970 also contains many beneficial provisions relating to mortgage credit, public housing, urban renewal, model cities and for the first time would provide crime insurance for our nation's small businessmen. This legislation is a necessity and I wholeheartedly urge its prompt enactment.

Mr. PERCY. Mr. President, the Senator from New Jersey (Mr. WILLIAMS) has addressed himself to the importance of urban mass transportation. What the bill has done is to take an innovative and creative step that should be given the full attention that it deserves. The time for taking action to improve mass transportation and urban incentives is now. We face a possible crisis not only in Washington, D.C., which we all know about, but in many other cities across the country.

We have heard, at a time of great need and of deep concern about the quality of our environment, when our mass transportation systems are failing, how our country and its citizens could be placed in great jeopardy.

Mr. President, we have also heard, over and over again, that mass transportation is needed to deal with poverty and unemployment and to improve the quality of urban life and of our environment. An adequate mass transportation system would enable the unemployed to move about and have a better opportunity to seek employment. The antipollution features of mass transportation are apparent to all of us. But, up until now, we have done very little. We have an incongruous situation, where we have a highway trust fund which has a $2 billion surplus in it, but we have mass transportation systems which are starving for assistance and help.

The pending bill would help keep the transit wheels of our buses, streetcars, and commuter trains rolling. It would prevent the reduction of critically needed transportation services in the cities by providing emergency help.

These emergency grants, which will require at least a one-third local contribution, would be provided to State and local public bodies, to enable them to assist local transportation companies to pay for outstanding indebtedness and operating deficits incurred while maintaining service. A total of $750 million is authorized for this assistance in the period 1971 to 1975.

This includes an amendment which I had the privilege of offering in committee, which would make grants for mass transit to pay indebtedness up to $75 million a year for 5 years. Also an amendment offered by the distinguished and able Senator from New Jersey (Mr. WILLIAMS), which would enable grants to cover operating deficits up to $75 million per year for a period of 5 years.

The committee, in reporting the bill, chose to act to meet the emergency need while, at the same time, calling for the prompt study and development of a more permanent and comprehensive program, to insure provision of essential transportation services in our rapidly growing urban areas.

Once again, Mr. President, I wish to commend the committee which found that immediate and substantial Federal assistance for urban mass transit systems is necessary now, and it has acted.

I know that in my State of Illinois, which is typical of many others, we have a mass transportation system in Chicago which has a deficit of $25 million this year. If that system should fail, we would have to build automobile highways 50 lanes wide in order to get the people to the "Loop" at night and to get them to work in the morning.

Mr. President, the pending bill is also necessary and urgently needed for smaller communities where bus lines are failing. The pending bill will enable us to take proper and appropriate action.

Mr. GOODELL. Mr. President, I send an amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

On page 40 insert the following new section after line 16.

DEMONSTRATIONS WITH RESPECT TO ABANDONED PROPERTIES

"Section 505 (a) In carrying out activities under Section 501, the Secretary shall undertake programs to demonstrate the most feasible means of providing assistance to localities in which a substantial number of structures are abandoned or are threatened with abandonment for the purpose of arresting the process of housing abandonment in its incipiency or in restoring viability to blighted areas in which abandonment is pervasive. For this purpose, the Secretary is authorized to make grants, subject to the limitations of this section, to assist local public bodies in planning and implementing demonstration projects for prompt and effective action in alleviating and preventing such abandonment in designated demonstration areas.

"(b) In administering this section, the Secretary shall give preference to those demonstration projects which in his judgment can reasonably be expected to arrest the process of abandonment in the demonstration area within a period of two years and which provide for innovative approaches to combating the problem of housing abandonment. Such projects may include, but shall not be limited to (1) acquisition by negotiated purchase, lease, receivership, tax lien proceedings, or other means authorized by law and satisfactory to the Secretary, of real property within the demonstration area or areas which is abandoned, deteriorated, or in violation of applicable code standards; (2) the repair of streets, sidewalks, parks, playground, publicly owned utilities, public buildings to meet needs consistent with the revitalization and continued use of the area; (3) the demolition of structures determined to be structurally unsound or unfit for human habitation of which contribute adversely to the physical or social environment of the locality involved; (4) the establishment of recreational or community facilities including public playgrounds; (5) the improvement of garbage and trash collection, street cleaning and other essential services necessary to the revitalization and maintenance of the area; (6) the rehabilitation of privately and publicly owned real property by the locality; and (7) the establishment and operation of locally controlled, nonprofit housing management corporations, municipal repair programs.

Subject to such conditions as the Secretary may prescribe, real property held as part of a project assisted under this Act may be available to (1) a limited dividend corporation, nonprofit corporation, or association, cooperative or public body or agency, or other approved purchaser or lessee, or (2) a purchaser who would be eligible for a mortgage insured under section 221 (d) (3) or (d) (4), section 221 (h) (1), section 235 (i) or (j) (1), or section 236 of the National Housing Act, for purchase or lease at fair value for use by such purchaser or

lessee, as, or in the provision of, new or rehabiliated housing for occupancy by families or individuals of low or moderate income.

"(d) Grants under this section shall be in amounts which do not exceed 90 per centum of the net project cost as determined by the Secretary. There are authorized to be appropriated for demonstration grants under this section not to exceed $25,000,000 for the fiscal year ending June 30, 1971. Any amounts appropriated shall remain available until expended in amounts authorized but not appropriated may be appropriated for any succeeding fiscal year commencing prior to July 1, 1972. Not more than one-third of the aggregate amount of grants made in any fiscal year under this section shall be made with respect to projects undertaken by one locality.

"(e) The provisions of sections 106, 114 and 115 of Title I of the Housing Act of 1949, and section 312 of the Housing Act of 1964, shall apply to projects assisted under this Act as if such projects were being carried out in urban renewal areas as part of urban renewal projects within the meaning of section 110 of the Housing Act of 1949.

"(f) The Secretary shall report annually to the Congress with respect to the status of demonstration projects funded by him and shall make such recommendations to the Congress as he deems necessary to further the purposes of this section.

"(g) Section 221(d)(3)(iii) of the National Housing Act is amended by striking out the comma in the second proviso after the words "Housing Act of 1949" and inserting in lieu thereof "or by a public body with Federal financial assistance pursuant to the Abandoned Properties Act of 1970".

Mr. GOODELL. Mr. President, the amendment is a compromise of the proposals that were made before our full committee to deal with the problem of housing abandonment—a problem that has reached crisis proportions in many of the cities of this Nation. It certainly has reached crisis proportions in New York City.

The amendment would affect many other cities of our Nation. The amendment I offer is cosponsored by the Senator from Massachusetts (Mr. BROOKE) and the senior Senator from New York (Mr. JAVITS). It is a compromise. We had testimony before our committee concerning the desperate need for some kind of a program to deal with individual houses that were abandoned on a block under circumstances where money was not available—for whatever reason—under urban renewal or other Federal programs to cope with the problem.

When a house is abandoned on a block, rats infest it. Derelicts come in to live there. Addicts come in and live there. It becomes a major fire hazard because of the addicts heating their equipment to use heroin.

It becomes a serious problem in terms of deterioration with respect to the entire neighborhood.

I think that most of my colleagues are well aware of this tremendous problem. We have talked about it in the committee. I think that we have essential agreement in the committee with reference to this compromise language.

I proposed in my testimony a major emergency approach with an authorization of $300 million. I think that amount of money is conservative if we are going to arrest the trend of abandoned housing, particularly in our major cities.

I do not want this session to pass without our getting underway with a program to demonstrate effective results in arresting the decay of our cities, particularly as evidenced by abandoned housing.

I am offering this amendment which would set up a demonstration research type of program in the research technology division of HUD. It involves a total authorization of $25 million. It would enable HUD to move forward and experiment with a whole variety of flexible tools in trying to cope with the abandonment problem.

The problem of housing abandonment has reached crises proportions in many of the cities of this Nation.

THE PROCESS OF ABANDONMENT

The process of abandonment usually begins in an outdated structure in a slum neighborhood. Because of its obsolescence, it is difficult and expensive to maintain in proper order. Because of the low income of its tenants, its rental yield is limited.

The landlord tries to keep costs down by skimping on repairs. This, however, only accelerates the vicious cycle. Because of lack of repairs, the building deteriorates faster. Because of the deterioration, it can be rented to none but the most indigent. Because of the impoverishment of the tenants, the prospects of an adequate and steady return on the investment diminishes.

Eventually, the landlord finds himself faced with a losing proposition—where the costs of operating the building exceed the rental income. No one else wants to buy the building—or even take it over free. Finally, the landlord simply walks away, unwilling to pay the taxes, make the repairs or bear the operating costs.

The following week, the superintendent is not paid and he quits. There is no more heat for the building. Other utilities and services give out, one by one.

For a time, the tenants may try to unite and organize to manage the building themselves. Too soon they discover that—because they lack legal title to the building—they can obtain fuel or supplies only for cash. Cash is one commodity they do not have.

The exodus begins. Those who can afford to do so, leave for more decent housing. The poorest try to remain in the unheated and untended structure, boarding up the vacant apartments to keep out squatters.

Then, the vandals arrive. Addicts and teenage gangs tear off the boards and take over the vacant apartments. They start stripping the building of all amenities which have a resale value such as the plumbing fixtures, pipes and copper tubing. In less than a week the building becomes unfit for human habitation. The remaining families flee, now in fear of their lives.

The abandonment of the building unmistakably points the direction in which the block is going—down. No one wants to invest in the neighborhood any more. People begin to look for homes elsewhere.

The gutted shell remains, a hostel for heroin users and criminals. They terrorize the neighborhood, and speed the departure of all but the poorest tenants in adjacent apartments. These structures, in turn, become prey to abandonment.

Whole blocks eventually empty and remain vacant for years, a symbol of urban decay at its worst.

DIMENSIONS OF THE PROBLEM

Abandonment was once thought of as a special New York City problem. It now infects cities throughout the Nation. The statistics are staggering. Over 130,000 apartments have been abandoned in New York City since 1965. In Philadelphia, 20,000 buildings have been abandoned; 7,500 in Houston; 5,000 in Baltimore; 1,500 in Detroit; 1,000 each in Boston and Washington; 950 in Chicago; 900 in New Orleans.

In many cities, there is a net loss of housing units. In New York for example, the casualties to the existing housing supply far exceed the number of new housing starts. The net loss is 21,000 units annually, despite the initial housing shortage the city is facing.

Moreover, the pace of abandonment is accelerating. In New York City, for example, 15,000 units were abandoned between 1960 and 1964. In the period between 1965 and 1967, the number jumped to 37,900—more than double the previous figure. The same phenomenon has occurred in Boston.

Until now, our housing programs have focused almost exclusively upon new construction. It is imperative, however, that we preserve our stock of structurally sound existing housing from the blight of abandonment.

CONGRESSIONAL RESPONSE

The Department of Housing and Urban Development has begun studies to determine the causes of housing abandonment. I felt strongly, however, that Congress should enact emergency legislation to attack the problem.

To achieve this objective, I introduced this August the Emergency Abandonment Assistance Act (S. 4180). This bill provides emergency urban renewal funds for the acquisition and rehabilitation of abandoned or about-to-be abandoned buildings.

Instead of the conventional tract-clearance type of urban renewal, the program would operate selectively—pinpointing potential abandonment sites anywhere in the municipality. The program thus can arrest the process of abandonment within neighborhoods in its early stages, before large areas have been affected.

The new program would also introduce an element of speed and urgency—by requiring that work undertaken be completed within 2 years and by eliminating the elaborate and time-consuming planning requirements of conventional urban renewal.

A significant advantage of the program is that it can alter the deficit economics that lead to abandonment in the first place. It accomplishes this by using the "writedown" technique of urban renewal—namely, that of making the prop-

erty available for redevelopment at substantially below acquisition costs, and having the Federal Government pay most of the difference. This "writedown" feature would permit the property to be rehabilitated at reduced cost; this reduced cost means smaller mortgage payments; and smaller mortgage payments mean operating costs that are brought into line with rental income.

A second bill of mine—the Housing Management Services Act (S. 4181)—is designed to alleviate another problem that has been associated with abandonment and blight: the lack of skilled housing management services in low-income areas.

One reason that developers have been unwilling to invest in low-income areas is that—while they can obtain a return from building or rehabilitating properties—they do not wish to assume the risks and administrative burdens of managing their properties.

My proposal would seek to remedy this by providing Federal grants to local, nonprofit management corporations, known as "housing management administrations"—HMA's.

The HMA would provide the sort of services that private management corporations provide for higher-income apartments. These would include bookkeeping, collection of rents, hiring of building staff, screening of prospective tenants, and the purchase of supplies and payment of expenses on a reimbursed basis. Because of the Federal subsidy—and also because of economies of scale in providing these services in comparatively a large area—the fees for these management services could be kept at a minimum.

This management service program could be well integrated with the emergency abandonment assistance program I have earlier described. Abandoned sites could be acquired, written down and sold to a developer for rehabilitation. Once rehabilitated, the management could be turned over to an HMA. This would eliminate a serious obstacle for the developer—his unwillingness to assume the risk and burden of the continuing management function. Alternatively, the property could be conveyed to the tenants as a cooperative or condominium, and the management assigned to the HMA. This would eliminate a serious obstacle to the transfer of ownership to the tenants—their lack of experience and skill in management.

My distinguished colleague from Massachusetts (Mr. BROOKE) introduced S. 4087, the Abandoned Properties and Neighborhoods Act of 1970.

This bill would establish a new program—with a $200 million authorization—available to localities to undertake programs of assistance in those neighborhoods in which it is determined that a substantial number of properties have been or may be abandoned. These Federal funds would be available for such programs as improving city-owned property, repairing streets, sidewalks, and utilities, demolition, the improvement of services and the establishment of new recreational or community facilities.
